(2) (i) An individual shall not be deemed subjected to discrimination if refused services by a recipient because his/her legal problem does not come within the recipient's priorities established pursuant to § 1620. Further, an individual shall not be deemed subject to discrimination by reasons of his/her exclusion from the benefits of a program limited by Federal law to individuals with a handicap or race, color, sex, national origin, or age group, not his/her own or from the benefits of a program specifically designed to address legal issues concerning a particular status not shared by the individual.

(ii) A recipient shall not be deemed to have discriminated in determining the site or location of facilities, unless selection was made with the purpose of excluding individuals from, denying them the benefits of, or subjecting them to discrimination under any program on the grounds of race, color, sex, religion, national origin, political affiliation, sexual orientation, age or handicap or with the purpose of substantially impairing the accomplishment of the objectives of this part.

(c) A recipient shall conduct its programs and activities so that, when viewed in their entirety, they are readily accessible to and usable by handicapped persons. This paragraph does not necessarily require a recipient to make each of its existing facilities or every part of an existing facility accessible to and usable by handicapped persons, or require a recipient to make structural changes in existing facilities when other methods are effective in achieving compliance. In choosing among available methods for meeting the requirements of this paragraph, a recipient shall give priority to those methods that offer legal services to handicapped persons in the most integrated setting appropriate.

(d) A recipient shall, to the maximum extent feasible, insure that new facilities it rents or purchases are accessible to handicapped persons. Prior to entering into any lease or contract for the purchase of a building, a recipient shall submit a statement to the regional office or other appropriate Corporation official certifying that the facilities covered by the lease or contract will be accessible to handicapped persons, or if the facilities will not be accessible, a detailed description of the efforts the program made to obtain accessible space, the reasons why the inaccessible facility was nevertheless selected, and the specific steps that will be taken by the recipient to insure that its services are accessible to handicapped persons who would otherwise use that facility. After a statement certifying facility accessibility has been submitted, additional statements need not be resubmitted with respect to the same facility, unless substantial changes have been made in the facility that affect its accessibility.

(e) A recipient shall ensure that new facilities designed or constructed for it are readily accessible to and usable by handicapped persons. Alterations to existing facilities shall, to the maximum extent feasible, be designed and constructed to make the altered facilities readily accessible to and usable by handicapped persons.

§ 1624.6 Discrimination prohibited—Employment practices

(a) No recipient to which this part applies shall directly or through contractual or other arrangements subject any person to discrimination in employment on the grounds of race, religion, color, sex, age, marital status, national origin, handicap, political affiliation or sexual orientation.

(b) A recipient shall make all decisions concerning employment in a manner insuring that discrimination on the basis of race, religion, color, sex, age, marital status, national origin, handicap, political affiliation or sexual orientation does not occur in the terms, conditions or privileges of employment.

(c) A recipient may not participate in any contractual or other relationship with persons, agencies, organizations or other entities, such as, but not limited to, employment and referral agencies, labor unions, organizations providing or administering fringe benefits to employees of the recipient, and organizations providing training and apprenticeship programs, if the practices of such person, agency, organization or other entity have the effect of subjecting qualified applicants or employees to discrimination on any of the bases enumerated in this subpart.

(d) A recipient program shall make reasonable accommodation to the known physical or mental limitations of an otherwise qualified handicapped applicant or employee unless the accommodation would impose an undue hardship on the operation of the program.

(1) For purposes of this paragraph (d), reasonable accommodation may include (i) making facilities used by employees readily accessible to and usable by handicapped persons, and (ii) job restructuring, part-time or modified work schedules, acquisition or modification of equipment or devices, the provision of readers or interpreters, and other similar actions.

(2) In determining whether an accommodation would impose an undue hardship on the operation of a recipient, factors to be considered include, but are not limited to, the overall size of the recipient's program with respect to number of employees, number and type of facilities, and size of budget, and the nature and costs of the accommodation needed.

(3) A recipient may not deny any employment opportunity to a qualified handicapped employee or applicant if the basis for the denial is a need to make reasonable accommodation to the physical or mental limitations of the employee or applicant.

(e) A recipient may not use employment tests or criteria that discriminate against handicapped persons, and shall insure that employment tests are adapted for use by persons who have handicaps that impair sensory, manual or speaking skills.

(f) A recipient may not conduct a pre-employment medical examination or make a pre-employment inquiry as to whether an applicant is a handicapped person or as to the nature or severity of a handicap except where the examination or inquiry is related to an essential job function.

(g) A recipient shall post a notice in a prominent place in each of its offices stating that it does not discriminate on any of the bases enumerated in this subpart.

(h) Any recruitment materials published or used by a recipient shall include a statement that the recipient does not discriminate.

Subpart C—Required recipient civil right program

§ 1624.7 Assurance

(a) Every application for financial assistance submitted under the Legal Services Corporation Act shall contain the assurance that the program will comply with this part.

§ 1624.8 Data and information requirements

(a) Each recipient shall collect, maintain and, upon request of the Corporation, submit the information set forth in this subpart. All information set forth in this subpart shall be collected unless the Director of the Corporation's Office of Equal Opportunity or his/her designee grants a written exemption to any information requirement for good cause shown by the recipient.

(b) Each recipient shall collect and maintain the following information:

(1) All information required by the Corporation in its instructions to recipients titled Application for Refunding:

(2) Data regarding employment including: (i) the number, race, sex and national origin of applicants for employment; (ii) relevant work force availability data by race, sex and national origin; (iii) staff composition by race, sex and national origin; (iv) the use or planned use of bilingual staff to provide equal access to legal services for members of minority language groups and (v) documentation of all recruitment efforts made in filling program vacancies; and

(3) A log of complaints under this part identifying the nature of the complaint, the date the complaint was filed, the date the recipient's investigation was completed and the disposition and date of the disposition.

(c) Each recipient shall permit access by the Corporation during normal business hours to its books, records, accounts, and other sources of information as may be pertinent to ascertain compliance with this part, except where such information would violate client confidentiality.

§ 1624.9 Required recipient civil rights program—delivery of services

(a) Recipients shall provide equal access to legal services to eligible clients regardless of race, religion, color, sex, age, national origin, handicap, political affiliation or sexual orientation and shall adopt:

(1) a written policy of equal access to services and equal employment opportunity and

(2) a written procedure for the uniform handling of complaints of discrimination approved by the Regional Office or Research Institute.

(b) A recipient shall designate a person to be responsible for monitoring each aspect of its civil rights program and an employee to assist persons alleging discrimination who shall be someone not responsible for the recipient's personnel decisions.

(1) This employee shall (i) be available to provide aggrieved persons with assistance in processing claims of discrimination, (ii) have the authority to review the underlying facts of such complaints and (iii) when requested by the complainant, shall seek to conciliate the complaint. This employee shall not be deemed to represent the complainant.

(2) In cases of claims of discrimination in the delivery of services where conciliation is not possible, the complainant shall be afforded all rights under the recipient's client grievance procedure adopted pursuant to § 1621.

(c) To insure that language minority persons have equal access to legal services, in any area where five percent of the eligible population are members of a minority language group, a recipient shall take the following steps:

(1) Employ persons who are bilingual in English and in the appropriate minority language in public contact positions in numbers sufficient in to accommodate the needs of the client community;

(2) Place bilingual employees in job categories where necessary to promote equal access to legal services including but not limited to clerical positions where it is necessary to translate materials into a minority language, attorney positions, paralegal positions, investigator positions and other positions which involve client contact and the direct provision of services;

(3) Provide informational literature, forms, notices, letters and other materials available to English-speaking clients in appropriate minority language(s).

(4) Conspicuously post signs in the appropriate minority language(s) stating that clients may request and receive services in those languages.

(d) Where a receipt serves an area where members of minority language groups comprise less than five percent of the eligible population, the recipient shall take all steps necessary to develop an appropriate capability for communicating with minority language clients or potential clients and shall make reasonable effort to comply with (c) (1)–(4) of this subpart.

(e) (1) A recipient that employs a total of 15 or more persons, regardless of whether such persons are employed at one or more locations, shall provide, when necessary, appropriate auxiliary aids to persons with impaired sensory, manual or speaking skills, in order to afford such persons an equal opportunity to benefit from the recipient's services. A recipient is not required to maintain such aids at all times, provided they can be obtained on reasonable notice.

(2) The Corporation may require a recipient with fewer than 15 employees to provide auxiliary aids where the provision of such aids would not significantly impair the ability of the recipient to provide its services.

(3) Auxiliary aids include, but are not limited to, brailled and taped material, interpreters, telecommunications equipment for the deaf, and other aids for persons with impaired hearing, speech or vision.

(f) A recipient shall take reasonable steps to insure that communications with its applicants, employees, and beneficiaries are available to persons with impaired vision and hearing.

§ 1624.10 Required recipient civil rights program—employment

(a) Recipients shall use the structure set out in § 1624.9(a) (1) and (2) and (b) (1) to ensure equal opportunity in employment regardless of race, religion, color, sex, age, marital status, national origin, handicap, political affiliation or sexual orientation.

(b) Recipients with 50 or more employees must implement an affirmative action plan approved by the Corporation's Director of Office of Equal Opportunity or his/her designee. All other recipients must develop an Equal Opportunity program in accordance with § 1624.9(a) (1) and (2) and (b) (1).

(c) Before developing an affirmative action plan or equal opportunity policy statement, a recipient shall determine if underutilization on the basis of race, national origin or sex occurs in any job category or unit of its work force by using an underutilization formula approved by the Corporation's Director of Office of Equal Opportunity or his/her designee.

(d) Written affirmative action plans required by this subpart must include at least the following elements:

(1) An Equal Opportunity policy statement;

(2) Specific data by race, national origin and sex concerning the recipient's current work force, applicant flow, hirings, promotions, training attendance, terminations and disciplinary actions;

(3) Appropriate labor force characteristics, including a breakdown by race, national origin and sex;

(4) A program of remedial or preventive action to correct employment disparities based on race, sex, or national origin;

(5) Goals and timetables to correct underutilization of women and minorities;

(6) A procedure for publicizing and disseminating the plan to all employees, applicants and the general public;

(7) A procedure for prompt and uniform handling of complaints of employment discrimination.

(e) The enumeration of specific requirements for an affirmative action plan does not limit the authority of the Corporation to require other elements in Recipient's Affirmative Action Plans in the presence of a past history of noncompliance with this part.

Subpart D—Conduct of investigation and review

§ 1624.11 Monitoring

(a) The Corporation shall monitor those recipients having the greatest disparity in the delivery of legal services on any basis prohibited by this part or appearing to have the most serious systematic employment problems.

(b) If the monitoring process finds noncompliance with this Part, the Corporation shall notify the recipient in writing of:

(1) Preliminary findings;

(2) Recommendations for achieving voluntary compliance, where appropriate; and

(3) The opportunity to engage in voluntary compliance negotiations, where appropriate.

(c) If voluntary compliance has not been secured within 30 days of the Corporation's recommendations, the Corporation shall make a formal written determination of noncompliance and the Corporation shall undertake the imposition of such sanctions as may be appropriate.

(d) All agreements to come into voluntary compliance shall be in writing, shall set forth the specific steps the recipient has agreed to take, and shall be signed by the Corporation's Director of Office of Equal Opportunity and an official of the recipient with authority to legally bind the recipient.

§ 1624.12 Complaint process

(a) In addition to or in lieu of using the recipient's complaint process, a complainant may file a complaint directly with the Corporation's Office of Equal Opportunity alleging a pattern and practice of discrimination by the recipient in the delivery of services or employment.

(b) If a complainant files an allegation of a pattern and practice of discrimination with the Corporation prior to availing itself of the recipient's grievance procedure, the recipient shall immediately be advised of the complaint and given 30 days in which to investigate, hear and attempt to resolve the complaint. Upon completion of the grievance process, the recipient shall submit written findings to the appropriate Regional Office or the Research Institute and the Corporation's Office of Equal Opportunity.

(c) No recipient shall intimidate, threaten, coerce, retaliate or discriminate against a person in order to interfere with any right secured by this part or applicable Federal or State law, or because he/she has made a complaint, testified, assisted or participated in any manner in any investigation, proceeding or hearing under this part.

Subpart E—Procedure for effecting compliance

§ 1624.13 Remedies

(a) Failure to comply with this part shall be regarded by the Corporation in the same manner as the Corporation regards a recipient's failure to comply with any other section of the Act or implementing regulations. Accordingly, the procedures described in Part 1606 may be pursued in the presence of violation of this part by a recipient.

(b) A recipient found to have discriminated in the delivery of services on the basis of race, color, sex, national origin, age, or handicap may be required to take affirmative action to overcome the effects of prior discrimination. Even in the absence of such prior discrimination, a recipient, in administering a program, may take affirmative action to overcome effects or conditions which result in limiting participation by persons on the grounds of race, color, sex, national origin, age or handicap.

(c) Where a recipient is found to have a work force or segment of the work force not on parity with the relevant labor market, the Regional Office or Research Institute may require its approval prior to the filling of all vacancies in such segment(s) of the recipient's work force in order to assure maximum efforts of affirmative action.

Mr. HELMS. Mr. President, just a moment ago I mentioned the exploding rate of Legal Services funding authorized and appropriated by this Congress. What has this accomplished?

This exploding rate of Legal Services funding has made possible increasing levels of involvement in all sorts of radical activist litigation and political lobbying efforts for which the Legal Services Corporation has become notorious.

These abuses were well-known at the time of the 1977 Legal Services amendments. They included, but by no means were limited to. the following examples of mismanagement and political activism.

Today, at lunchtime, Mr. President, we had as a guest the distinguished Secretary of Health and Human Services, Mr. Schweiker, a former Member of this body. If I remember correctly, he said that, at the present time, there are 21,000 lawsuits filed by legal services

attorneys against him, 21,000 lawsuits against the Secretary filed by these activist political attorneys being paid for by the taxpayers of America.

Mr. KENNEDY. Will the Senator yield on the question?

Mr. HELMS. No, sir, I will not yield.

Mr. KENNEDY. Will the Senator yield on the question of Legal Services lawsuits that are being brought to indicate to us the success——

Mr. HELMS. Mr. President, who has the floor?

Mr. KENNEDY (continuing). That the Legal Services lawyers have in courts? Will the Senator yield for that purpose?

Mr. HELMS. Mr. President, who has the floor?

The PRESIDING OFFICER (Mr. DENTON). The Senator from North Carolina has the floor.

Mr. HELMS. Mr. President, I do not choose to yield and I ask for regular order.

The PRESIDING OFFICER. The Senator will proceed.

Mr. HELMS. Mr. President, in an article for Barron's, Shirley Scheibla had pointed out that Massachusetts Law Reform Institute, an LSC funding recipient, had spearheaded a lobbying campaign for the graduated income tax in Massachusetts.

Pine Tree Legal Assistance, Inc., had litigated to return two-thirds of the State of Maine to the Passamaquoddy and Penobscot Indians.

The federally funded Western Center on Law and Poverty of Los Angeles and San Fernando Valley Neighborhood Legal Services of Pacoima, Calif., had sued to compel payment of supplemental social security benefits to alcoholics.

The legal action support project of the Bureau of Social Science Research, Inc., had studied food stamp recipients in order to lay the groundwork for a suit by Alaska Legal Services to require the Federal Government to actively encourage people to draw food stamps.

The LSC-funded Center for Law and Education had participated in a suit which led to a Federal district court placing South Boston High School in receivership in order to accomplish integration.

The Legal Services Corporation had filed a friend of the court brief on the side of the university in the Bakke case.

Far from using these abuses to curb the Legal Services Corporation, however, the 95th Congress expanded the LSC's charter to cover a number of the practices which funding recipients had, until then, engaged in illegally.

Following the passage of the 1977 amendments, activities of legal services recipients became even more brazen.

In 1979, the Neighborhood Legal Services office in Pittsburgh forced a Pittsburgh jail to transport an inmate to a hospital for an abortion. notwithstanding specific language in the Corporation's charter which states:

> No funds made available by the Corporation . . . may be used . . . to provide legal assistance with respect to any proceeding which seeks to procure a nontherapeutic abortion.

The Research Institute on Legal Assistance, in December 1979, used the federally funded Clearinghouse Review to solicit membership of legal services programs in a new coalition called Citizens for Tax Justice. That coalition represented the NAACP, the National Consumer Federation of America, the National Council of Senior Citizens, Texas ACORN, the AFL–CIO, and AFSCME. The contact point for groups interested in the coalition was the national social science and law project.

In June, 1977, Michael Shepard of Utah Legal Services litigated on behalf of a minor woman challenging HEW's policy of refusing to pay for nontherapeutic sterilizations of women under 21 years of age. The court dismissed the case, finding there was no "suspect classification" capable of sustaining a constitutional objection to the policy.

In Priebe against Wyman, a legal services grantee in Akron represented a mother seeking to abort her 6½ month pregnancy against the wishes of the child's father.

In June 1979, an article appeared in the New York Times outlining a suit by Michigan Legal Services to compel the Federal Government to define "black English" as a separate language and, therefore, to provide mandatory remedial language training to all blacks.

In 1979, Michigan Legal Services filed an amicus brief on behalf of a Governor's item veto of a provision barring State funds for nontherapeutic abortions.

In the meantime, lobbying by Legal Services recipients has become more brazen, notwithstanding the fact that 18 U.S.C. 1913 specifically prohibits any letter or communication advocating the passage or defeat of a legislative proposal which is financed with Federal funds. In May 1977, the National Consumer Law Center advertised that it "has traditionally devoted a significant amount of its resources to legislative activity at the State and Federal level, although its resources and willingness to be of assistance may not be generally known." Acknowledging that the Corporation was prohibited from lobbying by the Legal Services Act, it ignored the provisions of the criminal code which also prohibited recipients from lobbying, stating: "* * * the willingness of Legal Services attorneys to contact (and have others contact) Members of Congress can be crucial."

Similarly, the Luzerne County Legal Services Association advertised in Clearinghouse Review for a "law reform specialist" and the Contra Costa Legal Services Foundation bragged about its "tradition of strong community involvement and aggressive participation in local political, social and economic battles on behalf of its client communities."

Having participated in the legislative process, however, there seems to be no inclination by Legal Services attorneys to accept the result of that process. In Preterm Inc. against Dukakis, Greater Boston Legal Services challenged a Massachusetts law limiting expenditure of State funds to abortions necessary to prevent the death of the mother.

In G. against Edwards, the New Orleans Legal Assistance Corp. obtained a court injunction against enforcement of a Louisiana statute prohibiting use of public funds for abortion except to prevent the death of the mother. In Zbaraz against Quern, the Legal Assistance Foundation of Chicago won an injunction against enforcement of an Illinois law preventing State medical payments for abortions other than those performed to save the life of the mother.

The State and federally funded California rural legal assistance program filed a suit on behalf of 19 farmworkers challenging the entire system of publicly sponsored agricultural research seeking to produce more efficient farming equipment, claiming it was displacing migrant farmworkers.

Massachusetts Law Reform Institute, the same group which lobbied for the graduated State income tax, brought suit to challenge State interviews of 15,000 welfare recipients in order to reduce fraud.

The veterans education project advertised in Clearinghouse Review of the availability of material to help veterans thrown out of the army because of homosexuality to upgrade their discharges.

The Council for Public Interest Law is "working to encourage more agencies to establish publish participation funding programs for public interest law centers" notwithstanding that Congress has failed to authorize intervenor funding programs for these agencies and establishment without congressional authorization is unlawful under Green County Planning Board against Federal Power Commission.

In Beazer against New York City Transit Authority, the Legal Action Center of New York, Inc., successfully sued the New York City Transit Authority for failure to employ former heroin addicts, claiming that such a failure was discriminatory toward blacks and Hispanics. In addition to obtaining a judgment, attorneys in that case received $375,000 in attorneys' fees from the transit authority.

In in re Evans, the Montana Legal Services Association obtained a judgment that a preoperation was disabled for purposes of receiving SSI and disability benefits because he/she was "unable to engage in substantial gainful activity due to the severe emotional trauma she has experienced."

In Stevenson against Stevenson, the Legal Aid Society of Louisville successfully sued to establish the principle that a mother's lesbianism is not sufficient grounds for changing the custody of a child.

On Cape Cod, the Native Americans Rights Fund sued for the return of a large sector in the State of Massachusetts to the Indians.

And in the District of Columbia, the migrant legal action program went to court to challenge the Secretary of

Labor's failure to promulgate OSHA regulations for farm labor.

Almost all of the activities outlined above are directly federally funded by grants from the Legal Services Corporation. But the Clearinghouse Review, which is published and funded by the Corporation, also performs a very controversial function as a bulletin board for radical activism. Recent articles include:

A piece by an attorney with the National Center for Youth Law analyzing the "abortion-without-parents'-consent" decision in Bellotti against Baird, and stating that "it is important that Legal Services attorneys devote considerable energy to opposing the imposition of burdensome parental consent and notification requirements, either through legislative advocacy or through litigation." It adds:

> The National Center for Youth Law would be happy to assist with such efforts.

An Advocacy Guide to the Community Development Block Grant Program, intended to advise Legal Services lawyers in obtaining government funds. States the article: A community group's main consideration, for example, might be to back a sympathetic political faction or public agency over an unsympathetic one . . .

An outline of the status of intervenor funding legislation on the Senate agenda.

An article on "Police Brutality" by the Research Institute on Legal Assistance. According to this article:

> Legal services lawyers and others continue to litigate these difficult cases and contribute to an evolving body of law regarding them. As part of this effort to combat police abuse, several publications have been developed to assist both lawyers and clients.

It proceeds to cite a publication by the radical National Lawyer's Guild.

An article by feminist Sylvia Law on Reproductive Freedom Issues in Legal Services Practice. She concludes:

> The problems of ensuring poor women the right to reproductive choice are overwhelming. . . . Work in this area can also provide legal services lawyers opportunities to form alliances with others, help develop community organization, and strengthen the political base for dealing with issues that critically affect the lives of their clients.

If you want a fresh example, Mr. President, at this moment, officers and representatives of the Legal Services Corporation are just outside this Chamber, lobbying Senators to vote to keep this outfit in business.

Obviously, Mr. President, these lobbyists understand that there is $100 million in this resolution which can be used to preserve their jobs and their Corporation. Otherwise, they would not be engaged in such a lobbying blitz.

Based on these cases of Legal Services Corporation involvement in areas which are illegal according to the Legal Services Corporation Act of 1974, the widespread opinion that this program "has committed suicide" as columnist James J. Kilpatrick has said, is not without foundation.

On March 18 of this year, in the House of Representatives, the Honorable F. JAMES SENSENBRENNER quoted Kilpatrick to the effect that "if the Legal Services Corporation dies, it will have done itself in." Responding to the charges of the media commentators that the President and the New Right were out to "kill off" the Legal Services Corporation, Kilpatrick, in the March 15, 1981 Milwaukee Journal, wrote that:

> This would be a case of suicide, not homicide. The Legal Services Corporation, through its own failure to heed repeated warnings against its own activism, will have done itself in.

He went on to write that:

> The concept was so good. Call me a starry-eyed idealist if you will, but some American ideals deserve a starry-eyed devotion. One of these is carved in stone above the Supreme Court: "Equal Justice Under Law." It is an impossible ideal, to be sure, but no matter. We ought to strive for the impossible now and then.
>
> The idea behind the Legal Services Corporation was to put some element of balance in those famous scales of justice. The idea was to see that the poor person got a fair shake in his encounters with the civil law. . . .
>
> . . . Thus in 1974 came the Legal Services Corporation, with a mission to help. And it has helped. Through 323 local programs employing 5,000 lawyers, the corporation has gone to bat for thousands of poor persons in need of legal assistance: domestic relations, child custody, housing problems, welfare checks, divorce, employment.
>
> . . . But the corporation is heavily and unhappily influenced by ideological activists who have grander ideas. They see their role as a remaking of society. Many of the younger LSC lawyers are fresh caught from law school. Often their energy is surpassed only by their immaturity. Their passions cannot be fired by the humdrum fuel of a custody case. They want to be aggressive.

Mr. President, one of the LSC's oldest hands, Alan Houseman, who is Research Director for the Corporation, wrote and circulated a memorandum to LSC staff on December 29, 1980. In this memo, Houseman fretted over the survival of what he referred to as "committed, aggressive and political staff," reminding the staff that "aggressive advocacy" was needed to accomplish the Corporation's goals, which he defined in terms of "legislative and administrative representation, litigation, and community education." The Houseman memorandum went on to outline a comprehensive lobbying strategy.

These activities violate several provisions of sections 1006 and 1007 of the Legal Services Corporation Act of 1974. The case of the Penobscot Indian suit against the State of Maine is one example of this. To return one-third of the State of Maine to these Indians, as the suit sought to do, would cause the displacement of many thousands of poor persons and their families. The notion of poverty as a class problem variously manifested rather than an individual or family condition, a badly flawed concept, is fundamental to the legal services program. Every local legal services recipient organization is structured to function as a so-called public interest law firm in which the supposed public interest, for the poor as a class, is equated with questionable political conclusions.

I and millions of other Americans question and abhor the idea that it is in the interest of the poor that a policy of easy abortion be encouraged, that abortions be taxpayer financed, and that with respect to minor children abortions be performed without either parental notice or consent. Yet this is the prevailing ideology of the Legal Services Corporation.

Acknowledging the recidivist behavior of the LSC with regard to adherence to its charter, defenders of the Corporation nevertheless persist in defending it. A common argument is that class action suits—prohibited by the aforementioned sections of the act—account for a "mere 1 percent" of all cases handled by the LSC.

To place this argument in proper perspective, all one has to do is note that not a single example of those cases which I cited earlier could be called a class action. Nor need I mention the fact that just because a suit is not a class action does not mean it is not in violation of the Legal Services Corporation Act of 1974.

The political activities of the LSC, specifically lobbying, will consume $1.9 million of this year's budget. This is the estimate I received from a source inside the LSC who insists on retaining anonymity for fear of retaliation. Note that lobbying is not class action either.

This $1.9 million represents two-thirds of 1 percent of Legal Services' budget. However, no one has yet been able to quantify the total political activity of LSC.

The LSC is an outlaw program running wild. The staff of the Corporation likes to make a big deal about "helping the poor," but before we assume that the poor are being helped, we should be aware that increasing numbers of poor people have become alienated from the LSC, and in many cases, direct victims of LSC litigation targeted against them.

I question and abhor the idea that voluntary prayer be banned from the Nation's public school classrooms, on the grounds that it is in the interest of the poor to retain such a ban, yet taxpayer subsidized Legal Services attorneys are lobbying against the removal of such restrictions on prayer.

I question and abhor the idea that wilful, premeditated murder of the innocent cannot be made subject to capital punishment, yet Legal Services personnel use taxpayer resources to limit the availability of capital punishment, on the grounds that such a policy militates particularly against the poor.

I abhor the idea that reductions in property and income taxes such as those proposed in California and Massachusetts for working Americans are being opposed at taxpayer expense by subsidized LSC recipient personnel, who regard such tax cuts as depriving the poor of access to resources to which, in the opinion of such attorneys, they are entitled as a matter of right.

I abhor the LSC-propagated notion that students have a property right in their diplomas and that competency testing violates the civil rights of students who are unable to meet academic standards.

I applaud the President's courageous decision to propose the abolition of this counterproductive program which has arrogated to itself the right to use public funds to propagate its secular faith in liberal nostrums of class conflict, sexual liberation, economic redistribution, and governmentally mandated equality of result.

I further agree with the President and with conservative Democrats in the House of Representatives that no amount of reshuffling of budget categories can assure us that the heavy hand of the Federal Government will not again reassert itself in the area of legal services.

Therefore, for the sake of insuring, once and for all, that the Federal Government is extricated from the legal services area, I encourage my colleagues to support my amendment.

Mr. President, the president of the American Bar Association, Mr. William Reece Smith, Jr., has publicly criticized President Reagan's decision to terminate funding for the Legal Services Corporation. Mr. Smith has also attempted to generate support for this controversial program from State bar associations and bar leaders across the country. Staff of the ABA has also been involved in lobbying for continuation of the Legal Services Corporation.

I am sure, of course, that such efforts by Mr. Smith and the ABA staff—in conjunction with the LSC bureaucracy—have had some success. But support for the ABA-LSC position is far from unanimous among lawyers and State bar associations. In fact, most lawyers with whom I talk oppose continuation of funding for this controversial program. The North Carolina Bar Association, for example, has deep reservations about the continuation of the LSC in my State and the association's general practice committee is currently reviewing North Carolina's participation in the Federal legal services program.

Significantly, the president of the North Carolina Bar Association, Mr. Dewey W. Wells, declined to go along with Mr. Smith's blanket endorsement of the Legal Services Corporation. At this point, I shall insert into the RECORD a copy of Mr. Wells' letter to Mr. William Reece Smith, Jr., in which Mr. Wells states:

> The ABA is not reflecting the prevailing viewpoint of American lawyers when it supports a continuation of funding of LSC as it and its affiliates are now operating.

Mr. President, I ask unanimous consent that there be printed in the RECORD the copy of Mr. Wells' letter to Mr. William Reece Smith, Jr., to which I referred.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NORTH CAROLINA BAR ASSOCIATION,
Raleigh, N.C., March 18, 1981.

Mr. WILLIAM REECE SMITH, Jr.,
President, American Bar Association, American Bar Center, Chicago, Ill.

DEAR REECE: I acknowledge receiving your letter of March 13 inviting our Association to join American Bar Association representatives on April 1 to call on Senators and Congressmen to solicit their support of continued funding of Legal Services Corporation.

We will not be able to join you in that endeavor because whether the North Carolina Bar Association continues to support LSC is in doubt. Reacting to the concerns of many members, last fall I requested our Committee on General Practice to study the operations of Legal Services of North Carolina, Inc. It is doing so and I expect it to report to the Board of Governors next month. I expect the Board then to take a position favoring either the continuation, or the reordering, or the termination of LSC.

My personal opinion is that the ABA is not reflecting the prevailing viewpoint of American lawyers when it supports a continuation of funding of LSC as it and its affiliates are now operating. Their lobbying and "community education" efforts, and their resistance to funded participation by private lawyers, has justifiably deprived them of the support of a large portion of the bar which remains genuinely concerned about the availability of legal services to the poor.

Engaging in the advocacy of political and social causes is not only a deviation by LSC from the Congressional intent. It consumes a significant portion of the funds appropriated to it at a time when most Americans seem ready to adjust to a substantial reduction in inflationary government spending. It is disappointing that the ABA does not at least moderate its support of LSC by conceding that some economies are in order.

Yours sincerely,

DEWEY W. WELLS.

Mr. HELMS. I thank the Chair. I reserve the remainder of my time.

Mr. MOYNIHAN and Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. HOLLINGS. Mr. President, I yield such time as the Senator from New York may need.

Mr. MOYNIHAN. I thank the distinguished Senator from South Carolina.

Mr. President, I rise as perhaps the one Member of this body who was a member of the Task Force on Poverty which President Kennedy set up in 1963, prior to his assassination, and which President Johnson, to his great and historic glory, continued and brought to fruition as the Economic Opportunity Act of 1964, out of which grew the noble idea that the U.S. Government should provide a measure of legal representation in the courts of our Nation for those who could not afford it.

That was an idea that began under one Democratic President and was endorsed by the Republican President who succeeded him. The idea of a Legal Services Corporation was put forth first under President Nixon. He acknowledged that it would have difficulties and embarrass some persons and discomfort others, but he insisted that nothing was finer in the American political tradition than that we should accept such difficulties and embarrassments because the issue involved was justice—justice; that juries would decide, not lawyers; that judges would rule, not lawyers.

Following President Nixon's acute perception that a separate legal corporation ought to be set up independent of this body, of the executive branch, at length, proposed in 1971, it was established in 1975. It is one of the things that we are proud of in this Nation. I cannot imagine that this body, that has so long supported an idea that is essential to us, that embodies the whole purpose of a lawmaking institution—that the laws should be observed and justice should be done—would now consider abolishing that tradition.

Mr. President, I know there are Members on both sides of this aisle who feel as strongly as I do. I see the Senator from Missouri, who has served with such distinction as the attorney general of his State, has risen. I hope he might speak. I know the Senator from Massachusetts tried to speak and no doubt will. I simply wish to make my judgment clear.

Mr. President, I do ask that there be order for those other Senators who wish to speak now.

Mr. DOMENICI. Mr. President, I yield some time to the Senator from Kansas. How much time does he desire?

Mr. DOLE. Three minutes.

Mr. DOMENICI. I yield 3 minutes to the Senator from Kansas.

Mr. DOLE. Mr. President, I am going to yield to the majority leader.

Mr. BAKER. Mr. President, I support the position offered by the administration. It may be that, indeed, there will be a redesign of a system for Legal Services and it may be that the distinguished members of the Judiciary Committee will bring us such a recommendation. But the Budget Committee does not have the last word to say in that respect.

I wish to make it clear that I shall support the recommendations that have been made by the administration in this respect.

Mr. HELMS. I thank the distinguished majority leader.

Mr. DOLE. Mr. President, I should like to take a minute or two on another tack on which the distinguished Senator from Louisiana and others might agree.

What the amendment would do is require the Committee on Finance to cut an additional $100 million from both fiscal 1982 and 1983. This amendment, as I understand it, is intended to eliminate $100 million allegedly earmarked in social services block grant for the Legal Services Corporation.

Mr. President, I share many of the concerns of the distinguished Senator from North Carolina (Mr. HELMS) about the excess of legal services attorneys. I see no reason for the Federal Government to pay attorneys to tie up Federal programs in endless litigation or to lobby against legislation that they do not favor. Nevertheless, I see no need for this amendment. There are, in fact, no funds earmarked for legal services as part of social services block grant or as part of anything else in the Finance Committee's jurisdiction.

This amendment does not prevent any spending for legal services. Whether it passes or not, the Finance Committee can still authorize spending for legal services as a permissible use for social services funds. Therefore, the only real effect of the amendment is to force the Finance Committee to save an additional $100 million in its programs.

Mr. President, the Finance Committee is already required to produce $8.8 bil-

lion in savings in fiscal year 1982 and $10.87 billion for fiscal year 1983. This will be a painful task. I do not want to see the Finance Committee's task to be made more difficult simply because of a fear, which I believe unwarranted, that the Finance Committee will permit the funding of the Legal Services Corporation.

Mr. President, I am aware that there is some concern that members of the Budget Committee may have hoped that social services funds would be used to fund the Legal Services Corporation. I do not know what was on the minds of the Budget Committee when it approved the Finance Committee budget totals—I cannot psychoanalyze the members of the Budget Committee. Nothing in the Budget Committee's report indicates such an intent or any earmarking.

While I do not know what was on the minds of Budget Committee Senators, I know what is on my mind. The Finance Committee will make this decision, not the Budget Commitee.

This will be a painful task in itself. I have not determined yet where the Finance Committee comes in. We have almost reached the limit. I would be pleased to work with the Senator from North Carolina and others who have opposing views when it comes to our committee.

As I said, I cannot focus on the Budget Committee, but I know that the Finance Committee will finally make the decision. I just want to set the record straight. I do not believe the Senator from Louisiana disagrees with that.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. LONG. I say to the distinguished chairman of the Finance Committee, the Senator from Kansas, that no one agrees with the argument made by the Senator from North Carolina more than I do.

Some years ago, I offered an amendment trying to stop the practice of using the so-called poverty lawyers to sue the Government. I argued at that time that the most insane thing I could think of was to hire a lawyer to sue yourself. As I said at that time, nobody but an idiot would do that. I thought that was what the Government was doing when, to use the quotation of the Senator, our Government was paying for 25,000 lawsuits against ourselves, against the Secretary of HEW, who was doing what we wanted him to do.

I agree with the Senator's argument completely. On the other hand, the Finance Committee will have great difficulty getting within the funds provided in things we think are very important.

For example, very little money would be available for family planning. I believe that in that one area, every dollar that is saved is going to cost us $10 by adding to our welfare load in the long run.

So there are a lot of areas where we are not going to have enough money to do the things we think are necessary with regard to other social services.

While I agree with the Senator from North Carolina I believe that the money is going to be very much needed, and we will have great difficulty reducing by the $8 billion we are required to cut, without serious harm to a lot of unfortunate people.

So while I agree with the Senator from North Carolina, I believe the money will be needed for other services.

Mr. HELMS. Mr. President, will the Senator yield on my time?

Mr. DOMENICI. I yield.

Mr. HELMS. The hundred million dollars, if this amendment is not approved, will remain in the Finance Committee. Is that correct?

Mr. DOMENICI. That is correct.

Mr. HELMS. What is going to happen to the hundred million dollars?

Mr. DOMENICI. Is the Senator asking that of the Senator from New Mexico?

Mr. HELMS. I ask the distinguished chairman of the Finance Committee first, or the ranking minority member, or whoever.

Mr. DOLE. I will have to ask the distinguished chairman. Is that part of our $8.8 billion?

Mr. DOMENICI. That is part of the social services block grant that the President recommends, which would include merging into one block grant title XX day care, title XX local training, development, disabilities—a long list that the President said should all be put in one block, if you want to. It is still up to you. Then the States would end up using it for those things or not, depending on how you all drew the law and how it passed Congress.

Mr. DOLE. We do not have jurisdiction over the Legal Services Corporation.

Mr. DOMENICI. The point I should like to make—and then I will yield to the distinguished Senator who will take my place, and I will designate the time to him for the evening—is that, first of all, there is nothing done in this reconciliation resolution on the Legal Services Corporation—period, unequivocally, absolutely. The reason is that there is no authorization presently alive as a law on legal services, as the distinguished chairman of the committee knows. It has expired.

We cannot reconcile against unauthorized programs. That is sort of what we were doing on the last amendment—just telling a committee to save money. There is no law to reconcile against.

The Legal Services Corporation is still back. It is still back in their lap, with whatever authorizing money they have. They use it for CETA, they use it for all the different programs, and they may still use it for the Legal Services Corporation. I say to the Senator from North Carolina (Mr. HELMS), there is nothing in here that inhibits, entices it, or prohibits it.

Mr. HELMS. There is nothing in here except the $100 million, which is $100 million more than President Reagan requested. Is that not correct?

Mr. DOMENICI. The block grant has $100 million more in it than the President requested. That is absolutely correct. But the block grant as requested by the President had legal services in it. It just did not have the extra $100 million in it. It had it in before, and you put $100 million in for the whole block.

It just appears to me that when the block grant is $5 billion, you have neither assured nor have you destroyed what the President asked for, which was, "Put it in the block, but don't carry its money in it," so the block becomes a smaller percent for each of the programs. We put $100 million back in because there was a program, juvenile justice, that everyone thought should not be zeroed out, and it was totally zeroed out. We put it in the block and said, "Put $100 million in."

So it seems to me—and I say this in all respect to the Senator from North Carolina, one of the best friends I have—that the Senator's amendment will not effectively cause legal services to be part of that block grant, nor will it take it out—neither one. The only way the Senator can make sure it is out is to take every bit of money out of that block grant—every bit.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield.

Mr. DOLE. When that block grant came to the floor, the Senator could then offer an amendment.

Mr. DOMENICI. I mean in this reconciliation.

Mr. DOLE. At another time.

Mr. DOMENICI. Yes. He could go to the Finance Committee and say, "You should not include legal services as a permissive block grant for the States," and the Senator's committee would have to decide. If the committee put it in, the Senator from North Carolina could still come to the floor and say it should not be there.

There is a third protection. The committee could put it in, and the States may not use it. The States would not have to put it in if it is permissive.

So I hope that the Senator will not insist that we vote, because the Senator from New Mexico would oppose the amendment, not on the basis of legal services but on the basis that $100 million should be left in that block grant for the Finance Committee to decide the parameters of the block grant, and the Senate would debate the issue of what is in there.

Mr. HELMS. Mr. President will the Senator yield, on my time?

Mr. DOMENICI. I yield.

Mr. HELMS. What confuses me is that Mr. Bell, of the Budget Committee staff, said precisely and specifically that the $100 million which is the subject of this amendment included funds to save the legal services programs. This is what confused me.

Mr. DOMENICI. He is as wrong as Dave Stockman is in his letter. They are both wrong. Dave Stockman says in his letter, specifically:

We support your amendment to add $100 million savings to the social services block grant reconciliation instructions to eliminate earmarked funds for legal services.

That is not so. There are no earmarked funds. And Steve Bell is just as wrong.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a question?

Mr. DOMENICI. I yield.

Mr. MOYNIHAN. Are there any earmarked funds in this resolution?

Mr. HELMS. No.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. DOMENICI. That is why I say that Dave Stockman is just as much in error as our staff people.

Mr. MOYNIHAN. He is wrong.

Mr. DOMENICI. That is correct.

Mr. HATCH. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield all the time on the resolution to the Senator.

Mr. HATCH. Mr. President, in our Subcommittee on Aging, Family, and Human Services, chaired by the distinguished Senator from Alabama, when we made the markup in the Labor Committee, there was $100 million earmarked for the Legal Services Corporation.

The committee sent our budget mark to the Budget Committee and in the Budget Committee—maybe I better go back a step—as I recall based upon economic assumptions we were using at that time we were about $3 billion over what President Reagan had asked us to cut. When we went to the Budget Committee it came down to a donnybrook on the Budget Committee concerning how much of that $3 billion we would have to cut out, and it came down to a fight among the members of the Budget Committee, and I might add a series of negotiations among members of the Labor Committee as to what programs we should try to save.

I made the motion in the Budget Committee of those $3 billion we were overusing the economic assumptions that we used on the Labor Committee which are different from those used by the Budget Committee. Of the $3 billion we moved to save $353 million for the handicapped, which restored the full amount that we had projected for the handicapped, $345 million for educational block grants for elementary and secondary education because we believed, and we think we are right to this day, that we will not be able to implement the block grant program quickly enough to prevent the taking of funds out of State and local programs, and we added another $300 million for youth jobs and CETA, for a total of $998 million.

That passed by a vote of 12 to 10.

Knocked out of the Labor Committee mark by the Budget Committee was about $2 billion, including $100 million for the national Legal Services Corporation.

So as we stand here right now and in the budget reconciliation request that we are all debating, this resolution, Senate Concurrent Resolution 9, there is not a dime in this resolution for the Legal Services Corporation.

Now we have noticed that there is $100 million in title 20 social services funding for what has been described as juvenile justice and legal services for the poor.

It is my understanding, and I hope someone will correct me if I am wrong, that should those funds be permitted to stay in, should either the Senator's amendment be defeated or withdrawn, should funds stay in they will not be earmarked by the Finance Committee for the national Legal Services Corporation. That is my understanding because the jurisdiction of the national Legal Services Corporation lies in the Labor and Human Resources Committee.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. HATCH. Let me just add one or two points.

Mr. HELMS. Let me say I have never suggested that they were earmarked.

Mr. HATCH. I am not suggesting that the Senator has.

Mr. HELMS. I thank the Senator.

Mr. HATCH. I am trying to make clear they should not be earmarked for the national Legal Services Corporation.

It is one thing to keep $100 million extra money in the Finance Committee title 20 social services fund for whatever purposes they want as long as they do not overlap the jurisdiction of the Labor and Human Resources Committee which has jurisdiction over the national Legal Services Corporation.

It is another thing to utilize those funds by that committee for legal services for the poor as determined by the States through the block grant and for juvenile justice programs, and that is my understanding as to what the Finance Committee is likely to do.

I wish we had the distinguished chairman of the Finance Committee here because I think he would confirm, but the distinguished minority leader of the Finance Committee is here. I ask the distinguished minority leader: Is that not basically what the $100 million is likely to be used for if it is used for legal services at all?

Mr. LONG. I am sorry. My attention was diverted.

Mr. HATCH. We left $100 million in title 20 social services in the Finance Committee.

Mr. LONG. Yes.

Mr. HATCH. That has basically been described as money for juvenile justice and legal services for the poor through a block grant approach which the States would determine. Is that correct?

Mr. LONG. Yes. But, of course, there is no requirement that it be used that way. It can be used for other social services.

Mr. HATCH. Is it not likely either they use it for other social services or they will use it for juvenile justice for legal services for the poor?

Mr. LONG. Yes.

Mr. HATCH. If they decide not to use it for that purpose that means they will use it for some other social spending purpose not related to legal services.

Mr. LONG. That is correct.

Mr. HATCH. Under no circumstances will the Finance Committee come out with a bill or with a recommendation that those funds be used to fund the national Legal Services Corporation?

Mr. LONG. No. I can only speak for myself as the Senator from Kansas spoke for himself. But I think I have been heard to be as critical of the activities of the Legal Services Corporation as the Senator from North Carolina has been. I applaud what he said here. I really think that that organization has gone far beyond what most of us think should be the case.

Mr. HATCH. What I am saying is that I believe there is no desire on the part of the Finance Committee to assert jurisdiction over the national Legal Services Corporation or to have any of these funds earmarked for the perpetuation of this.

Mr. LONG. Not to my knowledge.

Mr. HATCH. Let me just go a little bit further.

I believe that the distinguished Senator from North Carolina realizes that I have been a supporter of the national Legal Services Corporation ever since I have been a Member of this Senate. I have had grave reservations in supporting it, and I can remember fighting the bill in 1977 and getting a number of amendments through and also reducing some of the total budget because they wanted to jump it, as I recall, from $117 million to $225 million, and I believe we went back to $205 million as a result of the work of the Senator from Utah on the floor.

I have worked in the committee and when we passed the bill, reauthorized the bill, I think last year or the year before—I cannot even keep track of it—we again raised concerns about the nature of the Legal Services Corporation and the exotic law and law approach that was being used by certain attorneys working for the national Legal Services Corporation.

We raised those issues. We were assured that these funds would all go to just help the poor, that they would go in a nonexotic law way to help the poor, and that they would basically stay away from these very controversial areas that have caused considerable controversy on the floor ever since I have been here in the Senate and which I think the distinguished Senator from North Carolina has more than adequately described this evening and which I think the distinguished Senator from Louisiana has described to a degree.

I personally believe that the national Legal Services Corporation has done itself in, I believe they have continued to ignore the wishes of this body after we have given it every opportunity to be the official quasigovernmental corporation to help the poor, that they have continued to go out and to lobby the Federal Government, to lobby Members of Congress, to lobby in State legislatures and elsewhere and to continue to promote rules and regulations which are contrary to the best interests of the poor and finally which are contrary to the desires of those of us who have actually tried to keep this corporation alive over the last 4 years.

Will the distinguished Senator from North Carolina agree with me on that?

Mr. HELMS. I do, indeed.

Mr. HATCH. I have to admit that I worry a considerable amount about legal services for the poor and about the needs of the poor, but I also worry about funding organizations that continue to exceed their mandate and continue to just fly in the face of all we have tried to recommend to them over the years that some of us sincerely have tried to support that organization.

I believe that the President of the United States is right in asking that it not be funded. So I intend to support the President of the United States.

I do recommend, however, that with at least the good faith assurance of the distinguished Senator from Louisiana the $100 million in the title XX funds in the Finance Committee be allowed to remain for whatever purpose they utilize with the understanding that we will not expect them to reauthorize in any way the national Legal Services Corporation over which Labor and Human Resources Committee has jurisdiction.

Personally I believe it is time to send a message to these people that we are sick and tired of them not exclusively working for the poor.

I can tell Senators that I have had people from Utah, very serious and sincere attorneys, who voluntarily came back here at their own time and expense and at the expense of other attorneys who have begged us to keep the national Legal Services Corporation alive, attorneys who I know are impeccable, top-rated attorneys, who literally have worked very hard in Utah to have the national Legal Services Corporation do what really was proper and legal for the poor.

I believe in Utah the situation is that the Legal Services Corporation has rendered a good service to the poor and has done so within the framework of the mandate we have talked about on the floor.

Mr. CRANSTON addressed the Chair.

Mr. HATCH. I am prepared to yield back the time under the circumstances that I think we have beaten this to death, and I would be interested in the distinguished Senator from California. I will yield the floor.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Mr. President, I rise in opposition to this amendment, and I will speak very briefly. Although it has been described by its sponsor as eliminating funding for the Legal Services Corporation—the future of the legal services program, which I believe is absolutely essential, is simply not at issue here, as was pointed out by the distinguished Senator from New Mexico, the chairman of the Budget Committee, who is managing the bill.

This amendment would reduce by $100 million funds available to the Finance Committee for social services programs for low-income and disabled individuals. The legal services program is now within the jurisdiction of the Labor and Human Resources Committee and the future of this program will be before the Senate at an appropriate time. But this is not the time, and this is not the amendment.

This amendment, if accepted, could result in a reduction of funds allocated for programs such as day care services for low-income children, for services to home-bound disabled and elderly individuals, for the care of abused and neglected children.

Mr. President, these programs are already facing drastic reductions under the Budget Committee's and the administration's proposal. Further cuts are simply unconscionable. These are programs that needy individuals depend upon for basic survival. I strongly urge the defeat of this ill-advised and ill-designed amendment.

However. I want to add one comment about the legal services program itself.

Our system of justice is based upon the peaceful, orderly resolution of disputes and conflicts. The assistance of counsel is essential to this system. The right to be heard is of little avail—even to an educated layman—without counsel.

The legal services program is based upon the very simple, fundamental premise that the poor—no less than the wealthy—are entitled to legal representation to redress grievances and defend their interests.

Our society—our social compact—is based upon the concept that all citizens, no matter what their financial circumstances, are entitled to be protected by the law. This right to equal protection of law and access to the judicial system is a basic right arising from our system of justice. A fair and just government cannot countenance denying people the protection of the law because of poverty. The Legal Services Corporation is an example of what a fair and just government can and must do to bring equal justice to its people.

I am delighted now to yield to my friend from Missouri.

Mr. HATCH. What I would like to do at this time is yield the remainder of the time from Senator DOMENICI to the distinguished Senator from South Carolina and then take the chair so that I can relieve my colleague.

The PRESIDING OFFICER (Mr. HATCH). The Senator from Missouri.

Mr. EAGLETON. Mr. President, I thank my colleague from California.

The purpose of the legal services program is a simple, but essential one—to provide equal access to our system of justice for those persons who cannot afford to pay for legal assistance. That purpose is rooted in the fundamentals of our democratic society.

The legal services program has been in existence now for nearly 10 years. To be sure, it has experienced many difficulties in the course of its development since it was established as a part of the Office of Economic Opportunity in 1964, but now it is enthusiastically supported by the American Bar Association and by State and local bar associations across the country.

Let me quote from an article written by a widely recognized and, at times, thoughtful conservative, Mr. James J. Kilpatrick, in the Washington Star of Tuesday, June 10, 1980. Mr. Kilpatrick wrote of his original opposition to the Corporation, but then went on to say:

The Corporation has come a long way from those angry days in 1973 and 1974 when many of us on the conservative side fought like bobcats against its very creation.

Further along in his column, Mr. Kilpatrick gets to the funding of Legal Services:

The pending Senate bill would authorize $321.3 million for the Corporation in Fiscal '81. It is a seriously needed sum. In the nature of things, poor families can accept the realities of being poor; they are not going to have the food, clothing, housing, higher education and material amenities of the rich. What they cannot accept is the sense of being unfairly ground down by the millwheels of the law.

We never will achieve the ideal of truly equal justice. Outside the antiseptic realms of mathematics, literal equality does not exist and ought not to exist. But at law, we must keep trying. The preamble to the Constitution pledges a national purpose "to establish justice." Let us get on with the job.

Mr. Kilpatrick argues the case with as great an eloquence as I have heard.

Just a little over a week ago, Mr. Kilpatrick again devoted a column to the Legal Services Corporation, in which he states that if the Legal Services Corporation dies, it will have done itself in through its own lobbying efforts. But Mr. Kilpatrick concludes that column as follows:

The concept is worth saving. Heaven knows it is! I will cling to the ideal willy-nilly. But perhaps some other mechanism—block grants to the states, or pro bono services by private attorneys—would be better. If the Corporation dies, the need will still be there.

Mr. President, I ask unanimous consent that the two aforementioned articles by Mr. Kilpatrick be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

OF JUSTICE FOR ALL

If there is one concept that our nation cherishes more than any other, it is the commitment that is carved in stone at the Supreme Court. The legend reads, "Equal Justice Under Law." Year by year we creep a little closer toward that distant goal.

That cheerful observation is prompted by a report from the Legal Services Corporation, marketing its first five years of operation. The corporation has come a long way from those angry days in 1973 and 1974 when many of us on the conservative side fought like bobcats against its very creation.

These days the Legal Services Corporation keeps a low profile. That was not the image projected by its predecessor outfit, the legal services arm of the now defunct Office of Economic Opportunity. Many "poverty lawyers" identified with the OEO program were hot-eyed social activists, little interested in the humdrum legal problems of the poor. Conservatives in both House and Senate had good reason to oppose the expenditure of tax funds on firebrand causes.

As a consequence, the bill to transfer the legal services program from OEO to a new corporation ran into a filbuster in the Senate and a bitter floor fight in the House. In order to avoid a presidential veto, sponsors accepted a host of restrictive amendments intended to dispel these lingering apprehensions.

Lawyers attached to the corporation are positively forbidden to engage in public demonstrations, picketing, boycotts, strikes, lobbying, partisan politics, voter registration

drives and the like. The act prohibited the establishment of "backup centers" that were seen by many of us as mere seedbeds for hothouse revolution.

By a margin of only seven votes in the House, the legal services bill survived a motion to recommit. The corporation wobbed into existence on rubbery legs. Now, six years later, it stands on its own two feet. Pending bills to extend the program's life for two years (in the Senate version) or three years (in the House) may set off brief thunder on the floor, but no typhoons are in sight.

As one of those who hollered the loudest six years ago, perhaps I may be permitted a round of applause today. Here and there abuses continue. A sneaking suspicion will not go away that the corporation has neatly evaded the law's prohibition against backup centers by creating backup centers and calling them something else, e.g., the National Clearinghouse on Legal Services.

Let it go. As it moves into its sixth year, the corporation is funding 335 independent programs staffed by more than 5,000 attorneys and 2,500 paralegals. In 1979 local offices dealt with more than a million legal problems of the poor. What kind of problems? Child custody. Food stamps. Election. Disputed bills. Contested eligibility for welfare benefits. None of this is the stuff from which landmarks are made, but it is the very heart and soul of a legal services program.

The corporation's clients are 57 per cent white, 30 per cent black, 10 per cent Hispanic. Only a fifth of them are employed; most are living on welfare or Social Security. More than a third of the legal problems involve family matters. Another 13 per cent concern landlord-tenant relationships. Half the cases are settled within a month. The corporation proudly notes that only 2 per cent of its budget goes to administration; 95 per cent of last year's $270 million appropriation went directly to legal services.

The pending Senate bill would authorize $321.3 million for the corporation in fiscal '81. It is obviously a substantial sum, but it is a seriously needed sum. In the nature of things, poor families can accept the realities of being poor; they are not going to have the food, clothing, housing, higher education and material amenities of the rich. What they cannot accept is the sense of being unfairly ground down by the millwheels of the law.

We never will achieve the ideal of truly equal justice. Outside the antiseptic realms of mathematics, literal equality does not exist and ought not to exist. But at law, we must keep trying. The preamble to the Constitution pledges a national purpose "to establish justice." Let us get on with the job.

LEGAL SERVICES COMMITTING SUICIDE

(By James J. Kilpatrick)

This is a hard column to write. For the past seven years, in lonesome opposition to fellow conservatives in Congress and in the press, I have been sticking up for the Legal Services Corporation. Now President Reagan wants to abolish it. It hurts to abandon a favorite cause, but maybe the time has come to let it go.

If Congress concurs, it will be said of the Legal Services Corporation that Reagan and the New Right "killed it off." Don't believe it. This would be a case of suicide, not homicide. The Legal Services Corporation, through its own failure to heed repeated warnings against its own activism, will have done itself in.

STRIVE FOR IMPOSSIBLE

The concept was so good. Call me a starry-eyed idealist if you will, but some American ideals deserve a starry-eyed devotion. One of these is carved in stone above the Supreme Court: "Equal Justice Under Law." It is an impossible ideal, to be sure, but no matter. We ought to strive for the impossible now and then.

The idea behind the Legal Services Corporation was to put some element of balance in those famous scales of justice. The idea was to see that the poor person got a fair shake in his encounters with the civil law. Was he being wrongly evicted from his home? Was he being unfairly persecuted by a creditor? Was he being denied some public benefit that rightfully was his? Was he trapped in some impenetrable maze of regulations?

Almost 40 years ago, as a young reporter, I covered what were known as the Civil Justice Courts. Here a rough form of stamp style. Every city has such tribunals. Here merchants and dotcors and loan sharks sue for unpaid bills. Landlords seek eviction orders. Many defendants never appear at all. Other defendants stand in bewildered resentment. They never heard of a garnishee. "Judgment granted . . . Judgment granted . . . Judgment granted." Ordinarily the poor fellow never stands a chance.

MISSION TO HELP

Thus in 1974 came the Legal Services Corporation, with a mission to help. And it has helped. Through 323 local programs employing 5,000 lawyers, the corporation has gone to bat for thousands of poor persons in need of legal assistance: domestic relations, child custody, housing problems, welfare check, divorce, employment. Such humble causes are overwhelmingly the business of the LSC.

But the corporation is heavily and unhappily influenced by ideological activists who have grander ideas. They see their role as a remaking of society. Many of the younger LSC lawyers are fresh caught from law school. Often their energy is surpassed only by their immaturity. Their passions cannot be fired by the humdrum fuel of a custody case. They want to be aggressive.

One of the corporation's oldest hands, research director Alan Houseman, circulated a fire-breathing staff memorandum on Dec. 29. He feared for the survival of "committed, aggressive and political staff." He pleaded for "aggressive advocacy," which he defined in terms of "legislative and administrative representation, litigation and community education." He foresaw possible restrictions that would prevent the LSC lawyers from suing local governments.

LOBBYING EFFORT

The Houseman memorandum outlined a comprehensive lobbying effort to preserve not only the Legal Services Corporation but other social programs also. He suggested battle plans for opposing Reagan appointees who might be "hostile to aggressive legal services." He anticipated "severe problems with the Senate." He charted strategies for effective lobbying, and in a companion memorandum he proposed specific lobbying assignments for members of the LSC staff—for Dan, Mary, Mario, Judy, Bruce, Bernie, Gerry, Steve, Alan, Andy and others.

Observers differ on whether the law prohibits the corporation from using public funds for such lobbying. That issue is almost immaterial. The question is whether the corporation, under present law and present leadership, is capable of adhering faithfully to the humble but important duties for which it was created. The Houseman memoranda raise almost insurmountable doubts.

The concept is worth saving. Heaven knows it is! I will cling to the ideal willy-nilly. But perhaps some other mechanism—block grants to the states, or pro bono services by private attorneys—would be better. If the corporation dies, the need will still be there.

Mr. DANFORTH. Mr. President, I yield myself 10 minutes on the resolution.

The PRESIDING OFFICER. Who yields time, on behalf of whom?

Mr. DANFORTH. Myself.

The PRESIDING OFFICER. The Senator from——

Mr. DANFORTH. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DANFORTH. It is my understanding that in addition to time on the amendment Senators do have time on the resolution itself; is that correct?

The PRESIDING OFFICER. The manager has time on the resolution, the distinguished Senator from South Carolina.

Mr. DANFORTH. I wonder if I could have about——

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Senator be permitted to proceed for 10 minutes on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. If I have any right to do it, I would be glad to yield whatever time the Senator wants.

Mr. DANFORTH. If I could have 5 minutes from the Senator from South Carolina, Mr. President, this is my understanding of the position we are in now. If the Senator from North Carolina decides to press on with his amendment, and it is my understanding that he will not, but if he will, it is my understanding that this amendment, if it were adopted by the Senate, would not mandate any particular kind of cut from the Committee on Finance and, therefore, it could come out of anything within the Finance Committee's jurisdiction, social security or anything else.

But I think it is the purpose of the Senator from North Carolina to make a point and, as I understand that point, he does not like the legal services program and he wants to terminate it.

Mr. HELMS. Corporation.

Mr. DANFORTH. Just the Corporation.

It is my understanding that what has been going on in the Congress to date has been whether or not the legal services program is going to be conducted by an independent corporation or in the alternative whether it is going to be a matter that is of discretion with each State to be operated as part of a block grant program within the jurisdiction of the Finance Committee.

Where we stand right now is that the Human Resources Committee has taken the position that it does not want the Legal Services Corporation and, therefore, the only possibility for continuing any legal services program would be in the context of a block grant program within the jurisdiction of the Finance Committee, and that those block grants may or may not be used for the purposes of providing legal services. Am I mistaken on that or is that correct?

Mr. HELMS. I think that is correct.

Mr. DANFORTH. Where we stand now is that if the amendment were persisted with, and further if the amendment were effective, that is if, in fact, the Fi-

nance Committee could be, which I understand it cannot, directed to terminate all legal services programs, then the thrust of this amendment would be to say, "We do not want any kind of legal services program whether it is run by the Corporation or whether it is operated as part of a block grant program." That is it, legal services is dead.

Now, Mr. President, lawyers, in fact, do a variety of things with their time. One thing lawyers do is to lobby. Law firms in Washington are retained by private clients to lobby.

Now the Legal Services Corporation has been criticized for lobbying. That might be a good criticism. I myself have had problems with the Government paying people to lobby Government.

But another thing that lawyers do is to file lawsuits or to defend lawsuits. And it is my understanding that if we were to terminate the legal services program altogether, we would not only terminate the abuse of lobbying, if it be an abuse—and I concede that I think it is—but we would also terminate the possibility of legal services lawyers prosecuting and defending lawsuits.

Now, one of the objections to the Legal Services Corporation is that when it files lawsuits it files lawsuits against the Government. And the Senator from North Carolina pointed out that it sometimes files lawsuits against HHS. Many law firms, private law firms, file lawsuits against government. They do it all the time.

Senator EAGLETON and I both used to be attorneys general of Missouri. And we were always being sued by all kinds of people in the private practice of law. That is the nature of the practice of law. It is controversial sometimes to sue government.

I would only point out that when lawyers file lawsuits they file all kinds of lawsuits and particularly lawyers for the poor. And they file lawsuits against people who have nothing to do with government. They file lawsuits against landlords. They file tort suits relating to automobile accidents. They file suits on contracts. They file product liability suits. They file divorce suits, child custody suits, a whole range of lawsuits, litigation, and various kinds of legal services that are provided for poor people.

And, in fact, they do not necessarily go to court—run-of-the-mill legal advice provided out of offices, just as it is provided to anybody else, are provided to poor people by legal services offices.

So what is really at stake now is not the design of the legal services program, what is at stake is whether there is any legal services program left. Any lawsuits prosecuted or defended on the part of the poor by Legal Services lawyers, any legal advice, any drawing of contracts, any writing of any kind of legal document at all by lawyers, that is what is at stake.

And even if it is conceded that the Legal Services Corporation has exceeded its bounds, this would truly, if it were to be effected, be a case of throwing out the baby with the bath. I would hope that the Government of this country, the executive branch as well as the Congress, would not be so carried away by perceived abuses—if they are abuses—of the Legal Services Corporation that we would decide to even say $100 million a year is too much money to provide for the vast array of legal services programs which could be available to people who are in need.

Several Senators addressed the Chair.

Mr. THURMOND. Mr. President, I yield to the Senator from Alabama.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. DENTON. Mr. President, I just want to note that the chairman of the Labor and Human Resources Subcommittee on Aging, Family, and Human Services, when he recommended $100 million for legal services intended that that $100 million be for legal services per se, not for the perpetuation of the Legal Services Corporation.

If that recommendation was not interpreted in that manner, that is an event over which I had no control.

When we made that recommendation, we recognized that there were legal needs on the part of the poor and we did not intend to alter the block grant approach.

I believe that it is somewhat questionable right now in the minds of many—although you, Mr. President, may have cleared it up—as to whether or not there is some valid claim that the Legal Services Corporation has the potential to exist by virtue of the $100 million, within title XX in the Finance Committee. But this Senator did not intend to keep the Legal Services Corporation going when he recommended that $100 million. And I wanted to say that for the record.

Mr. THURMOND. Mr. President, I yield myself such time as I may require.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise to voice support for the amendment offered by the distinguished Senator from North Carolina (Mr. HELMS), regarding the Legal Services Corporation.

In the first place, the administration has taken a position on this matter which I think is sound. They intend to provide block grants to the States and these services could be provided out of the block grant if the States feel it is wise. If the States do not deem it is wise, why should the Congress do it anyway? So I feel that we should support the administration's position on this matter.

Next, I do not know of any constitutional authority for the Federal Government to go into this field.

For years since I have been in the Senate, we have gone into so many fields of activity that are noble, probably, and worthwhile and helpful programs, but without constitutional authority.

I think the time has come now when we have to ask ourselves three questions: First, is the proposed legislation before us constitutional? If it is not, we should not go any further with it. Next, we should ask, is it wise? In other words, could it be done by some other level of government or should we pursue it at the Federal level? And then, third, can we afford it at the Federal level?

Mr. President, that is the reason this country is so much in debt today. That is the reason we have a debt of almost $1 trillion, because of going into fields of activity where we do not have authority, going into others where it was not wise to venture, and going into still others where we are not able to afford it.

Mr. President, it seems to me that the States constitute the proper level of government for legal services, if they are to be provided to the poor. I would have no objection to a State providing legal services of this kind if it sees fit to do so and wants to do it.

However, I might say that my understanding is that there have been a lot of abuses—that the Legal Services Corporation attorneys have gone into questions of abortion funding; they have gone into questions of school busing; they have gone into other prohibited areas, and they have lobbied—I understand they are actually lobbying now, have been lobbying today. And this is a violation of the statute, the congressional statute.

I do not know whether the people realize this or not. I do not know whether Members of Congress realize it or not. But I would like to call attention to the fact that it is a violation of the law to lobby here on this question. The statute says:

> Whoever, being an officer or employee of the United States or of any department or agency thereof, violates or attempts to violate this section, shall be fined not more than $500 or imprisoned not more than one year, or both; and after notice and hearing by the superior officer vested with the power of removing him shall be removed from office or employment.

This provides a criminal penalty concerning lobbying. It is a violation of law.

Well, are we going to continue at the Federal level to foster a program, to go forward with a program, where those who are participating in it are violating the law?

In fact, some time ago I wrote the Attorney General a letter on this very subject. It was addressed to the Honorable William French Smith, dated March 23, 1981. It says:

> DEAR MR. ATTORNEY GENERAL: I am enclosing for your information a copy of the NSCLC Washington Weekly newsletter for the week of March 13, 1981.
>
> The newsletter contains material which is highly critical of the President and which seems to boast about the success of the Legal Assistance Program in California in its efforts to force the President to spend more on welfare and Medicaid than he wished during his tenure as Governor.
>
> Some feel that the newsletter may be a violation of Title 18, Section 1913 of the United States Code. It appears advisable to have your staff look into this matter.

Mr. President, it seems to me, considering the matter from every angle, that the Federal Government should not have gone into this field, and if it did go into this field, then on account of the budget we are now trying to balance, on account of the abuses by the Legal Services Corporation employees, we ought to get out of the field and let the States handle it.

If the States think it is wise, they have

a right to do it. There is block money being sent to the States which would help the States for that purpose, if they see fit to use the funds for that purpose.

Mr. President, I am convinced that now is the time, and I think the administration is exactly right on this, for the Federal Government to withdraw from this field. Again I say, I do not think the Federal Government should have ever been in the field. But certainly now, we should withdraw from the field.

The Legal Services Corporation, originally designed to give aid to those Americans too poor to afford legal help in such basic matters as settling disputes with their landlords or providing counseling and advice on domestic matters, has instead become a weapon used by social and judicial activists in an unending battle against the very Government that funds their activities. Rather than attending to the legitimate basic legal needs of the poor and disadvantaged, the Corporation and its employees have repeatedly misused taxpayers' dollars to promote their own ideals of social justice or change, using the poor they represent to obtain standing in their suits. It is partly because of this continued, serious misuse of public funds that I oppose continued Federal funding for the LSC at this time.

One recent example of such overreaching by the LSC was presented to the Senate on March 17, 1981, by my distinguished colleague from Kentucky, Mr. HUDDLESTON; wherein he described the efforts currently being made by the LSC to "assist and encourage aliens to enter the United States illegally and to remain here without being apprehended" by the Immigration and Naturalization Service. Now I ask the Senate, is this the type of activity in which the Legal Services Corporation was designed to participate? Here, they are not aiding the poor who come to them with legal problems, but are actually going out and actively soliciting a clientele not even comprised of American citizens.

I would also at this time like to share with the Senate the contents of a recent newsletter sponsored by the National Senior Citizens Law Center (NSCLC), an organization which gets much of its Government funding from the Legal Services Corporation. In this newsletter, material is printed which is highly critical of the President, and which seems to boast about the success of the legal assistance program in California in its efforts to force the President to spend more on welfare and medicaid than he wished during his tenure as Governor. This seems to me not only to be an improper use of funds, which are supposedly being spent to give legal aid to the poor, but may very well constitute a violation of title 18, section 1913 of the United States Code, which prohibits lobbying of Members of Congress with appropriated moneys. Mr. President, I ask unanimous consent that relevant passages of the above-mentioned newsletter and the full text of the letter I sent to the Attorney General on this matter be printed in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. THURMOND. Mr. President, the Senate should also be aware of the comprehensive civil rights regulations proposed earlier this month by the Legal Services Corporation and published in the March 23 Federal Register. These regulations include controversial, far-reaching mandates that recipients of LSC aid must practice nondiscrimination against homosexuals, must have programs for bilingual employees and affirmative action requirements that guarantee the employment of women and minorities at levels that reflect "appropriate labor force characteristics." The proposed LSC rules also seek the inclusion of drug addiction and alcoholism as diseases that would qualify someone as being protected from discrimination as a handicapped person.

In addition, the proposed regulations include an elaborate network of documentation and monitoring to insure compliance with the goals and remedies prescribed. These monitoring activities will, of course, require the further expenditure of funds on matters unrelated to the goal of providing legal aid to lower income Americans.

In conclusion, Mr. President, I think it is evident from the examples I have just cited, and numerous other examples brought to the Senate's attention by the Senator from North Carolina (Mr. HELMS), and others, that this organization has not limited itself to providing necessary legal services to the poor, the original mandate established for the LSC by the Congress. Instead, Legal Services has increasingly become an instrument for social activism and change regarding issues on which there is a substantial division of opinion and debate in this country. I support the goal of equal access to the courts for the poor, but I also believe that the responsibility for providing basic legal services, if indeed it is a function of government at all, is a responsibility which should be borne by the States, perhaps assisted by some Federal funds made available through block grants. Certainly it does not serve the larger public interest to provide taxpayer funding for legal actions designed to effect various agendas for social change, rather than attempting to assist in meeting basic legal needs. Experimentation on behalf of novel legal theories and rights, where it is pursued, should be pursued through the private sector, not with Government funding supplied for the purpose of helping lower income Americans with basic legal services.

For these reasons, I support the efforts by my distinguished colleague, Mr. HELMS, to delete further Federal funding for this Corporation from the budget.

EXHIBIT 1

MARCH 23, 1981.

Hon. WILLIAM FRENCH SMITH,
The Attorney General of the United States, U.S. Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: I am enclosing for your information a copy of the NSCLC Washington Weekly newsletter for the week of March 13, 1981.

The newsletter contains material which is highly critical of the President and which seems to boast about the success of the Legal Assistance Program in California in its efforts to force the President to spend more on welfare and Medicaid than he wished during his tenure as Governor.

Some feel that the newsletter may be a violation of Title 18, Section 1913 of the United States Code. It appears advisable to have your staff look into this matter.

With kindest personal regards and best wishes,

Sincerely,

STROM THURMOND,
Chairman.

[From the NSCLC Washington Weekly, Mar. 13, 1981]

SAVING MONEY? NO, PRESERVING JUSTICE

"So it isn't the cost, after all, that bothers Mr. Reagan about legal services to the poor. It's the very idea of this program, which has enriched American justice, that sticks in the craw of a President who tilted against its lawyers when he was Governor of California. He offers to let the states use some of their other Federal money to sustain the program, if they like. But he knows not many will. Mr. Reagan aims to kill the Legal Services Corporation. He should be stopped.

The issue here is not just another worthy social program that America can't fully afford. It is a matter of protecting a fundamental principle of a fair society—equal justice. Legal Services represents in civil law what public defenders represent in criminal law: a chance for poor people to establish their rights by means available to the rest of society.

Ever since the Supreme Court ruled in 1963 that indigents charged with crimes are entitled to free representation, they have been routinely supplied with public defenders. But the same is not true when poor people are harassed by arrogant welfare agencies or hostile landlords. Without the Federally funded Legal Services program, they would have to represent themselves or rely on overworked legal aid bureaus and inexperienced law students.

The Federal lawyers have not only moved energetically to press individual grievances but have also brought class actions to correct systematic injustice. And that, of course, is why the program has made few friends among the elected officials, businessmen and bureaucrats it has beaten in court. Mr. Reagan has never forgiven California's Rural Legal Assistance program for requiring him to spend more than he wanted on welfare and Medicaid.

Legal Services is no radical scheme for the redistribution of wealth. The American Bar Association and liberal lawyers alike know it is a plan for fairly establishing rights. The relief it manages to obtain for the poor can be won only under laws passed by legislatures and interpreted by the courts. But a legal right, like a tax benefit, is meaningless for those who cannot afford the experts to claim it.

There may be aspects of Legal Services worth debating; it may even be that economies could be found in its $320 million budget. But to kill the program, under the pretense that the states are free to keep it alive, is unconscionable. The issue is not whether to save money; it is whether to preserve justice.

ABA SUPPORTS LEGAL SERVICES—DENOUNCES CUTBACKS

The President of the American Bar Association on Tuesday, March 10, 1981, urged Congress to continue federal funding for legal services for the poor. At a press conference, ABA President William Reece Smith,

Jr., said the Reagan administration's decision to eliminate federal funding of legal services for the poor would have a "devastating" effect on "the right of all people to a fair and equitable access to our justice system." Moreover, Smith said, "to eliminate or weaken a cost effective program that has not only provided legal assistance to millions of our citizens for the first time but has strengthened their belief in our society, would be unfortunate and contrary to the nation's best interest."

* * * * *

LEGAL SERVICES DEVELOPMENTS

The Reagan administration has asked Congress to cut off all future federal funding for legal aid for the poor. In his budget message to Congress, the President confirmed no further funding will be requested for the Legal Services Corporation which funds some 300 legal aid programs over $300 million a year. LSC programs assisted in approximately 1.5 million cases for the poor last year.

As we reported in last week's issue of the Washington Weekly, within the next few weeks Congress will make a number of extremely important decisions on the survival of legal services. These decisions will be made in the context of the budget authorization and appropriations processes—which move simultaneously through the committees of the House and the Senate and on the floors.

Early consideration of legal services will come before the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice. Yesterday, Judiciary Committee Chairman Peter Rodino (D-NJ) introduced a measure (H.R. 2506) which would extend the reauthorization of the Legal Services Corporation Act for another three years, through fiscal year 1984, with the current level of funding ($321 million) for FY 82 and "such sums as may be necessary" for the next two years.

While the Reagan Administration has indicated its desire to provide "zero funding" for legal services, the final word on funding for legal services must come from the Congress. The hearings scheduled by Chairman Robert Kastenmeier's Subcommittee is the first step in the reauthorization process. The actions of the House Judiciary Committee may well indicate the budget recommendations of the House of Representatives.

The Senate Labor and Human Resources Subcommittee on Aging, Family and Human Services is also of critical importance in the process of reauthorizing legal services in that it will consider reauthorization of the Legal Services Act. Hearings have not yet been scheduled.

Ultimately, the Senate and House appropriations committees, taking into consideration the budget and funding levels recommended by the authorizing and budget committees, will establish an appropriation for fiscal year 1982.

The following Congressional committees deal with reauthorization and appropriations for LSC.

Senate

Labor and Resources Committee

Republicans

Orrin Hatch (chairman, Utah), Robert Stafford (Vt.), Dan Quayle (Ind.), Paula Hawkins (Fla.), Don Nickles (Okla), *Lowell Weicker (Conn.), *Gordon Humphrey (N.H.), *Jeremiah Denton (Ala.), John East (N.C.).

Democrats

Edward Kennedy (Mass.), Jennings Randolph (W. Va.), Harrison Williams (N.J.), Claiborne Pell (R.I.), *Thomas Eagleton (Mo.), Donald Riegle (Maine), *Howard Metzenbaum (Ohio).

Appropriations Committee

Republicans

Mark Hatfield (Chair, Oreg.), **Ted Stevens (Alaska), **Lowell Weicker (Conn.), James McClure (Idaho), **Paul Laxalt (Nev.), Jake Garn (Utah), Harrison Schmitt (N. Mex.), **Thad Cochran (Miss.), Mark Andrews (N. Dak.), James Abdnor (S. Dak.), Robert Kasten (Wis.), Alfonse D'Amato (N.Y.), Mark Mattingly (Ga.), **Warren Rudman (N.H.), Arlen Specter (Pa.).

Democrats

William Proxmire (Wis.), John Stennis (Miss.), Robert Byrd (W. Va.), **Daniel Inouye (Hawaii), **Ernest Hollings (S.C.), Thomas Eagleton (Mo), Lawton Chiles (Fla.), Bennett Johnston (La.), Walter Huddleston (Ky.), Quentin Burdick (N. Dak.), Patrick Leahy (Vt.), Jim Sasser (Tenn.), Dennis DeConcini (Ariz.), **Dale Bumpers (Ark).

I thank the Senator for having yielded.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER (Mr. DENTON). The Senator from North Carolina has the floor.

Mr. KENNEDY. A point of inquiry, Mr. President.

Mr. HELMS. Regular order, Mr. President.

Mr. KENNEDY. Mr. President, I am entitled to raise a point of order.

The PRESIDING OFFICER. The Senator from North Carolina has the floor.

Mr. CRANSTON. Mr. President, the Senator is entitled to raise a point of inquiry.

Mr. HELMS. Mr. President, in case there has been a misunderstanding, I would emphasize again that at no time has the Senator from North Carolina ever contended that this resolution contained $100 million that is specifically earmarked for the Legal Services Corporation.

It is preeminently clear to all those who have taken part in this debate over the past few days that there are no funds earmarked for any program.

I do not see any validity to that sort of explanation by the opponents of this amendment. I think it is a red herring and I believe they know it is a red herring.

We are, of course, dealing only with directions to committees to achieve aggregate amounts. But the working assumptions which the committee has used are well known. In the case of my amendment, it is based upon the working assumptions contained in the nonbinding committee report, upon the transcript of the markup, which I realize is even less binding than the report, and upon my discussions with the distinguished chairman and his principal staff.

The fact is that the Budget Committee did include an extra $100 million in its instructions to the Finance Committee, and that this $100 million was to make possible the inclusion of funding of legal services. The distinguished chairman (Mr. DOMENICI) has, indeed, indicated that if the Finance Committee authorizes the inclusion of legal services in the block grants, each State could choose to use a portion of its block grant funds for legal services. That in itself proves my point, but it happens to be the most benign interpretation of what could happen.

The fact is that the Budget Committee has created an extra $100 millon in the reconciliation resolution which has a nonbinding intent that it be used for the provision of legal services. The lobbyists of the Legal Services Corporation are not asleep. In fact, there have been scores of them all over Capitol Hill for the past few days. The president of the Legal Services Corporation has been camping out in the Senate reception room.

The distinguished Senator from South Carolina mentioned lobbying by the Legal Services Corporation. I would say again that, obviously, the Legal Services Corporation itself believes that the retention of this $100 million will permit the Corporation to survive.

The Legal Services Corporation obviously thinks that it is very important to its future survival that this $100 million stay in the reconciliation resolution.

On December 28, 1980, Mr. Alan W. Houseman, of the Legal Services Corporation, prepared a memo, using Government funds, which explained how the Legal Services Corporaiton was going to use Government funds to lobby for its continued existence. This memo was sent to all State coordinators.

Mr. Houseman wrote:

Today we face a severe threat to the continuation and growth of aggressive legal services. At stake is the survival of the legal services movement.

Among the points he made were these:

We will be increasing the Washington lobbying efforts of the Corporation and our organizations. NLADA, for example, has hired a full-time experienced lobbyist to work on legal services and other matters. The new entity being formed will substantially expand our lobbying capacity.

That is not JESSE HELMS talking, Mr. President, that is Mr. Houseman. I do not want Mr. Houseman or any other Senator to tell me that this is not a lobbying outfit. He used Government funds to print a bulletin. The best that can be said for him is that he is candid.

We are developing an affirmative legislative strategy to deal with the difficult situations we face in the next session of Congress with regard to both appropriations and reauthorization.

This year it will be necessary for us to get our reauthorization through Congress. The Senate will not approve our appropriations without a reauthorization. We will also need to work again with the Budget Committees in the House and the Senate. Last year, the budget process played a major role in setting priorities on substantive legislation as well as appropriation levels.

Mr. President, I ask unanimous consent that the entire Houseman memo be printed at this point in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

*Members of the Subcommittee on Aging, Family and Human Services, Jeremiah Denton, Chairman.

**Members of the State, Justice, Commerce, The Judiciary and Related Agencies Subcommittee, Lowell Weicker, Chairman.

[From the Legal Services Corporation]

MEMORANDUM

Date: December 29, 1980.

To: State Coordinators and Other Interested Parties.

From: Alan W. Houseman.

Subject: Summary of our Overall Activities, Strategy and Perspective.

To assure that there is full knowledge among all critical actors in the effort we are undertaking to preserve aggressive legal services, I have prepared this summary of our activities, strategy and perspectives. Much of this comes from the oral remarks that have been given at the Regional Meetings and will not be new to most of you. Most of this information has been and will be supplemented in more detailed ways.

OVERALL PERSPECTIVE

Today we face a severe threat to the continuation and growth of aggressive legal services. At stake is the survival of the legal services movement. By that I mean:

Survival of committed, aggressive and political staff whether they are lawyers, paralegals, support staff or other advocates;

Survival of aggressive advocacy, (i.e., advocacy which utilizes the full scope of representation including legislative and administrative representation, litigation and community education; advocacy which seek all possible remedies; and advocacy which is not restricted in what defendants can be sued, e.g., government entities);

Survival of client involvement and control.

All three of these are essential to the legal services movement. All three of these are under attack and must be pressured and strengthened.

Far more is at stake than the survival of Legal Services. Many social benefit and entitlement programs that have developed during the 60's and 70's to provide concrete benefits to poor people are threatened. As we proceed in our fight, we must take all the steps necessary at national, local or state levels to assure the continuation of other social benefit and entitlement programs. It is essential that we join with others in preventing cutbacks in these programs, and preventing changes in other federal policies, such as affirmative action, which are essential to the continued development of poor people and minorities in this country. At no time must we let our own concerns override the more basic concerns of poor people.

BASIC PRINCIPLES

It is useful to repeat the basic principles which guide the actions that will be collectively taken to preserve legal services.

1. Using all methods of counseling and representation, legal services exists to provide highest quality legal services to all those unable to afford legal assistance in a manner which best enables poor people to assert their rights and interests and effect change in ways that they themselves choose.

2. LSC and the legal services community will continue to emphasize utilization of program resources in a manner that has the greatest impact on the largest number of poor people

3. Legal Services must be accountable to the low-income community in program governance, allocation of limited resources, and addressing the most pressing legal problems of a particular local community.

We will never compromise the basic values and structures of this program and we will continue to resist efforts that would impose restrictions or undermine aggressive advocacy for poor people.

SCOPE OF POTENTIAL THREAT

We will certainly face serious efforts by opponents of aggressive legal services to:

(1) Appoint members to the LSC Board who are not supportive or even hostile to aggressive legal services and the staff attorney system. Currently five terms are up; in June, the additional six positions will be up for nomination.

(2) Add additional restrictions on the types of representation (legislative and administrative advocacy), on types of cases (aliens, education, abortion, suits against government entities), or on attorney fees, support and training.

(3) Reduce our appropriations and/or earmark existing or new funds.

(4) Increase control of legal services staff and advocacy through a hostile bureaucracy, through political pressure from Congress, or through local and state government.

(5) Increase the role of local and state governments in funding and overseeing legal services delivery.

There will also be attempts by the "far right" to dismantle or eliminate the legal services program. These proposals have surfaced during the transition and will also arise during consideration of our reauthorization in 1981.

We can not now predict what efforts will be made, by whom and their timing to restrict or dismantle legal services. There are many possible scenarios that may develop both in the short and long run. What we are doing is to plan for every possible development.

POLITICAL SITUATION

We have a new administration headed by a President who has historically shown hostility to Legal Services. While Governor of California, President-elect Reagan attempted to veto and dismantle California Rural Legal Assistance. He also sought to impose additional controls on aggressive advocacy by Legal Services attorneys.

In the only public statement (in the American Bar Association Journal), the President-elect gave great deference to the pro bono efforts of private attorneys and called for an evaluation of the Legal Services Corporation to ensure "that it is serving the purpose for which it was intended." He went on to say: "Such a program should not be used to fund, at taxpayers expense, suits which are in reality attempts to force a judicial resolution of political and public policy issues properly left to the elective branch through its representatives in Congress. . . . I would also like to explore possible alternatives to the monolithic federal approach to the legal problems of the poor. I believe there is room for increased activity on the part of local government and local bar associations."

Some of President-elect Reagan's senior advisers and key cabinet members are people who may not be particularly supportive of legal services and who lack understanding of our program.

We face a much more conservative Senate which is now controlled by Republicans and southern Democratics. Many of the newly elected Senators are idealogically opposed to legal services. While we have some strong support in the Senate Committee on Labor and Human Resources, we face severe problems with the entire Senate.

While the House is still in Democratic control, it is much more conservative. Many believe there is now a majority of conservatives in the House which can block most liberal legislation. Although, our committee will remain supportive, we will continue to face, as we have in the past, severe problems on the floor.

The American Bar Association, though remaining steadfast in support of aggressive legal services, has moved to introduce legislation seeking to mandate the involvement of private attorneys in the delivery of legal services. We must not let this development affect their support for effective aggressive advocacy.

Many of our allies are themselves politically weakened. Moreover, the organizations from which we traditionally receive support have not yet made the survival of legal services a high priority. We may not have reached out sufficiently to other potential allies whether on a national or local level.

We have lost the support of large numbers of clients and poor people. Client involvement and control has not become a reality in most programs. Client organizations both on a local and national level have few resources to effectively advocate continuation of legal services.

We are not prepared for battle. We are not effectively united. The Legal Services Corporation has not had to face a major political crisis since its inception. The Legal Services Community has not had to face a political crisis of this severity since 1973. There are many new people in Legal Services. Some may not share the values of the community's leadership. Some may not be willing to take political risks to preserve aggressive advocacy.

On the other hand, we do not start from a position of weakness. We are stronger and more geographically diverse than ever before. We have able and committed staff working in programs throughout the country.

The Legal Services Corporation is an independent entity. Many people on the Hill, in the administration and the press perceive LSC to be an efficient and well run institution.

We have more resources to devote to this effort than we have had in the past. We are more sophisticated politically at both national and local levels.

WHAT WE ARE DOING TO WAGE THIS BATTLE

First, we are attempting to unite and join together in this struggle. We have formed a coalition with PAG, the National Clients Counsel (NCC), NLADA, the National Organization of Legal Services Workers (NOLSW) and the Minority Caucus. It will be expanding to include others from within the legal services community, such as National Association of Indian Legal Services (NAILS), migrant farm workers group, women's caucus, Organization Legal Services Backup Centers (OLSBUC), state support and others. It will also expand to include organizations who are allies and supporters of legal services.

The coalition members will be forming an outside entity to lobby and coordinate survival activities on behalf of the legal services community. This entity will be established soon and will begin to function early in 1981.

Second, we are expanding and strengthening our state coordination network. This is essential in order to assure effective communications within the community and for our congressional efforts.

Third, we are seeking to diversify and strengthen the base of local and state programs. It is essential to broaden the base. In the short run, a strong local political base will be critical if we are to successfully obtain support from Congress for the continuation of an aggressive legal services program. Effective lobbying in Washington will require local programs to establish credibility and a base in their communities and to develop allies who can and will assist them in persuading their Congressman and Senators to support legal services. In the long run, a strong local base will be necessary to survive possible efforts at local and state control through block grants or private bar control.

These plans involve a series of regional meetings that will attempt to help programs identify how to shore up and strengthen their base of support including support from the private bar, increased support from organizations that can be effective allies, effective use of the media and improved relations with Congressional offices. In addition

to the meetings, there will be technical assistance, training and other assistance available to local programs.

Fourth, we are strengthening our base of support nationally by developing closer ties and better relationships with Civil Rights, labor, elderly, consumer and many other organizations and individuals who have been allied with us in the past. We are also reaching out to new organizations as well to develop alliances and obtain support. Because legal services is only one of many issues with which these organizations are concerned, the National Support Centers and others will be joining with these organizations in common efforts to prevent benefit program reductions.

Fifth, we are addressing short-term issues that require immediate action. Through the National Legal Aid and Defender Association the coalition has identified potential nominees for the LSC Board of Directors who are supportive of legal services but also acceptable to the Reagan Administration.

In addition, we are working to acquaint key people in the Reagan Administration and in Congress (including the new Senate leadership) with our program, its independence, and its achievements. We are shoring up and strengthening the support we have among some members of the Reagan team. We are identifying those who can influence members of the transition teams and the appointees of the new administration.

Sixth, we are taking steps to protect programs and our overall delivery system. We will address basic bureaucratic and programmatic vulnerabilities that have been identified by GAO reports and by others. We are also reviewing our entire support structure to make sure it is sufficiently insulated from political pressure and can function effectively in the future.

Seventh, we will be increasing the Washington lobbying efforts of the Corporation and our organizations. NLADA, for example, has hired a full-time experienced lobbyist to work on legal services and other matters. The new entity being formed will substantially expand our lobbying capacity.

Eighth, we are developing an affirmative legislative strategy to deal with the difficult situations we face in the next session of Congress with regard to both appropriations and reauthorization.

This year it will be necessary for us to get out reauthorization through Congress. The Senate will not approve our appropriations without a reauthorization. We will also need to work again with the Budget Committees in the House and Senate. Last year, the budget process played a major role in setting priorities on substantive legislation as well as appropriation levels. Finally, confirmation in the Senate of LSC Board nominees may require some efforts by the legal services community.

Although an affirmative political strategy has not yet been fully developed, it will include at least the following components:

1. Selling the merits of legal services to Congress, media and others at the local, state and national level. Much of this will be done by local people and local programs.

2. Developing a broad range of support from a wide sector of group and organizations and making it in the interest of these groups for legal services to continue without restrictions. This will require effective work at a local, state and national level by legal services programs around the substantive issues affecting the members of the groups and organizations from which we seek support.

3. Improving our relationships with the private bar. We are developing a concrete partnership with the American Bar Association and other bar associations to preserve and expand legal services. This will require full implementation of the Delivery System Study Policy Report and increased involvement of private lawyers in the delivery of legal services. As part of our strategy we are seeking increase funds for expansion in the Fiscal Year 1982 Budget request. By seeking funds from Congress, we believe we can obtain support for the maintenance and expansion of existing programs and prevent mandates in the Legal Services Corporation Act that would reallocate current resources.

4. Developing an affirmative response to Congressional efforts to impose restrictions on legislative representation and other limitations on the scope of representation to be provided to our clients.

To develop this affirmative strategy we are preparing at least two background papers for circulation and discussion. John Dooley is preparing a paper discussing the private bar issues and options to address them. We are also preparing a paper analyzing possible options to prevent legislative representation restrictions. We will be meeting with a number of people to discuss each of these issues and will be holding strategy discussions with the coalition members in early January.

In considering our affirmative strategy we are meeting with many advocates who are experienced in political and legislative strategy in Washington. We are seeking their views on how to take the initiative, how to best use the private bar issue and how to prevent restrictions on case types or the scope of representation.

Regardless of our efforts in Washington, an affirmative legislative strategy is dependent upon effective relations on a local level with congressional offices with state and local bar associations, and with organizations and individuals who are potential supporters and allies.

WHAT MUST BE DONE

Each legal services program must undertake the following:

1. Develop a specific action plan at state and sub-state levels. This plan should detail how each state will seek to maintain and improve or develop Congressional relations, relations with local and state bar associations, relations with allies and supporters, and relations with local and state governmental entities. The plan must also discuss efforts to develop and improve media relations and develop new media contacts. Finally, the plan should specifically include concrete steps to maintain, improve and/or develop meaningful relations with poor people's organizations.

Many states have already developed such plans. Others are beginning to do so and will be completing the plans at the regional meetings.

These plans will require every program to shift program resources to undertake the efforts outlined in the plan and to change the priorities and work of project directors and staff.

2. Appoint a program coordinator or coordinators who will have overall responsibility of coordinating the implementation of the state and sub-state plans and assuring that all survival activities are carried out.

3. Develop timely and effective communications with the state coordinator. The state must assure that the coordinators have adequate staff and a means of communicating effectively and in a timely manner with all programs.

4. Develop effective internal communications networks that assure all staff with adequate and timely information about developments nationally and within state and local areas.

5. Continue to identify people who have contacts with officials of the Reagan Administration. State Coordinators and relevant Washington actors should be informed of these contacts. Please make sure I am informed of these contacts.

6. Continue to identify potential Board nominees who are supportive of legal services and yet potentially acceptable to a Reagan Administration. Names of potential nominees should be sent to Howard Eisenberg at NLADA.

7. Analyze new members of Congress from your area and review all old members of Congress. What is needed is carefully compiled information about all members of Congress. This includes: attitudes, public statements and prior voting records toward legal services and other social benefit programs; their supporters and major contributors from within the bar and general community; possible contacts with their supporters; and their political base in the district or state. This information should be sent to the state coordinator and Office of Government Relations. OGR will develop an analysis of each Congressional person and office. The completed analysis will be sent to each state and program coordinator. The analysis will also include such information as prior Congressional voting records on legal services, positions on other poor people's issues, committee assignments, names and background of key staff, and which members influence this member.

The difficulties we will face now and during the next few years will require sacrifice and discipline by LSC and program staff. Among other things:

1. We must start taking this effort very seriously if we are to succeed.

2. When program coordinators are asked to do something by the state coordinator, by LSC or members of the coalition, they must act responsibly and without delay to see that the tasks are done or that we are immediately informed that they can be done so that we can take the necessary actions to see that they are done.

3. This is the time to act and act quickly to organize within each state and local program to shore up and strengthen the base of political support.

4. Coordinated activity is important. This is not a time to act totally independent of the effort that is being initiated. Project directors and staff will have many good ideas, practical suggestions, intelligence and experience to share with national actors and with other programmatic people. It is important to work together and keep in touch.

COALITION BUILDING

A critical means of strengthening the local political base is to develop coalitions and working relationships with local organizations and individuals who would see it in their interest to assure the continuation of an aggressive legal services program.

Effective coalitions and working relationships will involve programs assisting these groups and organizations in concrete ways. Merely acting in concert or seeking assistance will not be sufficient. The local program must actually assist groups, individuals and coalition members so that they have a real stake in the survival of the legal services program. The legal services program must become a integral part of their activities.

Usually coalitions and working relationships will evolve out of common work on substantive issues. Legal services should seek out others in the community who may be involved on similar issues of concern to the program and client community. They should also seek to participate in activities by others that affect issues and problems of the client community.

There are a variety of these with whom local programs can develop relationships. Some are involved in advocacy for the poor (such as Community Action Programs); some are involved in services for the poor. Many are involved in common issues which affect both the poor and the members of the group (e.g., unions and food stamps; Associations of Retarded Persons and special education; elderly organizations, etc.). Many are involved directly in advocacy for

populations which include the poor (civil rights, etc.).

In developing working relationships and coalitions on substantive issues, legal services programs and staff should not forget their principal role as advocates for the poor. The point of developing working relationships and coalitions is to strengthen the power of poor people not to shift the program toward a different population. Legal services should not be viewed as compromising the interests of poor people for its own survival or for the broader good of the coalition. Moreover, legal services should seek to involve poor people directly in the coalitions and bridge relationships between poor people and individuals and organizations with common interests or issues.

THE BROADER PICTURE—THE NEEDS OF OUR CLIENTS

The struggle for survival of aggressive legal services should never be perceived by us to be a higher priority than the struggles that poor people will face during the next several years as this new administration and Congress attempt to curtail social benefit and entitlement programs and civil rights activities. We must not under any circumstances stop using most of our resources and most of our energies to continue providing aggressive impact advocacy to improve the lives and power of poor people.

Moreover, we must take immediate steps to develop effective efforts within each state and on a national level to preserve the gains won by poor people and their advocates during the last 15 years. And we must continue to strive to increase social benefits, improve housing and health care, prevent arbitrary private and public actions, improve job and educational opportunities, and eliminate discrimination.

This will require targeting increased resources on substantive issues which will arise on a national and state level: development of more effective national and state networks of staff, clients and other advocates and allies; improved communications to each state about national developments and within each state about national, state and local developments; strengthening our capacity for legislative and administrative advocacy; and developing more effective strategies that use all of the tools available including more effective use of litigation as well as community education, legislative and administrative representation, networking and coalition building.

Working with national and state support projects, we are strengthening current efforts and developing new approaches that will assist local and state programs in undertaking these critically important activities for survival of poor people's basic needs. Although there are different networks that will be used to work directly on these "substantive" activities (i.e., the substantive networks that have developed through national and state support projects), we will keep all state coordinators informed of national substantive developments.

Thus, as we enter this struggle for our survival, we must never forget that the purpose of our effort and the shift of some resources to our survival is not to save ourselves (or our jobs), not to save our current ways of doing things or even our current structures for that matter. Instead, the purpose of our efforts to preserve for poor people a force that they can call upon to use to improve their economic and social well-being.

Mr. HELMS. Mr. President, so it is not surprising, therefore, that the Legal Services Corporation is very interested in the outcome of its budget strategy. Now let us take a look at what has happened.

The jurisdiction for the Legal Services Corporation, of course, is in the Labor and Human Resources Committee. That committee cut spending in the legal services account down to $100 million, which was still $100 million more than the administration requested. Nevertheless it was the intent of the committee to terminate the Corporation. I quote from its report:

The committee proposes to terminate the Corporation, to reduce current available Corporation funding by approximately 70 per cent for purposes of the block grant and to give states the option to pool existing resources to fund worthwhile programs which address the true legal needs of the poor. The $100 million recommended for the account containing the Legal Services Corporation is, therefore, intended to fund legal services within the framework of a consolidated block grant to states for social services. Legal services would be authorized activities within the programs encompassed by the block grant.

In the Budget Committee, however, the $100 million was shifted from Human Resources to the Finance Committee's direct spending figures. "Direct spending" means that the funds are off-budget entitlements outside the appropriations process. That means that the amount of spending is determined by the number of eligible beneficiaries who meet the definitions of the entitlements.

The Budget Committee's instructions to the Finance Committee, if the Senator from North Carolina understands them correctly, is a set of directions to manipulate the definitions of eligibility so as to reduce projected off-budget spending in those accounts by 25 percent. In other words, in direct spending accounts, we cannot set targets of actual numbers. All that we can do is to change the definitions so that not as many persons are eligible for benefits. It is essentially a legislative instruction.

These directions appear on page 99 of the report. I quote:

COMMITTEE ON FINANCE

PRESIDENT'S PROPOSALS

Reductions in direct spending

Function 500: Education, Training, Employment and Social Service.

Program: Social services grant consolidation: merging Title XX of the Social Security Act—grants to States, day care grants, and grants for State and local training; Title IV–E foster care and adoption assistance.

Reconciliation proposal: To fold these programs and others into the Administration's proposed social services grant consolidation and to reduce the authorized funding level by about 25 percent.

Source of proposal: President.

Title XX of the Social Security Act is a catchall of grants to the States. It includes broad language which has already been interpreted as permitting grants for the provision of legal services. So the $100 million from the Legal Services Corporation account, that the Labor and Human Resources Committee wished to use to terminate the Corporation and fold into the grant block program was shifted from that account to the Finance Committee direct spending account. The effect of this shift is to take the provision of legal services out of the normal authorization and appropriation process and put it in an entitlement category bypassing authorization and appropriation.

Of course, this action is not definitive. The Finance Committee would still have to act to adopt the block grant approach and to include legal service as an eligible program. So what we could expect then is a full-scale lobbying campaign by the 5,500 lawyers of the Legal Services Corporation to keep the issue before the Finance Committee for action. The action of the Budget Committee keeps alive the hopes of those who are battling for what Mr. Houseman calls the "legal services movement," that is to say, a coordinated strategy of using the courts to enact quasilegislative entitlements bypassing the U.S. Congress.

Indeed, at any given moment, the Department of Health and Human Services, for example, is defending itself against 20,000 suits filed by Legal Services attorneys across the Nation. These suits are often filed with the cooperation of lower levels of the bureaucracy. The taxpayers of this Nation are paying to have suits filed against them and against their taxes. The time to stop this is now.

Moreover, the Budget Committee action makes it possible to bypass Finance Committee intentions by means of a floor amendment to some appropriate future vehicle. The Budget Committee action added $100 million to the title XX targets; the Helms amendment would take that $100 million away. If the Helms amendment fails, it would result in a direct invitation to attempt to use the extra $100 million provided to the Finance Committee in the reconciliation act in such an amendment. It should be noted that, since there is no "earmarking" in this resolution, the $100 million amendment could be used in future action to attempt to restore funds to the Legal Service Corporation itself, whatever the intention of the distinguished chairman of the Labor and Human Resources Committee, the Finance Committee, and the Budget Committee.

The time to face this issue is now. By eliminating the unwarranted $100 million that was added, uninvited, to the Finance Committee direct spending category, we take away the invitation to further involvement with that unnecessary issue.

It has been made perfectly clear to me by statements by the distinguished Senator from Kansas (Mr. DOLE), the distinguished Senator from Louisiana (Mr. LONG), the distinguished Senator from South Carolina (Mr. THURMOND), the distinguished Senator from Utah (Mr. HATCH), and others, including the distinguished majority leader (Mr. BAKER), that the will and intent of the majority of this Senate is clear. I see no point in pressing the amendment. For that reason, Mr. President, I withdraw the amendment.

Several Senators addressed the Chair.

Mr. THURMOND. Mr. President, I will be glad to yield to anyone else, if I have authority to do it.

Mr. CRANSTON. Mr. President——

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I op-

pose the amendment of the Senator from North Carolina, which would reduce the available funds for social services to our most needy citizens by $100 million.

The denial of these funds would limit States in their ability to choose to provide foster care, nutrition for the elderly, family counseling, juvenile justice, home health services, and other vital assistance. It would mean that an additional cutback, on top of all of the other budget reductions, would be imposed on States.

I also would argue against this amendment even if its only effect would have been as described initially by the Senator from North Carolina. The provision of legal services to the poor is a critically important program to keep faith with our commitment to equal access to justice.

In this particular amendment, it would prevent States from making a judgment that the most pressing human need was to enable an elderly citizen to have the legal counsel necessary to obtain rightful benefits, whether social security, medicare, or food stamps.

To deny that option to the States seems a totally contradictory position to that usually advanced by the Senator from North Carolina.

However, nothing in this amendment affects the Legal Services Corporation nor does this resolution in any way prevent the Human Resources Committee from reauthorizing the Legal Services Corporation.

What this amendment clearly does is take away $100 million that could be used to feed the elderly, provide care to the sick, to counsel the poor and to provide housing for orphans.

LEGAL SERVICES

Mr. President, I rise to oppose the amendment of the Senator from North Carolina which he described as an attempt to eliminate funding for legal services.

This Nation has asserted the principle of equality before the law as a fundamental right. Yet, until the creation of the Legal Services Corporation, that principle had a small codicil—equality before the law except if you happen to be poor.

In this society in 1981, we cannot afford to step back into the past when the poor were denied equal access to our system of justice. The simple fact is that tenants were illegally evicted, poor consumers victimized by fraud, elderly Americans denied their legal benefits and thousands of other Americans robbed of their rights because they could not afford a lawyer.

Since 1975, we have witnessed a gradual extension of legal assistance to poor people across this land. The Legal Services Corporation has used its funds wisely and well. More than 93 percent of all funds go directly to services at the local level. It has achieved coverage over the entire Nation although that coverage remains limited to an average of two attorneys for each 10,000 poor people. Before the Corporation came into being, there were whole regions of the country where the poor had no access to legal counsel. Last year, the local legal services programs served 1.2 million people.

The Legal Services Corporation, for the first time, has permitted this Nation to state that the poor have a real chance to have their rights and interests represented through the legal system.

Without the legal services program, the individuals would be denied effective access to justice. The consequences of that denial can be enormously damaging. It can mean children forced into programs for the mentally retarded without any evaluation of their intelligence, mothers left without money to feed their families when a benefit check stops, elderly persons whose apartments do not have heat because a landlord did not pay the utility bill.

Those who oppose this program do not seem to recognize how Legal Services attorneys actually spend their time. Of the more than 1 million legal matters handled by the local attorneys and paralegal aides, "family" issues constituted 30 percent of the total—issues spanning adoption, divorce, support, spouse abuse, and custody questions. Income maintenance and housing were the next largest category of legal problems, followed by consumer issues. These basic questions of food, shelter, health, and income are crucial to the survival of the poor.

Even those who are opposing continued Federal funding do not deny that the poor have a need for these services. Instead they argue that it should be a responsibility of the private bar.

Yet, the private bar has spoken out loudly and repeatedly that the Nation needs the continuation of the Legal Services Corporation. The current president of the American Bar Association and every president since 1965 has supported this concept. The legal services program that was begun in 1965 under the Economic Opportunity Act had the strong impetus of then ABA president and now Supreme Court Justice Lewis Powell. They all have recognized that the private bar is neither able nor willing to provide these services. In Massachusetts, it has received the endorsement of our highest court, of our judges and of our bar association.

Frequently, opponents of Legal Services argue that the legal services program is an agent of social or political change. They forget how the law works. They disregard the fundamental truth that Legal Services attorneys represent clients—breathing, living, human clients. They win only when the courts find that their clients are being treated improperly, unfairly, and illegally. If, as a matter of law, individuals are being denied their rights, then the act of bringing that fact to the surface through legal action on behalf of a poor client may produce change, but only change that is in accordance with the law.

I think it should be emphasized that the Federal Government spent only $321 million on legal services a year ago to provide for the needs of the poor. Yet, we permitted the largest and wealthiest corporations in this country to have their legal services subsidized by the American taxpayer. Legal services are legitimate business expenses and, as such, are deducted from their taxes. When the fortune 500 can have their legal expenses covered by the American taxpayer to a significant degree, surely public policy justifies the continuation of a federally-supported legal services program for the poor.

We have heard the administration discuss its safety net to cushion the very poor as they are imperiled during the current budget storm. Legal services is a vital means to assure that the laws establishing those "safety net" programs will be enforced. Without it, too many needy families will find that the safety net has been pulled out from under them.

Let me cite the testimony of the president of the Legal Services Corporation, Dan Bradley, to focus on the kinds of services that the Corporation provides:

In western Arkansas, an office opened in Russellville this past September. Within 2 months, the single Legal Services attorney there helped an elderly woman in Yell County to avoid an unfair eviction, a Pope County welfare recipient to obtain support from her child's father and a young couple in Johnson County to obtain the return of their car which had been wrongfully repossessed.

In several rural counties in Iowa, a Legal Service office helped residents end their 6-year quest for action on social security disability claims by cutting through the redtape and obtaining those legally entitled benefits for them. In Cerro Gordo County, a poor woman confined to a county home for 18 years as a result of a request for emergency subsistence has been released.

I could go on to enumerate other cases in every part of this Nation where Legal Services attorneys have helped the poor secure their rights under the law.

This Nation must permit the continued availability of legal services for the poor.

INTERNATIONAL MILITARY EDUCATION AND TRAINING PROGRAMS

Mr. HAYAKAWA. Mr. President, I came to this Chamber last Wednesday and delivered a speech commending the work of the Budget Committee and indicating my support for the budget reconciliation. I knew that many programs would have to be cut in order to stay within the levels established for each account and was prepared to work with these figures during the authorization process of the Agriculture, Foreign Relations, and Small Business Committees of which I am a member.

A top priority of the Reagan administration is to greatly improve our national security. And this must be accomplished in part by the exercise of influence throughout the world. The President sent Congress a carefully developed foreign aid package to be used as a tool for this conduct of foreign policy.

I am deeply disturbed by the action which took place on the Senate floor last Friday removing $200 million from foreign assistance for fiscal year 1982 and $200 million in fiscal year 1983. I firmly believe that foreign aid, well spent, will yield benefits which enhance our national security. Therefore, I am concerned that this action and any further attempts to reduce foreign aid will have negative implications on the

ability of the United States to operate in the international arena.

One such program that may be affected is the international military education and training programs (IMET). The proposed security assistance program for fiscal year 1982 recently announced by the administration includes $48 million for this valuable instrument of U.S. foreign and security policy. This is nearly a 50-percent increase over the levels requested and authorized during the past few years, and very well worth it.

The IMET program is one of the few remaining grant elements of our security assistance programs and a very important vehicle for developing strong and enduring ties with the military establishments of developing countries. This program covers a wide variety of training and education, ranging from short, technical courses within the recipient countries, to longer courses during which senior and midlevel officers are in resident in the United States attending our professional military colleges.

It is these longer term courses, during which participants are exposed to life, culture, and values in the United States, however, which have been the most effective vehicle for developing enduring ties to what has often been the modernizing sector in many of the developing nations—their military establishments—and for disseminating American ideas about political life and social values. This kind of training serves not only to establish common approaches to military organization, procedure, and equipment, but more importantly to convey American views about the proper role of the military in society, standards of civil order and approaches to human rights. On a more practical level, such training programs have, over the years, served to establish numerous personal relationships between American officers and ordinary citizens and individuals in developing countries who frequently achieve positions of leadership, not only in their respective military establishments but often in the political leadership in their countries.

Over the past decade, however, the number of students we have trained under the IMET program has declined dramatically, as is made clear in a table extracted from the GAO report which we had prepared for the committee.

I ask unanimous consent that the table be printed in the RECORD.

There being no objection. the table was ordered to be printed in the RECORD, as follows:

TRAINING PROVIDED UNDER THE INTERNATIONAL MILITARY EDUCATION AND TRAINING PROGRAM, FISCAL 1970–79

	Army	Navy	Air Force	Total
1970	11,029	3,782	7,036	21,847
1971	12,698	4,637	8,336	25,671
1972	43,569	1,876	6,786	52,231
1973	32,012	1,677	3,712	37,401
1974	5,971	1,759	4,767	12,497
1975	4,952	1,384	2,523	8,859
1976	3,956	1,240	1,765	6,961
1977	2,746	751	1,336	4,833
1978	2,093	753	1,570	4,416
1979	1,903	542	1,290	3,735
Total	120,929	18,401	39,121	178,451

Mr. HAYAKAWA. This decline, of course, is in large part a result of our debacle in Southeast Asia, however, it has been exaggerated and continued since our withdrawal from Vietnam as a result of two factors: A steady decline in funding levels and an unfortunate change in the pricing of our training which had the effect of making many courses much more expensive, thus reducing the number of students who could be trained under any particular program level. When this situation was brought to my attention, I undertook an effort to reverse the process. The result was that last year, at my initiative, the Senate made an important change in the way in which the costs of this training were allocated. We wrote into the law the requirement that these programs be charged on the basis of the additional cost incurred by the U.S. Government for providing such training, rather than including a prorata share of the total cost of operating and maintaining the facilities at which such training takes place. The result of this change, in most cases, is that most training is cheaper than it has been in recent years, and more participants—approximately 40 percent more—can be trained for any particular program level. This was, of course, a sensible change, since the dollars allocated to this program are foreign policy dollars, and increasing the number of participants who can be trained under any program level, amounts to making those scarce foreign policy dollars go further. Prior to this change, the funds authorized under this program were, in effect, subsidizing some of the normal operation and maintenance of the Defense Department facilities at which this training takes place. Though the amounts were trivial in terms of the total operations and maintenance budget of our Defense establishment ($10 to $15 million per year at most) they were by no means trivial in terms of their impact upon the intended purposes of the IMET program. They nearly halved the number of students who could be trained at a particular level. The change I have described was actively supported by our military services who are the providers of this training and who also must budget for the operation and maintenance of their facilities. We see the clear benefits the United States derives from the IMET program.

As I said last year in presenting the amendment to the Foreign Relations Committee—

I believe there is near unanimity among those who are responsible for projecting the United States' image abroad that the miscellaneous "exchange-of-persons" programs are our most effective tool. Many of these programs have been in existence since the end of World War II, and many of today's national leaders have become our friends under the influence of their early experiences as guests of this country. When I visited Thailand last year and called on General Prem, the Commander in Chief of the Thai Army, he and all the senior staff officers in the room remarked with visible pride that they had some training in the United States.

The second part of our effort last year, and one on which we did not do as well, was simply to add funds to the IMET program. We managed to increase the authorized program level by only a few million dollars. Thus, I am very pleased to see the new administration, recognizing the value of these programs, propose so significant an increase in funding. This increase, combined with the new costing procedures, could more than triple the number of students participating in this program. I will support the President's program very actively, and urge all of my colleagues to do likewise.

In conclusion, Mr. President, I ask unanimous consent to have printed in the RECORD the administration's proposed International Military Education and Training programs for fiscal year 1982.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Fiscal year 1982 international military education and training—IMET

(Millions of dollars)

Program total	47.7
(Budget authority)	(47.7)

THE PROPOSED TERMINATION OF THE SECTION 8 INDIAN HOUSING PROGRAM

● Mr. INOUYE. Mr. President, I wish to express concern over certain issues that arise as the result of budget oversight hearings held by the Select Committee on Indian Affairs on March 23. The revised budget proposals for fiscal year 1982 reflect that the administration proposes to terminate the section 8 Indian housing program at the Department of Housing and Urban Development.

Reports filed by the Department of HUD over the past years reflect that Indian housing is among the poorest in the Nation; 90 percent of all new housing is financed by HUD, 70 percent being mutual help homeownership housing. The January budget submission would have provided $25.1 million in new contract authority for initiation of 4,000 new units of housing on Indian reservations. The estimated total need stands at around 60,000 units of housing needed in the next few years.

Mr. President, the original justification for the termination of this housing program was an apparent excessive cost of the program. However, it appears from the testimony offered at the select committee's hearing that the unit costs of the Indian housing are not radically different from the unit costs of similar type non-Indian housing programs offered in similar geographic settings. Under the circumstances, Mr. President, I have grave doubts with respect to the wisdom or justification for the termination of the Indian housing program by the Department of HUD. I do believe that some cut in this program may be in order, but it should not be any greater than that of the non-Indian programs.

Mr. COHEN. Mr. President, I do join with my colleague, the senior Senator from Hawaii, in his sentiments. I have a related concern respecting the proposal to eliminate funding for any further construction of water and sanitation facilities by the Indian Health Service. This program involves the delivery of water and sanitation facilities for the new housing constructed by the Department of HUD. It appears from the testimony of HUD witnesses that there are a number of new housing units awaiting construction of water and sanitation facilities and that there are some 15,000 additional units of housing that are in the pipeline and will be constructed over the next 3 years. Elimination of budgetary authority for construction of water and sanitation facilities by the Indian Health Service means that none of these housing units would receive any water or sewer facilities.

This clearly is a case where the budgetary proposals for one agency were not matched to the program activity of another agency. It is my understanding that the administration is considering restoring funding for this program and I certainly urge their favorable consideration for such restoration.

Mr. President, I do not offer any amendments to Senate Concurrent Resolution 9. I do not believe the resolution precludes examination by the Budget Committee at a later date when they mark up the first concurrent budget resolution. I join the senior Senator from Hawaii in urging that serious consideration be given to restoring funds to both the HUD Indian housing program and to the Indian Health Service at Health and Human Services to alleviate this problem.●

SOCIAL SECURITY MINIMUM BENEFIT

● Mr. LEVIN. Mr. President, earlier this week we voted to dismantle the social security minimum benefit.

It is hard to believe that the Senate supported such a clear breach-of-contract with the elderly citizens of this Nation. What have we come to when we find it necessary to renege on a commitment made to millions of older Americans who have reached the twilight of their years?

Mr. President, many of the people who would be affected by the elimination of the minimum benefit are medically indigent, many have no close family members and most cannot work.

We are talking about 13,678 beneficiaries who are over the age of 95; 66,396 are between the ages of 90 and 94; 66,552 are between 85 and 89; 284,534 are between 80 and 84; 410,376 are between 75 and 79; and 508,226 are 70 to 74 years of age.

These are the people who will be affected—the people that are being told that the Government has changed its mind about them—that it has decided not to honor its commitment to them.

Mr. President, the psychological effects on many of our elderly as a result of such action will be horrendous. And so will be the effects on most Americans depending on social security when we realize we can no longer depend on the word of our Government regarding social security benefits.

Social security is less secure after this week's vote.

This is not just my view—it is a view widely shared. Indicative of this perception is a copy of a letter I recently received from Rabbi Albert Lewis of Grand Rapids, Mich. In his capacity as a gerontologist, he points to the impact this proposed change will have on the morale of those who participate in the system. I ask that the text of his letter to the Commissioner of Social Security appear in the RECORD.

The letter follows:

TEMPLE EMANUEL,
Grand Rapids, Mich., March 6, 1981.

DEAR COMMISSIONER: As you and your advisors deliberate toward the possible resolution of the current Social Security dilemma, I encourage you to recognize that any changes in the current system will affect not only the current recipients but will also have the potential of undermining the morale of all those currently contributing to the system. This change in morale may evidence itself in intergenerational conflicts, loss of faith in government, and fear of the future and future planning. Undoubtedly, changes which may adversely affect the present and near future aged recipients will also negatively affect the attitudes toward aging in this country of all persons through the year 2000.

As a gerontologist, I urge you to thoroughly consider the short and long term merits of all proposed alterations. You are being asked, I believe, to consider not only the fiscal integrity of the Social Security system, but also the emotional and spiritual well being of the system's present and future participants. I urge you to proceed with great caution.

Respectfully,

Dr. ALBERT M. LEWIS,
Rabbi.●

ROUTINE MORNING BUSINESS

Mr. COCHRAN. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business for not to exceed 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

PHILIP CYR

Mr. DODD. Mr. President, it is appropriate that we honor the memory of young Americans who have given their lives in service to their country in times of war and as part of our Armed Forces. It is equally appropriate that we honor the memory of young Americans who have died in peaceful service to the United States.

One such young man who gave his life to our country is Philip Cyr. Philip Cyr served in the best tradition of our Nation as a Peace Corps volunteer in Nepal. Last October, shortly before he was due to return to his family in West Hartford, Conn., Philip set off on a trek into the

foothills of the Himalayas. He never returned. Last week, after months of intensive searching, his body was found. He had apparently been robbed and murdered in a remote village.

I have personally expressed my heartfelt sympathy to Philip's parents, Normand and Jean Cyr. However, I wanted to take this opportunity to recognize both Philip's and his parents' sacrifice on the floor of the Senate.

As a former Peace Corps volunteer myself, I understand the motivations which brought Philip to a tiny village in Nepal to teach school for 2 years. Philip's Peace Corps service exemplifies the best qualities of our young people. He gave up a comfortable life in the United States in order to help teach villagers in one of the poorest regions of the world. Ultimately, he also gave his life. Philip's service and his sacrifice are to be commended by all Americans.

I should also commend the Peace Corps which launched a massive search effort as soon as it was learned Philip had not returned from his trek. The Peace Corps also flew Normand and Jean Cyr to Nepal to allow them to discuss the search with our personnel and with the highest ranking Nepalese authorities. I understand that the Cyrs returned with a better appreciation for the love their son Philip felt for the people of Nepal and the beauty of their country.

The loss of a son is a terrible burden to bear for any family. I know, however, how proud Normand and Jean Cyr are at the service their son gave to his country and to the world through his work in the Peace Corps.

I ask my colleagues to join me in recognizing Philip Cyr's sacrifice and in expressing our deep sympathy to Normand and Jean Cyr.

THE TRIVIALIZATION OF HUMAN RIGHTS

Mr. HAYAKAWA. Mr. President, a little more than 2 years ago Dr. Ernest Lefever, Assistant Secretary of State Designate for Human Rights and Humanitarian Affairs, wrote a major article which appeared in the winter 1978 issue of Policy Review. This article, "The Trivialization of Human Rights" is perhaps the most comprehensive critique of the Carter approach to human rights. At the time it was published, the article received worldwide attention and favorable comment. It was probably this article more than any other factor that drew Dr. Lefever to the attention of the Reagan administration.

Dr. Lefever wrote this as an independent scholar and stands by its fundamental concepts, although he no doubt has further developed his views since then. I have had the opportunity to discuss with Dr. Lefever his views on human rights. He feels the pursuit of human rights is wholly compatible with a sound national security policy. Dr. Lefever also believes that quiet persuasion is more effective than public scolding. He is deeply committed to a solid human rights policy and his article suggests major contributions Americans can make to further the cause of human rights in other countries.

Mr. President, the Senate will be considering Dr. Lefever's nomination soon, and I feel it is essential that my colleagues have the chance to become familiar with his views on human rights. Therefore, I ask unanimous consent that "The Trivialization of Human Rights" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE TRIVIALIZATION OF HUMAN RIGHTS

(By Ernest W. Lefever)

Human rights are what politics is all about. Fifteen centuries ago Saint Augustine said that were it not for government, men would devour one another as fishes. He was, of course, referring to good government, but governments often become corrupt, cruel, or tyrannical. When this happens, they are the most monstrous fish of all. Depending on its character, government can be the most effective protector of human rights or the most vicious violator of them. Hence, the struggle for humane government is the heart of politics.

It is important to distinguish between two frequently confused concepts of human rights.[1] One has more immediate universal application because it is rooted in the religion and ethics of virtually all cultures and calls for sanctions against political authorities and others guilty of genocide, brutalizing innocent people and similar atrocities. The second and more precise concept of human rights in the fruit of the recent Western democratic experience and embraces a variety of substantive and procedural rights and safeguards that are enforced in perhaps fewer than a score of states. These rights include freedom of speech, assembly, press, and religion; equality before the law; periodic elections; the concept of being innocent until proved guilty; a judicial system independent from executive authority; and a range of safeguards for accused persons. Many of these Western democratic rights are unknown and unattainable in large parts of the world where both history and culture preclude the development of full-fledged democratic institutions. Nevertheless, there are significant differences in the extent to which human rights, more generally defined, are honored in undemocratic states. And some of these states have introduced a few of the specific Western safeguards.

The never-ending battle to maintain and enlarge the areas of proximate liberty and justice must be fought against external and internal forces which seek to impose authority without freedom, often by brutal means. Human rights as we know them in the United States and other democratic countries can be eroded or even obliterated from within by acquiescing to willful men who seek to capture the reins of power for their own narrow ends or from without by totalitarian regimes determined to extend their dominion.

Our Founding Fathers wrestled with the problem of creating a free and independent country ruled by a government with sufficient authority to overcome domestic and alien threats and with sufficient openness to respond to the will of the people. Their formula was the judicious balance between authority and freedom embraced in the Declaration of Independence and elaborated in the Constitution. The former asserted that "governments are instituted among men, deriving their just powers from the consent of the governed" to secure certain fundamental rights, among them "life, liberty, and the pursuit of happiness." The Constitution was promulgated to "establish justice, insure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty."

This audacious experiment prospered in an inauspicious world. In the face of new challenges, the American system provided for increasingly broader political participation and other specific rights spelled out or implied in the Constitution and its amendments. Our history is not without blemish, but compared to other political communities past and present, the American record is a beacon of freedom and justice in a world bedeviled by chaos, authoritarian rule, and messianic tyranny.

THE CURRENT HUMAN RIGHTS CAMPAIGN

The current wave of concern for human rights around the world was foreshadowed by several developments, notably Woodrow Wilson's crusade for "self-determination" and the Universal Declaration of Human Rights adopted by the United Nations in 1948. The U.S. campaign to make the advancement of human rights abroad an objective of foreign policy is more recent, but it did not start with President Jimmy Carter. He simply built on the lively interest developed in Congress during the past several years which has been expressed largely in foreign aid legislation designed to prohibit or restrict economic or military assistance to any government "which engages in a consistent pattern of gross violations of internationally recognized human rights, including torture or cruel, inhumane, or degrading treatment or punishment, prolonged detention without charges, or other flagrant denial of the right to life, liberty, and the security of person" (Foreign Assistance Act, Section 502B, adopted in 1974). Most of the congressional human rights activists have limited their advocacy of punitive measures to Chile, South Korea, and Iran. In practice, the restrictions have had little effect on limiting aid, loans, or military sales, even to these countries.

Human rights was a natural cause for President Carter. As a born-again Baptist and a latter-day Wilsonian, he repeatedly stated his intention to restore integrity and compassion to American domestic and foreign policy. In his address at Notre Dame University on March 22, 1977, Mr. Carter looked back to the immediate past and deplored our "intellectual and moral poverty," illustrated by our Vietnam policy, and our "inordinate fear of Communism which once led us to embrace any dictator who joined us in that fear." He called for a "new" American foreign policy, "based on constant decency in its values and an optimism in its historical vision." The most conspicuous manifestation of his new policy is the effort to promote human rights in other countries by means of U.S. statecraft, including private diplomacy, public preaching, and measures to deny or threaten to deny economic, military or nuclear assistance. Mr. Carter's campaign has been given bureaucratic visibility by establishing a new post, Assistant Secretary of State for Human Rights and Humanitarian Affairs, currently filled by Patricia Derian, who sometimes discusses her assignment in moralistic rhetoric alien to traditional diplomatic discourse.

The human rights campaign has received mixed reviews at home and abroad. Last July in a New Yorker article friendly to the effort, Elizabeth Drew reported that Mr. Carter's people "are pleased, and some even a bit awestruck, at the impact that the human-rights campaign has had thus far. 'I think' says one, 'that the mulish world has noticed the two-by-four.'"

There is no doubt that the threatening

[1] This distinction is elaborated in Peter L. Berger's "Are Human Rights Universal?", Commentary, September, 1977.

plank has been noticed, and probably in isolated cases it has accomplished some good. But it should be recorded that some unmulish elements in the world, including friendly and allied governments, have also seen the two-by-four and are not convinced that its whack, however well-intended, has always been redemptive. There is no doubt that it has harmed relations with some allies and has both irritated and comforted adversaries.

It is by no means clear that the campaign has resulted in any significant relaxation of Soviet restrictions against emigration or political dissent. There is evidence that the opposite may be the case. On December 30, 1977, a New York Times page-one story reported: "The small Soviet human rights movement . . . is at its lowest point in years after a campaign of arrests, threats, and forced exile."

It is clear, however, that a score of allies has been unhappy with a policy they regard as arrogant and unfairly applied. Brazil, Argentina, Uruguay, and Guatemala have been alienated to the point where they have refused military assistance from Washington. And Brazil has served notice that it wishes to withdraw from its Security Assistance Agreement of 25 years standing. This alienation of allies gives aid and comfort to Moscow which more than offsets the minor embarrassment it suffers from Mr. Carter's conspicuous "intervention" on behalf of Soviet dissidents.

SIX FLAWS IN THE HUMAN RIGHTS POLICY

Far more serious, however, the Carter campaign has confused our foreign policy goals and trivialized the concept of human rights. It both reflects and reinforces serious conceptual flaws in the worldview of its most articulate spokesmen. These flaws, if permitted to instruct foreign policy, or even influence it unduly, could have catastrophic consequences for the security of the United States and the cause of freedom in the world. Six interrelated flaws deserve brief mention:

1. Underestimating the totalitarian threat

Human dignity and freedom are under siege around the world. It has been ever so. The islands of community protected by humane law have been contracting ever since postwar decolonization began. The citizens of most of the newly independent states in Asia and Africa now experience less freedom and fewer guaranteed rights than they did under Western colonial rule.

But the greatest threat to human rights comes from messianic totalitarian regimes whose brutal grip brooks no opposition. Their self-anointed and self-perpetuating elites have become the arbiters of orthodoxy in every sphere—politics, economics, education, the arts, and family life. The ruling party even usurps the place of God. In totalitarian states like the U.S.S.R., Cuba, Cambodia, and Vietnam, there are no countervailing forces to challenge the power, will, or policies of the entrenched elite.

In spite of notable exceptions, the general political situation in the Third World is characterized by chaos and authoritarian regimes. Democratic and anti-democratic ideas and institutions are competing for acceptance. In this struggle, we should not underestimate the attraction of the totalitarian temptation to leaders who are grappling with the perplexing problems of moving traditional societies into modern, welfare states.

The human rights activists tend to underestimate the totalitarian threat to the West and the totalitarian temptation in the Third World. Hence, they neglect or trivialize the fundamental political and moral struggle of our time—the protracted conflict between forces of total government based on coercion and the proponents of limited government based on popular consent and humane law. In their preoccupation with the minor abridgment of certain rights in authoritarian states, they often overlook the massive threat to the liberty of millions. They attack the limitation of civil rights in South Korea and at the same time call for the United States to withdraw its ground forces, an act that may invite aggression from North Korea. It would be a great irony if Washington in the name of human rights were to adopt a policy that would deliver 35,000,000 largely free South Koreans into virtual slavery.

2. Confusing totalitarianism with authoritarianism

In terms of political rights, moral freedom, and cultural vitality, there is a profound difference between authoritarian and totaliarian regimes. Most Asian, African, and Latin American countries are ruled by small elites supported by varying degrees of popular consent. Some are run by brutal tyrants like General Idi Amin of Uganda, others by one-party cliques, military juntas, or civilian-military committees. Almost all authoritarian regimes permit a significantly greater degree of freedom and diversity than the totalitarian ones in all spheres—political, cultural, economic, and religious. Authoritarian rulers often allow opposition parties to operate and a restrained press to publish. Foreign correspondents usually can move about freely and send out uncensored dispatches. They often permit and sometimes encourage relatively free economic activity and freedom of movement for their citizens. The quality of life possible under such rule, of course, depends not only on the character or central control, but on the cultural and economic level of the population as well.

There is, for example, far more freedom of choice, diversity of opinion and activity, and respect for human rights in authoritarian South Korea than in totalitarian North Korea. There is also far more freedom and cultural vitality in Chile—even under its present state of siege—than in Cuba. There have been political prisoners in Chile and there may be a handful now, but there are an estimated 15,000 to 60,000 political detainees in Cuba. These facts are noted, not to praise Chile or condemn Cuba, but to emphasize the consequential difference of human rights in the two kinds of regimes.

Another crucial difference is the capacity of authoritarian rule to evolve into democratic rule. This has happened recently in Spain, Portugal, Greece, and India. In sharp contrast, a Communist dictatorship has never made a peaceful transition to more representative and responsive rule.

3. Overestimating America's influence abroad

If the human rights zealots do not indulge in what Denis Brogan once called "the illusion of American omnipotence," they tend to overestimate our capacity, or the capacity of our government, to influence the external world, particularly domestic developments in other countries. America is powerful, but it is not all-powerful. Our considerable leverage of the 1950s and even our diminished leverage of the 1960s has been seriously eroded by OPEC, the great leap forward in Soviet military might, and our abandonment of Vietnam.

Quite apart from our limited capacity to influence intractable realities abroad, there is and should be a profound moral constraint on efforts designed to alter domestic practices, institutions, and policies within other states. Neo-Wilsonian attempts to make the world safe for human rights seem to be rooted in what Professor Ronald Berman has called "a planned confusion between domestic and foreign policy. The rest of the world is depicted as if it were an American constituency, driven by our own motives, vulnerable to our own rhetoric."[2] To be sure, the extravagant rhetoric of a Carter or a Wilson, with its crusading and paternalistic overtones, draws upon a persistent idealistic stream in the American character. But there is another and quieter stream equally honorable, but less pushy and perhaps more persuasive—symbolized by the Biblical parable of a candle upon a candlestick or a city set upon a hill, an example of the "lesser breeds without the law," as it was put in a more candid era.

John Quincy Adams expressed this more modest understanding of America's external responsibility: "We are the friends of liberty everywhere, but the custodians only of our own." Thirty years later, Abraham Lincoln spoke of "liberty as the heritage of all men, in all lands everywhere," but he did not claim that the United States was the chosen instrument for fulfilling this heritage.

4. Confusing domestic and foreign policy

Elaborating on Professor Berman's point, many human rights crusaders confuse the fundamental distinctions between domestic and foreign policy which are rooted in age-old practice, international law, the U.N. Charter, and common sense. They do not take seriously the distinctions in authority and responsibility that flow from the concept of sovereignty which underlies the modern state system. Our President and all other heads of state have authority to act only in their own states, within the territory of their legal jurisdiction. They are responsible only for the security and welfare of their own people, including their citizens living or traveling abroad.

There are, of course, multiple modes of interaction and cooperation between states based on mutual interest, ranging from trade, investment, and cultural exchange to military assistance and alliance ties. These activities are consistent with the concept of sovereign equality and non-interference in internal affairs. But short of a victorious war, no government has a right to impose its preference on another sovereign state. The mode and quality of life, the character and structure of institutions within a state should be determined by its own people, not by outsiders, however well-intentioned. The same is true for the pace and direction of social, political or economic change.

U.S. foreign policy toward another state should be determined largely by the foreign policy of that state. Domestic factors and forces are significant determinants only if they bear on external realities. Washington is allied with Iran, Taiwan, Thailand, and South Korea, not because their governments are authoritarian, but because they are regarded as vital in the struggle against the expansion of Soviet or Chinese power. It is therefore, appropriate to provide economic or military assistance to them, even if they do not hold regular elections. In sum, U.S. aid can properly be given to encourage a friend or ally to pursue constructive external policies, but not to promote internal reforms opposed by the assisted government. This leads to the next point.

5. Ignoring the perils of reform intervention

The impulse to impose our standards or practices on other societies, supported by policies of reward and punishment, leads inevitably to a kind of reform intervention. We Americans have no moral mandate to transform other societies, and we rightly resent such efforts on the part of the totalitarians. There is more than a touch of arrogance in our efforts to alter the domestic behavior of allies, or even of adversaries.

As noted above, the Foreign Assistance Act states that a principal goal of U.S. policy is to promote internationally recognized human rights abroad. Further, Title IX of the Act says that U.S. aid should be used to encourage "democratic-private and local government institutions" within the recipient

[2] See footnote 3.

states. The implications of this seemingly innocent phrase are disquieting. Should U.S. assistance be used to alter domestic institutions? Should we insist on an ideological or reform test before providing economic or military aid? Is this not a form of uninvited interference in domestic matters? If we take sovereign equality seriously, we will recognize that the people of every state should determine their own system of justice and how they want to defend themselves against domestic or foreign dangers.

Other states may request assistance from friendly governments on mutually agreed terms. But external forces, however nobly motivated, cannot impose justice, human rights, or freedom on other states without resorting to conquest. It may be possible to "export revolution"—as the phrase goes—but we cannot export human rights or respect for the rule of law. Freedom and justice are the fruit of long organic growth nurtured by religious values, personal courage, social restraint, and respect for law. The majesty of law is little understood in traditional societies where ethnic identity tends to supersede all other claims on loyalty and obedience.

6. Distorting foreign policy objectives

A consistent and single-minded invocation of a human rights standard in making U.S. foreign policy decisions would subordinate, blur, or distort other essential considerations. After all, our foreign policy has vital but limited goals—national security and international peace—both of which have a great impact on human rights. Aggressive war and tyranny are the two chief enemies of freedom and justice. Our efforts to deter nuclear war and nuclear blackmail are calculated to protect the culture and free institutions of Western Europe and North America. In the Third World we seek to maintain a regional stability conducive to responsible political development and mutually beneficial economic intercourse among states. Economic productivity alleviates stark poverty and thus broadens the range of cultural and political choice.

Therefore, our policies of nuclear deterrence should be determined by our understanding of the Soviet nuclear threat and our trade policies toward Moscow should be determined by our economic and security interests. Neither should be influenced, much less determined, by the extent of human rights violations in the Soviet Union. Likewise, in dealing with Third World countries, their foreign policy behavior should be the determining factor, not their domestic practices. Even though South Korea has an authoritarian government, we should continue our security support because it is a faithful ally under siege from a totalitarian neighbor and because its independence is vital to the defense of Japan and Japan's independence is vital to the U.S. position in the Western Pacific and the world.

THE PITFALLS OF SELECTIVE APPLICATION

These six conceptual flaws which underlie the human rights crusade have already led to unwise policies and if carried to their logical conclusion, could end in disaster. "Perhaps the most widely criticized and resented aspect of the campaign thus far has been its capricious and selective application to both Communist states and American allies."

During his visit to Poland last December, President Carter raised the human rights issue several times in public. On the one hand, he criticized his hosts for not permitting a handful of dissident journalists to attend his press conference. On the other, he praised Poland's rights record (compared to that of other Eastern European states) and said: "Our concept of human rights is preserved in Poland," to which a Polish writer replied: "The words are the same," but they "mean different things in the United States." The impropriety, not to say irony, of raising the sensitive rights issue in a Communist state whose fragile and problematic autonomy is precariously maintained at the sufferance of a totalitarian superpower, did not seem to concern Mr. Carter. Nor did the fact that Poland is forced to imitate many of the repressive measures of its master. By focusing on the absence of a handful of dissenting journalists at his press conference when the entire Polish people are held in bondage by the Soviet Union, President Carter distorted and trivialized the real meaning of human rights.

The policy of the Administration and the Congress toward the Soviet Union has also been vacillating and confused, seemingly more intent on scoring merchandisable victories than on grappling with the fundamental problem. Were it not for the Jewish emigration issue, Moscow would probably be receiving less critical attention than it is. How else can one explain the almost complete neglect of the massive violation of civil and political rights in Communist China, North Korea, Vietnam, and Cambodia?

Cambodia provides a particularly poignant example of this double standard toward totalitarian countries. Since the Communists took over on April 17, 1975, reliable studies estimate that 800,000 to 1.5 million Cambodians have died by execution or from starvation and disease caused by the forced evacuations from cities. This means that one in every six or seven has perished in the ruthless Communist bloodbath. Yet, where is the outcry from the advocates of human rights? Why this strange silence about what may well be the most brutal atrocity of our century? Measured by relative population, the Communist purge in Cambodia has destroyed more lives than Hitler's concentration camps or Stalin's Gulag Archipelago.

The great silence can be explained in part by racial and ideological factors. To certain rights advocates it somehow seems more reprehensible if violations or brutality are directed toward members of a different race. A white South African regime denying blacks the vote seems more morally repugnant than black regimes denying all citizens the vote (which is the case in most other African states). Filtered through a racist lens, it does not seem as bad for Cambodian Communists to murder thousands of innocent Cambodians—men, women, and children—as for a much smaller number of Cambodian soldiers to die in a war in which the United States was involved.

This suggests that an ideological factor is also present. A recent Wall Street Journal editorial pointed to the frequent alliance between liberal moral outrage and revolutionary causes: the "crimes of the Khmer Rouge, even though they dwarf some other state crimes of our times . . . have attracted less attention because they are inflicted in the name of revolution." One can only wonder what the reaction would be if the new government had employed "conservative" rhetoric and announced that it was going to cleanse the country of all socialist or Marxist influences.

Turning to American allies, some of the most articulate rights advocates concentrate their outrage on the very regimes that are under the most severe pressure from the totalitarians—South Korea, Taiwan, Iran, and Chile. The first three are geographically and militarily exposed to Communist power. Chile under Allende was the target of a massive internal and extenal assault by Marxist forces seeking to transform it into a Cuban-style dictatorship. All four of these states have authoritarian regimes, primarily in response to their present or recently endangered position, but in each the range of rights permitted or guaranteed by the regime is far greater than that of the Communist governments that seek to subvert or replace them. This suggests that the human rights standard is sometimes used, not to advance freedom, but as a cloak to attack antitotalitarian allies.

Some rights advocates have simultaneously urged punitive policies against Chile and measures to normalize relations with Cuba. This is a double irony. Human rights are more honored in Chile than in Cuba and Chile is pursuing a more peaceful foreign policy than Cuba. Havana is a mischief maker on a grand scale, acting as a cats-paw for Moscow. Castro, in addition to shoring up a minority regime in Angola with 19,000 Cuban troops, has sent Cuban soldiers to support the Marxist military junta in Ethiopia and to assist "revolutionary" regimes and other groups in a dozen other African states.

This double standard is often promoted by the media. According to a tabulation of news stories, editorials, and signed opinion for 1976, the prestige media's big five—New York Times, Washington Post, and the TV evening news shows of ABC, CBS, and NBC—carried 227 items about rights violations in two allied countries, Chile and South Korea, in contrast to only 24 stories about violation in three Communist countries, North Korea, Cuba, and Cambodia. The tabulation drawn up by Accuracy in Media follows:

	Chile	South Korea	North Korea	Cuba	Cambodia
New York Times	66	61	0	3	4
Washington Post	58	24	1	4	9
ABC-TV	5	2	0	0	1
CBS-TV	5	3	0	0	2
NBC-TV	3	0	0	0	0
Total	137	90	1	7	16

The content of the items was not examined, but the bias was clearly revealed by the inordinate attention given the small human rights sins of two loyal allies compared to the massive sins of three totalitarian adversaries—a ratio of almost ten to one.

Admittedly, it is far easier to get reliable information about the imperfections of authoritarian societies than those of closed, totalitarian states, but this is hardly an excuse for the media which pride themselves on vigorous investigative reporting. Certainly a little effort could have yielded considerably more data on violations in Cambodia, North Korea, and Cuba, to say nothing of China where both blunt and subtle forms of repression have been developed into an exquisite craft.

The lopsided application of human rights criteria is justified by White House and State Department spokesmen on pragmatic grounds. They frankly admit that they give more critical attention to allies than to adversaries because they have more leverage over the former—we can withhold or threaten to withhold aid from our friends, so why not strike a blow for freedom where we can, or, if one prefers, why not administer the two-by-four to a mulish friend?

What is America's Responsibility?

In a formal and legal sense, the U.S. Government has no responsibility—and certainly no authority—to promote human rights in other sovereign states. But this is hardly the whole story. Because of our heritage, our dedication to humane government, our power, and our wealth, we Americans have a moral responsibility, albeit ill-defined, in the larger world consistent with our primary obligations at home and commensurate with our capacity to influence external events. We are almost universally regarded as a humanitarian power and as the champion of freedom and decency. We should be proud of our humane occupation policies in Germany and Japan. But we enjoy no occupation rights now, and the role of our government abroad

is less clear. Saying this, the American people and their government can make two major contributions to the cause of human rights in other countries.

First, in the spirit of John Quincy Adams and Lincoln, we can be worthy custodians of the freedom bequeathed us by the Founding Fathers and thus continued to give heart to the aspirations of peoples everywhere. We can give hope to those in bondage by illustrating what the late Reinhold Niebuhr has called "the relevance of the impossible ideal." We can never fully realize our own ideals. And in most other cultural settings, full respect for human rights cannot be expected in the foreseeable future. A quick change in government will not enshrine liberty or justice. The message of our example is subdued, but not without hope—the struggle for a bit more freedom of choice or a better chance for justice is a never-ending one and after small gains have been made, eternal vigilance is vital to avoid sliding back into bondage. Serving as an example of decency, then, is our most effective way to nudge forward the cause of human dignity.

Second, our government can advance human rights by strengthening our resolve and our resources to defend our allies who are threatened by totalitarian aggression or subversion. This requires security guarantees, military assistance, and in some cases the presence of U.S. troops on foreign soil. Our combined effort to maintain a favorable balance of power has succeeded in preserving the independence of Western Europe, Japan, and South Korea. But because of our half-hearted commitment, we failed in Vietnam, Cambodia, and Laos, and in a different sense in Angola.

We have a domestic consensus for continued support of our North Atlantic allies and Japan, but some of our commitments elsewhere have been eroded by confusion over the nature of the threat. We are being severely tested in Taiwan, South Korea, and southern Africa. In each case, the totalitarians are pressing relentlessly by military, economic, political, and subversive means to destroy and replace Western influence. The struggle in these areas is hardly one of pure freedom against totalitarianism, but human rights (as well as peace) are clearly at stake. Any regime installed or sponsored by Moscow or Peking in Seoul, Taipei, or Pretoria will certainly provide less justice and freedom than the imperfect regime it displaced.

Beyond serving as a good example and maintaining our security commitments, there is little the U.S. Government can or should do to advance human rights, other than using quiet diplomatic channels at appropriate times and places. Moscow and other governments should be reminded of their pledges in the United Nations Charter and the Helsinki Agreement. Public preaching to friend or foe has limited utility. As we have already seen, it is both embarrassing and contraproductive to threaten punitive measures against friendly, but less than democratic, regimes which are attempting to achieve a reasonable balance between authority and freedom at home, often under severely trying circumstances, and are pursuing constructive policies abroad.

THE IRONY OF VIRTUE

The Carter Administration is not of one mind on the significance, purpose, or effects of the human rights crusade. The administration is even less united in the implementation of the program in specific cases. During his visit to Iran last December, President Carter gave his final approval for the sale of six to eight nuclear reactors to that country whose government has been the target of human rights activists as well as of Marxist groups. Alleged rights violations by the Shah's government have apparently had little effect on U.S. arms sales there. The same appears to be true of South Korea. In fact, some observers believe that the entire campaign so far has been more rhetoric than reality, and some suggest that it was launched more to satisfy the impulses of U.S. domestic groups than to effect real changes in the external world.

In any event, there appears to be a growing recognition of the moral and political limitations of a foreign policy crusade which, to repeat Mr. Carter, is based on "constant decency" and "optimism." While defending the campaign in principle, Secretary of State Cyrus Vance notes some of the reservations and flaws developed above. In a Law Day address April 30, 1977, Mr. Vance warned against a "self-righteous and strident" posture and said "we must always keep in mind the limits of our power and of our wisdom." He added that "a doctrinaire plan of action" to advance human rights "would be as damaging as indifference."

The tone of Mr. Vance's address stands in sharp contrast to President Carter's Notre Dame speech, which has been criticized as arrogant, self-righteous, and naive by Senator Daniel Moynihan and eight other policy observers in a monograph published last December.[3] Among other things, these critics took exception to Mr. Carter's view that there have been "dramatic worldwide advances in the protection of the individual from the arbitrary power of the state." In his pragmatic response to the security and other political realities, however, the President is far closer to Mr. Vance's words than to his own rhetoric. In the interests of reasonable consistency, the President has two choices—he can alter his rhetoric or alter his actual policies. Politically and morally, reality is more compelling than rhetoric.

The canons of prudence, statesmanship, and accountability all suggest that the President tone down his rhetoric. He should quietly recognize the political and moral limits of promoting particular reforms in other societies. He should recognize that a policy rooted in a presumption of American righteousness and in our capacity to sponsor virtue in other states often leads to the opposite effect. In some circumstances, the invocation of a rigid standard could undercut our security ties and invite a disaster in which millions of persons would move from partial freedom to tyranny.

Mr. Carter's policy is full of irony, precisely because his good intentions may lead to dire consequences. Irony is not the result of evil intention or malice, but rather of a hidden defect in virtue. In Mr. Carter's case, at least in rhetoric, the defect is a kind of vague, romantic optimism with an excessive confidence in the power of reason and goodwill. This comforting view of human nature, the child of the Enlightenment and social Darwinism, differs sharply with the more sober Biblical understanding of the nature and destiny of man. Be that as it may, the President should not be judged on his philosophical consistency, but rather by the actual policies he pursues. Since there is some relation between how one thinks and feels and what one does, it is not inappropriate to recall the words of columnist Michael Novak: "One of the best ways to create an immoral foreign policy is to try too hard for a moral one."

[3] See "Morality and Foreign Policy: A Symposium on President Carter's Stance," ed., Ernest W. Lefever, published by Ethics and Public Policy Center, Georgetown University, December 1977. The other critics are Robert L. Bartley, Ronald L. Berman, Jeane Kirkpatrick, Charles Burton Marshall, Michael Novak, John P. Roche, Eugene V. Rostow, and Roger L. Shinn.

THE RARE II REVIEW ACT OF 1981

Mr. McCLURE. Mr. President, I am pleased to be a cosponsor of S. 842 the RARE II Review Act of 1981 introduced yesterday by Senator HAYAKAWA. For the past decade, one-third of the national forest system, some 62 million acres, has been in limbo. It is not wilderness because Congress has not statutorily declared it to be. But neither has it been used or developed for either its resource or recreational values.

These lands have been embroiled in a continuing round of studies, litigation, restudies and new court challenges. The lands are in dispute because they are roadless and thus eligible to be considered for wilderness.

Wilderness is a very special, highly restricted use of land. Wilderness is defined by law as "an area where the Earth and its community of life are untrammeled by man, where man himself is a visitor who does not remain."

Access to wilderness can be only by foot, on horseback, or by canoe. There are no roads, improved campsites, ski lifts, or permanent structures. Care, recreational vehicles, and motor boats are excluded. Timber harvesting is prohibited. Mining, oil and gas exploration, grazing, and wildlife and watershed management are limited. Wilderness is the most restrictive of all public land uses.

The national forest system is one of America's great natural resources. For nearly a century, Congress has required these 187 million acres be used for a variety of purposes, including timber grazing, minerals, water, recreation, wilderness and fish and wildlife.

Congress has reserved to itself the right to decide which national forest lands should be designated as wilderness. It has left to the Forest Service, operating within statutory guidelines, decisions on the use of forest lands not designated as wilderness.

Enactment of the Forest and Rangeland Renewable Resources Planning Act of 1974 (RPA) provided for the first time a long-range planning program for national forest management and other Forest Service programs. RPA requires that information be developed to aid decisionmaking and to help identify the array of issues which can affect the use of natural resources for decades to come.

RPA provides a process by which program and policy alternatives can be expressed and considered. The Forest Service must prepare a periodic renewable resources assessment and a series of long-range renewable resource programs that are responsive to changes anticipated in the year ahead.

The first assessment and program were sent to Congress early in 1976 with the first updatings scheduled for 1979 and 1980, respectively. The act requires a new assessment every 10 years thereafter and a new program every 5 years.

The program is developed with public participation and millions of public dollars. It is a program where the approach to management and allocation of national forest resources evolved after Con-

gress recognized the serious difficulties created by political responses to complex long-term problems. The integrated approach to the uses of our national forests promises the most public benefits of any yet tried and it should be permitted to work. However, Congress and the administration have independently taken actions at cross purposes with the RPA program, especially with regard to wilderness designations.

The RPA program provides for a major increase in the national forest share of the national wilderness preservation system. National forest classified wilderness acreage would remain nearly constant up to 1980 at 15.2 million acres; then recommendations would be made to Congress to increase the acreage to 25 to 30 million by 2020. The Wilderness Act of 1964 designated 14.3 million acres of national forest for possible inclusion in the national wilderness preservation system. Additions have now raised the acreage to 25.4 million, including 5.4 million acres in Alaska. As of January 1981, this total of 25.4 million acres of wilderness already meets the RPA goal for the year 2020. Still wilderness considerations continue.

The Wilderness Act of 1964 required the Secretary of Agriculture to study and review, within 10 years, existing primitive areas under its administration for suitability for inclusion in the national wilderness preservation system. Although it was not required to do so under the Wilderness Act, the U.S. Forest Service, under its administrative discretion, established its first roadless area review and evaluation (RARE I). Initiated in 1972, RARE I inventoried 1,449 roadless and undeveloped areas, involving 56 million acres, for possible inclusion in the national wilderness preservation system. Almost 8 years later, and after the initiation in June 1977, of a more comprehensive study (RARE II), the Forest Service made its latest recommendations on which areas within the national forest system should be designated as wilderness and included in the national wilderness preservation system.

In its final environmental statement, "Roadless Area Review and Evaluation II" (January 1979) the Forest Service presented, on an area basis, its recommendations regarding 62 million acres of national forest lands. Based on the review and evaluation of these lands the Forest Service recommended that 15 million acres be designated as wilderness, 11 million acres as further planning—subject to continuing resource management planning and studies—and 36 million acres as nonwilderness.

During a 3-month period the Carter administration considered the Forest Service recommendations and on April 16, 1979, announced its endorsement with some minor revisions. The Carter administration then sent to Congress the Forest Service recommendations, somewhat revised, for legislative action. To date, nine States have had these recommendations considered and revised and have passed into statutory wilderness designation on some 9.7 million acres. However, this should not be construed to mean that of the 15 million acres recommended for wilderness, only 5.3 million acres remain to be considered. This is the problem. There are still 11.3 million acres recommended for further planning and 28.7 million acres recommended for nonwilderness. Congress is not limited to only wilderness recommendations. It can designate for wilderness any of the further planning or nonwilderness areas.

The result is an enormous uncertainty about the amount of national forest lands available for timber supply and resource uses. Withdrawals for wilderness and wilderness study are having severe impacts on the Nation's timber supply, development of mineral and energy resources, range capability, and the expansion of developed recreational opportunities. These actions collectively shrink the land base available for multiple use. Even more disturbing is the cloud of uncertainty that hangs over lands inventoried as roadless but which have not been recommended for wilderness. These lands could and should be providing essential resources, such as timber, and vitally important mineral and energy resources.

The focus has been on expanding wilderness designations simply because land is undisturbed. The very nature of the wilderness study and designation system, coupled with its enormous litigation possibilities, means that wilderness advocates can win, through indecision, long-term wilderness status for their favorite areas without any consideration of overall national needs.

With this paralysis, the urgent question which must be answered is, How much wilderness is enough?

The quickest step that can be taken to end the uncertainty and remove the paralysis is to provide by statute for the nonwilderness multiple-use management of the 36 million acres that were recommended for nonwilderness use as a result of RARE II.

Although the Forest Service's stated intention is to manage these lands for nonwilderness purposes, statutory direction is necessary to avoid legal entanglements that could prolong the indecision. Such legislation would constitute a final "No" to those who persist in their efforts to convert these lands to wilderness even though extensive studies have found them unsuited for that purpose.

Such national legislation will reinforce the RARE II process. It will give the Forest Service the continuity and time required to plan timber management programs, which can involve a period of 100 years, without threat of costly time consuming appeals and lawsuits. It will bring to a close for these lands 16 years of uncertainty which has plagued workers, managers, and communities whose livelihoods depend on national forest resources.

Mr. President, passage of this bill will help to solve this paralysis and confront Congress with its responsibility to answer, in a timely fashion, How much wilderness is enough?

SOVIET DEFENSE ADVANCES IN PAST FEW YEARS

Mr. THURMOND. Mr. President, the urgent need for our Nation to rebuild our defense forces is becoming clearer to the American people each day.

Our military leaders, no longer constrained by the ill-conceived defense policies of the Carter administration, are speaking out clearly relative to our defense problems and the needed solutions.

A succinct statement on this subject came recently from the Commander in Chief of the Strategic Air Command, Gen. Richard Ellis, who declared we are now entering an "extremely dangerous period" because of "years of indecision, cancellations, and delays, involving strategic force modernization."

Mr. President, I ask unanimous consent that this article entitled "SAC Chief: Arms Gap Is Alarming," which appeared in the March 19, 1981 issue of the Omaha World Herald, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SAC CHIEF: ARMS GAP IS ALARMING

(By Howard Silber)

The commander-in-chief of the Strategic Air Command has told a congressional subcommittee that the United States will enter an "extremely dangerous period" because of its strategic weapons insufficiency.

Gen. Richard H. Ellis blamed "years of indecision, cancellations and delays involving strategic force modernization" which he said "have led to a strategic imbalance between the United States and the Soviet Union."

The Ellis remarks were contained in a copy of his testimony Wednesday before the research and development subcommittee of the House Armed Services Committee in Washington.

Ellis expressed alarm at what he called "the fragile nature" of strategic communications and command control systems.

As a result, he said, "One of the pressing areas of concern is the high stress placed on" the extensive communications system "by Soviet submarines which patrol off both of our coasts."

Ellis said the strategic imbalance between the United States and Russia "came about principally because one leg of the strategic Triad was allowed to become vulnerable and another leg to approach obsolescence."

His reference was to the Minuteman and Titan II intercontinental ballistic missile force, which he said has become increasingly vulnerable to Soviet missiles, and to the principal U.S. strategic bomber, the 25-year-old B-52. These, along with the Navy's missile submarines, constitute the strategic Triad.

The SAC chief called for continued development of the MX missile without further delays, as a means of providing the United States with a survivable ICBM force.

Ellis called for the production of new bombers—either an improved FB-111 or the B-1—for introduction to the SAC force in the middle of the current decade or sooner and work on a more sophisticated, advanced-technology manned penetrator for the 1990s.

APPOINTMENTS BY THE PRESIDENT PRO TEMPORE

The PRESIDING OFFICER (Mr. GRASSLEY). The Chair, on behalf of the

President pro tempore, pursuant to Public Law 96-374, appoints the Senator from Vermont (Mr. STAFFORD) and Dr. David Gardner, president of the University of Utah, to the National Commission on Student Financial Assistance.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVAL

A message from the President of the United States announced that on March 31, 1981, he had approved and signed the following act:

S. 509. An act to amend section 201 of the Agricultural Act of 1949, as amended, to delete the requirement that the support price of milk be adjusted semiannually.

MESSAGE FROM THE HOUSE

ENROLLED JOINT RESOLUTION SIGNED

At 4:54 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its clerks, announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 182. Joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era."

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-823. A communication from the Acting Under Secretary of Agriculture for International Affairs and Commodity Programs, transmitting, pursuant to law, the third quarterly commodity and country allocation table showing the planned programing of food assistance under title I/III of Public Law 480 for fiscal year 1981; to the Committee on Agriculture, Nutrition, and Forestry.

EC-824. A communication from the Acting Administrator of the General Services Administration, transmitting, pursuant to law, a report on an overobligation of appropriations in the Federal Buildings Fund of the Public Building Service; to the Committee on Appropriations.

EC-825. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Army Needs To Improve Individual Soldier Training In Its Units"; to the Committee on Armed Services.

EC-826. A communication from the Principal Deputy Assistant Secretary of the Navy (Logistics), transmitting, pursuant to law, a report with respect to converting the base operating support functions at Naval Air Facility, Midway Island, and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC-827. A communication from the Secretary of the Army, transmitting, pursuant to law, notice of the intent of the recent discovery and disposal of a suspected lethal chemical nerve agent munition at Dugway Proving Ground, Utah; to the Committee on Armed Services.

EC-828. A communication from the Secretary of Transportation, transmitting, pursuant to law, the final Urban Mass Transporation Administration Quarterly Report for fiscal year 1980; to the Committee on Banking, Housing, and Urban Affairs.

EC-829. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "What Can Be Done To Check The Growth Of Federal Entitlement And Indexed Spending"; to the Committee on the Budget.

EC-830. A communication from the chairman of the board and the president and chief executive officer of the U.S. Railway Association, transmitting, pursuant to law, a report entitled "Conrail at the Crossroads: The Future Of Rail Service in the Northeast"; to the Committee on Commerce, Science, and Transportation.

EC-831. A communication from the Secretary of the Interstate Commerce Commission, transmitting, pursuant to law, notice that the Commission will be unable to render a final decision in Docket No. 37522, Florida East Coast Railroad, application of joint rates, within the initially specified 7-month period; to the Committee on Commerce, Science, and Transportation.

EC-832. A communication from the Acting Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, a report on the proposed allocation in the fiscal year 1981 space shuttle program of funds in excess of the amount appropriated; to the Committee on Appropriations.

EC-833. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Hazardous Materials Transportation Act to authorize appropriations for fiscal years 1982 and 1983, and for other purposes; to the Committee on Commerce, Science, and Transportation.

EC-834. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Natural Gas Pipeline Safety Act of 1968, as amended, and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1982 and 1983; to the Committee on Commerce, Science, and Transportation.

EC-835. A communication from the Acting Administrator, Energy Information Administration, Department of Energy, transmitting, pursuant to law, volume three of the Energy Information Administration Annual Report for 1980; to the Committee on Energy and Natural Resources.

EC-836. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report on the annual achievements of the innovation grant program of the urban park and recreation recovery program (UPARR); to the Committee on Energy and Natural Resources.

EC-837. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Clean Air Act: Summary of GAO Reports (October 1977 through January 1981) And Ongoing Reviews," April 1, 1981; to the Committee on Environment and Public Works.

EC-838. A communication from the Acting Chairman, Council on Environmental Quality, Executive Office of the President, transmitting a draft of proposed legislation authorizing the Council on Environmental Quality appropriations under the Environmental Quality Improvement Act (EQIA) of 1970 for fiscal years ending September 30, 1982 and September 30, 1983; to the Committee on Environment and Public Works.

EC-839. A communication from the Secretary of Labor, transmitting a draft of proposed legislation to amend the Trade Act of 1974 to provide for changes in adjustment assistance for workers, and for other purposes; to the Committee on Finance.

EC-840. A communication from the Fiscal Assistant Secretary of the Treasury, transmitting, pursuant to law, a report on inventory of nonpurchased foreign currencies as of September 30, 1980; to the Committee on Foreign Relations.

EC-841. A communication from the assistant legal adviser for treaty affairs, transmitting, pursuant to law, international agreements other than treaties entered into by the United States within 60 days after the execution thereof; to the Committee on Foreign Relations.

EC-842. A communication from the Acting Assistant Secretary for Health, Department of Health and Human Services, transmitting, pursuant to law, a report on a new system of records; to the Committee on Governmental Affairs.

EC-843. A communication from the President, the Mortgage Corp., Federal Home Loan Mortgage Corporation, transmitting its annual report for 1980; to the Committee on Governmental Affairs.

EC-844. A communication from the Acting Inspector General, Department of Health and Human Services, transmitting, pursuant to law, the annual report of the Office of Inspector General covering the period January 1, 1980 through December 31, 1980; to the Committee on Governmental Affairs.

EC-845. A communication from the Acting Secretary, Federal Trade Commission, transmitting, pursuant to law, the FTC's annual report of compliance with the Government in the Sunshine Act; to the Committee on Governmental Affairs.

EC-846. A communication from the Acting Assistant Attorney General, Criminal Division, U.S. Deparment of Justice, transmitting, pursuant to law, a report on its activities and operations for 1980 re the Ethics in Government Act of 1978, 28 U.S.C. 529; to the Committee on Governmental Affairs.

EC-847. A communication from the Director, Office of Management and Budget, Executive Office of the President, transmitting a draft of proposed legislation to revise the Federal Grant and Cooperative Agreement Act (P.L. 95-224, 41 U.S.C. 501 et seq.); to the Committee on Governmental Affairs.

EC-848. A communication from the Public Information Specialist, Occupational Safety and Health Review Commission, transmitting, pursuant to law, the report of the Commission under the Freedom of Information Act for calendar year 1980; to the Committee on the Judiciary.

EC-849. A communication from the President of the Inter-American Foundation, transmitting, pursuant to law, the Foundation's report for calendar year 1980 under the Freedom of Information Act; to the Committee on the Judiciary.

EC-850. A communication from the Director of the Federal Judicial Center, transmitting, pursuant to law, the 1980 Annual Report of the Center; to the Committee on the Judiciary.

EC-851. A communication from the Director of the Office of Personnel Management transmitting, pursuant to law, the agency's report for calendar year 1980 under the Freedom of Information Act; to the Committee on the Judiciary.

EC-852. A communication from the Solic-

itor of the United States Commission on Civil Rights, transmitting pursuant to law, the report of the Commission for calendar year 1980 under the Freedom of Information Act; to the Committee on the Judiciary.

EC–853. A communication from the president and from the national director of the Girl Scouts, transmitting, pursuant to law, the 31st Annual Report of the Girl Scouts of the United States of America; to the Committee on Labor and Human Resources.

EC–854. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the annual report on the primary care research and demonstration program for fiscal year 1980; to the Committee on Labor and Human Resources.

EC–855. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the fourth annual report on the administration of the national health service corps scholarship program; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POW–55. A petition from a citizen of San Francisco, Calif., favoring congressional cooperation with the efforts of the Reagan administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–56. A petition from a citizen of Miami, Fla., favoring congressional cooperation with the efforts of the Reagan administration to strengthen the military power of the United States; to the Committee on Armed Services.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. TOWER, from the Committee on Armed Services, with an amendment (in the nature of a substitute), and an amendment to the title:

S. 694. A bill to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and for research, development, test, and evaluation, and to increase the authorized personnel strength for military and civilian personnel of the Department of Defense, and for other purposes (Rept. No. 97–35).

By Mr. TOWER, from the Committee on Armed Services, without amendment:

S. Res. 105. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 694; referred to the Committee on the Budget.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following executive reports of committees were submitted:

TREATY

By Mr. PERCY, from the Committee on Foreign Relations with amendments:

Executive U, 96th Congress, 1st Session. Maritime Boundary Settlement Treaty With Canada, signed at Washington, March 29, 1979 (Executive Rept. 97–5).

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

William Gene Lesher, of Virginia, to be an Assistant Secretary of Agriculture.

Seeley Lodwick, of Iowa, to be Under Secretary of Agriculture for International Affairs and Commodity Programs.

Seeley Lodwick, of Iowa, to be a member of the Board of Directors of the Commodity Credit Corporation.

William Gene Lesher, of Virginia, to be a member of the Board of Directors of the Commodity Credit Corporation.

John B. Crowell, of Oregon, to be an Assistant Secretary of Agriculture.

C. W. McMillan, of Virginia, to be a member of the Board of Directors of the Commodity Credit Corporation.

(The above nominations reported from the Committee on Agriculture, Nutrition, and Forestry, with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BOSCHWITZ:

S. 843. A bill for the relief of Dr. Romulo Z. Kabatay and Wilma E. Kabatay; to the Committee on the Judiciary.

S. 844. A bill for the relief of Daniel Han Ying NG; to the Committee on the Judiciary.

S. 845. A bill for the relief of Bins Tao San; to the Committee on the Judiciary.

By Mr. WARNER (for himself and Mr. JACKSON) (by request):

S. 846. A bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982 and fiscal year 1983, and for other purposes; to the Committee on Armed Services.

By Mr. PERCY (by request):

S. 847. A bill to amend the Board for International Broadcasting Act of 1973, to authorize a supplemental appropriation for fiscal year 1981, and to authorize appropriations for fiscal years 1982 and 1983; to the Committee on Foreign Relations.

S. 848. A bill to authorize appropriations for the Peace Corps, and for other purposes; to the Committee on Foreign Relations.

S. 849. A bill to authorize appropriations for the International Communication Agency to carry out in fiscal years 1982 and 1983 international communication and educational and cultural exchange programs, and for other purposes; to the Committee on Foreign Relations.

By Mr. BAUCUS:

S. 850. A bill to amend the Internal Revenue Code of 1954 to provide greater protection for the rights of the taxpayers; to the Committee on Finance.

By Mr. MOYNIHAN:

S. 851. A bill to amend the Internal Revenue Code to increase the amount that an artist may deduct when he contributes an artistic composition to charity; to the Committee on Finance.

S. 852. A bill to amend the Internal Revenue Code to provide a tax credit for certain contributions of literary, musical or artistic compositions; to the Committee on Finance.

S. 853. A bill to amend the Social Security Act to provide that the Federal Government will gradually take over the local share of AFDC and medicaid costs if States meet certain minimum AFDC benefit requirements, and for other purposes; to the Committee on Finance.

By Mr. PERCY:

S. 854. A bill to promote the orderly conduct of international relations by facilitating the operation of foreign missions in the United States, thereby promoting the secure and efficient operation of the U.S. missions abroad; to the Committee on Foreign Relations.

By Mr. MOYNIHAN:

S. 855. A bill to amend the Social Security Act to revise the AFDC and medicaid matching formula for States which meet certain minimum AFDC benefit requirements, and for other purposes; to the Committee on Finance.

By Mr. SARBANES:

By Mr. TOWER:

S. 857. A bill to impose quantitative restrictions on the importation of lamb meat; to the Committee on Finance.

By Mr. DURENBERGER:

S. 858. A bill to amend the Internal Revenue Code of 1954 to provide estate tax equity for family farms and other enterprises, and for other purposes; to the Committee on Finance.

By Mr. THURMOND (for himself, Mr. DOMENICI, Mr. ABDNOR, Mr. BAUCUS, Mr. HEFLIN, Mr. NUNN, Mr. LAXALT, Mr. HATFIELD, Mr. LUGAR, Mr. HELMS, Mr. GRASSLEY, Mr. SYMMS, Mr. HUDDLESTON, Mr. BENTSEN, Mrs. KASSEBAUM, Mr. TSONGAS, Mr. CRANSTON, Mr. MOYNIHAN, Mr. SARBANES, Mr. SASSER, Mr. SPECTER, Mr. HATCH, Mr. KENNEDY, Mr. CHAFEE, Mr. HAYAKAWA, Mr. HOLLINGS, Mr. PROXMIRE, Mr. DECONCINI, Mr. DENTON, Mr. RIEGLE, Mrs. HAWKINS, Mr. DOLE, Mr. WALLOP, Mr. ANDREWS, Mr. LEAHY, Mr. GARN, Mr. DURENBERGER, and Mr. METZENBAUM):

S.J. Res. 60. Joint resolution to authorize and request the President to designate the week of May 3 through May 9, 1981, as "National Physical Fitness and Sports for All Week"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WARNER (for himself and Mr. JACKSON) (by request):

S. 846. A bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982 and fiscal year 1983, and for other purposes; to the Committee on Armed Services.

DEPARTMENT OF ENERGY NATIONAL SECURITY AND MILITARY APPLICATIONS OF NUCLEAR ENERGY AUTHORIZATION ACT OF 1982

● Mr. WARNER. Mr. President, by request, for myself and the senior Senator from Washington (Mr. JACKSON), I introduce for appropriate reference a bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982 and fiscal year 1983, and for other purposes.

I ask unanimous consent that the bill and a letter of transmittal requesting consideration of the legislation and explaining its purpose be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 846

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Energy National Security and Military Applications of Nuclear Energy Authorization Act of 1982".

TITLE I—NATIONAL SECURITY PROGRAMS

OPERATING EXPENSES

SEC. 101. Funds are hereby authorized to be appropriated to the Department of Energy

for fiscal year 1982 for operating expenses incurred in carrying out national security programs (including scientific research and development in support of the armed services, strategic and critical materials necessary for the common defense, and military applications of nuclear energy and related management and support activities) as follows:

(1) For naval reactors development, $279,500,000;

(2) For weapons activities, $2,454,300,000;

(3) For verification and control technology, $48,900,000;

(4) For materials production, $616,200,000;

(5) For defense nuclear waste management, $262,028,000;

(6) For nuclear materials security and safeguards development, $44,300,000;

(7) For security investigations, $23,600,000.

PLANT AND CAPITAL EQUIPMENT

SEC. 102. Funds are hereby authorized to be appropriated to the Department of Energy for fiscal year 1982 for plant and capital equipment (including planning, construction, acquisition and modification of facilities, land acquisition related thereto, and acquisition and fabrication of capital equipment not related to construction) necessary for national security programs, as follows:

for national security development:

Project 82–N–100, general plant projects, various locations, $4,000,000.

Project 82–N–111, materials facility, Savannah River, South Carolina, $15,000,000.

(2) For weapons activities:

Project 82–D–100, general plant projects, various locations, $15,800,000.

Project 82–D–103, general plant projects, various locations, $16,300,000.

Project 82–D–104, new weapons production installations, various locations, $5,000,000.

Project 82–D–106, weapon assembly facilities, Pantex Plant, Amarillo, Texas, $23,500,000.

Project 82–D–107, utilities and equipment restoration, replacement, and upgrade, Phase III, various locations, $87,500,000.

Project 82–D–108, nuclear weapons stockpile improvement, various locations, $32,200,000.

Project 82–D–109, 155mm artillery fired atomic projectile (AFAP) production facilities, various locations, $35,000,000.

Project 82–D–111, interactive graphics system, various locations, $9,000,000.

Project 82–D–142, North Las Vegas Atlas facility, Las Vegas, Nevada, $3,600,000.

Project 82–D–146, weapons production and production support facilities, various locations, $8,000,000.

Project 82–D–147, pressure test facility, Savannah River Plant, Aiken, South Carolina, $3,500,000.

Project 81–D–106, weaponization facilities, Ernest Orlando Lawrence Livermore National Laboratory, California, an additional sum of $1,000,000 for a total project authorization of $7,600,000.

Project 81–D–108, reactor support facilities, Sandia National Laboratories, New Mexico, an additional sum of $1,000,000 for a total project authorization of $10,000,000.

Project 81–D–115, M–X warhead production facilities, various locations, an additional sum of $60,000,000 for a total project authorization of $70,000,000.

Project 81–D–116, utilities and equipment restoration, replacement, and upgrade, Phase II, various locations, an additional sum of $10,000,000 for a total project authorization of $85,000,000.

Project 81–D–120, control of effluents and pollutants, Y–12 Plant, Oak Ridge, Tennessee, an additional sum of $3,400,000 for a total project authorization of $6,400,000.

Project 81–D–133, earthquake damage restoration, Lawrence Livermore National Laboratory, California, an additional sum of $6,300,000 for a total project authorization of $9,300,000.

Project 81–D–134, earthquake damage restoration, Sandia National Laboratory at Livermore, California, an additional sum of $1,700,000 for a total project authorization of $3,700,000.

Project 79–7–o, universal pilot plant, Pantex Plant, Amarillo, Texas, an additional sum of $5,200,000 for a total project authorization of $12,600,000.

Project 78–16–a, cruise missile production facilities, various locations, an additional sum of $80,700,000 for a total project authorization of $98,800,000.

Project 78–17–d, steam plant improvements, Y–12 Plant, Oak Ridge, Tennessee, an additional sum of $1,500,000 for a total project authorization of $27,000,000.

Project 78–17–e, high explosive machining facility, Pantex Plant, Amarillo, Texas, an additional sum of $5,600,000 for a total project authorization of $10,600,000.

Project 77–11–c, 8-inch artillery fired atomic projectile (AFAP) production facilities, various locations, an additional sum of $3,600,000 for a total project authorization of $30,800,000.

(3) For materials production:

Project 82–D–116, general plant projects, various locations, $23,000,000.

Project 82–D–117, plant engineering and design, various locations, $3,000,000.

Project 82–D–118, N plant security and surveillance, Richland, Washington $4,000,000.

Project 82–D–124, restoration of production capabilities, Phase II, various locations, $126,000,000.

Project 82–D–126, reactor safety and reliability, various locations, $42,900,000.

Project 82–D–127, safeguards improvements, Savannah River, South Carolina, $34,600,000.

Project 82–D–128, plant perimeter security systems upgrade, Idaho Fuels Processing Facilities, Idaho National Engineering Laboratory, Idaho, $4,400,000.

Project 82–D–136, fuel processing facilities upgrade, Idaho Fuel Processing Facility, INEL, Idaho, $40,000,000.

Project 81–D–126, pollution abatement facilities—chemical processing plants, Richland, Washington, for an additional sum of $4,300,000 for a total project authorization of $5,300,000.

Project 81–D–128, restoration of production capabilities, various locations, an additional sum of $14,400,000 for a total project authorization of $49,400,0000.

Project 81–D–142, steam transfer header Savannah River, South Carolina, an additional sum of $1,000,000 for a total project authorization of $8,000,000.

Project 81–D–143, L–Reactor Upgrade, Savannah River, South Carolina, an additional sum of $66,000,000 for a total project authorization of $115,000,000.

Project 80–AE–3, steam generation facilities, Idaho Fuels Processing Facility, Idaho, an additional sum of $5,000,000 for a total project authorization of $28,500,000.

Project 77–13–a, fluorinel dissolution process and fuel receiving improvements, Idaho Fuels Processing Facility, Idaho National Engineering Laboratory, Idaho, an additional sum of $50,000,000 for a total project authorization of $199,400,000.

(4) For defense nuclear waste management:

Project 82–N–101, general plant projects various locations, $11,400,000.

Project 82–N–103, waste handling and isolation facilities, Richland, Washington, $34,450,000.

Project 82–N–104, waste transfer facilities, Richland, Washington, $6,750,000.

Project 82–N–107, rail replacement/Hanford railroad, Richland, Washington, $12,000,000.

Project 82–N–110, plant engineering and design, Savannah River, South Carolina, $10,000,000.

Project 77–13–f, waste isolation pilot plant, Delaware Basin, Southeast, New Mexico, an additional sum of $8,600,000 for a total project authorization of $127,600,000.

(5) For capital equipment not related to construction—

(A) for naval reactors development, $28,000,000;

(B) for weapons activities, $196,500,000;

(C) for verification and control technology, $1,100,000;

(D) for materials production, $73,600,000;

(E) for defense nuclear waste management, $24,472,000; and

(F) for nuclear materials security and safeguards development, $3,700,000.

TITLE II—GENERAL PROVISIONS

REPROGRAMMING

SEC. 201. (a) Except as otherwise provided in this Act—

(1) no amount appropriated pursuant to this Act may be used for any program in excess of 105 percent of the amount authorized for that program by this Act or $10,000,000 more than the amount authorized for that program by this Act, whichever is the lesser, and

(2) no amount appropriated pursuant to this Act may be used for any program which has not been presented to, or requested of, the Congress, unless a period of 30 calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after receipt by the appropriate committees of Congress of notice from the Secretary of Energy (hereinafter in this title referred to as the "Secretary") containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of the proposed action, or unless each committee before the expiration of such period has transmitted to the Secretary written notice to the effect such Committee has no objection to the proposed action.

LIMITS ON GENERAL PLANT PROJECTS

SEC. 202. (a) The Secretary may carry out any construction project under the general plant projects provisions authorized by this Act if the total estimated cost of the construction project does not exceed $1,000,000.

(b) If at any time during the construction of any general plant project authorized by this Act, the estimated cost of the project is revised due to unforeseen cost variations and the revised cost of the project exceeds $1,000,000, the Secretary shall immediately furnish a complete report to the appropriate committees of Congress explaining the reasons for the cost variation.

LIMITS ON CONSTRUCTION PROJECTS

SEC. 203. (a) Whenever the current estimated cost of a construction project which is authorized by section 102 of this Act, or which is in support of national security programs of the Department of Energy and was authorized by any previous Act, exceeds by more than 25 percent the higher of (1) the amount authorized for the project, or (2) the amount of the total estimated cost for the project as shown in the most recent budget justification data submitted to Congress, construction may not be started or additional obligations incurred in connection with the project above the total estimated cost, as the case may be, unless a period of 30 calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three days to a day certain) has passed after receipt by the appropriate committees of Congress of written notice from the Secretary containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of the action, or unless each committee before the expiration of such period has notified the Secretary it has no objection to the proposed action.

(b) Subsection (a) shall not apply to any construction project which has a current estimated cost of less than $5,000,000.

FUND TRANSFER AUTHORITY

SEC. 204. To the extent specified in appropriation Acts, funds appropriated pursuant to this Act may be transferred to other agencies of the Government for the performance of the work for which the funds were appropriated, and funds so transferred may be merged with the appropriations of the agency to which the funds are transferred.

AUTHORITY FOR CONSTRUCTION DESIGN

SEC. 205. (a) Within the amounts authorized by this Act for plant engineering and design, the Secretary may carry out advance planning and construction designs (including architectural and engineering services) in connection with any proposed construction projects.

(b) In the event it is necessary to conduct a plant engineering and design project which was not previously identified in the budget justification data previously submitted to Congress, the Secretary shall notify the appropriate committees of Congress in writing of the details of the project at least 30 days before any funds are obligated for the project.

(c) Subsection (b) shall not apply to any plant engineering and design project which has a current estimated cost of less than $500,000.

FUNDS AVAILABLE FOR ALL NATIONAL SECURITY PROGRAMS OF THE DEPARTMENT OF ENERGY

SEC. 206. Subject to the provisions of appropriation Acts, amounts appropriated pursuant to this Act for management and support activities and for general plant projects are available for use, when necessary, in connection with all national security programs of the Department of Energy.

AUTHORITY FOR EMERGENCY CONSTRUCTION DESIGN

SEC. 207. In addition to the advance planning and construction design authorized by section 102, the Secretary may perform planning and design utilizing available funds for any Department of Energy defense activity construction project whenever the Secretary determines that the design must proceed expeditiously in order to meet the needs of national defense or to protect property or human life.

ADJUSTMENTS FOR PAY INCREASES

SEC. 208. Appropriations authorized by this Act for salary, pay, retirement or other benefits for Federal employees may be increased by such amounts as may be necessary for increases in benefits authorized by law.

AVAILABILITY OF FUNDS

SEC. 209. When so specified in an appropriation Act, amounts appropriated for "Operating Expenses" or for "Plant and Capital Equipment" may remain available until expended.

TITLE III—AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1983

SEC. 301. (a) There is authorized to be appropriated to the Department of Energy to be available not earlier than October 1, 1982, those sums which may be necessary for fiscal year 1983 for programs set forth in this Act.

(b) All of the provisions which are applicable to amounts appropriated pursuant to other sections of this Act shall apply in the same manner to amounts appropriated pursuant to this section.

DEPARTMENT OF ENERGY,
Washington, D.C.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is proposed legislation "[t]o authorize appropriations for the Department of Energy for national security programs for fiscal year 1982 and fiscal year 1983" in accordance with section 660 of the Department of Energy Organization Act. The bill would authorize specific appropriations for FY 82 and those appropriations which might be necessary for FY 83. The total amount proposed for FY 82 is $4,996,400,000, of which $3,728,828,000 is for operating expenses, $327,372,000 is for capital equipment, and $940,200,000 is for construction projects.

The Office of Management and Budget advises that this legislative proposal is in accord with the program of the President.

Sincerely,

ERIC J. FYGI,
Acting General Counsel.

By Mr. PERCY (by request):

S. 847. A bill to amend the Board for International Broadcasting Act of 1973, to authorize a supplemental appropriation for fiscal year 1981, and to authorize appropriations for fiscal years 1982 and 1983; to the Committee on Foreign Relations.

BOARD FOR INTERNATIONAL BROADCASTING AUTHORIZATION ACT, FISCAL YEARS 1981, 1982, AND 1983

● Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to amend the Board for International Broadcasting Act of 1973 and to authorize appropriations for the Board to carry out its responsibilities as specified in that act.

This legislation has been requested by the Board, and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with a sectional analysis of the bill and the letter from the Executive Director of the Board for International Broadcasting to the President of the Senate dated March 18, 1981.

There being no objection, the bill, analysis, and letter were ordered to be printed in the RECORD, as follows:

S. 847

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Board for International Broadcasting Authorization Act, Fiscal Years 1981, 1982 and 1983."

AUTHORIZATION OF APPROPRIATIONS

Section 1. Section 8(a)(1)(A) of the Board for International Broadcasting Act of 1973 (22 U.S.C. 2877(a)) is amended to read as follows—

"(A) $100,300,000 for fiscal year 1981."

SEC. 2. There are authorized to be appropriated for the Board for International Broadcasting $98,317,000 for fiscal year 1982 and $98,317,000 for fiscal year 1983.

SECTIONAL ANALYSIS

Section 1: This paragraph authorizes appropriations of additional funds to the Board for improvements in the programs and facilities of Radio Free Europe/Radio Liberty, Inc., in fiscal year 1981.

Section 2: This paragraph authorizes appropriations for the Board to carry out its functions during fiscal years 1982 and 1983.

BOARD FOR INTERNATIONAL BROADCASTING,
Washington, D.C., March 18, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is transmitted herewith proposed legislation to make required amendments to the Board for International Broadcasting Act of 1973 and to authorize appropriations for the Board to carry out its responsibilities as specified in that Act.

The bill provides for authorization of a supplemental appropriation for fiscal year 1981 and for appropriations for the Board's operation during fiscal years 1982 and 1983.

A sectional analysis explaining the proposed legislation is enclosed.

The Office of Management and Budget has advised the Board that there is no objection to the presentation of this proposal to the Congress and that its enactment would be in accord with the program of the President.

Respectfully,

WALTER R. ROBERTS,
Executive Director.

By Mr. PERCY (by request):

S. 848. A bill to authorize appropriations for the Peace Corps, and for other purposes; to the Committee on Foreign Relations.

PEACE CORPS ACT AMENDMENTS OF 1981

Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to authorize appropriations for the Peace Corps, and for other purposes.

This legislation has been requested by the Peace Corps, and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with a section-by-section analysis of the bill and the letter from the Acting Director of the Peace Corps to the President of the Senate dated March 17, 1981.

There being no objection, the bill, analysis, and letter were ordered to be printed in the RECORD, as follows:

S. 848

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Peace Corps Act Amendments of 1981".

SEC. 2. (a) Section 3(b) of the Peace Corps Act, as amended, (hereinafter the "Act") is amended by deleting "fiscal year 1981 not to exceed $118,000,000" and inserting in lieu thereof, "for the fiscal year ending September 30, 1982 not to exceed $95,000,000, and for the fiscal year ending September 30, 1983 such sums as may be necessary."

(b) Section 3(c) of the Act is amended by inserting after "fiscal year 1981" the words "and fiscal years 1982 and 1983".

(c) Section 3 of the Act is amended by adding the following new subsection at the end thereof:

"(h) In recognition of the fact that there are over 400,000,000 disabled people in the world, 95 percent of whom are among the poorest of the poor, the Peace Corps shall be administered so as to give particular attention to programs, projects and activities which tend to integrate disabled people into

the national economies of developing countries, thus improving their status and assisting the total development effort."

SEC. 3. Section 9 of the Act is amended by striking out "section 10(a)(4)" and by inserting in lieu thereof "section 10(a)(5)".

SEC. 4. Section 5(h) of the Act is amended by deleting the last two sentences at the end thereof.

SEC. 5. Section 10 of the Act is amended by adding the following new subsection at the end thereof:

"(i) The Provisions of Section 30 of the State Department Basic Authorities Act of 1956 relating to malpractice protection shall apply to volunteers and personnel assigned or employed under this Act, and references to the Secretary of State in subsection (f) of such section shall be deemed references to the President. For purposes of subsection (g) of such section, a Peace Corps representative shall be deemed to be a principal representative of the United States."

SEC. 6. The Act is amended by striking out section 18 thereof.

PEACE CORPS ACT AMENDMENTS OF 1981—SECTION-BY-SECTION ANALYSIS

Section 1, the enacting clause, establishes the enacting clause as the "Peace Corps Act Amendments of 1981".

Section 2 amends section 3(b) of the Peace Corps Act (the "Act") to authorize the appropriation of $95,000,000 for activities under the Act for the fiscal year ending September 30, 1982, and such sums as may be necessary for the fiscal year ending September 30, 1983. Appropriations are requested for the fiscal year ending September 30, 1983 to comply with the requirement of section 607 of the Congressional Budget Act of 1974.

Section 2 also authorizes the appropriation of such sums as may be necessary for increases in pay, retirement, and similar benefits authorized by law for fiscal year 1982 and 1983.

Section 2 would also add a new section (h) to section 3 of the Act to recognize the need for the Peace Corps to give particular attention to the more than 400,000,000 disabled people in the world, most of whom are among the poorest of the poor, and to programs, projects and activities which tend to integrate them into national economies of their countries and thereby improve their status and decrease the economic drain they represent on their families and society in general.

Section 3 is a technical amendment to change the reference to section 10(a)(4) in section 9 of the Act to a reference to section 10(a)(5). This is necessary to correct an oversight which occurred when section 10 was renumbered in 1978.

Section 4 deletes references to malpractice protections for Peace Corps Volunteers now contained in Section 5(h) and proposed to be added to Sec. 10.

Section 5 amends section 10 of the Act to provide to Peace Corps employees and volunteers protection against claims for damages based on medical malpractice or negligence which is available to State Department employees. Peace Corps employees had this coverage prior to passage of the Foreign Service Act of 1980, but section 1091 of the Foreign Service Act of 1946 (which provided the coverage) was repealed and reenacted as part of the Department of State Basic Authorities Act. This reenactment deprived Peace Corps employees of the protection they previously had. This amendment would restore their coverage by extending to them the malpractice protections previously afforded only to Peace Corps Volunteers in Section 5(h) of the Act, which was based on the same law, using the language of Section 5(h) but adding a reference to Peace Corps employees.

Section 6 repeals section 18 of the Peace Corps Act, which applies the Mutual Defense Assistance Control Act of 1951 (22 U.S.C. 1611) to functions carried out under the Peace Corps Act. The Mutual Defense Assistance Act was superseded by the Export Administartion Act of 1979 (93 Stat. 503) effective October 1, 1979. Section 18 is therefore obsolete, and should be repealed.

PEACE CORPS,
Washington, D.C., March 17, 1981.

Hon. GEORGE BUSH,
President, U.S. Senate, the Capitol, Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for your consideration is a draft bill which will enable the Peace Corps to continue its work in behalf of world peace and friendship for the next two years.

The bill would authorize the appropriation of $95,000,000 for the fiscal year ending September 30, 1982 and such sums as may be necessary for the fiscal year ending September 30, 1983. It would also authorize such sums as may be necessary to fund increases in pay and other employee benefits authorized by law..

In recognition of the contribution that disabled individuals can make to their communities, we propose that a provision be added to the Peace Corps Act requiring that particular attention be given to programs, projects and activities which tend to integrate disabled people into the national economies of developing countries.

The bill would also restore the malpractice protection available to Peace Corps employees which was inadvertently removed when the Foreign Service Act of 1980 was passed.

The Office of Management and Budget has advised that there is no objection to the submission of this draft legislation to the Congress and that its enactment would be in accord with the program of the President.

Sincerely,

WILLIAM G. SYKES,
Acting Director.

By Mr. PERCY (by request):

S. 849. A bill to authorize appropriations for the International Communication Agency to carry out in fiscal years 1982 and 1983 international communication and educational and cultural exchange programs, and for other purposes; to the Committee on Foreign Relations.

INTERNATIONAL COMMUNICATION AGENCY AUTHORIZATION ACT, FISCAL YEARS 1982 AND 1983

● Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to authorize appropriations for the International Communication Agency.

This legislation has been requested by the International Communication Agency, and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with a section-by-section analysis of the bill and the letter from the Acting Director of ICA to the President of the Senate dated March 25, 1981.

There being no objection, the bill, analysis, and letter were ordered to be printed in the RECORD, as follows:

S. 849

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.—This Act may be cited as the "International Communication Agency Authorization Act, Fiscal Years 1982 and 1983."

SEC. 2. AUTHORIZATION AND APPROPRIATIONS.—There are authorized to be appropriated for the International Communication Agency, $561,402,000 for the fiscal year 1982 and $482,340,000 for the fiscal year 1983 to carry out international communication, educational, cultural, and exchange programs under the United States Information and Educational Exchange Act of 1948, as amended, the Mutual Educational and Cultural Exchange Act of 1961, as amended, and Reorganization Plan No. 2 of 1977, and other purposes authorized by law.

SEC. 3(A). CHANGES IN ADMINISTRATIVE AUTHORITIES.—Title III of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1451–1453) is amended to read as follows:

"PERSONS TO BE ASSIGNED

"SEC. 301. The Director of the International Communication Agency is authorized, when the government of another country is desirous of obtaining the services of a person having special scientific or other technical or professional qualifications, from time to time to assign or authorize the assignment for service, to or in cooperation with such government, any person in the employ or service of the Government of the United States who has such qualifications, with the approval of the Government agency in which such person is employed or serving. No person shall be assigned for service to or in cooperation with the government of any country unless (1) the Director finds that such assignment is necessary in the national interest of the United States, or (2) such government agrees to reimburse the United States in an amount equal to the compensation, travel expenses, and allowances payable to such person during the period of such assignment in accordance with the provisions of section 302, or (3) such government shall have made an advance of funds, property, or services as provided in section 902. Nothing in this Act, however, shall authorize the assignment of such personnel for service relating to the organization, training, operation, development, or combat equipment of the armed forces of a foreign government.

"STATUS AND ALLOWANCES

"SEC. 302. Any person in the employ or service of the United States, while assigned for service to or in cooperation with another government under the authority of this Act, shall be considered, for the purpose of preserving his rights, allowances, and privileges as such, an officer or employee of the Government of the United States and of the Government agency from which assigned and he shall continue to receive compensation from that agency. He may also receive, under such regulations as the President may prescribe, representation allowances similar to those allowed under section 905 of the Foreign Service Act of 1980. The authorization of such allowances and other benefits and the payment thereof out of any appropriations available therefor shall be considered as meeting all the requirements of 5 U.S.C. 5536.

"ACCEPTANCE OF OFFICE UNDER ANOTHER GOVERNMENT

"SEC. 303. Any person in the employ or service of the United States while assigned for service to or in cooperation with another

government under authority of this Act may, at the discretion of his Government agency, with the concurrence of the Director of the International Communication Agency, and without additional compensation therefor, accept an office under the government to which he is assigned, if the acceptance of such an office in the opinion of his Government agency is necessary to permit the effective performance of duties for which he is assigned, including the making or approving on behalf of such foreign government the disbursement of funds provided by such government or of receiving from such foreign government funds for deposit and disbursement on behalf of such government, in carrying out programs undertaken pursuant to this Act: *Provided, however,* that such acceptance of office shall in no case involve the taking of an oath of allegiance to another government."

SEC. 3. (b) Section 701 of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1476) is amended to read as follows:

"(a) Effective October 1, 1981, no money appropriated to carry out this Act shall be available for obligation or expenditure—

"(1) unless the appropriation therefor has been previously authorized by law; or

"(2) in excess of an amount previously prescribed by law.

"(b) To the extent that legislation enacted after the making of an appropriation to carry out this Act authorizes the obligation or expenditure thereof, the limitation contained in subsection (a) shall have no effect.

"(c) Appropriations to carry out this Act made available under joint resolutions making continuing appropriations for fiscal year 1982 or subsequent fiscal years are hereby authorized. The limitations contained in subsection (a) shall not apply to such appropriations.

"(d) The provisions of this section shall not apply to, or affect in any manner, permanent appropriations, trust funds, and other similar accounts administered by the International Communication Agency as authorized by law."

SEC. 3. (c) Section 804 of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1474) is amended—

(1) by revising paragraph (16) to read as follows:

"(16) purchase passenger motor vehicles for use abroad, except that right-hand drive and other special requirement vehicles may be purchased without regard to any maximum price limitation established by law;"

(2) by striking out "and" at the end of paragraph (18);

(3) in paragraph (19) by striking out the period and inserting a semicolon together with the word "and";

(4) by adding at the end thereof the following new paragraph:

"(20) purchase motion picture, radio and television producers' liability insurance to cover errors and omissions or similar insurance coverage for the protection of interests in intellectual property."

SEC. 3. (d) Title VIII of the United States Information and Education Exchange Act of 1948 (22 U.S.C. 1471–1475b) is amended by adding at the end thereof the following new section:

"ACTING ASSOCIATE DIRECTORS

"SEC. 808. If an Associate Director of the International Communication Agency dies, resigns, or is sick or absent, the Associate Director's principal assistant shall perform the duties of the office until a successor is appointed or the absence or sickness stops."

SEC. 3. (e) Section 802 of the United States Information and Educational Exchange Act (22 U.S.C. 1472) is amended by inserting the letter "(a)" immediately before the words "In carrying on activities" and adding the following new subsections:

"(b) Any contract of the types authorized by subsection (a) and described in subsection (d) of this section which is funded on the basis of annual appropriations may nevertheless be made for periods not in excess of five years when—

"(1) apupropriations are available and adequate for payment for the first fiscal year and all potential cancellation costs; and

"(2) the Director of the International Communication Agency determines that—

"(A) the need of the Government for the property or service being acquired over the period of the contract is reasonably firm and continuing;

"(B) such a contract will serve the best interests of the United States by encouraging effective competition or promoting economies in performance and operation; and

"(C) such a method of contracting will not inhibit small business participation.

"(c) In the event that funds are not made available for the continuation of such a contract into a subsequent fiscal year, the contract shall be cancelled and any cancellation costs incurred shall be paid from appropriations originally available for the same purpose or any amount remaining for the performance of the contract, appropriations currently available for the acquisition of similar property or services and not otherwise obligated, or appropriations made for such cancellation payments.

"(d) The types of contracts referred to in subsection (b) shall be those for the procurement of property or services, or both, for the operation, maintenance and support of programs, facilities and installations for or related to telecommunication activities, newswire services, and the distribution of books and other publications in foreign countries."

SEC. 3. (f) Section 1011 of the United States Information and Educational Exchange Act of 1948, as amended, is amended by adding at the end thereof the following new subsection:

"(i) Foreign currencies which were derived from conversions made pursuant to the obligation of informational media guaranties and which have been determined to be unavailable for, or in excess of, the requirements of the United States and transferred to the Secretary of the Treasury, shall be held until disposed of, and any dollar proceeds realized from such disposition shall be deposited in miscellaneous receipts. As such currencies become available for such purposes of mutual interest as may be agreed to by the governments of the United States and the country from which the currencies derive, they may be sold for dollars to agencies of the United States government."

SEC. 3. (g) Title VIII of the United States Information and Educational Exchange Act of 1948, as amended, is revised by the addition of the following section:

"SEC. 809. Cultural exchanges, international fairs and expositions, and other exhibits or demonstrations of United States economic accomplishments and cultural attainments provided for under this Act or the Mutual Educational and Cultural Exchange Act of 1961 shall not be considered "public work" as that term is defined in Section 1 of the Defense Base Act, as amended (Section 1651(b) of Title 42 of the U.S. Code)."

SEC. 4. ADDITIONAL FISCAL YEAR 1981 AUTHORIZATION.—Section 202 of the International Communication Agency Authorization Act, fiscal years 1980 and 1981 (93 Stat. 398; Public Law 96–60), is amended by:

(1) inserting the designation "(a)" before the word "There" at the beginning of the section; and

(2) adding the following new paragraph (b):

"(b) In addition to the amounts otherwise authorized to be appropriated for the Agency for the fiscal year 1981 or thereafter, such sums as may be necessary to liquidate the outstanding notes, and accrued interest thereon, assumed in the operation of the informational Media Guarantee Program pursuant to section 1011 of the United States Information and Educational Exchange Act of 1948, as amended (22 U.S.C. 1442)."

SECTION-BY-SECTION ANALYSIS

AUTHORIZATION OF APPROPRIATIONS

Section 202

This section provides a general authorization of appropriations for the International Communication Agency (USICA) in accordance with the provisions of Section 701(a) of the United States Information and Educational Exchange Act of 1948, as amended (22 U.S.C. 1476(a)). The proposed authorization will enable the Agency to carry out international communication, educational, cultural and exchange programs under the United States Information and Educational Exchange Act of 1948, as amended (the "Smith-Mundt Act"); the Mutual Educational and Cultural Exchange Act of 1961, as amended (the "Fulbright-Hays Act"); and Reorganization Plan No. 2 of 1977. This legislation is submitted in accordance with the provisions of Section 607 of the Congressional Budget Act of 1974 (Public Law 93–344).

CHANGES IN ADMINISTRATIVE AUTHORITIES

Section 203(a)—Assignment of specialists

This proposal enables the Director of the Agency to assign or to authorize the assignment of any employee of the United States to a foreign government at the latter's request.

At present, only U.S. citizen employees may thus be assigned under the authority of § 301 of the Smith-Mundt Act. The legislative history furnishes no reason why the assignment was restricted only to citizen employees. In particular cases, it may be that the employee with the requisite expertise is an alien, and it may achieve economies or be advantageous programmatically or psychologically to send a third-country national to give instruction. This is likely to occur under an agreement covering a radio relay station.

The amendments to §§ 302 and 303 are technical in nature and are required to bring the sections into conformity with § 301, and certain updated statutory cross references.

Section 203(b)—Authorization for continuing appropriation resolution

As Fiscal Year 1981 began, the Agency, as well as most other agencies in the United States Government, found itself in need of a continuing appropriations resolution. The Agency was fortunate in that legislation covering authorization for FY '81 appropriations up to $466 million was already enacted. Given the possibilities for a repetition of the need for continuing resolutions in future years, perhaps without enacted advance authorization, the Agency would be well served to have § 701 of the Smith-Mundt Act revised so that continuing resolutions would be excepted from the prior authorization requirement. Some agencies have such legislation in permanent form thus obviating the necessity to enact special authorizing provisions as part of continuing resolutions. Should Congress through some lapse fail in a continuing resolution to authorize the Agency to use the appropriations, it would be precluded from doing so.

USIA, USICA's predecessor, previously had such authority in § 701 of Smith-Mundt, but Congress in 1972 decided to bring State and USIA into the periodic authorization process.

This revision will not obviate USICA appearances for its authorization bills before its Congressional oversight committees but will be limited to the purpose stated above with respect to continuing resolutions.

Section 203(c)—Technical amendments

(1) Purchase of Special Requirement Vehicles

Terrorist activities abroad increase the risk of death or injury to U.S. personnel and of damage to U.S. vehicles or vehicles without security features. The Agency should have the flexibility or option to acquire whatever type of equipment is best suited to meet the threat at each particular location.

This amendment brings the Agency's authority in line with identical authority granted to the Department of State in Title I of Public Law 96-68 (93 Stat. 416). Section 204(b)(4) of Public Law 96-60 (93 Stat. 400) granted the Agency authority to purchase right-hand drive vehicles for overseas use without regard to maximum price limitation.

(2) Special Insurance Coverage

This proposal will clarify the existing authority of the Agency to comply with the demands with which many owners of films, music and other cultural or intellectual properties generally precondition their permission to use the property.

Most of the large film studies and music companies have been unwilling to grant the Agency use of film clips or recorded music unless the Agency agrees to sign their standard indemnification agreements which current federal practice prohibits because of the uncertain and unfunded potential liability. The studios are concerned about the possibility of someone involved in the production of the film filing a claim for further royalties based on the Agency's use of the film. These payments are continuing in nature in that payments accumulate with additional showings of the films. Whenever an independent contractor produces a film for the Agency, he or she signs the studio's indemnification agreement for any acquired film footage used and thus assumes the risk of future payments being demanded for such use. When the agency puts together a film product in-house, it may be unsuccessful in acquiring footage from a large number of famous films (as was the case with the recent VTR series *The American Cinema*).

Owners of music rights and other cultural or intellectual property also require an indemnity.

The Agency seeks clarification of its authority to purchase a special errors and emissions insurance policy or similar coverage to meet any potential liability. Thus, the ability of the Agency to comply with the rights holders' demands for indemnification will be undoubted. Insurance rates are typically low for coverage relating to rights in creative or intellectual property. Furthermore, the Agency intends to assure good actuarial experience by continuing its present rights clearance processes under which no type of claim of the kind to be insured against has been presented in the history of the Agency.

Section 203(d)—Acting associate directors

During the absence, disability or death of an Associate Director or during a vacancy in the Office of the Associate Director, his or her principal deputy succeeds to the duties on an acting basis in accordance with the Agency's administrative procedures. However, the validity of some actions by such acting Associate Directors could be in doubt and perhaps successfully challenged in court, particularly those actions involving the obligation of funds. The Comptroller General has called into question the validity of actions taken by officials occupying on an acting basis positions whose incumbents are Presidential nominees confirmed by the Senate, unless specific legal authority is provided for the temporary official so to act (*e.g.*, 56 Comp. Gen. 761 (1977); Decision B-150136. May 16, 1978).

This proposal will cure the deficiency by authorizing the deputy to exercise the full functions of the Associate Director. Such authority has long been granted to cabinet and military departments by the Vacancies Act (5 U.S.C. 3346), but the pertinent statute has not been extended to executive agencies.

Section 203(e)—Multiyear contracting authority

The sole purpose of the proposed amendments to § 802 of the United States Information and Educational Exchange Act of 1948 (22 U.S.C. 1472) is to authorize the Agency to enter into contracts for property and services on a multiyear basis where such contracts are funded by annual appropriations.

The term of any such contract could not exceed five years. If a contract was cancelled at any time after the fiscal year in which made by reason of the failure or refusal of Congress to appropriate funds for its continuation, a cancellation payment would, if necessary, be made to the contractor to reimburse him for the unrecouped portion of such items as startup costs that were to have been prorated over the originally contemplated contract period. Some examples of the sort of economies and the potential for increased competition that the Agency might expect to derive from such multiyear contracting include the following:

First, there has long been a need for an offshore facility in Greece for the more economical and expeditious unloading of the substantial quantities of petroleum products used to operate the Voice of America radio relay station at Kavala. A major supplier informed the Agency that if it had been offered a multiyear contract for these products, it would have installed the needed facility at its own expense.

Second, multiyear contracts for newswire services will probably result in less drastic annual price increases to the Agency.

Third, the tariff rates that the Agency pays for satellite broadcast transmission services will probably be lower under multiyear contracts.

Fourth, the cost to the Agency of obtaining computerized lists of books for use abroad by its numerous libraries will be substantially reduced under multiyear contracts. In addition, there is a strong likelihood of increased competition for these contracts because the high startup costs could be amortized over a much longer period of time.

Fifth, in the absence of our ability to make other than one-year contracts for the maintenance of the grounds at our relay stations, we have encountered decreasing competition and, presumably, increased costs, inasmuch as many small business enterprises are unwilling or unable to absorb in one year the relatively large capital costs of equipment needed to perform these maintenance services.

The requested amendments are broadly analogous to the provisions contained in 10 U.S.C. 2306(g), which authorize certain agencies (primarily the military departments) to enter into contracts for periods of not more than five years for specified types of services (and related supplies) to be rendered outside the forty-eight contiguous states and the District of Columbia. However, these amendments have been cast in a simpler form.

Section 203(f)—Disposition of foreign currencies derived from informational media guarantee program

It is proposed that the Secretary of the Treasury be authorized to sell the foreign currencies generated under the Informational Media Guarantee Program and now held by the Treasury in restricted accounts. As of September 30, 1979, the Treasury was holding foreign currency from Indonesia and Pakistan valued at $1,036,611 collected under the program. These funds, obtained from conversions made pursuant to the guarantees, are not available for administrative uses of the U.S. Government because of restrictions contained in the relevant bilateral agreements. Extensive but unsuccessful efforts have been made to have the agreements changed. In the event a bilateral agreement is changed in the future, the Treasury would need legislative authority to sell the currency to any U.S. Government agency. Proceeds of such sales would be deposited into miscellaneous receipts.

Section 203(g)—Defense Base Act

This proposal will exempt USICA from the necessity of paying for federal workmen's compensation insurance for our exhibits and performing arts exchanges.

The law providing compensation for disability or death to persons employed at military bases outside the United States has recently been interpreted by the courts and an administrative tribunal to apply to U.S. Government grants and to service contracts even when there is no national defense or war activities nexus.

As a result, performing art groups overseas on USICA-sponsored tours are being required to procure insurance coverage under the more liberal—and thus more expensive—Longshoremen's and Harbor Workers' Compensation Act rather than under their usual state or local workers compensation programs for which they already carry insurance. The increased cost is significant (at least $7,500 per grant regardless of size of performing group or length of tour) and decreases the funds available for cultural programming.

ADDITIONAL FISCAL YEAR 1981 AUTHORIZATION

Section 204

In addition to the technical change explained in Section 203(f) above, USICA proposes to eliminate the accrued debts in the operation of the now-dormant Informational Media Guarantee Program. The net requirement to liquidate the outstanding borrowed principal and the interest thereon, estimated $33,718,000 through September 30, 1981, will necessitate additional appropriation authority. A supplementary appropriation in the amount of $33,718,000 is being requested for fiscal year 1981. The Agency seeks authorization "for the fiscal year 1981 or thereafter" and "such sums as may be necessary" in order to cover possible delays in enactment of appropriations and variations in interest accruals over time.

This transaction will not result in any net outlay of funds from the United States Treasury.

INTERNATIONAL COMMUNICATION AGENCY,
Washington, D.C., March 25, 1981.

DEAR MR. PRESIDENT: There is transmitted herewith proposed legislation to authorize appropriations for the International Communication Agency to carry out in Fiscal Years 1982 and 1983 international communication and educational and cultural exchange programs. These activities are mandated by the United States Information and Educational Exchange Act of 1948, as amended; the Mutual Educational and Cultural Exchange Act of 1961, as amended; and Reorganization Plan No. 2 of 1977. The authorization of our appropriations is required by Section 701(a) of the United States Information and Educational Exchange Act of 1948, as amended (22 U.S.C. 1475(a)).

The legislation also proposes to amend some of the provisions of the Agency's basic enabling authorities. An analysis explaining the proposed legislation is enclosed.

The Office of Management and Budget has informed us that there is no objection to

the presentation of this proposed legislation and that its enactment would be in accord with the program of the President.

Sincerely,

JOHN W. SHIRLEY,
Acting Director.●

By Mr. BAUCUS:

S. 850. A bill to amend the Internal Revenue Code of 1954 to provide greater protection for the rights of the taxpayers; to the Committee on Finance.

TAXPAYERS' BILL OF RIGHTS

● Mr. BAUCUS. Mr. President, the bill I am introducing today—the taxpayers' bill of rights—would put American taxpayers on a more equal footing with the Internal Revenue Service. American taxpayers are asked to comply voluntarily with the tax laws. In turn, Congress has an obligation to assure taxpayers that these laws are administered fairly and impartially, that enforcement activities are carried out evenhandedly and that help is available to resolve speedily any questions, problems or complaints they might have.

Mr. President, this legislation is a six-point plan that would define taxpayers' rights and provide protection against arbitrary, irresponsible IRS actions. Briefly, my bill would:

Emphasize the importance of IRS maintaining and improving its taxpayer service programs;

Create an independent ombudsman in the IRS to intervene on taxpayers' behalf;

Require the IRS to establish an administrative appeal procedure for disputed collection cases, similar to the procedure currently provided for disputed examinations;

Require the IRS to issue rulings within 18 months after new laws are enacted;

Eliminate the requirement that taxpayers file periodic declarations of estimated tax, and raise from $100 to $300 the amount of tax one can owe on a return before quarterly estimated tax payments are required;

Eliminate the requirement that employers send W–2 forms to persons who leave a job midyear.

TAXPAYER SERVICE

The Federal income tax system asks taxpayers to determine whether they are required to file a tax return and, if so, they must determine the amount owed. The need for assistance in preparing and filing income tax returns has increased significantly in the past two decades. For example, in 1968, 40 tax loopholes or tax expenditures were part of the Tax Code. Today, over 100 tax expenditures are part of the Tax Code. As a result, the tax return has become more complicated and difficult to understand.

During this same period, the IRS gradually increased and improved its taxpayer service programs. However, during times of budget cuts, these programs are easy targets. Increasingly, taxpayers trying to reach the IRS through its toll-free telephone system get a busy signal, or, if they go to a local IRS office, must wait for service.

The gap is growing between taxpayers' need for help and the level of help provided by IRS. My taxpayers' bill of rights recognizes this change and declares that it should be congressional policy that IRS continue to maintain and improve its taxpayer service programs.

TAXPAYER OMBUDSMAN

In 1977, the IRS established a problem resolution program (PRP) to help taxpayers with problems they were unable to resolve through normal IRS channels. The program has offices in all of IRS' districts, service centers and regional offices.

Of the problems taxpayers brought to PRP last year, about 37 percent dealt with errant refund checks. Others involved errors in computer-generated notices and incorrect social security numbers.

The IRS created the position of taxpayer ombudsman in January 1980 to centralize control of this rapidly expanding program. The present IRS ombudsman is in charge of 214 PRP people nationwide. The responsibilities of the ombudsman are twofold: To be administrator of the program and to be the principal advocate of taxpayer interests and concerns within the IRS.

I applaud the IRS' efforts to establish the taxpayer ombudsman and the problem resolution program. Unfortunately, the ombudsman has not been given sufficient latitude to act as an aggressive advocate of taxpayers' rights.

Integrated within the IRS, the taxpayer ombudsman can be effective in solving taxpayer difficulties. Immersed in the give and take of the agency, the ombudsman can cross divisional lines, cut redtape, gain information and eventually solve both individual taxpayer problems as well as their underlying causes.

In his present position inside the agency, the IRS ombudsman is under the Office of the Commissioner; in fact, he is a career IRS civil servant. But to be an effective taxpayer advocate, the ombudsman must be independent from the agency. He should have an objective, not a subjective, view of the operation.

Thus, my taxpayers' bill of rights mandates the establishment of an independent Office of Ombudsman. This ombudsman, to be appointed for a 6-year term by the President, with the consent of the Senate, would have the independence, power, and authority to intervene aggressively for American taxpayers.

APPEAL OF IRS COLLECTION CASES

The Internal Revenue Service has remarkable authority for dealing with taxpayers. This authority is most readily abused in the area of collection of taxes.

Under the present law, if a citizen does not pay his taxes, the Internal Revenue Service can attach a lien to, or seize his property—farmland, home, automobile—or levy on his wages or bank accounts. All of this can be done without any type of appeal and without a court order.

Once a Federal tax lien is filed, it becomes a matter of public record and may adversely affect the taxpayer's business transactions or other financial interests.

I am sure we all want our fellow citizens to pay the taxes they owe, if they have the ability to do so. But what if the IRS is wrong? What if the taxpayer does not owe the tax, has already paid it, or is willing and able to pay the taxes in installments? There is nothing in the law to protect these taxpayers. They have no legal right to appeal a collection decision of the IRS unless they first pay the amount in dispute and then file a claim. This is small comfort to the person who has already paid the amount demanded or knows that it is not owed. The rights of these taxpayers need to be protected.

Numerous horror stories have been reported in Montana and elsewhere, describing tales of IRS harassment and unwarranted confiscation of property. I believe IRS collection powers, without any type of appeal, and specifically its authority to seize property without a court order, are unreasonable Government authorities.

A recent investigation on IRS collection practices by the Senate Subcommittee on Oversight of Government Management revealed the following facts:

IRS violates its own formal policy by taking excessive and harsh enforcement collection actions without considering all available collection alternatives;

IRS uses seizure and levy statistics as a principal measure of collection effectiveness;

IRS group managers abuse their supervisory authority and require revenue officers to take harsh and unnecessary enforcement actions;

IRS uses enforcement statistics to impose production quotas on its collection employees.

My taxpayers' bill of rights would correct these injustices by requiring the IRS to establish an administrative appeal procedure for contested collection cases, similar to that allowed for unagreed examinations, and to obtain a court order before seizing any citizen's property for nonpayment of taxes.

REGULATION BACKLOG

To implement tax legislation passed by Congress, the Internal Revenue Service must establish specific rules. Unfortunately, the IRS is notoriously slow in formulating these rules.

The Tax Reform Act of 1976, two subsequent acts in 1978—the Revenue Act and the Energy Act—and the Windfall Tax Act all added to the IRS regulation burden by requiring additional regulations. This influx of legislation—which will undoubtedly continue this year—exacerbated by IRS' lackadasical response, has left a large void in the tax law. Taxpayers are often afforded little guidance and are forced to pay their taxes without a clear understanding of what their liabilities should be.

What is the impact of the regulation backlog? Tax attorneys say the lack of regulations may inhibit transactions with uncertain tax consequences.

Professionals who have to give tax advice based on the law say they are frustrated:

You get into an area and suddenly discover there is no regulation. You're hamstrung.

Another attorney said:

I'd like to be able to give some sound advice. I can certainly do a better job if I know the IRS position.

The absence of regulations undermines transactions or leads to excessive caution. One attorney commented:

The rules of our profession require that we have reasonable support for advice. It would be useful to have regulations as that support.

To ease the uncertainty, most attorneys and accountants seek IRS rulings to fill regulation gaps. Such a ruling outlines the probable IRS stance in a particular situation. However, a request for a ruling may be as hard to come by as a regulation.

Taxpayers need to be protected against unreasonable delays in IRS rulemaking. My bill provides that all regulations must be issued within 18 months, unless the law specifically provides otherwise.

REDUCTION OF REDTAPE FOR TAXPAYERS

Taxpayers are overburdened by IRS forms. To help cut down some of the paperwork, my bill would eliminate the requirement that taxpayers file declarations of estimated tax and would raise from $100 to $300 the amount of tax one could owe before estimated tax payments are required.

The first revision would eliminate hundreds of thousands of voucher forms currently filed when no payments are necessary. These forms are useless and are discarded by the IRS.

The Government Accounting Office estimates that it costs taxpayers about $35,175 in postage to file those vouchers in 1979 and cost IRS about $11,360 to receive and destroy them.

If Government officials in the future would devote as much time to eliminating reports as they have in the past to creating them, I believe as much as 50 to 70 percent of all Government paperwork could be eliminated.

Considering the reduction in cost and paperwork burden to both the taxpayers and the IRS, I believe it is necessary to remove the requirement that individual taxpayers make declarations of estimated tax.

The second revision, raising the minimum level of accumulated tax from $100 to $300 before estimated tax is required, will relieve many taxpayers with small pensions, dividends or interest from the complicated task of figuring and filing quarterly estimated tax payments.

REDUCTION OF REDTAPE FOR SMALL BUSINESSES

Small businesses are caught in a maze of IRS redtape. The taxpayers' bill of rights offers a partial solution to this problem by eliminating duplicative W–2 forms.

Current law requires that a W–2 form be issued to a worker who leaves his job during the year. To alleviate some of the paperwork burden of small businesses, my bill proposes that all W–2's be issued once, at the end of the year, for all employees. Those who need to obtain forms earlier could do so by request.

CONCLUSION

The complexity of the Tax Code and the arbitrary administration of the tax laws have undermined much of the faith taxpayers have in Government.

The procedures outlined in the taxpayers' bill of rights require added services at some cost to the IRS. However, these provisions would help restore the taxpayers' faith in the equitable administration of the tax laws by insuring that taxpayers and the Internal Revenue Service are aware of their respective obligations.

In this regard, my bill would reduce long-run costs of the IRS by increasing taxpayers' confidence in the equity and efficiency of IRS operations and thereby increasing voluntary compliance with the tax laws.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 850

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Taxpayers' Bill of Rights Act".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds and declares that—

(1) the very success of our system of taxation depends upon the willingness of taxpayers to accurately assess themselves and voluntarily pay their taxes,

(2) it is in the national interest to encourage all Americans to voluntarily comply with the tax laws of our Nation, and

(3) the Internal Revenue Service can encourage voluntary compliance by improving the assistance the Internal Revenue Service provides to taxpayers in answering tax questions, helping taxpayers complete tax returns, and explaining notices and bills.

(b) PURPOSE.—The purpose of this Act is to protect the rights of American taxpayers. Basic to such rights must be the ability to receive the assistance needed to deal with our tax laws which have become increasingly complex and difficult to understand.

SEC. 3. ESTABLISHMENT OF AN OFFICE OF OMBUDSMAN.

(a) ESTABLISHMENT OF OFFICE.—Section 7802 (relating to Commissioner of Internal Revenue) is amended by adding at the end thereof the following new subsection:

"(c) OFFICE OF OMBUDSMAN.—

"(1) IN GENERAL.—There is established within the Internal Revenue Service an office to be known as the Office of Ombudsman to be under the supervision and direction of the Ombudsman. The Ombudsman shall be appointed by the President, by and with the advice and consent of the Senate, for a six year term of office. The Ombudsman may employ such personnel as he deems necessary to carry out the functions of the Office of Ombudsman.

"(2) DUTIES OF THE OMBUDSMAN.—The Ombudsman shall be an advocate of the rights of taxpayers and shall be responsible for—

"(A) establishing procedures to review and evaluate complaints of taxpayers regarding improper, abusive, or inefficient service by employees of the Internal Revenue Service and, with due regard to the rights of both the taxpayer and such employees and under regulations prescribed by the Secretary, taking action to correct such service;

"(B) surveying taxpayers to obtain their evaluation of the quality of the service provided by the Internal Revenue Service and the Office of the Ombudsman;

"(C) compiling data on the number and type of taxpayer complaints in each internal revenue district and service center and evaluating the actions taken to resolve such complaints;

"(D) issuing Stop Action Orders under section 7811;

"(E) providing a forum for taxpayers to communicate their problems in dealing with the tax forms, publications, complex regulations and internal procedures of the Internal Revenue Service; and

"(F) carrying out such other functions which relate to assisting taxpayers as the Ombudsman may deem appropriate.

"(3) REPORT.—The Ombudsman shall submit an annual report on the activities of the Office of Ombudsman (including any recommended legislation) to the Committee on Ways and Means of the House of Representatives, the Committee on Finance of the Senate, and the Joint Committee on Taxation.".

(b) COMPENSATION FOR OMBUDSMAN.—Section 5316 of title 5, United States Code (relating to positions at level V), is amended by adding at the end thereof the following new item: "Ombudsman, Department of the Treasury.".

(c) STOP ACTION ORDERS.—Subchapter A of chapter 80 (relating to general rules for application of the internal revenue laws) is amended by adding at the end thereof the following new section:

"SEC. 7811. STOP ACTION ORDERS.

"(a) AUTHORITY TO ISSUE.—Upon application filed by a taxpayer with the Office of Ombudsman (in such form, manner, and at such time as the Secretary shall by regulations prescribe), the Ombudsman may issue a Stop Action Order if, in the determination of the Ombudsman, the taxpayer is suffering or about to suffer from an unusual unnecessary, or irreparable loss as a result of the manner in which the internal revenue laws are being administered by the Secretary.

"(b) EFFECT OF ORDER.—During the period (not to exceed 60 days) specified in any Stop Action Order issued under subsection (a), the Secretary may not take any action adverse to such taxpayer under—

"(1) chapter 64 (relating to collection),

"(2) subchapter B of chapter 70 (relating to bankruptcy and receiverships),

"(3) chapter 78 (relating to discovery of liability and enforcement of title), or

"(4) any other provision of law which is specifically described by the Ombudsman in such order,

unless the Secretary has made a finding that the collection of a tax would be jeopardized by delay.".

(d) CONFORMING AMENDMENTS.—

(1) The heading for section 7802 is amended by inserting "; OMBUDSMAN" after "ORGANIZATIONS)".

(2) The table of sections for subchapter A of chapter 80 is amended by inserting "; Ombudsman" after "Organizations)" in the item relating to section 7802.

(3) The table of sections for subchapter A of chapter 80 is amended by adding at the end thereof the following new item:

"Sec. 7811. Stop Action Orders.".

(e) EFFECTIVE DATE.—The amendments made by this section shall take effect on the 90th day after the date of the enactment of this Act.

SEC. 4. ADMINISTRATIVE APPEAL OF LIENS.

(a) ESTABLISHMENT OF ADMINISTRATIVE APPEAL FOR DISPUTED LIENS.—Subchapter C of chapter 64 (relating to lien for taxes) is amended by redesignating section 6326 as section 6327 and inserting after section 6325 the following new section:

"SEC. 6326. ADMINISTRATIVE APPEAL OF LIENS.

"Any person shall be allowed to appeal to the Secretary, in such form and at such time as the Secretary shall prescribe by regulations, the imposition of a lien under this subchapter on the property or the rights to property of such person.".

(b) REGULATIONS.—The Secretary shall prescribe the regulations necessary to implement the administrative appeal provided for in the amendment made by subsection (a) within 180 days after the date of enactment of this Act.

(c) CONFORMING AMENDMENT.—The table of sections for subchapter C of chapter 64 is amended by striking out the item relating to section 6326 and inserting in lieu thereof the following:

"Sec. 6326. Administrative appeal of liens.
"Sec. 6327. Cross references.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to any lien imposed on or after 180 days after the date of enactment of this Act.

SEC. 5. PREVENTION OF UNWARRANTED SEIZURE OF TAXPAYER PROPERTY.

(a) GENERAL RULE.—Section 6331 (relating to levy and distraint) is amended by redesignating subsection (e) as subsection (g) and by inserting after subsection (d) the following new subsections:

"(e) COURT ORDER REQUIRED FOR COLLECTIONS NOT IN JEOPARDY.—

"(1) IN GENERAL.—Levy may be made under subsection (a) with respect to any unpaid tax only after the Secretary is authorized by court order to make such levy.

"(2) AUTHORITY TO ISSUE ORDER.—On request of the Secretary, the court order required under paragraph (1) may be issued by any Federal judge or any judge of a State court of record within the district wherein the property (or right to property) to be levied upon is located.

"(3) STANDARD FOR ISSUING ORDER.—A judge may issue an order under paragraph (2) only if—

"(A) the owner of the property to be levied upon has exhausted all administrative appeals under subsection (f) or section 6326, or the time for making such appeals has expired,

"(B) the Secretary, by affidavit sworn to before such judge, establishes that the requirements of this section (other than this subsection) have been met, and

"(C) the judge determines that there is reasonable cause to believe that such requirements have been met.

"(4) JEOPARDY.—Paragraph (1) shall not apply to a levy if the Secretary has made a finding under the last sentence of subsection (a) that the collection of tax is in jeopardy.

"(5) STATE.—For purposes of this subsection, the term 'State' includes any possession of the United States.

"(f) ADMINISTRATIVE APPEAL.—Any person shall be allowed to appeal to the Secretary, in such form and at such time as the Secretary shall prescribe by regulations, the decision of the Secretary to levy upon the property or the right to property of such person made under subsection (a).".

(b) REGULATIONS.—The Secretary shall prescribe the regulations necessary to implement the administrative appeal provided for in the amendment made by subsection (a) within 180 days after the date of enactment of this Act.

(c) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to any levy issued on and after 180 days after the date of the enactment of this Act.

SEC. 6. ELIMINATION OF DELAYS IN RULEMAKING.

(a) GENERAL RULE.—Section 7805 (relating to rules and regulations) is amended by adding at the end thereof the following new subsection:

"(d) TIME FOR PRESCRIBING REGULATIONS.—

"(1) IN GENERAL.—Unless otherwise provided by law, all of the initial final regulations necessary to be promulgated for the purpose of implementing the addition of any provision to, or the amendment of any provision of, this title shall be promulgated within 18 months after the date of the enactment of such addition or amendment.

"(2) FAILURE TO PROMULGATE REGULATIONS WITHIN TIME PRESCRIBED.—

"(A) PROSPECTIVE EFFECTIVE DATE.—If the Secretary fails to prescribe regulations within the period provided for in paragraph (1), the effective date of such regulations shall not be earlier than the date on which they are published in the Federal Register.

"(B) REASONABLE POSITION.—If the Secretary fails to promulgate regulations within the time prescribed by paragraph (1), any reasonable position with respect to an issue for which the regulations have not been promulgated which is advanced by the taxpayer shall apply to such taxpayer with respect to such issue, notwithstanding any regulations subsequently promulgated by the Secretary.

"(C) BURDEN OF PROOF.—In any legal proceeding with respect to issues described in subparagraph (B), the taxpayer shall have the burden of proof in showing that his position is reasonable. With respect to such issues, the position of the Secretary shall not be given any greater weight than that of the taxpayer.

"(D) APPLICATION OF PARAGRAPH.—This paragraph shall only apply to issues arising with respect to the taxpayer after the time provided in paragraph (1) and on or before the date the regulations are published in the Federal Register, but shall not apply to reoccurrences of such issues with respect to such taxpayer after the date on which the regulations are so published.".

(b) EFFECTIVE DATES.—

(1) GENERAL RULE.—Except as provided in paragraph (2), the amendments made by this section shall apply to regulations relating to amendments or additions to the Internal Revenue Code of 1954 enacted after December 29, 1969.

(2) RETROACTIVE APPLICATION.—In the case of amendments or additions made to the Internal Revenue Code of 1954 which were enacted after December 29, 1969, and before the date 6 months from the date of the enactment of this Act, the provisions of section 7805(d)(1) of the Internal Revenue Code of 1954 shall be applied by substituting "within 36 months from the date of the enactment of the Taxpayers' Bill or Rights Act" for "within 18 months of the date of the enactment of such addition or amendment".

SEC. 7. REDUCTION OF REDTAPE FOR INDIVIDUAL TAXPAYERS.

(a) REPEAL OF REQUIREMENT OF DECLARATION.—Section 6015 (relating to declarations of estimated income tax by individuals) and section 6073 (relating to time for filing declarations of estimated income tax by individuals) are repealed.

(b) INSTALLMENT PAYMENTS OF ESTIMATED INCOME TAX BY INDIVIDUALS.—Section 6153 (relating to installment payments of estimated income tax by individuals) is amended to read as follows:

"SEC. 6153. INSTALLMENT PAYMENTS OF ESTIMATED INCOME TAX BY INDIVIDUALS.

"(a) INDIVIDUALS REQUIRED TO PAY ESTIMATED INCOME TAX.—Except as otherwise provided by this section, every individual subject to taxation under section 1 shall make payments of his estimated tax (as defined in subsection (c) during the taxable year as provided in subsection (b)) if—

"(1) the gross income for the taxable year can reasonably be expected to exceed—

"(A) $20,000 in the case of—

"(i) a single individual, including a head of household (as defined in section 2(b)) or a surviving spouse (as defined in section 2(a)); or

"(ii) a married individual entitled under subsection (e) to make joint payments with his spouse, but only if his spouse has not received wages (as defined in section 3401(a)) for the taxable year;

"(B) $10,000 in the case of a married individual entitled under subsection (e) to make joint payments with his spouse, but only if both he and his spouse have received wages (as defined in section 3401(a)) for the taxable year; or

"(C) $5,000 in the case of a married individual not entitled under subsection (e) to make joint payments with his spouse; or

"(2) the gross income can reasonably be expected to include more than $500 from sources other than wages (as defined in section 3401(a)).

Notwithstanding the provisions of this subsection, no payments are required if the estimated tax (as defined in subsection (c)) can reasonably be expected to be less than $300.

"(b) PAYMENT IN INSTALLMENTS.—Any individual required under subsection (a) to make payments of estimated tax (as defined in subsection (c)), shall make such payments in installments as follows:

	The following percentages of the estimated tax shall be paid on the 15th day of the—			
"If the requirements of subsection (a) are met—	1st mo	6th mo	9th mo	1st mo of succeeding taxable year
Before the 1st day of the 4th mo of the taxable year	25	25	25	25
After the last day of the 3d mo and before the 1st day of the 6th mo of the taxable year		33⅓	33⅓	33⅓
After the last day of the 5th mo and before the 1st day of the 9th mo of the taxable year			50	50
After the last day of the 8th mo and before the 1st day of the 12th mo of the taxable year				100

"(c) ESTIMATED TAX DEFINED.—For purposes of this title, in the case of an individual, the term 'estimated tax' means—

"(1) the amount which the individual estimates as the amount of the income tax imposed by chapter 1 for the taxable year (other than the tax imposed by section 55 or 56), plus

"(2) the amount which the individual estimates as the amount of the self-employment tax imposed by chapter 2 for the taxable year, minus

"(3) the amount which the individual estimates as the sum of any credits against tax provided by part IV of subchapter A of chapter 1.

"(d) RECOMPUTATION OF ESTIMATED TAX.—If, after paying any installment of estimated tax, the taxpayer makes a new estimate, the amount of each remaining installment (if any) shall be the amount which would have been payable if the new estimate has been made when the first estimate for the taxable year was made, increased or decreased (as the case may be) by the amount computed by dividing—

"(1) the difference between—

"(A) the amount of estimated tax required to be paid before the date on which the new estimate is made, and

"(B) the amount of estimated tax which would have been required to be paid before

such date if the new estimate had been made when the first estimate was made, by

"(2) the number of installments remaining to be paid on or after the date on which the new estimate is made.

"(e) JOINT PAYMENTS BY HUSBAND AND WIFE.—In the case of a husband and wife, payments under this section may be made by them jointly, in which case the liability with respect to the estimated tax shall be joint and several. No joint payment may be made if either the husband or the wife is a nonresident alien, if they are separated under a decree of divorce or of separate maintenance, or if they have different taxable years. If joint payments are made but a joint return is not made for the taxable year, the estimated tax for such year may be treated as the estimated tax of either the husband or the wife, or may be divided between them.

"(f) FARMERS OR FISHERMEN.—Payments of estimated tax required by this section from any individual—

"(1) whose estimated gross income from farming or fishing (including oyster farming) for the taxable year is at least two-thirds of his total estimated gross income from all sources for the taxable year, or

"(2) whose gross income from farming or fishing (including oyster farming) shown on his return for the preceding taxable year is at least two-thirds of the total gross income from all sources shown on such return,

may in lieu of the time prescribed in subsection (b) file a return, for the taxable year for which the estimated tax is payable, and make full payment of the estimated tax on or before March 1 of the succeeding taxable year.

"(g) INSTALLMENTS PAID IN ADVANCE.—Any installment payment of estimated tax required by this section may be made prior to the date prescribed for its payment.

"(h) SHORT TAXABLE YEARS.—The application of this section to taxable years of less than 12 months shall be in accordance with regulations prescribed by the Secretary.

"(i) ESTATES AND TRUSTS.—The provisions of this section shall not apply to an estate or trust.

"(j) NONRESIDENT ALIEN INDIVIDUALS.—No payments shall be required to be made under this section by a nonresident alien individual unless—

"(1) withholding under chapter 24 is made applicable to the wages, as defined in section 3401(a), of such individual,

"(2) such individual has income (other than compensation for personal services subject to deduction and withholding under section 1441) which is effectively connected with the conduct of a trade or business within the United States, or

"(3) such individual is a resident of Puerto Rico during the entire taxable year.".

(c) CONFORMING AMENDMENTS.—

(1) Paragraph (6) of section 871(g) (relating to tax on nonresident alien individuals) is amended to read as follows:

"(6) For the requirement that certain nonresident alien individuals pay an estimated income tax, see section 6153(j).".

(2) Paragraph (3) of section 1403(b) (relating to miscellaneous provisions) is amended to read as follows:

"(3) For provisions relating to estimated income tax on self-employment income, see section 6153.".

(3) Paragraph (2) of section 6012(b) (relating to persons required to make returns of income) is amended by striking out "or section 6015(a)".

(4) Paragraph (1) of section 6020(b) (relating to returns prepared for or executed by the Secretary) is amended by striking out "(other than a declaration of estimated tax required under section 6015".

(5) Subsection (d) of section 6651 (relating to failure to file tax return or to pay tax) is amended by striking out "to file a declaration of estimated tax required by section 6015 or".

(6) Section 6654 (relating to failure by individuals to pay estimated income tax) is amended by striking out "section 6073(b)" each place it appears and inserting in lieu thereof "section 6153(f)".

(7) Section 7203 (relating to willful failure to file return, supply information, or pay tax) is amended by striking out "(other than a return required under authority of section 6015)".

(8) Subsection (a) of section 7216 (relating to disclosure or use of information by preparers of returns) is amended to read as follows:

"(a) GENERAL RULE.—Any person who is engaged in the business of preparing or providing services in connection with the preparation of returns of tax imposed by chapter 1 or any person who for compensation prepares any such return for any other person, and who—

"(1) discloses any information furnished to him for, or in connection with, the preparation of any such return, or

"(2) uses any such information for any purpose other than to prepare, or assist in preparing, any such return, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be fined not more than $1,000, or imprisoned not more than 1 year, or both, together with the costs of prosecution.".

(9) Subparagraph (A) of section 7701(a)(34) (relating to the definition of estimated income tax) is amended by striking out "section 6015(c)" and inserting in lieu thereof "section 6153(c)".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after the date of enactment of this Act.

SEC. 8. REDUCTION OF REDTAPE FOR SMALL BUSINESS.

(a) GENERAL RULE.—Subsection (a) of section 6051 (relating to receipts for employees) is amended—

(1) by striking out "on the day on which the last payment of remuneration is made" and inserting in lieu thereof "within 30 days after receipt of a written request from the employee if earlier"; and

(2) by adding at the end thereof the following new sentence: "In the case of an employee whose employment is terminated before the close of a calendar year, the employer shall furnish the employee, on the day on which the last payment is made, a general written notice stating that (A) the employee may request in writing that such information be provided within 30 days of such request if earlier than January 31, (B) an amount of Federal taxes has been withheld, and (C) if the employee is entitled to a refund, he must file a Federal income tax return based on information which, unless a request is made by the employee, will be sent to the employee at his last known address before January 31 of the next calendar year.".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect 30 days after the date of enactment of this Act.●

By Mr. MOYNIHAN:

S. 851. A bill to amend the Internal Revenue Code to increase the amount that an artist may deduct when he contributes an artistic composition to charity; to the Committee on Finance.

S. 852. A bill to amend the Internal Revenue Code to provide a tax credit for certain contributions of literary, musical, or artistic compositions; to the Committee on Finance.

LEGISLATION RELATING TO DONATION OF CERTAIN ARTISTIC COMPOSITIONS

● Mr. MOYNIHAN. Mr. President, I am introducing two bills that would put right one of the most unfair and unwise provisions of Federal tax law.

Today, when an art collector donates a painting to a museum, he may deduct the market value of the painting from his taxes. But when an artist donates a painting, he may deduct only the cost of the paints and canvas. The same rule applies to the composer who donates a score, and to the writer who donates a manuscript, poem, or other composition, except in their cases a deduction may be taken only for the pen, ink, and paper. This has been the law since 1969.

It is unfair because the artist has given the museum greater value than he is given credit for.

It is unwise because it has left artists with little incentive to place their works in public collections. Daniel Boorstin, the Librarian of Congress, testified before the Finance Committee recently that the Library used to receive 200,000 original manuscripts from writers each year during the 1960's. But since 1969, it has been given only one major gift of self-created material from a living author.

Mr. Boorstin said:

The consequences of the reduced level of acquisitions will have a disastrous effect on scholarship, on the study and appreciation of American civilization.

Authors are now selling their works on the open market, dispersing them among numerous private collectors:

Thus, the material ceases to be available for research in public institutions. Even more alarming, these materials are usually stored where they suffer rapid deterioration and are subject to risks of fire, flood and theft. They are lost forever.

One thing Congress can do would be to let artists deduct the market value of their gifts. It is a simple answer, but it is not a very good one. The trouble is that that was the law before 1969. And we amended the law for good reason: It was abused. Donald Lubick, Assistant Treasury Secretary in the Carter administration, discussed this problem in Senate testimony 2 years ago:

Prior to the Tax Reform Act of 1969, a taxpayer, including an artist, who contributed appreciated property to charity was entitled to a charitable contribution deduction based on fair market value even though the appreciation was never subject to tax. In many cases, this enabled an individual to obtain a benefit through a charitable contribution that would exceed the after-tax proceeds from a sale.

According to Lubick, artists who were in high tax brackets were better off giving away their works than selling them:

For example, assume an individual in a marginal tax bracket of 70 percent owns property worth $100 that has a negligible cost. If the property were sold, the individual would owe $70 in tax and would retain $30. If the property were given to charity, the charitable deduction would reduce the donor's taxes by $70.

The artist earned $70 if he gave away the painting, and only $30 if he sold it.

79-059 O - 84 - 32 (Pt. 5)

That wasn't the only problem. There were others, and a catalog of them can be found in Bittker & Stone, "Federal Income, Estate and Gift Taxation" at pages 197–198. The point is that we cannot just restore pre-1969 law.

Then what is the answer? Let me phrase the question a little differently: What is the correct principle?

I suggest two. The first is that we should allow the artist a tax deduction, but only for what his donation costs him. When an artist in the 70-percent tax bracket donates a painting to a museum, he forfeits the chance to earn 30 percent of the market value. That is all he would be able to keep after taxes if he were to sell the painting, instead. His deduction should be 30 percent.

The cost to each artist is a function of his tax bracket. It is one minus the marginal rate. My bill has tables in it. An artist would simply look at the tables to determine his applicable percentage.

In the alternative, I suggest a second principle. That is that the tax system should be neutral. Taxes should not be a factor when an artist decides what to do with a painting. Unfortunately, under present law, he has an incentive to sell it.

Mr. President, I ask unanimous consent that a table be printed at this point in the RECORD.

There being no objection, the table was ordered printed in the RECORD, as follows:

	Artist in the 70-percent tax bracket			
	Before-tax income	Deduction	Tax	After-tax income
Painting given to charity	$200	0	$140	$60
Painting sold	300	0	210	90
Painting given to charity, but deduction claimed for 30 percent of market value	200	$30	119	81

Mr. MOYNIHAN. Mr. President, the table shows an artist in the 70-percent tax bracket. He has $200 of income and a painting worth $100. Under present law, if he gives the painting to charity, he gets no tax deduction and his aftertax income that year is $60. But if he sells the painting, his aftertax income is $90.

If we want the tax system to be neutral, then we must make the artist's aftertax income the same in both cases. The way to do it is to give him a $30 tax credit when he gives the painting away.

Again, the amount of credit would vary according to each artist's tax bracket. Again, an artist would simply look at a table to determine his "applicable percentage."

My bill places restrictions on the credit. It could only be used to reduce taxes on income from work that the artist sells.

And an artist could not claim more than $2,500 or an amount equal to half his tax liability—whichever is greater—in credit in any one year. Extra credits would be carried over and used in the future. The carryover period is 5 years.

Both bills apply to contributions of "literary, musical, or artistic compositions" to section 501(c)(3) organizations or to Government agencies. However, the artist must obtain a statement in writing from the donee that says that the artwork has artistic significance and that it will be used by the donee in connection with its exempt function. For example, a university could use a sculpture given to it for teaching, but not for decorating the chancellor's office.

Neither bill would change the rules for politicians who make gifts of their official papers. Politicians do not get tax deductions now and they would not in the future.

Both bills have the same effective date: January 1, 1982.

I am offering two bills because I think the two principles I am suggesting are reasonable. They lead to different results; I find it hard to choose between them. Either bill would be an improvement over existing law.

I ask unanimous consent, Mr. President, that the texts of my bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 851

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Pen and Ink Act of 1981".

SEC. 2. DEDUCTIONS FOR CONTRIBUTING CERTAIN LITERARY, MUSICAL OR ARTISTIC COMPOSITIONS.

Section 170(e) of the Internal Revenue Code (relating to certain contributions of ordinary income and capital gains property) is amended by adding at the end thereof the following new paragraph—

"(4) SPECIAL RULE FOR CERTAIN CONTRIBUTIONS OF LITERARY, MUSICAL OR ARTISTIC COMPOSITIONS.—

"(A) QUALIFIED CONTRIBUTIONS.—For an individual who contributes a literary, musical or artistic composition created by his own efforts to an organization described in section 501(c)(3) (that is exempt from tax under section 501(a)) or to a governmental unit described in section 170(c)(1), the amount of charitable contribution taken into account under this section shall be a percentage of the fair market value of such composition determined according to the applicable table.

"(B) APPLICABLE TABLES.—For purposes of subparagraph (A), the applicable table for—

"(i) married individuals and surviving spouses described in section 1(a) is table 1,

"(ii) heads of households described in section 1(b) is table 2,

"(iii) unmarried individuals described in section 1(c) is table 3, and

"(iv) married individuals described in section 1(d) is table 4.

Over $11,100 but not over $13,300	72
Over $13,300 but not over $15,950	68
Over $15,950 but not over $18,600	63
Over $18,600 but not over $23,900	57
Over $23,900 but not over $31,000	51
Over $31,000 but not over $43,800	46
Over $43,800 but not over $55,700	41
Over $55,700 but not over $82,200	36
Over $82,200 but not over $108,700	32
Over $108,700	30

"(C) CERTIFICATION REQUIRED.—This paragraph shall not apply unless the individual receives from the donee a written statement that the donated composition represents material of artistic, musical or literary significance and that the use of such composition by the donee will be related to the purpose or function constituting the basis for its exemption under section 501 (or, in the case of a governmental unit, to any purpose or function described in section 170(c)(2)(B)).

"(D) CERTAIN LETTERS, MEMORANDA, OR SIMILAR PROPERTY PREPARED BY GOVERNMENT OFFICIALS.—This paragraph shall not apply to a contribution by an individual of a letter, memorandum, or similar property that was written, prepared, or produced by or for the individual while he held an office under the Government of the United States or of any State or political subdivision thereof if the writing, preparation, or production of such property was related to the performaince of the duties of such office.".

SEC. 3. EFFECTIVE DATE.

The amendment made by this Act shall apply to taxable years beginning after December 31, 1981.

S. 852

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Pen and Ink Act of 1981".

SEC. 2. CREDIT FOR CONTRIBUTING CERTAIN LITERARY, MUSICAL OF ARTISTIC COMPOSITIONS.

Subpart A of part IV of subchapter A of Chapter 1 of the Internal Revenue Code (relating to credits allowable) is amended by inserting before section 45 the following new section—

"SEC. 44F. CREDIT FOR CONTRIBUTING CERTAIN LITERARY, MUSICAL OR ARTISTIC COMPOSITIONS.

"(a) GENERAL RULE.—In the case of an individual who contributes a literary, musical or artistic composition created by his own efforts to an organization described in section 501(c)(3) (that is exempt from tax under section 501(a)) or to a governmental unit described in section 170(c)(1), there shall be allowed a credit against the tax imposed by this chapter. The credit shall be a percentage of the fair market value of such composition determined according to the applicable table.

"(b) APPLICABLE TABLES.—For purposes of subsection (a), the applicable table for—

"(1) married individuals and surviving spouses described in section 1(a) is table 1,

"(2) heads of households described in section 1(b) is table 2,

"(3) unmarried individuals described in section 1(c) is table 3, and

"(4) married individuals described in section 1(d) is table 4.

"(c) LIMITATIONS.

"(1) CREDIT MAY BE USED ONLY TO REDUCE TAX ON ARTS INCOME.—The amount of credit allowed under subsection (a) for the taxable year shall not exceed the amount of tax on the taxpayer's income from sales of literary, musical or artistic compositions.

"(2) MAXIMUM CREDIT.—The amount of credit allowed under subsection (a) for the taxable year shall not exceed the greater of—

"(A) $2,500 or

"(B) half of the taxpayer's liability for tax under this chapter for the taxable year.

"(d) FIVE-YEAR CARRYOVER OF EXCESS CREDITS.—If the amount of credit allowed by subsection (a) for any taxable year exceeds the limits imposed by subsection (c), then the excess shall be added to the amount allowed as a credit in the next five succeeding taxable years to the extent that it may be used in those years.

"(e) CERTIFICATION REQUIRED.—This section shall not apply unless the individual receives from the donee a written statement that the donated composition represents material of artistic, musical or literary significance and that the use of such composition by the donee will be related to the purpose or function constituting the basis for its exemption under section 501 (or, in the case of a governmental unit, to any purpose or function described in section 170(c)(2)(B)).

"(f) CERTAIN LETTERS, MEMORANDA OR SIMILAR PROPERTY BY GOVERNMENT OFFICIALS.—This section shall not apply to a contribution by an individual of a letter, memorandum, or similar property that was written, prepared, or produced by or for the individual while he held office under the government of the United States or of any State or political subdivision thereof if the writing, preparation, or production of such property was related to the performance of the duties of such office.".

SEC. 3. CONFORMING AND TECHNICAL AMENDMENTS.

(a) Section 170(e) of the Internal Revenue Code (relating to certain contributions of ordinary income and capital gains property) is amended by inserting at the end thereof the following—

"(4) DENIAL OF DEDUCTION FOR CERTAIN CONTRIBUTIONS OF LITERARY, MUSICAL OR ARTISTIC COMPOSITIONS.—No deduction shall be allowed under this section for any contribution for which a credit is claimed under section 44F.".

(b) The table of sections for subpart A of part IV of subchapter A of chapter 1 of the Code is amended by inserting immediately before the item relating to section 45 the following—

"(6) section 44F (relating to credit for contributing certain literary, musical or artistic compositions,"

(c) Section 42(b) of the Code (relating to the general tax credit) is amended by striking out "and" at the end of paragraph (4), by inserting "and" at the end of paragraph (5), and by inserting after paragraph (5) the following new paragraph—

"(6) section 44F (relating to credit for contributing certain literary, musical of artistic compositions),"

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall apply to taxable years beginning after December 31, 1981.●

By Mr. MOYNIHAN:

S. 853. A bill to amend the Social Security Act to provide that the Federal Government will gradually take over the local share of AFDC and medicaid costs if States meet certain minimum AFDC benefit requirements, and for other purposes; to the Committee on Finance.

WELFARE AND MEDICAID FISCAL ASSISTANCE PROGRAM ACT OF 1981

● Mr. MOYNIHAN. Mr. President, when the National Governors' Association announced its support for President Reagan's budget and legislative agenda, it stressed one important exception to its approval:

The Federal Government, as the Governors have long maintained, should move toward primary responsibility for welfare and medicaid. . . .

The Governors are not alone in their belief that welfare and medicaid are properly the province of the Federal Government: The Democratic Party has maintained this for more than 10 years. As a member of the 1980 Democratic Party Platform Committee, I proposed that our party pledge itself again to carry out this commitment. The 1980 platform states, inter alia:

The nation's welfare system continues to be inequitable and archaic . . . States and cities which make an honest effort to meet the welfare crisis find themselves in deepening fiscal difficulty. . . . The fiscal crisis of welfare recipients has also deepened . . . The fiscal crisis for taxpayers continues. . . . We are at a crossroad in the delivery of welfare. Serious reform is necessary. . . .

This commitment has not yet been kept. But that does not reflect upon the significance of the problem underlying the need for Federal assumption of welfare costs. For the problem grows larger, ineluctably larger, each day.

The States bear an ever-heavier burden in paying their share of welfare costs, particularly of aid to families with dependent children (AFDC) and medicaid. The National Journal of January 10, 1981, quotes North Carolina Medicaid Supervisor Barbara Matula likening medicaid to "an amoeba that just keeps gobbling up State resources. It will * * * continue to take up a disproportionate share of money available until the State reaches a fiscal crisis."

In a number of States, particularly New York, local governments are all but devastated by their share of these costs. As New York City Mayor Edward Koch stated before the Democratic Convention on August 11, 1980—

If we did not have to bear this burden, we would have no trouble balancing our budget.

In the meantime, the condition of the millions of needy persons who depend upon these programs for their income and their health care continues to worsen. The National Urban League's state of black America 1980 reported that:

(M)ost AFDC payments have been significantly eroded by inflation . . . (B)etween 1973 and 1979, the average state maximum for a family of four without other income (in constant 1979 dollars) dropped from $424 to $349 a month.

In New York, the basic cash allowance for a family of four was set at $258 a month—exclusive of shelter—in 1974. It remains $258 today. In that time, consumer prices have increased by 64 percent. Sensible of this erosion, the State senate, upon Gov. Hugh Carey's urging, approved a 15-percent increase in AFDC benefits. This hardly compensates for the large drop in the benefits' real value. But even this small rise will cost the State an additional $120 million in 1982.

And that is merely the beginning. Only to illustrate this do I mention that data I have published in the spring 1981 issue of the Journal of Socioeconomic Issues show that dependency has increased astonishingly. Permit me to quote:

It appears that one-half of the children now being born are likely to live in female-headed households at some point prior to their 18th birthday. This includes 40 percent of majority children and 75 percent of minority children.

Two-thirds of female-headed households with children now receive AFDC payments.

Before their 18th birthday, one-third of all children now being born are likely to live in a female-headed household receiving AFDC payments.

One-third of all children. A third of our children dependent upon their State governments—which set benefit levels—for an even less adequate level of subsistence. Inadequate not because their governments are mean spirited, but because they cannot afford anything more.

The bill I introduce today would fundamentally change this. It would remove the burden of welfare and medicaid financing from local governments, and would substantially ease the burden on State governments. But this higher level of Federal reimbursement is available only to those States that provide AFDC and food stamp benefits in excess of three-quarters of the federally determined poverty line.

The bill's hold harmless provision insures that State costs will not increase because of this minimum benefit level; if the cost of meeting the minimum benefit exceeds the higher reimbursement rate, the Federal Government is responsible for the difference. States will be able—will be encouraged—to provide a decent level of cash assistance and health care for their neediest residents.

This is an easily understood bill, similar to legislation I introduced in the 96th Congress. It simply changes the minimum Federal reimbursement level under the "Medicaid formula" (which governs both the medicaid and AFDC programs) from 50 percent to 75 percent in fiscal 1982, rising to 90 percent in fiscal 1985 and thereafter. The bill requires that the additional Federal funding be "passed through" to localities in those States that now require local cost-sharing in amounts sufficient to eliminate the local share. When fully implemented, the State (or State-local) share of expenditures for medicaid would be only 10 percent (down from the present average of 44 percent) and the State (or State-local) share of AFDC cash benefits would also be 10 percent (down from the present average of 46 percent).

The essential purpose of this bill, the welfare and medicaid fiscal assistance program, is to assign the primary responsibility to the Federal Government of paying for both welfare and medicaid. This is entirely consistent with the stated policy recommendations of the National Governors Association. It is not a complete transfer of fiscal responsibility, for so long as the States retain the task of administering these programs (and of setting cash assistance levels, above a federally-prescribed floor) they must retain a fiscal stake in them. The 10-percent share envisioned in this bill is quite sufficient for that purpose.

I would add, however, that I would welcome complete Federal assumption of the administrative and fiscal responsibility for both sets of activities. That is how social security, disability, SSI and medicare work and is, I believe, the proper permanent locus for cash assistance to dependent children and for medical care for the needy as well. Short of that large structural change, a realinement of fiscal responsibility would constitute a major improvement.

I urge its favorable consideration and its enactment.●

By Mr. PERCY:

S. 854. A bill to promote the orderly conduct of international relations by facilitating the operation of foreign missions in the United States, thereby promoting the secure and efficient operation of the U.S. missions abroad; to the Committee on Foreign Relations.

FOREIGN MISSIONS ACT OF 1982

Mr. PERCY. Mr. President, today I am introducing a bill which I call the Foreign Missions Act of 1982. An identical bill is being introduced in the House of Representatives by Congressman DANTE FASCELL of Florida.

This legislation is designed to provide the means to remedy a serious and growing imbalance between the treatment accorded in many countries to official missions of the United Stataes abroad, and that made available to foreign government missions in the United States. At present the Department of State lacks authority compared to that enjoyed by many other governments to enforce reciprocity in an appropriate manner.

In an increasing number of countries, for example, the United States is denied suitable locations for our missions or long-term rights to property or facilities, often resulting in diminished security, excessive or discriminatory costs, or inadequate facilities which significantly reduce the effectiveness of our missions. For example:

In the Soviet Union and East European countries, the United States is barred from purchasing office and residential properties and is required to obtain all facilities through government controlled sources. In many cases these are either inadequate, excessively costly, or both, or denied arbitrarily. However, in the United States, these governments are allowed to purchase both types of property in Washington, D.C. All own either office or residential space.

Venezuela will not allow the Department to purchase staff housing units in the capital city, which imposes difficulties on the functioning of the mission, but the Venezuelans are purchasing housing in the greater Washington metropolitan area for official purposes.

Kuwait, Bahrain, and the United Arab Emirates will not allow the United States to purchase badly needed staff housing sites which would allow residential construction and elimination of exorbitant short-term lease charges. Yet these same governments own residential units in our capital area. For example, in Doha, Qatar, it costs the U.S. Government $33,000 per year to lease living quarters for a single secretary.

In Indonesia, the government has determined that the U.S. Government may no longer own its more than 20 properties and is now in the process of converting these to long-term leaseholds. The new ground rents will be considerable. Indonesia is free to buy, lease, and sell in the United States.

In Algeria, a prior expropriation of U.S. property remains unresolved. Our present facilities are very inadequate and our efforts to secure long-term office and residential properties have met with negative results.

Our Embassies in the Soviet Union, East European, and other countries with state directed economies are required to deal through service organizations within the Ministries of Foreign Affairs for practically all administrative support and services, that is, housing, maintenance, utilities, employees, tickets for cultural and athletic performances, travel, et cetera. These organizations often impose a substantial surcharge for often unnecessary or unwanted "services." The total cost to the U.S. Government and its employees amounts to hundreds of thousands of dollars annually. For example, the Soviets charge diplomatic personnel but not tourists a "fee"—equal to one night's lodging—for holding a hotel reservation. Thus, a traveler is required to pay for 1 extra day of lodging regardless of the amount of time the room was occupied.

In many areas of the world, both the U.S. Government and its employees encounter serious inequities regarding the import or export of privately owned vehicles and other personal effects. Employees of these governments' foreign mission in the United States do not face these same restrictions; problems exist, for example, in Mexico, Venezuela, Singapore, Guatemala, and at many Embassies in the Near East.

At the same time, missions of those same countries are allowed in the United States to acquire property and goods freely or obtain benefits or public services, often without limitation. The U.S.

Government and its personnel are often confronted by serious inequities concerning the payment of taxes on goods and services obtained in the host country. For example, in Chile and Malta the Embassy is not exempt from the payment of a gasoline tax of 48 cents and 25 cents per gallon, respectively. In Yugoslavia the Embassy is required to pay a 27.5-percent tax on heating oil.

A number of countries also require a transaction tax on certain construction materials. An example is Portugal where the imposition of this tax may greatly increase the cost of the new Embassy being constructed in Lisbon. In New Delhi, all Embassy administrative and support staff and specialized staff such as Library of Congress personnel do not receive duty-free import privileges and are not exempt from customs inspection and imposition of certain taxes, despite their performance of official functions for the United States.

In most cases, the Department lacks authority to impose similar restrictions or conditions on those or other countries in the United States. Instead it can only take far more extreme action such as barring the country concerned from using property it may acquire or declaring some persons persona non grata. These remedies are not suitable for such situations and are therefore rarely used.

The proposed Foreign Missions Act provides mechanisms whereby the operations of foreign missions in the United States and the benefits available to them from Federal, State, and local authorities, public utilities and private persons may be cleared through the Federal Government and adjusted according to U.S. needs abroad as well as national security interests at home.

In this way, the conditions under which foreign missions operate in the United States can be made to reflect the conditions under which missions of the United States are required to operate in the countries represented by such foreign missions. As a result, the foreign governments represented by mission in the United States will have an incentive to provide fair, equitable and nondiscriminatory treatment to U.S. missions and personnel in their territory, thus contributing to significant savings in the costs of operating U.S. missions, improved working conditions for U.S. personnel, and mutual respect in our foreign relations. The bill's authorities may also be applied to international organizations to a limited extent where necessary to give effect to the policy of the bill.

Specifically, the bill sets up an independent Office of Foreign Missions within the Department of State. The Office is to be headed by a Director appointed by the Secretary of State. The Director will carry out his or her responsibilities under the general supervision and direction of the Secretary. The Secretary is prohibited from delegating supervisory authority over the Director to any official below the rank of Under Secretary.

This organizational structure seeks to reconcile two competing policy interests. On the one hand, the operation of foreign missions in the United States is an important aspect of the conduct of foreign affairs and should be directly under the supervision of the Secretary of State. On the other hand, responsibility for the hard decisions to deny or impose conditions on benefits desired by foreign missions should be somewhat insulated from the operating bureaus in the State Department which deal with foreign missions on substantive issues on a daily basis. These concerns will be met effectively by placing the responsibility in the State Department and by precluding supervision of its exercise by any of the operating bureaus. The Office will be staffed by Foreign Service members, other Government employees, experts and consultants as necessary.

The Secretary of State will set the terms and conditions under which benefits may be granted or denied a foreign mission. Such actions will be governed by the need for reciprocity or other factors in our relations with other nations. The purposes served include the following:

Facilitating relations between the United States and a sending state.

Protecting U.S. interests.

Adjusting for costs and procedures of obtaining benefits for missions of the United States abroad.

Assisting in resolving disputes involving a foreign mission or sending state.

In carrying out the provisions of the bill, the Director is authorized to assist Federal, State, and municipal governments with regard to ascertaining and according benefits, privileges and immunities to foreign missions. The activities covered include the execution or performance of any contract or agreement, the acquisition or retention of any real property, or the application for or acceptance of any benefit, including benefits from any Federal, State, or municipal authority, or any entity providing public services; for example, utility and telephone company.

The bill specifically provides that the terms and conditions set by the Secretary may include a requirement to pay the Director a surcharge or fee, which would be deposited in the working capital fund of the Department of State to be used in carrying out the provisions of the bill. In addition, the Secretary may require a waiver by any foreign mission of any recourse against any governmental authority, public service entity, agent or employee thereof, in connection with actions taken under the provisions of the bill. This will protect companies from lawsuits and will thus enable the Director to carry out the provisions of the bill more effectively.

The bill also provides that issues concerning the location of foreign missions in the District of Columbia be settled by the National Capital Planning Commission, on which Federal, city, and citizen interests are represented. In order to insure full discussion, public hearings are required.

Mr. President, I urge my colleagues to support this bill, which is designed to achieve more balance between the treatment accorded U.S. missions overseas and that given foreign missions in the United States. I ask unanimous consent that this bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 854

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the State Department Basic Authorities Act of 1956 is amended by striking out "That the Secretary" in the first section and inserting in lieu thereof the following:

"TITLE I—BASIC AUTHORITIES GENERALLY

"SECTION 1. The Secretary".

(b) That Act is further amended by adding at the end thereof the following:

"TITLE II—AUTHORITIES RELATING TO THE REGULATION OF FOREIGN MISSIONS

"DECLARATION OF FINDINGS AND POLICY

"SEC. 201. (a) The Congress finds that the operation in the United States of foreign missions and public international organizations and the official missions to such organizations, including the permissible scope of their activities and the location and size of their facilities, is a proper subject for the exercise of Federal jurisdiction.

"(b) The Congress declares that it is the policy of the United States to support the secure and deficient operation of United States missions abroad, to facilitate the secure and efficient operation in the United States of foreign missions and public international organizations and the official missions to such organizations, and to assist in obtaining appropriate benefits, privileges, and immunities for those missions and organizations and to require their observance of corresponding obligations in accordance with international law.

"(c) The assistance to be provided to a foreign mission in the United States shall be determined after due consideration of the benefits, privileges, and immunities provided to missions of the United States in the country or territory represented by that foreign mission.

"DEFINITIONS

"SEC. 202. (a) For purposes of this title—

"(1) 'benefit' (with respect to a foreign mission) means any acquisition, or authorization for an acquisition, in the United States by or for a foreign mission, including the acquisition of—

"(A) real property by purchase, lease, exchange, construction, or otherwise,

"(B) public services, including services relating to customs, importation, and utilities, and the processing of applications or requests relating to public services,

"(C) supplies, maintenance, and transportation,

"(D) locally engaged staff on a temporary or regular basis,

"(E) travel and related services, and

"(F) protective services,

and includes such other benefits as the Secretary may designate;

"(2) 'chancery' means the principal offices of a foreign mission used for diplomatic or related purposes, and annexes to such offices (including ancillary offices and support facilities), and includes the site and any building on such site which is used for such purposes;

"(3) 'Director' means the Director of the Office of Foreign Missions established pursuant to section 203(a);

"(4) 'foreign mission' means any official

mission to the United States involving diplomatic, consular, or other governmental activities of—

"(A) a foreign government, or

"(B) an organization (other than an international organization, as defined in section 209(b) of this title) representing a territory or political entity which has been granted diplomatic or other official privileges and immunities under the laws of the United States,

including any real property of such a mission and including the personnel of such a mission;

"(5) 'real property' includes any right, title, or interest in or to, or the beneficial use of, any real property in the United States, including any office or other building;

"(6) 'Secretary' means the Secretary of State;

"(7) 'sending State' means the foreign government, territory, or political entity represented by a foreign mission; and

"(8) 'United States' means, when used in a geographic sense, the several States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

"(b) Determinations with respect to the meaning and applicability of the terms used in subsection (a) shall be committed to the discretion of the Secretary.

"OFFICE OF FOREIGN MISSIONS

"SEC. 203. (a) The Secretary shall establish an Office of Foreign Missions as an independent office within the Department of State. The Office shall be headed by a Director, appointed by the Secretary, who shall perform his or her functions under the supervision and direction of the Secretary. The Secretary may delegate this authority for supervision and direction of the Director only to the Deputy Secretary of State or an Under Secretary of State.

"(b) The Secretary may authorize the Director to—

"(1) assist agencies of Federal, State, and municipal government with regard to ascertaining and according benefits, privileges, and immunities to which a foreign mission may be entitled;

"(2) provide or assist in the provision of benefits for or on behalf of a foreign mission in accordance with section 204; and

"(3) perform such other functions as the Secretary may determine necessary in furtherance of the policy of this title.

"PROVISION OF BENEFITS

"SEC. 204. (a) Upon the request of a foreign mission, benefits may be provided to or for that foreign mission by or through the Director on such terms and conditions as the Secretary may approve.

"(b) The Secretary may require a foreign mission to obtain benefits from or through the Director on such terms and conditions as the Secretary may approve, if the Secretary determines that such action is reasonably necessary on the basis of reciprocity or otherwise—

"(1) to facilitate relations between the United States and a sending State;

"(2) to protect the interests of the United States;

"(3) to adjusts for costs and procedures of obtaining benefits for missions of the United States abroad; or

"(4) to assist in resolving a dispute affecting United States interests and involving a foreign mission or sending State.

"(c) The Secretary may require any foreign mission to comply with such terms and conditions as the Secretary may determine as a condition to the execution or performance in the United States of any contract or other agreement; the acquisition, retention, or use of any real property or the application for or acceptance of any benefit (including any benefit from or authorized by any Federal, State, or municipal governmental authority, or any entity providing public services).

"(d) Terms and conditions established by the Secretary under this section may include—

"(1) a requirement to pay to the Director a surcharge or fee, and

"(2) a waiver by a foreign mission (or any assignee of or person deriving rights from a foreign mission) of any recourse against any governmental authority, any entity providing public services, any employee or agent of such an authority or entity, or any other person, in connection with any action determined by the Secretary to be undertaken in furtherance of this title.

"(e) For purposes of effectuating a waiver of recourse which is required under this section, the Secretary may designate the Director or any other officer of the Department of State as the agent of a foreign mission (or of any assignee of or person deriving rights from a foreign mission). Any such waiver by an officer so designated shall for all purposes (including any court or administrative proceeding) be deemed to be a waiver by the foreign mission (or the assignee of or other person deriving rights from a foreign mission).

"PROPERTY OF FOREIGN MISSIONS

"SEC. 205. (a)(1) The Secretary may require any foreign mission to notify the Director prior to any proposed acquisition, or any proposed sale or other disposition, of any real property by or on behalf of such mission. If such a notification is required, the foreign mission (or other party acting on behalf of the foreign mission) may initiate or execute any contract, proceeding, application, or other action required for the proposed action—

"(A) only after the expiration of the sixty-day period beginning on the date of such notification (or after the expiration of such shorter period as the Secretary may specify in a given case); and

"(B) only if the mission is not notified by the Secretary within that period that the proposal has been disapproved; however, the Secretary may include in such a notification such terms and conditions as the Secretary may determine appropriate in order to remove the disapproval.

"(2) For purposes of this section, 'acquisition' includes any acquisition or alteration of, or addition to, any real property or any change in the purpose for which real property is used by foreign mission.

"(b) The Secretary may require any foreign mission to divest itself of, or forego the use of, any real property determined by the Secretary—

"(1) not to have been acquired in accordance with this section; or

"(2) to exceed limitations placed on real property available to a United States mission in the sending State.

"(c) If a foreign mission has ceased conducting diplomatic, consular, and other governmental activities in the United States and has not designated a protecting power or other agent approved by the Secretary to be responsible for the property of that foreign mission, the Secretary—

"(1) until the designation of a protecting power or other agent approved by the Secretary, may protect and preserve any property of that foreign mission; and

"(2) may authorize the Director to dispose of such property at such time as the Secretary may determine after the expiration of the one-year period beginning on the date that the foreign mission ceased those activities, and may remit to the sending State the net proceeds from such disposition.

"LOCATION OF FOREIGN MISSIONS

"SEC 206. (a) In order to ensure the fulfillment of the international obligations of the United States and fulfillment of the policy of this title, and to ensure the orderly development of the national capital, the location, height, bulk, number of stories, and size of any building or other real property of a foreign mission in the District of Columbia, and the provision for open space in and around any such building or other property, shall be subject to approval by the National Capital Planning Commission (hereafter in this section referred to as the 'Commission'). This subsection does not apply with respect to a building or other real property of a foreign mission if the Commission determines that the property will only be used by a party other than a foreign mission and will only be used for activities that do not involve the diplomatic, consular, or other governmental activities of a foreign mission.

"(b) Any determination by the Commission pursuant to subsection (a) of this section which involves approval of the location of or a use of real property for a chancery, or involves approval of site and building plans for a chancery, shall be considered rulemaking under section 553 of title 5, United States Code, and shall be based solely on the following criteria:

"(1) the Federal interest;

"(2) the chancery is an area (A) of predominantly office use, (B) of mixed use, including residential, commercial, office, or institutional use, (C) of medium or high density residential use, or (D) in reasonable proximity to streets on which existing chanceries are concentrated;

"(3) historic preservation (as determined in accordance with regulations issued by the Commission in carrying out this section);

"(4) the extent to which the area will be served by public transit to reduce parking requirements;

"(5) the extent to which the area will have adequate public facilities, utilities, and services, including streets, street lighting, water, sewer, electricity, telephone, and refuse collection;

"(6) the area is capable of being adequately protected, as determined by a Federal agency authorized to perform protective services; and

"(7) the municipal interest.

Any other determination by the Commission with respect to real property of a foreign mission pursuant to subsection (a) of this section shall be based solely on the criteria specified in paragraphs (1), (3), (6), and (7), and such other criteria as the Commission may by regulation establish.

"(c) In any proceeding with respect to real property of a foreign mission pursuant to subsection (a) of this section—

"(1) a determination by the Secretary as to the Federal interest shall be given substantial weight; and

"(2) a determination by the Mayor of the District of Columbia as to the municipal interest shall be given substantial weight.

"(d) In any proceeding with respect to real property of a foreign mission pursuant to subsection (a) of this section, the final determination with respect to approval of a location or use or approval of site and building plans shall be made not later than 5 months after the date of filing an application for such approval.

"PREEMPTION

"SEC. 207. Notwithstanding any other provision of law, no act of any Federal agency or of any State or municipal governmental authority shall be effective to confer or deny any benefits with respect to any foreign mission contrary to this title.

"GENERAL PROVISIONS

"SEC. 208. (a) The Secretary may issue such regulations as the Secretary may determine necessary to carry out the policy of this title.

"(b) Compliance with any regulation, instruction, or direction issued by the Secretary

under this title shall to the extent thereof be a full acquittance and discharge for all purposes of the obligation of the person making the same. No person shall be held liable in any court or administrative proceeding for or with respect to anything done or omitted in good faith in connection with the administration of, or pursuant to and in reliance on, this title, or any regulation, instruction, or direction issued by the Secretary under this title.

"(c) For purposes of administering this title, the Secretary may—

"(1) employ experts and consultants in accordance with section 3109 of title 5, United States Code, at rates not to exceed the rate payable for level IV of the Executive Schedule, under contracts which may be renewed annually;

"(2) obtain without regard to the provisions of law governing appointments in the competitive service, by appointment or contract (subject to availability of funds), the services of individuals to provide technical and professional services required to carry out the functions of the Director; and

"(3) accept details and assignments of employees of Federal agencies to the Office of Foreign Missions on a reimbursable or nonreimbursable basis (with any such reimbursements to be credited to the appropriations made available for the salaries and expenses of officers and employees of the employing agency).

"(d) Contracts and subcontracts for supplies or services (except for personal services), made by or on behalf of the Director, shall be made after advertising, in such manner and at such times as the Secretary shall determine to be adequate to ensure notice and opportunity for competition, except that advertisement shall not be required when (1) the Secretary determines that it is impracticable or will not permit timely performance to obtain bids by advertising, or (2) the aggregate amount involved in a purchase of supplies or procurement of services does not exceed $10,000. Such contracts and subcontracts may be entered into without regard to laws and regulations otherwise applicable to solicitation, negotiation, administration, and performance of government contracts. In awarding contracts, the Secretary may consider such factors as relative quality and availability of supplies or services and the compatability of the supplies or services with implementation of this title.

"(e) The head of any Federal agency may, for purposes of this title—

"(1) transfer or loan any property to, and perform administrative and technical support functions and services for the operations of, the Office of Foreign Missions (with reimbursements to agencies under this paragraph to be credited to the current applicable appropriation of the agency concerned); and

"(2) acquire and accept services from the Office of Foreign Missions, including (whenever the Secretary determines it to be in furtherance of the purposes of this title) acquisitions without regard to laws normally applicable to the acquisition of services by such agency.

"(f) Assets of or under the control of the Office of Foreign Missions, wherever situated, which are used by or held for the use of a foreign mission shall not be subject to attachment, execution, injunction, or similar process, whether intermediate or final.

"(g) Except as otherwise provided, any determination required under this title shall be committed to the discretion of the Secretary. Except as provided in the first sentence of section 206(b), actions taken under the authority of this title shall not be considered rulemaking within the meaning of section 553 of title 5, United States Code.

"(h)(1) In order to implement this title, the Secretary may transfer such amounts available to the Department of State as may be necessary to the working capital fund established by section 13 of this Act.

"(2) Notwithstanding any other provision of law, all revenues, including proceeds from gifts and donations, received by the Director or the Secretary in carrying out this title may be credited to the working capital fund established by section 13 of this Act and shall be available for purposes of this title in accordance with that section.

"APPLICATION TO PUBLIC INTERNATIONAL ORGANIZATIONS AND OFFICIAL MISSIONS TO SUCH ORGANIZATIONS

"SEC. 209. (a) The Secretary may make section 206, or any other provision of this title, appplicable with respect to an international organization to the same extent that it is applicable with respect to a foreign mission if the Secretary determines, after consultation with the international organization, that such application is necessary to carry out the policy set forth in section 201(b) and to further the objectives set forth in section 204(b).

"(b) For purposes of this section, 'international organization' means—

"(1) a public international organization designated as such pursuant to the International Organizations Immunities Act (22 U.S.C. 288–288f–2) or other law authorizing such status; and

"(2) an official mission (other than a United States mission) to such a public international organization, including any real property of such an organization or mission and including the personnel of such an organization or mission.

"PRIVILEGES AND IMMUNITIES

"SEC. 210. Nothing in this title shall be construed to limit the authority of the United States to carry out its international obligations, or to supersede or limit immunities otherwise available by law. No act or omission by any foreign mission, public international organization, or official mission to such an organization, in compliance with this title, shall be deemed to be an implied waiver of any immunity otherwise provided for by law.

"ENFORCEMENT

"SEC. 211. It shall be unlawful for any person to make available any benefits to a foreign mission contrary to this title. This section shall be enforceable in any appropriate district court of the United States by injunctive or other equitable relief upon application by the Attorney General.

"SEVERABILITY

"SEC. 212. If any provision of this title or the application thereof to any person or circumstance is held invalid, the remainder of this title and the application of such provision to any other person or circumstance shall not be affected thereby.".

(c) Section 13 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684) is amended in the first sentence by striking out "and" following the semicolon at the end of clause (3), and by inserting immediately before the period at the end thereof "; and (5) services and supplies to carry out title II of this Act".

(d)(1) Subparagraph (A) of section 2(1) of the Diplomatic Relations Act (22 U.S.C. 254a(1)(A)) is amended to read as follows:

"(A) the head of a mission and those members of a mission who are members of the diplomatic staff or who, pursuant to law, are granted equivalent privileges and immunities,".

(2) Section 3(b) of such Act (22 U.S.C. 254b) is amended to read as follows:

"(b) With respect to a nonparty to the Vienna Convention, the mission, the members of the mission, their families, and diplomatic couriers shall enjoy the privileges and immunities specified in the Vienna Convention.".

(3) Section 4 of such Act (22 U.S.C. 254c) is amended—

(A) by inserting "the mission, the" immediately after "immunities for"; and

(B) by striking out "of any sending state".

(4) Section 1364 of title 28, United States Code, is amended by striking out "as defined in the Vienna Convention on Diplomatic Relations" and inserting in lieu thereof "within the meaning of section 2(3) of the Diplomatic Relations Act (22 U.S.C. 254a(3))".

(e) The Act of June 20, 1938 (Public Law 684, 75th Congress; 52 Stat. 797) is amended—

(1) in section 6 by striking out "(a)", and by striking out subsections (b), (c), (d), and (e); and

(2) in section 16 by adding at the end thereof the following new sentence: "In addition, the provisions of this Act shall not apply to any real property to which section 206(a) of the State Department Basic Authorities Act of 1956 (relating to foreign missions) is applicable.".

By Mr. MOYNIHAN:

S. 855. A bill to amend the Social Security Act to revise the AFDC and medicaid matching formula for States which meet certain minimum AFDC benefit requirements, and for other purposes; to the Committee on Finance.

MEDICAID FORMULA MODERNIZATION ACT OF 1981

● Mr. MOYNIHAN. Mr. President, I am today introducing the Medicaid Formula Modernization Act of 1981. It is intended to rectify four serious shortcomings in the medicaid formula presently embodied in the Social Security Act, the formula by which the Federal matching share is determined for State outlays under both medicaid and the program of aid to families with dependent children.

The existing formula looks like this:

Federal share of AFDC/Medicaid = .45 × State per capita income[2]/national per capita income[2]

It is, to be blunt, a perverse and inequitable formula.

Per capita income is used as the unqualified measure of a State's ability to pay for medicaid and AFDC. Income is certainly one gage of a State's economic condition, but it is not the only measure and it is certainly not the most accurate measure of a State's fiscal capacity. It ignores the sizable cost-of-living differences among States, resulting in unfair treatment of areas with higher living costs. A family residing in New York City, for instance, needs approximately 25 percent more income to maintain itself at the same standard of living as a similar family in Dallas or Houston.

The squaring mechanism exacerbates the distortions. It was intended to assure greater Federal financial assistance to States with the least ability to pay. However well-meaning its original purpose, the squaring mechanism no longer makes sense. There is no evidence that a State's need for Federal matching funds is geometrically related to the ratio of its income to national income levels; nor is there evidence that an unsquared ratio would not allocate Federal moneys in closer proportion to the true needs of the

State. The squaring mechanism only aggravates the problems resulting from reliance on per capita income.

Moreover, those ratios include cash transfer payments as part of income. Most such payments vary, State by State, and the proportion of the population that receives them does, too. A State such as New York, with a large number of welfare recipients, and with higher benefit levels, finds itself losing much-needed Federal reimbursement funds as a consequence of its success in alleviating poverty and meeting health care needs. This commitment to adequate provision for the needy serves to raise their cash income levels and thereby boosts our average State income level. This inflation is then squared.

The final large weakness of the current medicaid formula is the use of the 0.45 multiplier. Not only is it entirely arbitary, but the requirement that the States continue to pay such a large share of the costs of a keystone program for the poor imposes what must be acknowledged to be an unmanageable burden on the States and, often on local governments as well.

This bill would correct these inequities by: adjusting State income measures for cost-of-living differences, eliminating the squaring mechanism, excluding need-based cash transfer payments from income as defined for purposes of this formula, and changing the multiplier from 0.45 to 0.35. The higher reimbursement rate would be predicated upon State AFDC and food stamp benefits meeting 75 percent of the poverty line, and the bill includes a hold-harmless provision to insure that this proviso will not cost the States more in funding than they will receive in additional reimbursement.

The bill contains a mandatory pass-through of additional Federal matching funds to local governments in those States that now require localities to bear medicaid or AFDC costs.

This bill is based in large part on a superb analysis of inequities in the current medicaid formula that was prepared at the behest of New York City Council President Carol Bellamy. It is virtually identical to the measure that former President Carter endorsed in 1980. It is faithful to the platform commitments of the Democratic Party. It deserves careful attention and I urge its support.

In closing, Mr. President, I would simply add that this is one of two bills I am introducing simultaneously. The purpose is not to confuse, but rather to illustrate alternative approaches to the solution of a large and pressing problem: The crushing and inequitable fiscal burden created by the current system of apportioning responsibility for AFDC and medicaid among the three levels of Government in our federal system. The two bills closely resemble proposals that I first introduced in the 96th Congress. The principal difference, in both cases, is the requirement that AFDC and food stamp benefits in a given State equal or exceed 75 percent of the Federal poverty line as a condition of receiving the additional Federal matching funds provided through this legislation. Although that requirement has no direct effect on most States, it embodies a necessary—if insufficient—step toward true welfare reform by instituting a national minimum benefit level for needy and dependent children.

I would ask unanimous consent at this time that there be printed in full in the RECORD at the conclusion of these remarks the text of my recent article, "Children and Welfare Reform," published in the spring 1981 issue of the Journal of the Institute of Socio-economic Studies. I believe that the data presented in that article support my contention that welfare reform must be taken seriously, and pursued vigorously, for the sake of the millions of children who already depend for much of their material existence on these programs provided by a compassionate society.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CHILDREN AND WELFARE REFORM

(By DANIEL PATRICK MOYNIHAN)

"The first time as tragedy, the second as farce."[1] Karl Marx's celebrated epigram concerning the two Napoleons could as well apply to the two major efforts at welfare reform which took up sizable portions of presidential energy during the 1970s, but so far as support for dependent children is concerned, came to nothing.

The Family Assistance Plan (FAP), proposed by Richard Nixon in 1969, the first year of his presidency, undertook to substitute a guaranteed annual income for the four welfare programs already established under the Social Security Act: Aid to the Blind, Aid to the Permanently and Totally Disabled, Old Age Assistance, and Aid to Families with Dependent Children. This bill twice passed the House of Representatives by heavy margins.[2]

In 1973, with the enactment of the Supplemental Security Income (SSI) program, it could be said that three of the four objectives of the proposal were achieved. But this would miss the fact that the driving force behind "welfare reform" as it was universally known, was the idea of establishing a more generous, more uniform, more extensive system of support for children in poor or dependent families.[3] The Family Assistance Plan was devised above all to provide a guaranteed income for children and for families with children. In the end, children and families were the only groups excluded.

In 1977, President Jimmy Carter in the first year of his presidency took up the issue once more, proposing the Program for Better Jobs and Income (PBJI). By this point, the Federal bureaucracies and associated academic centers had acquired considerable sophistication with respect to guaranteed income plans. In what for example would appear to be the first such development in social policy, a variety of guaranteed income plans were actually "field tested". This was inaugurated with the New Jersey Graduated Work Incentive Experiment begun in 1967 under President Johnson. As a result, vast amounts of data were available in 1977.[4] Thus it came about that in contrast to the small group which was able rather rapidly to put together the Family Assistance Plan for President Nixon in 1969, in 1977 President Carter was able—or was forced?—to turn to a much swollen bureaucratic and academic apparatus. The result was, on the edge, farcical. Committees became so large they met in auditoriums. Starting with presidential instructions that no additional funds should be committed, a program ended up that would have cost the Federal government an additional $17.4 billion.[5]

Footnotes at end of article.

"WELL-MEANING BUT WITHOUT UNDERSTANDING"

The PBJI was sent to Congress in September 1977. In my study of FAP, *The Politics of a Guaranteed Income*, I made the point that a crucial feature of the negative income tax, of which both the Nixon and Carter proposals were variants, is that it is *hard to understand*. It was not likely that more than a sixth of the Members of Congress could follow just how the proposal before them in 1969-72 actually worked. But by contrast with the Carter proposal, FAP was Euclidean in its clarity. For by mid-decade, the economists had quite taken over the subject with the consequence that Carter's experts produced a proposal that it is not likely 25 persons in Washington actually understood.

Carter's welfare economists are said to have done reputable work in other fields, but when it came to social policy they were bumpkins. They used up almost a year of their president's time on a proposal that the full House Committee on Ways and Means never even considered. In the Senate, I introduced the legislation, but there was little interest and not the least disposition to act until the House had acted. (This is, after all, the constitutionally prescribed sequence of the two tax-writing committees which have jurisdiction over Social Security matters.)

President Carter had devoted extraordinary effort to devising the PBJI. Word was passed that this was a priority matter for his party and his administration and that the Congress would be receptive and the nation supportive, if not indeed impatient for action. In the end, however, a grotesquely swollen and self-deluded policy process failed utterly. Moreover, in the process, it destroyed the prospects of any significant advances. Apart from the relatively modest Adoption Assistance and Child Welfare Act of 1980, the Carter Administration, having expended such efforts on welfare reform—to the scorn of a Democratic Congress and the evident indifference of the public at large—never again mustered its resources or its nerve in the cause of other social policy innovations. It left office after four years, perhaps the first administration since that of Calvin Coolidge that could boast of no significant social legislation. The farcical element, however, was that nothing was going to happen anyway.

THE FAP DEFEAT

By contrast, there had been a tragic element in the loss of FAP, and it was this. The proposal was made at a time of still rising expectations about social reform. While it received acclamation and support, it was also opposed by groups which were of the view that such were the ever-improving prospects for such measures, a still better measure could be enacted. Thus, for example, the National Urban League opposed FAP.[6]

This was an illusion, widely shared, but susceptible of analysis. Only as evidence that a closer look argued otherwise, I observe that on July 1, 1970, I addressed a meeting of the National Urban Coalition in Washington to press for enactment of the Family Assistance Plan that year. The House had voted; the Senate was ready. I stated: "If we don't get it in this Congress, I don't see us getting it in this decade."[7]

The tragedy then was hubristic. FAP might not have passed in any event, given the opposition of those who thought it was "too much." But for certain it was opposed by those who thought it was "too little," and who were overwhelmingly confident that yet more resources could be made available. By the end of the decade, however, the resources available for social programs were already committed elsewhere, and far from having been improved, the levels of support for mothers and dependent children in the land

had actually begun to *diminish*. In the meantime, institutional crises such as the near-bankruptcy of New York City in 1975 cast the failed opportunity of FAP in yet another light. Had it been adopted in 1970, welfare costs, strictly defined, would have disappeared from the City's budget. This might have put off the fiscal crisis, and in any event would significantly have hastened recovery from it. Mayor John V. Lindsay sensed this in 1970 and strongly supported the "federalization" of welfare, which was an incidental but not casual aspect of FAP. A decade later, Mayor Edward I. Koch must accept that this is an ever receding prospect. As will be related, serious questions have arisen as to whether a guaranteed income would be desirable social policy. But few would contest that it would have been brilliant urban policy.

The record of failure in the 1970s would not seem to argue well for the 1980s. There has been a sharp retreat from party commitment to welfare reform as it was understood a decade ago. As recently as 1972, the Republican Party urged "uniform Federal payment standards for all welfare recipients" and lauded the Republican administration that had produced the Family Assistance Plan.

The platform adopted at the Republican convention in 1980, however, wanted no part of any such thing. "We categorically reject the notion of a guaranteed annual income, no matter how it may be disguised," said the welfare plank. "We oppose federalizing the welfare system . . ." Senator Robert F. Dole of Kansas, assuming the chairmanship of the Senate Committee on Finance, told the Socioeconomic Newsletter for January 1981 that he "flatly rejects . . . the institution of a guaranteed annual income."

The Democratic platform was at least as ardent as the Republican in 1972, proposing to "end the present welfare system and replace it with an income security program. . . ." But by 1980 there was no such reference. In a discursive and largely evasive plank there was no mention whatever of President Carter's Program for Better Jobs and Income. Instead, the party pledged itself to "continue to work" to extend to all states the "unemployed parent" portion of AFDC, under which two-parent families can in certain circumstances become eligible for welfare benefits, and to raise AFDC minimum payments in some southern and southwestern states. In a word, the routine elaboration of an established program. Not unimportant, but most emphatically not new.

The 1980 election seemed anything but a mandate for new social programs, more likely otherwise. Before taking office, a memorandum from then Representative David A. Stockman, who became President Reagan's Director of the Office of Management and Budget, suggested that the routine political rhetoric of getting rid of government "waste" or "fraud" would "hardly make a dent in the true problem"; that if the budget were to be reduced, more drastic steps, including cuts in entitlements and other programs, would have to be undertaken.[8] An editorial in the Washington Post noted that while only 1.3 percent of the Federal budget goes to programs that "most people mean by 'welfare'," they had become the subject of such public indignation "that it would almost be worth cutting them out entirely in order to be rid of this convenient scapegoat . . ."[9]

What prospects for change do exist are implied in the Post's caveat to its own modest proposal:

"It would be well to eliminate welfare altogether were it not for the likely disastrous effect on the lives of some seven million children, effects we somehow doubt anyone would really relish."[10]

Footnotes at end of article.

That is the essential point: the lives of children are involved. Few seem to grasp how many.

Some 20 years ago, as head of the newly formed policy planning staff of the U.S. Department of Labor, I began a series of statistical investigations seeking to establish the social costs of unemployment. This had been the subject of some enquiry during the 1930s, but had receded before the conceptual power of the Gross National Product and its measurement of costs and benefits in direct economic terms.

BIRTH OF THE "WELFARE CLASS"

Early on, I felt I was on to something. A considerable range of social indicators, especially among Black Americans, a group with a high rate of unemployment, could be shown to relate to unemployment. Especially when the indicators were lagged—for example, dropping "Married Woman, Husband Absent" back nine months or a year, and comparing this with Male Unemployment—quite astonishing correlations could be shown. Going back in time, a singularly powerful correlation could be shown between male unemployment rates and new AFDC cases. But this persisted only into the late 1950s, when all of a sudden the correlation began to weaken. Then in the early 1960s, it disappeared altogther, becoming sharply negative. This is to say that for most of the postwar period (when unemployment data became available) until the close of the 1950s, whenever male unemployment rose, the number of new AFDC cases rose also. When unemployment dropped, the number of new cases dropped. (In this "model," I assumed that unemployment was the moon and AFDC the tide; in logic it could be the reverse, but to govern, as President Kennedy said, is to choose!)

Then this relation disappeared. Unemployment went down, and AFDC up. When I finally sent this data to President Lyndon B. Johnson, the negative relationship had existed for only two years, 1962–64. But this had been preceded by four years in which the positive relationship had steadily weakened. My hypothesis that employment and unemployment in the very near term controlled social dispositions was seemingly disproved. Something else was going on. And so I put it to the president that the society was entering a welfare crisis.

My data, subsequently published in *Daedalus*, the journal of the American Academy of Arts and Sciences, and in *The Annals* of the American Academy of Political and Social Science have not to my knowledge been disputed by social scientists.[11] The findings, of course, gave rise to intense controversy, but this turned on the presumed implications of the data. The data themselves have never been challenged.

As it happens, a number of scholars have in recent years returned to this subject and have confirmed my projections. Writing in the Summer 1980 edition of *The Wilson Quarterly*, Graham B. Spanier sums up: "That general prediction has proven correct. . . ."[12] What some statisticians have called "Moynihan's Scissors"—the sudden crossing of the curves—accurately forecast a major social development of the subsequent 15 years.

Data make a difference. Ours is scarcely a purely rational society, and anything but conflict-free. But we are, in the main, a well-intentioned society, capable of learning. The great welfare initiatives of the 1960s and 1970s arose as much as anything from data demonstrating the need for change.[13]

IMPACT ON CHILDREN

I make this point by way of introducing a new body of data which argues that however much the impulse may have faltered, the need for change is as great as ever. The data may be summarized as follows:

1. It appears that one-half of the children now being born are likely to live in female-headed households at some point prior to their 18th birthday. This includes 40 percent of majority children and 75 percent of minority children.

2. Two-thirds of female-headed households with children now receive AFDC payments.

3. Before their 18th birthday, one-third of all children now being born are likely to live in a female-headed household receiving AFDC payments.[14]

Year	Percentage of children born that year likely to reside in female-headed households prior to age 18	Average annual percentage of female-headed households with children receiving AFDC	Percentage of all children born that year likely to live in female-headed households receiving AFDC, prior to the 18th birthday
1940	31	23	7
1950	33	52	17
1960	35	64	22
1965	37	70	26
1970	40	78	31
1975	45	74	33
1978	48	67	32
1979	50	NA	NA

I wish to be explicit that these data do not in any way bear on the subject of whether the existing welfare system leads to family breakup. To my knowledge there is no evidence one way or another for this proposition and never has been. If the absence of research on a subject about which every other president and every secretary of Health, Education, and Welfare in the modern age has confidently expounded uniform convictions is surprising, it should be understood as a characteristic of the present system. Some years ago, Lee Rainwater pointed to a tendency of professionals in social welfare to "protect the good name of the poor and disadvantaged" by discouraging, even obstructing certain kinds of research.[15] At minimum it might have been supposed that of the hundreds of millions of dollars spent on research by HEW (now Health and Human Services) some effort would have been made to calculate the rates set forth in the table seen on page 8. None has.

CHANGING WELFARE POPULATION

On the other hand, it may be said that these data are consistent with current observations and projections concerning the nature and extent of poverty in the United States. Although the two are not the same, poverty is increasingly a problem of dependency; they commence now to intersect. In 1976, for the first time, the number of poor living in female-headed families surpassed the number of poor in male-headed families.[16] In its 1980 report to the president, an annual feature of the Economic Opportunity Act of 1964, the National Advisory Council on Economic Opportunity stated:

"All other things being equal, if the proportion of the poor who are in female-headed families were to increase at the same rates as it did from 1967 to 1977, the poverty population would be composed solely of women and their children by about the year 2000."[17]

This is a bold forecast, beyond the range of the present data. It assumes that a rate of increase that existed in one decade will persist for 23 more years. While it seems implausible that the entire "poverty population" would ever consist of persons living in female-headed families—the proportion of female-headed family persons within the total poverty population rose to 53 percent in 1978, but slipped back to 52 percent in 1979—certainly the same kinds of developments that raised the proportion from 38.1 percent to 51.0 percent in ten years could raise it considerably further by the end of the century.

Again, this must be allowed to be a condition especially pronounced among minority groups. Dr. Robert B. Hill of the National Urban League writes in his chapter on "Black Families in the 1970s" in *The State of Black America* 1980:

"While the number of poor white families declined by two percent . . . between 1969 and 1978, the number of poor Black families rose by 19 percent . . . Because of the sharp rise in the number of Black families headed by women, they accounted for all of the increase in the number of poor Black families over the decade. While the number of poor Black families headed by men fell by 34 percent . . . between 1969 and 1978, the number of poor Black families headed by women soared by 64 percent." [18]

PERILOUS PROSPECT

In sum, more and more children will spend some or all of their early years in female-headed households. Most of these youngsters will be on welfare at some point. But not all will receive public assistance. Some will not need it. Others will need it, but will not satisfy the complex and uneven requirements of the various states and hence will not get it.

The social consequences of a childhood spent with only one parent extend beyond issues of welfare policy. Consider the report on "One-Parent Children in the Schools," related by the National Association of Elementary School Principals on July 28, 1980.[19]

One-parent children, on the whole, show lower achievement in school than their two-parent peers . . . Among all two-parent children, 30 percent were ranked as high achievers, compared to only 17 percent of one-parent children. At the other end of the scale, the situation is reversed. Only 24 percent of two-parent children were low achievers—while fully 40 percent of the one-parent children fell in that category.

There are more clinic visits among one-parent students. And their absence rate runs far higher than for students with two parents, with one-parent students losing about eight days more over the course of the year.

One-parent students are consistently more likely to be late, truant, and subject to disciplinary action by every criterion we examined, and at both the elementary and secondary levels . . . one-parent children are more than twice as likely as two-parent children to give up on school altogether.

In terms of group relations, such research findings augur continuing anguish. For there can be, there is, no equality among groups without some equivalence of social structure, for good or ill. This is a judgment, to be sure, but I hold to it.

What are the prospects for changes that might lead to improvements? Let it be said at the outset that there is less prospect in the 1980s for a guaranteed income, in the sense of a universal program available to dependent and non-dependent alike, than there was in the 1970s. The Democratic party, when in control of both the presidency and the Congress, could not enact one. The Republican party, now in control of the presidency and one house of the Congress, is adamantly opposed. Just as importantly, the results of the negative income tax experiments begun in the 1960s have been anything but reassuring with respect to the effect on social structure. Simply stated, there appears to have been more breakup among those families receiving a guaranteed income than among those that did not.[20]

George Gilder, in his stimulating book, *Wealth and Poverty*, ascribes to me a measure of blame for having set us off in this policy direction, which I accept. He notes that my "preferred policy was always child allowances," but I urged the guaranteed income scheme on the new administration in 1969 because I thought it would be more politically appealing. He writes, "The result was a lost decade of initiatives of little political appeal or objective validity." [21]

This is a view that might reasonably be shared by Dr. Martin Anderson, who took part in the deliberations concerning the Family Assistance Plan of 1969 and returned to Washington in 1981 as Senior Advisor to President Ronald W. Reagan. In his own book, *Welfare*, Anderson argues that one lesson to be drawn from our recent experience is that "Radical welfare reform or any variety of a guaranteed income is politically impossible" for no such "plan can be devised that will simultaneously yield minimum levels of welfare benefits, financial incentives to work, and an overall cost to the taxpayers that are politically acceptable." [22]

HAS THE WAR ON POVERTY BEEN WON?

It is also Dr. Anderson's view, however, that "radical" welfare reform is unnecessary. He contends that "the war on poverty" that began in 1964 has been largely successful. "The growth of jobs and income in the private economy, combined with an explosive increase in government spending for welfare and income transfer programs, has virtually eliminated poverty in the United States." [23] He urges that future reform efforts be directed to increasing efficiency, decreasing "fraud," enforcing a "fair, clear work requirement" and shifting more responsibility for policy and administration from Washington to state and local governments.

Dr. Anderson's proposals are based on the stated assumption that "There is no way that the Congress, at least in the near future, is going to pass any kind of welfare reform that actually reduces payments for millions of welfare recipients" and that even if Congress were to pass such a bill "no President could resist vetoing" it.[24]

But surely there is an elemental case for maintaining the existing level of benefits. Whether they be "high" or "low," there is no case for making them lower.* Yet this is what the decade did. Not by act of Congress, to be sure, nor with explicit presidential sanction, but by inaction, by failure at both the national and state levels to maintain the purchasing power of welfare benefits.

INFLATIONARY EROSION

In February 1980, the Subcommittee on Public Assistance of the Senate Finance Committee held hearings on this matter. Data compiled by the Department of Health and Human Services were presented and analyzed by government officials and expert outside witnesses. It was shown that the average monthly AFDC benefit paid to families rose from $171 in 1969 to $272 in 1980. In constant dollars, however, the average benefit declined by 56 percent during those years.

Taking the 20 states then represented on the Finance Committee as a sample, Professor Leonard Hausman of Brandeis University pointed out that 12 had experienced benefit declines between 1973 and 1978. In Georgia, the decline was one-third. In Texas, there has been no change since 1969 (save for a temporary $5 increase in 1979) in the maximum benefit payable to a family of four with no other income. That payment of $140 a month—an annual income of $1,680—today buys less than half what it bought 11 years ago.[25]

In New York State, always so self-congratulatory in these matters, the basic allowances (exclusive of shelter) for a family of four was set at $258 in 1974. At the outset of 1981 it remained $258 although consumer prices increased 64 percent in that period.[26] To buy the same amount of food and clothing that could be purchased with $258 seven years ago would require $428 in 1981.[27]

The result is that in New York City today we find the paradox of the nation's largest welfare caseload, daily erosion of the real benefits paid to those hundreds of thousands of children, and a city in fiscal difficulty that, under the present arrangements, would nevertheless have to come up with a full quarter of the additional monies needed to provide any increase at all.

This suggests the fundamental difference in the context of welfare reform efforts today, as against a decade ago. In 1970, it was reasonable to point to states such as New York, that had striven for an adequate standard of common provision for their dependent populations, as the standard toward which other states and regions should be moved by the Federal government.

Today the so-called "high benefit states" can seemingly no longer afford to maintain those benefits. It is, therefore, no longer satisfactory to speak of welfare reform only in terms of increasing payments in a dozen southern and southwestern states (though they are low, and raising them remains an essential element). Nor is it any longer acceptable to design proposals that would transfer more resources out of weakening economies such as those of the northeastern industrial states and into the economies of ever more prosperous regions.

The AFDC program is caught in a fiscal trap. Because it is not "indexed," whilst every other Federal income maintenance program of any consequence is indexed, whatever additional Federal revenues are allotted to what we now call "Budget Function 600, Income Maintenance," are needed to pay for automatic increases in the indexed programs.

SHRINKING AFDC

The Federal budget grew from $400 billion in fiscal 1976 to $637 billion in fiscal 1981. One would suppose a few social initiatives could be squeezed out of an additional $237 billion. Or at least that needy children could be spared the full burden of inflation. But they have not been. "Uncontrollables" account for more than 70 percent of the entire increase in Federal outlays since 1977, and for almost 90 cents of every dollar of increased social spending. As a percent of the Federal budget, outlays for AFDC have shrunk from 1.6 percent in fiscal 1973 to 1.4 percent in fiscal 1977 to 1.1 percent in fiscal 1980.

It may be observed that the "new" Congressional budget process, something much favored in the early 1970s by reform groups, has had consequences not anticipated at the time. Frank C. Ballance of the Carnegie Endowment for International Peace observed in 1980 that "The Budget Act, a well-intentioned reform for Congressional reconciliation of revenues and expenditures, has spawned a time-consuming and complex budget process and forces accommodation in a way that has the greatest impact on the weakest programs." [28]

BLOCK GRANTS TO STATES

The Republican Administration came to office in 1981 pledged to cut the budget, to reduce taxes, and to transfer responsibility for welfare back to the states in the form of "block grants."

The latter phrase implies two quite distinct ideas. The first is fiscal: Washington will replace its system of open-ended "matching payments" (under which it now reimburses states from 50 to 83 cents, according to a formula, of each dollar they expend on AFDC) with a specified sum provided to each state every year in the form of a "Federal contribution" to the costs of welfare. If the state spends more, it must use its own money. If it spends less, it can keep the remainder.

The second idea concerns program policy: in place of a federally designed and essentially national program (albeit with cer-

Footnotes at end of article.

tain state variations, such as maximum benefit levels) that embodies a long list of "protections" for recipients with earnings, that prescribes the rate at which benefits are to be reduced for recipients with earnings, that bars requiring recipients to work in return for their benefits, and that makes other benefits (such as Medicaid) automatic, a block grant program would empower the states to make these and other such policy decisions.

The first of these propositions—to replace open-ended "matching payments" from the Federal government—has considerable appeal. Senators Alan Cranston, Russell B. Long and I proposed a variation of it in 1978, after the Carter proposal had died and when it looked as if nothing at all were going to happen. (In the end, of course, nothing did.) That bill, however, would *not* have removed the recipient protections contained in the Social Security Act. It would merely have altered the fiscal arrangements from a reimbursement scheme to an annual Federal "contribution" that would increase as the cost of living (and the unemployment level) rose. The point was both to provide some immediate fiscal relief to state and local governments *and* to make it possible for them to insulate welfare recipients from the depredations of inflation.

Erasure of the national standards for AFDC as put forward in the second proposition raises the most profound questions about the relationship between the Federal government and the millions of dependent American children in one-parent households.

Either the nation does have a responsibility for the welfare of these children, or it does not. I hold to the belief that it does, and that it cannot renounce that responsibility in the name of "reform."

AIM: TO AID CHILDREN

AFDC is a program for aiding dependent children. That it incidentally aids their mothers—and a handful of fathers—is beside the point. I have little patience with welfare reform "debates" that hinge on the question of whether a given proposal will or will not increase the "incentive" for adults to "work." A woman with two or three or four young children and no husband ordinarily cannot work, at least not without elaborate (and expensive) day care arrangements. AFDC is not a program to subsidize leisure; it is a program to enable a hard-pressed woman to keep a roof over the heads, clothes on the backs, and food in the mouths of her children.

Providing such aid has been a responsibility of the Federal government since 1935. It is a basic component of our national arrangements for common provision, as embodied in the Social Security Act. It is as basic as benefits for the elderly, for the unemployed and for the disabled. It is the proper task of the national government.

Any number of specific administrative arrangements can be devised for fulfilling that responsibility. Myriad fiscal mechanisms can be imagined. Some could take the form of "block grants" to states. Others, in the manner of Supplemental Security Income, would be entirely national. These are details, and while they are often intricate and always important, they matter less than the criterion by which their desirability will be measured. And the essential criterion is simplicity itself: will a given arrangement provide a better life for the children affected by it?

There is this central fact. An astonishingly large and evidently still increasing proportion of American children grow up in circumstances that significantly impair their prospects in life. This increase was foreseen. Nothing was done to prevent it. Or in any case, nothing did. To accept it as normal would be indifference to pain. Worse, the problem is now so extensive that to allow it to persist without a sustained effort to reverse it would constitute an indifference to the well being, even the security of the nation itself. In 1969 a new Republican administration showed a far greater boldness in this matter than had its Democratic predecessor. Is it possible that history will repeat itself?

TECHNICAL NOTE

The data in the Table were calculated by:

(1) Estimating the percentage of babies born in a given year who are likely to reside in a female-headed household before turning 18.

(2) By calculating the average percentage of female-headed households with children under 18 who receive AFDC during a 15-year period including and following the child's year of birth; and

(3) By multiplying the results of the above computations in order to estimate the percentage of all children born in that given year likely to receive AFDC at some point in their minority.

Data were calculated for 1940, 1950, 1960, 1965, 1970, 1975 and 1978. For the more recent years, when the 15-year average used in step (2) is unobtainable (i.e., 1965, 1970, 1975, 1978), we instead averaged over the longest period of time for which data are available the annual percentage of female-headed households with children under 18 receiving AFDC.

(A) The methodology for estimating the percentage of babies born in a given year likely to reside in a single-parent household before reaching their majority was developed by Arthur J. Norton, Assistant Chief of the Population Division, Bureau of Census, Department of Commerce. His methodology, which is based on a consideration of trends in premarital births, divorce, long-term separation and death, was adapted to apply only to female parents. The following is a step-by-step description of the computations.

(1) Premarital births. To find the percentage of babies born out of wedlock that will live in a female-headed household for at least one year following birth, the illegitimacy ratio for a given year was multiplied by the percentage of illegitimate babies retained by their mothers, then by the percentage of mothers who remained unmarried for at least one year following childbirth. Norton estimated that 90 percent of prematurally born children are retained by their mothers, and that this has held true over the past 40 years.

(2) Divorce. We reduced the original cohort of babies by the result of Calculation (1), and multiplied the reduced cohort by the estimated percentage of first marriages of young adults likely to end in divorce. As this estimate is upwardly influenced by persons who had borne a child before marriage and by childless couples, we reduced the figure by four percent. James McCarthy of Princeton University's Office of Population Research developed a methodology for estimating and supplied estimates of the percentage of first marriages of young adults likely to end in divorce (McCarthy, "A Comparison of the Probability of the Dissolution of First and Second Marriages," *Demography*, Vol. 15, No. 3, August 1978, 345–359). Note that this figure will not account for children born to young women with husbands or for babies born to older women (over 45).

(3) Separation. We obtained estimated percentages of long-term separations which either end in reconciliation or last indefinitely.

(4) Death of male parent. We subtracted the results of Calculations (2) and (3) from the reduced cohort of babies to find the number of babies expected to live in a two-parent home except in case of death of a parent. For each year, we obtained estimates of the percentage of male parents who died while their children were under 18, then multiplied this figure by the remaining pool of babies. Charles Westoff of Princeton's Office of Population Research calculated our estimates of parental deaths according to Norton's methodology. He used a life table to estimate the survival rate of men at 28 years (the average age of childbearing women is 26, and the average husband is two years older than his wife). As life tables are not stratified by marital status, he reduced the percentage of non-survivors by 20 percent on the assumption that married persons have a somewhat greater longevity than non-married persons.

(5) Final Results. We added the results of Calculations (1) through (4) to obtain an estimate of the percentage of babies born in that year likely to reside in a female-headed household before their 18th birthday.

(B) To find the average percentage of female-headed households with children receiving AFDC over a 15-year (or other period) of time, we divided the average number of female-headed households receiving AFDC in each year of that time period by the average number of female-headed households with children in each year of that same period. To estimate the percentage of all children born in a given year likely to receive AFDC before their 18th birthday, we multiplied the results of Calculation (A) by the results of Calculation (B).

*Editor's Note: The case for *not* interceding against the inflationary erosion of welfare benefits is made by Tom Bethell in *Real Reform*, "The Journal/The Institute for Socioeconomic Studies," Vol. V, No. 3, Autumn 1980, p. 29 ff.

[25] Statement by Leonard Hausman, "How to Think About Welfare Reform in the 1980s," testimony delivered February 6, 1980, before the United States Senate, Committee on Finance, Subcommittee on Public Assistance, pp. 183–184.

[26] The prognosis for a rise in New York's welfare benefits seems to be improving. In his State of the State message on January 7, 1981, Governor Hugh L. Carey proposed a ten-percent increase per year for the next two years in AFDC benefit payments. The New York State Assembly passed a ten-percent increase in their 1980 session, but this measure was not approved by the State Senate. However, a *New York Times* article of December 31, 1980 details State Senate Majority Leader Warren Anderson's support for a 15-percent increase in AFDC payments. I am hopeful the state will finally enact a rise in welfare benefit levels this legislative session.

[27] Food Stamp benefits have increased, to be sure, and these are wholly paid for by the Federal government. Medicaid payments have increased as well. And New York's AFDC shelter allowance has risen somewhat, also. But Food Stamps cannot be used to pay the heating bill or to buy winter shoes. Thirty-six percent of New York City's welfare recipients must pay more for housing than the "shelter allowance" provides. And, as *The New York Times* pointed out on December 6, 1980, those who receive more in Medicaid benefits are sicker, not richer, than those who do not. See Dr. Blanche Bernstein, letter to the editor, *The New York Times*, November 29, 1980, and editorial rejoinder. December 6, 1980.

By Mr. TOWER:

S. 857. A bill to impose quantitative restrictions on the importation of lamb meat; to the Committee on Finance.

LAMB MEAT QUOTA ACT OF 1981

Mr. TOWER. Mr. President, I introduce legislation today that is of great importance to the survival of our domestic lamb meat producers. It is of particular importance to the sheep and lamb industry in Texas. Texas leads the Nation in sheep and lamb numbers, with approximately 2.4 million head.

I am most concerned that the level at which imported lamb meat is subsidized by the foreign countries from which it is exported is contrary to American law and inconsistent with international trade agreements between such countries and the United States.

The legislation I introduce is companion legislation to that of Representative TOM LOEFFLER of the 21st Congressional District of Texas. We seek to lessen the immediate threat of our domestic lamb meat producers face.

Mr. President, I request that the complete text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 857

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Lamb Meat Quota Act of 1981".

SEC. 2. The Congress finds—

(1) that lamb meat imported into the United States is in direct competition with lamb meat produced in the United States;

(2) that the level at which substantial amounts of imported lamb meat is subsidized by the foreign countries from which it is exported is contrary to American law and inconsistent with international trade agreements between such countries and the United States; and

(3) that the level of lamb meat imports into the United States poses an immediate and serious threat to the economic survival of the lamb meat producers of this Nation.

SEC. 3. For purposes of this Act—

(1) The term "domestic price" means the average of the prices received by farmers for lamb.

(2) The term "entered" means entered, or withdrawn from a warehouse, for consumption in the customs territory of the United States.

(3) The term "lamb meat" means the articles provided for in item 106.30 (relating to fresh, chilled, or frozen lamb meat) of the Tariff Schedules of the United States (19 U.S.C. 1202).

(4) The term "parity price" shall have the meaning given it in section 301(a)(1) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1301(a)(1)) and shall be determined in accordance with section 301(a) of such Act, except that any reference to "any agricultural commodity" or "such commodity" in section 301(a) of such Act shall be deemed to be a reference to lamb.

(5) The term "Secretary" means the Secretary of Agriculture.

SEC. 4. (a) The aggregate quantity of lamb meat that may be entered during any calendar year after 1981 may not exceed, except as provided in subsection (b), the smaller of the following amounts:

(1) 31,000,000 pounds, or

(2) an amount equal to 12 percent of the domestic slaughter of lamb during the calendar year that immediately precedes the calendar year for which such aggregate quantity of lamb meat is to be established under this subsection.

(b) The Secretary shall estimate, before the close of each of the first three calendar quarters of any calendar year after 1981, whether the domestic price of lamb during the calendar quarter involved exceeds the parity price of lamb. If the Secretary estimates that the domestic price of lamb during such calendar quarter—

(1) equals or exceeds 95 percent of the parity price of lamb for such calendar quarter, then the aggregate quantity of lamb meat established under subsection (a) for such calendar year shall be increased, commencing with the immediately succeeding calendar quarter, by 5 percent, or

(2) is less than 95 percent of the parity price of lamb for such calendar quarter, then, without regard to whether an increase is in effect under paragraph (1) for such calendar year, the aggregate quantity of lamb meat established under subsection (a) for such calendar year shall apply during the calendar quarter immediately succeeding such calendar quarter.

(c) Notwithstanding any other provision of this Act, the total quantity of lamb meat that may be entered during any calendar quarter in any calendar year after 1981 may not exceed 27 percent of the aggregate quantity of lamb meat estimated for such calendar year under subsection (a) as adjusted, if applicable, under subsection (b).

(d) For each calendar year after 1981, the Secretary shall estimate, on the basis of the best information available at the time, and publish—

(1) before the first day of such calendar year, the aggregate quantity of lamb meat established under subsection (a) for such calendar year, and

(2) before the close of each of the first three calendar quarters in such calendar year, the domestic price of lamb during the calendar quarter involved and, if subsection (b)(1) applies, the adjusted aggregate quantity of lamb meat established under subsection (a) for such calendar year.

SEC. 5. The Secretary shall allocate the aggregate quantity of lamb meat established under section 3(a) for any calendar year (as increased, if applicable, under section 3(b)) among supplying countries on the basis of the shares of the United States market for lamb meat such countries supplied during a representative period. Notwithstanding the preceding sentence, due account may be given to special factors which have affected or may affect the trade in lamb meat. The Secretary shall certify such allocations to the Secretary of the Treasury.

SEC. 6. (a) The Secretary shall issue such regulations as he determines to be necessary to prevent circumvention of the purposes of this Act. The Secretary of the Treasury shall issue such regulations as may be appropriate to ensure, to the extent practicable, that the country of origin of lamb meat subject to this Act is indicated to consumers who purchase lamb meat at retail prices.

(b) All determinations by the Secretary under this Act shall be final.

By Mr. DURENBERGER:

S. 858. A bill to amend the Internal Revenue Code of 1954 to provide estate tax equity for family farms and other enterprises, and for other purposes; to the Committee on Finance.

FAMILY FARM PROTECTION ACT OF 1981

● Mr. DURENBERGER. Mr. President, today I am introducing legislation on behalf of the American farmer. Estate taxes are destroying the prosperity of these hard-working Americans. The Tax Reform Act of 1976 made important steps to alleviating this onerous burden. My bill, the Family Farm Protection Act of 1981, would correct certain problems that have arisen in the implementation of the 1976 provisions as well as expand the use of some of them to further enable these families to carry on the family business.

This legislation reflects my belief that tax policy should be aimed at decisions we make while we are alive, not those we are now forced to make in anticipation of dying.

The Federal estate tax is one of the most unfair taxes because of the burden it places on low- and middle-income persons. The estate tax represents about 1.2 percent of all Federal tax revenue, approximately $6.5 billion per year. Most of the burden falls on people with estates of $500,000 or less. In fact, under my reform legislation, more than 9 out of 10 estates would be exempt from the tax.

While the 1976 Tax Reform Act recognized the unfairness of the Federal estate tax and made two changes of vital importance to farmers, it did not go far enough.

The first change in 1976 raised the amount of the estate that is excluded from taxation from $60,000 to $175,000. That exclusion is clearly insufficient in these times of high inflation. My bill would increase this exclusion to $600,000 so that only the largest estates would have to bear the burden of estate taxes.

The second major change of the 1976 act is called the special use valuation provision. Prior to the 1976 change, the value of property included in the gross estate of a decedent generally was its fair market value at the date of death—the price at which property would change hands in an arm's-length transaction. One of the most important factors used in determining fair market value is the highest and best use to which the property can be put, rather than the actual use of the land at the time.

For example, farmland that could be used for a subdivision of new homes would have a much higher value—and thus a much higher estate tax—than its value as farmland. In many cases the greater estate tax burden made continuation of farming or other business activity infeasible because the income potential from these activities was insufficient to service extended tax payments or loans obtained to pay the tax.

Recognizing that fair market valuation was severely undermining the ability of families to carry on the family business, Congress passed the special use valuation provision. Under this provision, section 2032A of the Internal Revenue Code, real property used in farming or certain other businesses would be valued at its present use, rather than the highest and best use, up to a reduction in the gross estate of $500,000.

However, Congress realized that it would be a windfall to the beneficiaries of an estate to allow the real property to be valued at the special use valuation unless the beneficiaries continue to use the property for the same purpose for a reasonable period of time. Therefore, Congress provided for a recapture of the estate tax benefit where the land is sold or converted to a nonqualifying use within 15 years of the decedent's death.

Five years and four sets of IRS regulations later, experience has shown us where improvements must be made in the special use provision. My bill would make a number of changes in the special use rules to achieve the purpose of the 1976 changes—protecting the family business from sale because of onerous estate tax burdens.

First, the bill eliminates the $500,000 cap on the special use valuation, thus allowing the entire qualifying estate to be valued at its current rather than highest and best use. Inflation and speculative pressures have caused real property values to soar in the last half decade. The family farmer and small business person suffer from inflation in two ways. First, inflation causes operating expenses to skyrocket and profits to dissipate. Second, inflated real estate values contribute to exorbitant estate tax bills, even when the special use valuation is elected. Therefore, this legislation lifts the $500,000 lid.

Second, this bill explicitly allows property cash rented to a family member to qualify for special use valuation, thereby clarifying the intent of the 1976 act. The Internal Revenue Service has issued regulations disallowing special use valuation if the farm was cash rented by the decedent to his heirs. The committee report accompanying the 1976 act clearly states that such passive rental of the farm was not meant to disqualify the estate where "a related party leases the property and conducts farming or other business activities on the property. The real property may qualify for special use valuation."

If the decedent, before he dies, wishes to retire and cash lease his farm or business to his heir, he should be entitled to do so. However, the final IRS regulations do not consider cash-rented property, even though rented to an otherwise qualified heir, "qualified" property because they consider the mere passive rental of property not to be a "trade or business use." Consequently, if enforcement of the IRS regulations as to family members were to continue, the number of farm and other businesses involved in cash rentals would be severely or eliminated altogether.

Additionally, discouraging the cash rental of qualified property is totally inconsistent with other provisions of the code. Under the Social Security Act, a crop-sharing arrangement may cause a farmer's rental income to be treated as self-employment earnings, thereby reducing or eliminating social security benefits to which that farmer would otherwise be entitled. On the other hand, cash rental is not treated as self-employment earnings for social security purposes. Therefore, we have one section of the code clearly encouraging elderly individuals to cash rent their qualified property while the IRS regulations preclude them from obtaining the lower estate tax benefit under the special use valuation.

Third, this bill provides that the "material participation" requirement for qualification for special use valuation need only be met until the date upon which the decedent retires or becomes disabled.

In drafting the special use valuation provision, Congress incorporated the "material participation" requirement to avoid creating a new loophole for the "Wall Street Cowboy"—the wealthy investor who owns a farm for speculative purposes. Material participation by the decedent or a member of the decedent's family prior to his death and by the heir following the decedent's death are required.

The "material participation" requirement strikes an injustice on the decedent's estate if he suffered a prolonged illness prior to his death or if he simply wanted to retire to enjoy the fruits of his many years of hard work. Therefore, Mr. President, this bill provides that the "material participation" requirement for qualification for special use valuation need only be met until the date upon which the decedent retires or becomes disabled.

Fourth, this bill provides that "active management" rather than "material participation" will qualify, under certain circumstances, for the special use valuation. The majority of surviving spouses is women. Many widows have literally invested their entire lives in raising a family and managing the household yet they may not be experienced in or physically able to "materially participate" in the day-to-day operation of a farm or

other trade or business. Currently, absent their "material participation" in the business inherited from the decedent, they lose the special use valuation and must pay estate taxes on the highest and best use of this property.

Therefore, this bill explicitly provides that for farms or other business real property inherited from a spouse and qualifying for special use valuation, an "active management" rather than a "material participation" test may be used. "Active management" is defined to mean the making of the management decisions of a business, other than the daily operating decisions.

Fifth, this bill provides that qualification for special use valuation can be attained in the case of woodlands if the decedent or a member of his family is engaged in their "active management" for the 10-year period prior to his death.

Sixth, this bill reduces from 15 to 10 years the time for recapture of estate tax benefits. Currently, if qualified property that was subject to the special use valuation is sold or otherwise converted to a nonqualified use within 15 years after the decedent's death, a ratable portion of the estate tax benefit is recaptured. Under this bill that time period would be reduced to a more reasonable 10 years.

Seventh, this bill provides that an agent of the qualified heir may meet the "active management" test where the qualified heir is a spouse, with respect to farm property, or in the case of other property, where the qualified heir is a surviving spouse of the decedent, a minor, a student or is disabled.

Again, Mr. President, this bill makes explicit the intentions implicit in the 1976 law. Clearly, Congress does not want to preclude favorable estate tax treatment to the surviving heir because that person is disabled or may be too young to participate in the operation of the business.

Eighth, this bill permits crop-share rentals as well as cash rentals to qualify for special use valuation. The 1976 law includes two methods for valuing qualified property. The first method, which is available only for farms, involves the use of a mathematical formula based on cash rentals. The second method involves the use of commonly accepted appraisal factors such as income capitalization. Because farms in Minnesota as in other States are frequently rented on a crop-share basis, my bill permits crop-share rentals to be used in place of or in addition to cash rentals in the valuation formula. This provision simply clarifies the 1976 special use valuation formula when no comparable cash rents are available.

Ninth, this bill permits the exchnge of like-kind qualified property without incurring a recapture of tax. In other words, if an heir inherited a farm or closely held business that had been valued under the special use valuation rules, and that heir desired to carry on the business, for example, near his current residence or near other family members in a different location, the heir may do so. Under current law, an heir cannot do this without triggering a recapture of Federal tax.

Tenth, this bill eliminates the requirement that the heir must make an election in order not to have a recapture of tax after an involuntary conversion. It is unfair to require an election when inadvertence in failing to elect could cause a severe hardship.

Eleventh, this bill provides that, upon recapture of the estate tax, the basis of the property would be increased to its fair market value on the date of the decedent's death.

Mr. President, the last provision of my bill does not deal with the special use valuation provision but is equally essential to facilitating the goal of keeping the farm in the family. This provision would set the interest rate on extended payments of estate taxes at the lesser of 6 percent or 75 percent of prime.

The interest rate on extended estate taxpayments was set at 9 percent in 1975 with adjustments to be made periodically by the Treasury Department to keep it approximately equal to 90 percent of the prime rate. Effective on February 1, 1976, the interest rate was adjusted downward from 9 percent to 7 percent and later to 6 percent. On February 1 of last year the interest rate increased from this 6 percent to 12 percent and will stay there for 2 years unless changed by this legislation.

Because of these high interest rates, the deferred payment provisions have proven inadequate to deal with liquidity problems experienced by estates in which a substantial portion of the assets consists of a farm or a closely held business, or other illiquid assets.

In many cases with farms as well as other businesses, the rate of return is so low that they are unable to make the extended payments with such a high interest rate. Too often that means selling the family farm we are trying to protect.

Mr. President, it is my sincere belief that the passage of these provisions would implement the intentions of Congress in passing the 1976 Tax Reform Act. I therefore urge my colleagues, both in the Finance Committee and the entire Senate, to consider this bill for timely passage.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 858

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE: AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Family Farm Protection Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 2. INCREASE IN UNIFIED CREDIT.

(a) CREDIT AGAINST ESTATE TAX.—

(1) IN GENERAL.—Subsection (a) of section 2010 (relating to unified credit against estate tax) is amended by striking out "$47,000" and inserting in lieu thereof "$192,800".

(2) CONFORMING AMENDMENTS.—

(A) Subsection (b) of section 2010 is repealed.

(B) Subsection (a) of section 6018 (relating to estate tax returns by executors) is amended—

(i) by striking out "$175,000" in paragraph (1) and inserting in lieu thereof "$600,000",

(ii) by striking out paragraph (3), and

(iii) by redesignating paragraph (4) as paragraph (3).

(b) CREDIT AGAINST GIFT TAX.—

(1) IN GENERAL.—Paragraph (1) of section 2505(a) (relating to unified credit against gift tax) is amended by striking out "$47,000" and inserting in lieu thereof "$192,800".

(2) CONFORMING AMENDMENT.—Subsection (b) of section 2505 is amended to read as follows:

"(b) PHASE-IN OF CREDIT.—

Subsection (a)(1) shall be applied by substituting for '$192,800' the following amount:

"In the case of gifts made in:	
1981	$47,000
1982	70,800
1983	96,300
1984	121,800.".

SEC. 3. SPECIAL USE VALUATION RULES.

(a) REPEAL OF $500,000 LIMITATION.—Subsection (a) of section 2032A (relating to value based on use under which property qualifies) is amended to read as follows:

"(a) VALUE BASED ON USE UNDER WHICH PROPERTY QUALIFIES.—If—

"(1) the decedent was (at the time of his death) a citizen or resident of the United States; and

"(2) the executor elects the application of this section and files the agreement referred to in subsection (d)(2).

then, for purposes of this chapter, the value of qualified real property shall be its value for the use under which it qualifies, under subsection (b), as qualified real property.".

(b) CLARIFICATION OF RENTAL TO FAMILY MEMBER.—Paragraph (1) of section 2032A (b) is amended by adding at the end thereof the following sentence:

"For purposes of this paragraph, real property shall not be treated as property not being used for a qualified use merely because the decedent leased such property to a member of the decedent's family for a fixed or variable rental."

(c) DEFINITION OF QUALIFIED REAL PROPERTY.—Subsection (b) of section 2032A (defining qualified real property) is amended by adding at the end thereof the following new paragraphs:

"(4) RETIRED AND DISABLED DECEDENTS.—

"(A) IN GENERAL.—If, on the date of death of the decedent, the decedent did not otherwise meet the requirements of paragraph (1)(C) with respect to any property, and the decedent—

"(i) was eligible to receive old-age benefits under title II of the Social Security Act, or

"(ii) was disabled for a continuous period ending on such date,

then paragraph (1)(C) shall be applied by substituting 'the date on which the decedent became eligible to receive old-age benefits under title II of the Social Security Act or became disabled' for 'the date of the decedent's death'.

"(B) DISABLED DEFINED.—For purposes of subparagraph (A), an individual shall be disabled if such individual has a mental or physical impairment which renders him unable to materially participate in the operation of the farm or other business.

"(5) SPECIAL RULE FOR SPOUSES WHO ARE QUALIFIED HEIRS.—In the case of any qualified real property which was acquired by a qualified heir who is the spouse of the decedent and which does not otherwise meet

the requirements of paragraph (1)(C) upon the death of such spouse, such real property shall be treated as meeting the requirements of paragraph (1)(C) if such spouse was engaged in the active management of the operation of the business at all times during—

"(A) the 10-year period ending on the date of death of the spouse, or

"(B) the period beginning on the date of death of the decedent and ending on the date of death of the spouse.

"(6) SPECIAL RULE FOR CERTAIN WOODLANDS.—In the case of real property used for a farming purpose described in subparagraph (C) of subsection (e)(5) which does not otherwise meet the requirements of paragraph (1)(C), such real property shall be treated as meeting the requirements of paragraph (1)(C) if, at all times during the 10-year period ending on the date of the decedent's death—

"(A) such real property was owned by the decedent or a member of the decedent's family and used for such farming purpose, and

"(B) the decedent or a number of the decedent's family was engaged in the active management of the operation of the business.".

(d) DISPOSITIONS AND FAILURES TO USE FOR QUALIFIED USE.—

(1) 10-YEAR HOLDING PERIOD.—

(A) IN GENERAL.—Subsection (c) of section 2032A (relating to tax treatment of dispositions and failures to use for qualified use) is amended—

(i) by striking out "15 years" in paragraph (1) and inserting in lieu thereof "10 years", and

(ii) by striking out paragraph (3) and redesignating paragraphs (4) through (7) as paragraphs (3) through (6).

(B) CONFORMING AMENDMENTS.—Paragraph (2) of section 2032A(h) (relating to treatment of replaced property) is amended—

(i) by striking out in subparagraph (A) all that follows "involuntarily converted," and inserting in lieu thereof the following: "except that with respect to such qualified replacement property the 10-year period under paragraph (1) of subsection (c) shall be extended by any period, beyond the 2-year period referred to in section 1033(a)(2)(B)(i), during which the qualified heir was allowed to replace the qualified real property,", and

(ii) by striking out "(7)" in subparagraph (C) and inserting in lieu thereof "(6)".

(2) CESSATION OF QUALIFIED USE.—

(A) IN GENERAL.—Paragraph (6) of section 2032A(c) (defining cessation of qualified use), as redesignated by paragraph (1), is amended to read as follows:

"(6) CESSATION OF QUALIFIED USE.—For purposes of paragraph (1)(B)—

"(A) IN GENERAL.—Real property shall cease to be used for the qualified use if—

"(i) such property ceases to be used for the qualified use set forth in subparagraph (A) or (B) of subsection (b)(2) under which the property qualified under subsection (b), or

"(ii) except as provided in subparagraph (B), during any period of 8 years ending after the date of the decedent's death and before the date of the death of the qualified heir, there had been periods aggregating 3 years or more during which—

"(I) in the case of periods during which the property was held by the decedent (other than periods during which the decedent was an individual described in subsection (b)(4)(A)(i) or (ii)), there was no material participation by the decedent or any member of the family in the operation of the farm or other business, and

"(II) in the case of periods during which the property was held by any qualified heir, there was no material participation by such qualified heir or any member of his family in the operation of the farm or other business.

"(B) 10-YEAR ACTIVE MANAGEMENT.—If an eligible qualified heir elects, at such time and in such manner as the Secretary may prescribe, to have the provisions of this subparagraph apply to any real property—

"(i) the provisions of clause (ii) of subsuparagraph (A) shall not apply to such property, and

"(ii) such property shall cease to be used for the qualified use if the fiduciary or the eligible qualified heir or any member of his family did not take part in the active management of the farm or other business at all times during the period beginning on the date of death of the decedent and ending on the earlier of—

"(I) the date of death of the qualified heir, or

"(II) the date which is 10 years from date of death of the decedent.

"(C) ELIGIBLE QUALIFIED HEIR.—For purposes of this paragraph, the term 'eligible qualified heir' means—

"(i) any qualified heir with respect to real property the qualified use for which is a farming purpose described in subparagraph (C) of subsection (e)(5), and

"(ii) in any other case, a qualified heir who, on the date of death of the decedent—

"(I) is the spouse of the decedent,

"(II) has not attained the age of 21,

"(III) is a student described in subparagraph (A) or (B) of section 151(e)(4), or

"(IV) was disabled (within the meaning of subsection (b)(4)(B)) for a continuous period ending on such date.".

(B) CONFORMING AMENDMENT.—Subsection (e) of section 2032A (relating to definitions and special rules) is amended by adding at the end thereof the following new paragraph:

"(12) ACTIVE MANAGEMENT.—The term 'active management' means the making of the management decisions of a business (other than the daily operating decisions).".

(e) METHOD OF VALUING FARMS.—

(1) NET SHARE RENTALS.—

(A) IN GENERAL.—Paragraph (7) of section 2032A(e) (relating to method of valuing farms) is amended by redesignating subparagraph (B) as subparagraph (C) and by inserting after subparagraph (A) the following new subparagraph:

"(B) VALUE BASED ON NET SHARE RENTAL IN CERTAIN CASES.—

"(i) IN GENERAL.—If there is no comparable land from which the average annual gross rental may be determined, subparagraph (A)(i) shall be applied by substituting 'average net share rental' for 'average gross cash rental'.

"(ii) NET SHARE RENTAL.—For purposes of this paragraph, the term 'net share rental' means the excess of—

"(I) the value of the produce received by the lessor of the land on which such produce is grown, over

"(II) the cash operating expenses of growing such produce which, under the lease, are paid by the lessor.

"(iii) DETERMINATION OF AVERAGE NET SHARE RENTAL.—For purposes of this subparagraph, the average net share rental shall be—

"(I) the average net share rental for reasonably comparable land published by the Department of Agriculture, an agency of the State in which the land is located, or a college or university of such State (within the meaning of section 511(a)(2)(B)), or

"(II) if the average described in subclause (I) is not available, the average net share rental determined on the basis of comparable land located in the locality of such farm.".

(B) CONFORMING AMENDMENTS.—

(i) Clause (i) of section 2032A(e)(7)(C) (as redesignated by subsection (a)) is amended by inserting ", or where it is established that the average net share rental is not capable of being determined under subparagraph (B)(iii)" after "determined".

(ii) Subparagraph (A) of section 2032A(e)(7) is amended by striking out "subparagraph (B)" and inserting in lieu thereof "subparagraph (C)".

(2) COMPARABLE SALES.—Subparagraph (D) of section 2032A(e)(8) (relating to method of valuing closely held business interests, etc.) is amended by striking out "Comparable" and inserting in lieu thereof "Reasonably comparable".

(f) EXCHANGE OF QUALIFIED REAL PROPERTY.—

(1) IN GENERAL.—Section 2032A (relating to valuation of certain farm, etc., real property) is amended by adding at the end thereof the following new subsection:

"(i) EXCHANGES OF QUALIFIED REAL PROPERTY.—

"(1) TREATMENT OF PROPERTY EXCHANGED.—

"(A) IN GENERAL.—If an interest in qualified real property is exchanged—

"(i) no tax shall be imposed by subsection (c) on such exchange if the interest in qualified real property is exchanged solely for an interest in qualified exchange property in a transaction which qualifies under section 1031(a), or

"(ii) if clause (i) does not apply, the amount of the tax imposed by subsection (c) on such exchange shall be the amount determined under subparagraph (B).

"(B) AMOUNT OF TAX WHERE PROPERTY RECEIVED IS NOT SOLELY AN INTEREST IN QUALIFIED EXCHANGE PROPERTY.—The amount determined under this subparagraph with respect to any exchange is the amount of tax which (but for this subsection) would have been imposed on such exchange reduced by an amount equal to that portion of such tax which is attributable to the amount of the interest in qualified exchange property received by the taxpayer.

"(2) TREATMENT OF QUALIFIED EXCHANGE PROPERTY.—For purposes of subsection (c)—

"(A) any interest in qualified exchange property shall be treated in the same manner as if it were a portion of the interest in qualified real property which was exchanged, and

"(B) any tax imposed by subsection (c) on the exchange shall be treated as a tax imposed on a partial disposition.

"(3) QUALIFIED EXCHANGE PROPERTY.—For purposes of this subsection, the term 'qualified exchange property' means real property which is to be used for the qualified use set forth in subparagraph (A) or (B) of subsection (b)(2) under which the real property exchanged therefor originally qualified under subsection (a).".

(2) CONFORMING AMENDMENTS.—

(A) Paragraph (1) of section 2032A(f) (relating to statute of limitations) is amended—

(i) by inserting "or exchange" after "conversion",

(ii) by inserting "or (i)" after "(h)", and

(iii) by inserting "or of the exchange of property" after "replace".

(B) Paragraph (2) of section 6324B(c) (relating to special liens) is amended by inserting "and qualified exchange property (within the meaning of section 2032A(i)(3))" before the period at the end thereof.

(g) ELECTION REQUIREMENT OF SPECIAL RULES FOR INVOLUNTARY CONVERSIONS REPEALED.—Section 2032A(h) (relating to special rules for involuntary conversions of qualified real property) is amended—

(1) by striking out "and the qualified heir makes an election under this subsection" in paragraph (1)(A); and

(2) by striking out paragraph (5).

(h) BASIS UPON RECAPTURE.—Paragraph (3) of section 1014(a) (relating to basis of property acquired from a decedent) is amended

by inserting "(increased by the value of any interest in such property (determined for purposes of this chapter without regard to this section) with respect to which an additional estate tax is imposed under section 2032A(C)(1))" after "section".

SEC. 4. INTEREST RATE ON EXTENDED PAYMENTS OF ESTATE TAXES.

Section 6601 (relating to interest on underpayment, nonpayment, or extension of time for payment of tax) is amended by—

(a) redesignating subsection (k) (relating to no interest on certain adjustments) as subsection (l), and

(b) adding immediately after subsection (j) a new subsection (k) to read as follows:

"(k) INTEREST RATE ON PORTION OF ESTATE TAX EXTENDED UNDER SECTION 6165.—

"(1) IN GENERAL.—If the time for payment of an amount of tax imposed by chapter 11 is extended as provided in section 6166, interest on the portion of such amount which does not qualify for the 4-percent rate under subsection (j), shall (in lieu of the annual rate provided by subsection (a)) be paid at a rate determined under paragraph (2). For purposes of this subsection, the amount of any deficiency which is prorated to installments payable under section 6166 shall be treated as an amount of tax payable in installments under such section.

"(2) INTEREST RATE.—The rate of interest under this subsection shall be the lesser of—

"(A) 6 percent, or

"(B) a rate determined in the same manner as under section 6621 except that subsection (c) thereof shall be applied by substituting '75 percent' for '90 percent'.

The rate determined under subparagraph (B) shall not be less than 4 percent.

"(3) TREATMENT OF PAYMENTS.—In any case where this subsection and subsection (j) apply with respect to the amount of tax imposed by chapter 11 which is extended as provided in section 6166, any payment of a portion of such amount shall be allocated to the 4-percent portion in accordance with paragraph (3) of subsection (j) and any remaining amount shall be treated, for purposes of computing interest for periods after such payment, as reducing the amount to which this subsection applies.", and

(c) striking out "For purposes of this subsection," in paragraph (2) of subsection (j) and inserting in lieu thereof "For purposes of this subsection and subsection (k),".

SEC. 5. EFFECTIVE DATES.—The amendments made by this Act shall apply to the estates of decedents dying after December 31, 1981, except that the amendment made by section 3(b) shall apply to the estates of decedents dying after December 31, 1976.

By Mr. THURMOND (for himself, Mr. DOMENICI, Mr. ABDNOR, Mr. BAUCUS, Mr. HEFLIN, Mr. NUNN, Mr. LAXALT, Mr. HATFIELD, Mr. LUGAR, Mr. HELMS, Mr. GRASSLEY, Mr. SYMMS, Mr. HUDDLESTON, Mr. BENTSEN, Mrs. KASSEBAUM, Mr. TSONGAS, Mr. CRANSTON, Mr. MOYNIHAN, Mr. SARBANES, Mr. SASSER, Mr. SPECTER, Mr. HATCH, Mr. KENNEDY, Mr. CHAFEE, Mr. HAYAKAWA, Mr. HOLLINGS, Mr. PROXMIRE, Mr. DECONCINI, Mr. DENTON, Mr. RIEGLE, Mrs. HAWKINS, Mr. DOLE, Mr. WALLOP, Mr. ANDREWS, Mr. GARN, Mr. DURENBERGER, Mr. METZENBAUM, and Mr. LEAHY):

S.J. Res. 60. Joint resolution to authorize and request the President to designate the week of May 3 through May 9, 1981, as "National Physical Fitness and Sports for All Week"; to the Committee on the Judiciary.

NATIONAL PHYSICAL FITNESS AND SPORTS FOR ALL WEEK

Mr. THURMOND. Mr. President, I am introducing today a joint resolution to authorize and request the President to designate the week of May 3 through 9, 1981, as "National Physical Fitness and Sports for All Week."

I am pleased to have Senators ABDNOR, BAUCUS, HEFLIN, DOMENICI, NUNN, LAXALT, HELMS, GRASSLEY, SYMMS, HUDDLESTON, BENTSEN, KASSEBAUM, CRANSTON, HATFIELD, LUGAR, MOYNIHAN, SARBANES, SASSER, SPECTER, HATCH, TSONGAS, KENNEDY, CHAFEE, HAYAKAWA, HOLLINGS, PROXMIRE, DECONCINI, DENTON, RIEGLE, HAWKINS, DOLE, WALLOP, ANDREWS, GARN, DURENBERGER, METZENBAUM, and LEAHY join with me as cosponsors of this resolution.

Mr. President, we have come a long way from the time when physical exercise was viewed mainly as an entertainment or a diversion, and when boys and young men were the main participants in sports. Today we recognize that physical activity is an important part of daily life for people of both sexes and all ages.

One of every two adults in the United States engages regularly in exercise and sport. A third of us swim, a fourth ride bicycles, and a fifth play one of the racquet sports. Running has more than 20 million adherents. It is interesting to note that the number of physically active men and women has doubled in 10 years, and continues to grow rapidly.

Typically, interest in physical activity begins at an early age, and presently, nearly 30 million boys and girls take part in age-group team sports and other organized out-of-school activities. More than 6 million teenagers and over 600,000 college students compete in athletic programs.

Our physical fitness and sports programs are one of the primary means by which we strengthen and refresh ourselves. It is essential that we publicize such programs and make them increasingly available so that all of our citizens will be able to experience the benefits they offer. Accordingly, I am sponsoring this resolution, which requests President Reagan to declare May 3 through 9 as "National Physical Fitness and Sports for All Week."

Mr. President, I ask unanimous consent that a copy of the resolution be printed in the RECORD at the conclusion of my remarks.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 60

Whereas one of every two adults in our country is a regular participant in exercise and sports;

Whereas the number of physically active men and women has doubled in ten years and continues to grow rapidly;

Whereas today we recognize that physical activity is an important part of daily life for people of both sexes and of all ages;

Whereas physical activity is vital to good health and is a rich source of pleasure and personal satisfaction;

Whereas physical fitness and sports programs are one of the primary means by which we strengthen our bodies and refresh our spirits;

Whereas it is essential that we make fitness and sports programs increasingly available so that all of our citizens will be able to experience the joys and benefits they offer: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of May 3 through 9, 1981, as "National Physical Fitness and Sports for All Week," and to call upon Federal, State, and local government agencies, and the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

Mr. HAYAKAWA. Mr. President, "the Good Life"—a phrase that means different things to different people. As we approach National Physical Fitness and Sports for All Week, let us remember the common denominator for the good life: The physical well-being to pursue your goals. Exercise is the key to attaining and maintaining the physical fitness necessary for that well-being.

I am pleased to join Senator THURMOND as a cosponsor of Senate Joint Resolution 60, which proclaims May 3 through 9, 1981 as national fitness week. National Physical Fitness and Sports for All Week is a good title because it describes the theme of America's fitness revival: Fitness for all. There is a fitness activity for everyone, one that is fun, available, and inexpensive. According to the YMCA, for every weight lifter you will find 5 aerobic dancers, 7 yoga devotees, and 10 child swimmers.

Americans are jumping, running, and bicycling for fitness. An exciting feature of our fitness revival is the variety of activities available. I believe that everyone can find an activity that is fun and useful for them. For me, it is tap dancing. This form of exercise is enjoyable for me, and has many of the same benefits of jogging: Strengthen the heart and tones the leg muscles. Tap dancing also involves another of my hobbies, listening to music, which adds to my enjoyment. You do not have to be Fred Astaire to get started. Most public recreation departments offer tap classes at reasonable fees for beginners. Get yourself a good pair of shoes and before you know it, you will be tapping away to "Tea for Two."

Try new things. Remember those three words, and your fitness activities will be interesting and diverse. For instance, I became a scuba diver after I came to the Senate. Though I am very busy with my Senate responsibilities, I managed to squeeze in enough practice and lessons to become certified in my newest sport, and have recently taken a few dives off the California coast. Try new things. Executives are climbing stairs, mothers are loosening up with trimnastics, and senior citizens are cycling. America is starting off the day with Richard Simmons, whose fitness demonstrations are broadcast nationally from his California studio. His is a

sample of the many television shows that bring exercise right into your living room. Try new things.

The private sector is joining the fitness revival by funding publications, workshops, and employee fitness programs. Last September, for example, a new national school fitness program was unveiled, free of charge to the public. The program is the result of coordination by the President's Council on Physical Fitness and Sports, and funding from the Blue Cross/Blue Shield Association and Walt Disney Educational Media Co. of Burbank, Calif. The package consists of three 12-minute films and a teacher's guide. Teachers' workshops are planned in each of the States where the materials are offered. This is only one sample of the coordination between the President's Council and the private sector. With a budget of $800,000 in fiscal year 1981, the President's Council generated private industry support for fitness totaling $40 million.

Our Nation can only be as healthy and strong as its people. I ask that the following excerpts of an article by Casey Conrad, Director of the President's Council on Physical Fitness and Sports, be inserted in the RECORD. Mr. Conrad is from Sacramento, Calif., and joined the President's Council in 1970, after 24 years with the State Department of Education in California. He describes public and corporate fitness initiatives as he asks, "Do We Have the Determination To Promote Physical Fitness for All?"

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DO WE HAVE THE DESIRE AND DETERMINATION TO PROMOTE PHYSICAL FITNESS FOR ALL?

(By C. Carson Conrad)

MANY FACILITIES ARE UNDERUTILIZED

We are also advised that our facilities and other resources for sport are the best and most extensive in the world, but we learn that many of these resources are under utilized or are not being used for the purposes for which they were intended.

We have learned that recreation departments represent our greatest untapped resource for providing physical fitness in the communities of this nation. By increasing the opportunities for instruction and competition, they could substantially widen the national participation base.

John Davis, Executive Director of the National Recreation and Park Association, told us, "All our systems are go for fitness." He suggested we immediately form a coalition to implement physical fitness and sports for all through our nation's recreation departments.

Dr. Janet R. MacLean, Director of Indiana University's Center on Aging and the Aged, helped us clearly understand the importance of physical fitness for the elderly, when she told us of the payoff of one oldster's regimen. "The woman said, 'Now I can get off the john by myself.'" Dr. MacLean reported.

This reminded me that a number of years ago, I observed an exercise program for the elderly in one of the churches in Zurich, Switzerland. On the wall was a sign which read, "Everyone should exercise: the elderly must exercise." Surely none of us now fail to recognize the essential nature of exercise for older Americans.

The biggest obstacle to overcome is getting people to understand that something that is so available, so inexpensive and so simple as exercise can be so rewarding and valuable.

EMPLOYEE PROGRAMS HAVE GREAT POTENTIAL

A relatively new factor in the fitness/sports equation is the employee physical program. More than 450 large companies and corporations now provide some type of leadership, facilities and programming for their employees. The overwhelming majority of these programs have been developed during the past decade. As they continue to multiply and expand, their potential for increasing fitness/sports participation opportunities for adults is obvious.

There recently have been several developments that indicated we are on the verge of realizing even a greater involvement in sport. One of these is the decision by the Congress and by the United States Olympic Committee (USOC) to strengthen the national sports governing bodies. As these bodies become better organized, more liberally funded and more representative in their makeup, they will be able to promote participation and development on a much wider scale.

"SPORTS FOR ALL" HELPS OLYMPIC EFFORT

The USOC team is the apex of the pyramid of our amateur sports world. The height of that apex depends upon how broad the base upon which it is built. Mass "Sports for All" will result in better performance and better world-class athletes. Schools, colleges, clubs, industry, recreation, voluntary agencies such as Ys, national sports governing bodies and multi-sport groups are important as a part of that broad-based pyramid and we sometimes tend to underestimate the contributions that any of the aforementioned make to our Olympic effort.

For a number of years, the USOC has recognized the prowess of graduates of California high schools in our Olympic effort. California has produced more than 25 per cent of U.S. Olympic team members since 1912. This performance must be partially credited to the fact that until several years ago, every pupil in grades 1 through 12 in that state had daily physical education. Physical education is properly concerned with dynamic health and participation throughout life in fitness and sports activities; but its impact on competitive athletics is inescapable and its influence on sports invaluable. It is essential that daily physical education be required at all levels in order to have the most direct and positive means of improving both physical fitness and "Sports for All" in this country.

We have heard here that we possess the know how, the facilities and the other resources to greatly improve our sports and physical fitness programs and practices. The only serious question remaining is: do we have the desire and the determination?

This conference was designed to help us give an affirmative answer. I am convinced by what I have seen and heard here, "Yes" is the only kind of answer we can give. I hope you agree. After all, it is your response that will determine whether this conference is recorded as simply another meeting or as a watershed in the sports and physical movement.

Mr. MOYNIHAN. Mr. President, today I rise with 34 of my colleagues to support the designation of the week of May 3 through 9, 1981, as "National Physical Fitness and Sports for All Week."

The importance of athletic participation cannot be overstated. Indeed, it was President John F. Kennedy who voiced the thoughts of many Americans when, in 1961, he observed that:

The vigor of our country is no stronger than the vitality and will of all our countrymen. The level of physical, mental, moral and spiritual fitness of every American citizen must be our constant concern.

Today these thoughts are particularly relevant. As our lives become ever more complex and hurried, physical activity becomes all the more vital to our health and spiritual well-being. It is essential that we make fitness and sports programs increasingly available in order that all the citizens of this good Nation will be able to experience the exhilaration of an active life.

Last year I introduced a resolution which designated a week in June as "National Athletic Boosters Week." This resolution rallied overwhelming support and recognized thousands of local volunteer athletic booster clubs which have tirelessly sought to insure the survival of sound athletic programs in our schools. In the same vein, today we ask for recognition of millions of Americans who participate in a myriad of athletic pursuits. We ought to commend not only their energy, but their understanding of good health as well. Would that we could insure longer, healthier and, indeed, happier lives for all the citizens of this country.

I hope the Senate will act promptly and enthusiastically in passing this resolution.

ADDITIONAL COSPONSORS

S. 47

A the request of Mr. SCHMITT, the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 47, a bill to amend the Immigration and Nationality Act to establish a temporary worker's visa program between the United States and Mexico.

S. 270

At the request of Mr. SCHMITT, the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 270, a bill to amend the Communications Act of 1934 in order to encourage and develop marketplace competition in the provision of certain radio services and to provide certain deregulation of such radio services, and for other purposes.

S. 598

At the request of Mr. JEPSEN, the Senator from Arizona (Mr. GOLDWATER), and the Senator from North Carolina (Mr. HELMS) were added as cosponsors of S. 598, a bill to amend the Internal Revenue Code of 1954 to exempt from taxation the earned income of certain individuals working outside the United States.

S. 622

At the request of Mr. INOUYE, the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Vermont (Mr. STAFFORD), and the Senator from Ohio (Mr. GLENN) were added as cosponsors of S. 622, a bill to control the export of hazardous wastes.

S. 643

At the request of Mr. JEPSEN, the Senator from New York (Mr. D'AMATO), the

Senator from New Jersey (Mr. WILLIAMS), the Senator from South Dakota (Mr. ABDNOR), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of S. 643, a bill to amend the Internal Revenue Code of 1954 to provide explicitly for the exclusion of social security benefits from taxable income.

S. 718

At the request of Mr. PROXMIRE, the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 718, a bill to amend title IV of the Social Security Act to provide that States must require recipients of aid to families with dependent children to participate in community work programs if they are able to do so.

S. 719

At the request of Mr. PRYOR, the Senator from Alabama (Mr. HEFLIN), the Senator from New York (Mr. MOYNIHAN), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Arkansas (Mr. BUMPERS) were added as cosponsors of S. 719, a bill to amend section 3109 of title 5, United States Code, to clarify the authority for appointment and compensation of experts and consultants, to provide statutory guidelines concerning the award of contracts for the procurement of consulting services, management and professional services, and for other purposes.

S. 752

At the request of Mr. BAUCUS, the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of S. 752, a bill to amend the Internal Revenue Code of 1954 to provide for the awarding of reasonable court costs and certain fees to prevailing parties in civil tax actions, and for other purposes.

SENATE JOINT RESOLUTION 3

At the request of Mr. PRYOR, the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of Senate Joint Resolution 3, a joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States.

SENATE RESOLUTION 44

At the request of Mr. MOYNIHAN, the Senator from Maine (Mr. COHEN) was added as a cosponsor of Senate Resolution 44, a resolution relating to the convening of an international conference to amend certain international agreements concerning the privileges and immunities of diplomatic and consular agents.

SENATE RESOLUTION 97

At the request of Mr. PROXMIRE, the Senator from Indiana (Mr. QUAYLE) was added as a cosponsor of Senate Resolution 97, a resolution establishing a maximum number of full-time Senate employees and prohibiting the construction of additional office buildings for the Senate.

SENATE RESOLUTION 105—RESOLUTION RELATING TO THE CONSIDERATION OF S. 694

Mr. TOWER, from the Committee on Armed Services, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 105

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 694, a bill to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and for research, development, test, and evaluation, and to increase the authorized personnel strength for military and civilian personnel of the Department of Defense, and for other purposes.

Such a waiver is necessary because section 402(a) of the Congressional Budget Act of 1974 provides that it shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority for a fiscal year, unless that bill or resolution is reported in the House or the Senate, as the case may be, on or before May 15 preceding the beginning of such fiscal year.

For the foregoing reasons, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to S. 694, as reported by the Committee on Armed Services.

AMENDMENTS SUBMITTED FOR PRINTING

AUTHORIZATION OF APPROPRIATIONS FOR DEPARTMENT OF STATE

AMENDMENT NO. 28

(Ordered to be printed and be referred to the Committee on Foreign Relations.)

Mr. MOYNIHAN submitted an amendment intended to be proposed by him to the bill (S. 784) to authorize appropriations for fiscal years 1982 and 1983 for the Department of State.

Mr. MOYNIHAN. Mr. President, today I introduce a measure that conforms well to one of the distinctive themes of the still young Reagan administration, the dangers posed by international terrorism. Among the groups that spread this scourge in international life, none is more deadly than the Palestine Liberation Organization and yet, despite the deadliness of its program, none is accorded greater respect. The PLO has been able to secure for itself rights and privileges usually accorded only to states.

This problem appears to be well understood in the new administration. Its spokesmen seem determined to combat the growing international disregard of the true nature of the PLO and to reverse the organization's success in gaining legitimacy for its repugnant purposes. In an interview with ABC News, Mr. Richard Allen, the President's Assistant for National Security Affairs, recently spoke the truth that American administrations have too long wished to sidestep. That the PLO is to be understood as a terrorist apparat if it is to be understood at all.

In this light it is unfortunate that the administration's State Department authorization request for fiscal 1982 and 1983 should lack the very provisions that were attached by the Congress 2 years ago in an effort to prevent even indirect American subsidy of the Palestine Liberation Organization. Two years ago, Mr. President, I introduced into this body—as did then Congressman Wolff in the other body—an amendment to the last State Department authorization bill. We proposed, and both Houses of Congress agreed without objection, that the United States should withdraw any contribution to the United Nations to support two units within the U.N. that serve as front organizations for the PLO. These are the Committee for the Exercise of the Inalienable Rights of the Palestinian People, and the Special Unit on Palestinian Rights. The former organization, it will be recalled, was created by the General Assembly on November 10, 1975, the day that it also declared Zionism to be a form of racism. Since that time, this body, like its sister unit, has been run as an arm of the PLO.

Because this seemed intolerable to the entire Congress 2 years ago, we adopted the restrictions of the Moynihan-Wolff amendment, that the U.S. contribution to the United Nations be reduced by an amount equal to 25 percent of the budget of the two PLO bodies. As a result the U.S. contribution to the United Nations was reduced in this past year by $190,775. In the present year, the U.S. payment will be cut by $228,550.

The amendment I introduce today would continue this pattern of reductions, and I hope that the Senate Foreign Relations Committee will wish to adopt it once more. If it is attached to S. 784, the State Department authorization bill, this amendment would have an impact much like that of the one described above. The budgetary effect of this cut would, as before, be modest, but its importance lies in expressing the view of the Congress that the United States cannot abide the role that the PLO has acquired at the United Nations. It is beyond our power at this time to undo this role, but we hardly need subsidize what we find utterly repugnant.

Accordingly we take the extraordinary step of withholding a small portion of the assessed contribution of the United States. The United Nations will find it hard to operate if members freely withhold funds to express disapproval of particular budget items. But we do not take this step lightly. We take it to express our very deep alarm that the PLO, whose purposes run counter to those of internation society, has been admitted as a member in good standing within that society. We are alarmed that the United Nations has conferred legitimacy on an organization dedicated to the destruction of one of the U.N.'s members.

Mr. President, I first introduced this measure 2 years ago. Last November I introduced a measure making comparable cuts in U.S. contributions to UNESCO programs that are operated in conjunction with the PLO. Its purpose was similar to the amendment I propose today. It may in time prove desirable to tie together these amendments in legislation that imposes comprehensive restrictions on U.S. payments to international organizations. Yet as we study this possibility, we should make as clear as we can—by attaching this amendment to S. 784—that the United States can have no part

in support of whatever sort for the Palestine Liberation Organization.

In the other body, Congressman CHARLES SCHUMER will introduce a similar amendment.

BUDGET RECONCILIATION RESOLUTION

AMENDMENT NO. 29

(Ordered to be printed and to lie on the table.)

Mr. BUMPERS (for himself, Mr. RANDOLPH, Mr. BAUCUS, Mr. BENTSEN, Mr. GLENN, Mr. LEVIN, Mr. MATSUNAGA, Mr. HART, Mr. CANNON, Mr. METZENBAUM, and Mr. JACKSON) submitted an amendment intended to be proposed by them to the concurrent resolution (S. Con. Res. 9) revising the congressional budget for the U.S. Government for the fiscal years 1981, 1982, and 1983.

AMENDMENT NO. 30

(Ordered to be printed and to lie on the table.)

Mr. D'AMATO submitted an amendment intended to be proposed by him to the concurrent resolution Senate Concurrent Resolution 9, supra.

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, the Senate Committee on Small Business will hold a full committee hearing on May 5, 1981, on the Small Business Administration's size standards proposals, at 9:30 a.m., in room 4232 of the Dirksen Senate Office Building. Senator HATCH will chair the hearing. For further information, contact Kimberly Elliott at 224–5175.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Committee on Energy and Natural Resources on the following nominations: Mr. R. Tenney Johnson, of Maryland, to be General Counsel for the Department of Energy; Mr. William H. Coldiron, of Montana, to be Solicitor for the Department of the Interior; Mr. Garrey Edward Carruthers, of New Mexico, to be Assistant Secretary for Land and Water Resources, Department of the Interior; and Mr. G. Ray Arnett, of California, to be Assistant Secretary for Fish and Wildlife and Parks, Department of the Interior.

The hearing is scheduled for Wednesday, April 8, 1981, beginning at 2 p.m. in room 3110 of the Dirksen Senate Office Building.

For further information regarding the hearing, you may wish to contact Mr. David Doane at 224–7144 for the Department of Energy nomination and Mr. Tony Bevinetto at 224–5161 for the Department of the Interior nominations.

ADDITIONAL STATEMENTS

A TIME NOT ONLY FOR ANGER, BUT FOR REASSURANCE

● Mr. DOLE. Mr. President, my immediate reaction to the events of Monday, upon hearing that our President had been shot and three others wounded by a would-be assassin's gunfire, was a combination of disbelief and a bit of anger. I would guess that millions the world over felt similar emotions. We have all viewed the attempt on the President's life as the occasion for horror at violence, terrorism, and the increasing frequency of crime in our society.

However, it is more. It is also a reaffirmation that we are all finally human beings, even Presidents and high administration officials.

One man tried to murder another. But that terrible act was only the opening for an unnumbered array of other men and women to act with nobility, courage, and compassion. G. K. Chesterton, the English writer of the first half of this century, defined courage as "grace under pressure." Mr. Reagan has illuminated the meaning of that definition for all of us during the past several days. Not some mythical figure, but this man, our President, has shown us how to meet pain, fear, and the unknown. In so doing, he has reassured all of us about ourselves.

Mrs. Reagan, knowing fear for her husband's life and safety, made us a little better for her quiet strength and dignity in the face of the unexpected. Secret service men like Mr. McCarthy and policemen like Mr. Delahanty give us a practical lesson that heroism is not dead. It is as close as a neighbor's need.

And Jim Brady, the President's Press Secretary, continues to display a tenacity and toughness which we can all strive to emulate.

Still others, doctors, nurses, technicians, doing what they do every day, remind us that these dedicated individuals do their work without regard to whether it is cobbler or king. They give us the better side of what it is to be human.

Mr. President, I do not suggest that we ignore the violent nature of this act. The individual responsible must be punished. But, he will join the likes of John Wilkes Booth and Lee Harvey Oswald in the perverted pantheon of assassins and would-be assassins.

We should all take some time out to remember that even a tragedy like this can reassure us. It is important to note that for every assassin who makes us feel ashamed to be human, there are millions who share our humanity and who make us proud to share theirs.

At this point, I wish to echo some of the President's own words which he spoke in his inaugural address on January 20. The President said:

> We have every right to dream heroic dreams. Those who say we're in a time when there are no heroes, they just don't know where to look.

We do have heroes. They are around us every day and as the events of the past 48 hours have shown, we do not as Mr. Reagan stated have far to look.●

MULTIPLE USE OF OUR NATIONAL FORESTS

● Mr. SYMMS. Mr. President, I bring to the attention of my colleagues the comments of Ralph Kizer, Forest Supervisor of the Idaho Panhandle National Forests. In his article, Mr. Kizer presents alternative plans for harvesting timber in the national forests of Idaho while maintaining the elk population that inhabits the region. Mr. Kizer offers solutions for the specific problem of this forest, and in so doing, demonstrates a duty by which more employees and agencies of the Federal Government should be bound. This duty I mention is an obligation to consider all pertinent interests when making policy decisions that affect the common good. As supervisor of the national forest, Mr. Kizer proposes multiple-use land management policies that strike a balance between the need to preserve our natural resources and the need to strengthen our economy.

Mr. President, I ask that the comments of Ralph Kizer, Forest Supervisor under the U.S. Department of Agriculture, dated February 27, 1981, be entered into the record.

The article follows:

COMMENTS ON IDAHO FISH AND GAME

(By Forest Supervisor Ralph Kizer)

The Idaho Panhandle National Forests timber management program has been based for decades on the premise that about 1.8 million acres out of a total of 2.5 million acres are suitable and available for timber management purposes. (There are 1.8 million acres of commercial forest land—land capable of providing a crop of commercially valuable timber). I do not foresee that large areas (thousands of acres) of commercially important timber will be set aside or foregone for the exclusive management for wildlife—primarily elk. Nor do I see large areas being set aside for the *exclusive* management of any single resource, including timber.

There are, of course, several millions of acres in Idaho which are already set aside in Wilderness. Thousands more acres are being proposed by the Forest Service for inclusion in the National Wilderness Preservation System. While most of the area in Wilderness does not contain good timber growing potential much of it does. Of the total area set aside or proposed for Wilderness, a substantial portion is very important for wildlife. In addition, there are designated Scenic Areas and other special interest areas where road development is essentially precluded and the commercial timber resource is excluded from management. Again, I don't foresee that further additional large areas of commercial forest land will be removed from the timber base exclusively for wildlife management (elk).

The local office of the Idaho Fish and Game Department has hand-picked some large areas which have not, through any of the above means, been set aside for uses other than timber. The local Department people are telling the Forest Service that the long established Wilderness areas, plus the recent conversions of Primitive Areas to Wilderness, plus the Roadless Area Review and Evaluation (RARE II) recommendations, all added up, are really not enough.

We can manage forested areas for both timber and elk (and for other resource values). The Forest Service wants to work with the Fish and Game Department and other interests cooperatively to achieve the best possible balance of resource uses. I want Forest Service and Fish and Game biologists and managers to work together and to agree on objectives so we can then manage toward those objectives. If we can agree on the numbers of animals desirable over a broad area, we can then cooperatively manage lands and animals to achieve such an objective.

Elk habitat requirements are being considered. I believe the challenge is to produce both timber and elks. On all of our timber sales we prepare an Environmental Analysis report that considers all resources. In the Nelson Peak area, northeast of Avery, for example, we have been working on an Environmental Analysis report for a possible timber sale that would be sold in 1983. Fish and Game Department personnel have been invited to participate and have participated in this process. We understand their position is to harvest no timber in this area, of about 12,000 acres, that would require any new road construction. We have used helicopters to harvest some timber, but helicopter logging is limited to less than 1 mile from a landing or road.

I have not approved the Environmental Analysis report or made my final choice of alternatives for this area. However, at this time, I am strongly considering an alternative that would require 14.5 miles of new road, to harvest about 6 to 7 million board feet, and at the same time maintain 75% of elk habitat. All of the new roads would be closed after completion of the timber sale for at least 5 years. Another alternative would provide 12 million board feet, but require 21 miles of logging roads. A no action alternative for this area would maintain elk habitat at 85 to 90 percent of potential, but produce no timber harvest. Each million board feet we harvest provides about 10 person years of local employment for logging and primary processing, and would build about 100 homes for Americans. I believe our primary mission is for our silviculturists and wildlife biologists to work out a solution so that we can produce both timber and elk in areas like Nelson Peak.

Our annual timber sale volume has been reduced from 317 million board feet in 1980 to 275 million in 1981. One reason for this reduction, which may be temporary, was to provide more consideration for elk and other resource needs.

The Forest Service is interested in doing the best job we possibly can to serve all interests.

THE ADMINISTRATION'S SOCIAL POLICY DECISIONS

○ Mr. MOYNIHAN. Mr. President, if the administration spokesmen are accurately reflecting the administration's social policy decisions, we are being presented with an extraordinary change in the purposes of public assistance.

I refer to the March 19 statement of Mr. Edwin L. Dale, Jr., spokesman for the Office of Management and Budget, as quoted in the New York Times of March 20, 1981, that—

> The policy decision is that welfare is a safety net and not an income-supplement program.

Mr. Dale was commenting on a new report by the Center for the Study of Welfare Policy of the University of Chicago, entitled "The Poor: Profiles of Families in Poverty," which analyzes the impact on low-income families of certain of the administration's proposed budget reductions and program changes. The study examined the aggregate impact of changes in six Federal programs—aid to families with dependent children, medicaid, food stamps, low-income energy assistance, public housing, and comprehensive employment and training—on families in 10 States. Several of its findings merit attention, among them the conclusion that the administration's proposals would narrow—and in some cases eliminate—the income gap between welfare recipients who work and those who do not work, thereby reducing—and in some cases perhaps eliminating—the incentive to work.

The policy question is whether a welfare recipient who works should be better off than one who does not. If there is no economic gain from working, there is no economic reason, although there may be other reasons, to do so.

For 14 years, the program we know as aid to families with dependent children has embodied the principle that welfare recipients who are able to work should have an incentive to work. The Social Security Amendments of 1967 established what is known as the $30 and a third earned income disregard. This means that a welfare recipient who works can "keep" the first $30 of each month's earnings, plus one-third of all additional earnings, plus whatever is required to pay for work-related expenses and children's day care. The welfare check is reduced by the amount of earnings in excess of those disregarded under this formula.

In New York State, for example, an AFDC family of four, mother and three children, with no outside earnings receives $373 a month in cash assistance plus $150 in food stamps. Should the family head take a part-time job paying $396 a month—and assuming monthly work expenses, including day care, of $200 a month—the family's net cash income would be $667, plus $40 in food stamps. Thus the family as a whole would be $191 better off each month as a consequence of the mother's employment than it would be if she stayed at home.

The result is that a significant number of welfare recipients do work. In 1977, some 21.8 percent of all AFDC families in the Nation had income other than their welfare benefit. That represents a population of 763,000 families, 65,000 of them in New York, who are both economically better off as a consequence of working and in which the children are growing up with the awareness that one who works is better off than one who does not.

The administration proposes changes that would all but eliminate this incentive. In the 10 States sampled by the University of Chicago, the average difference in monthly incomes between welfare recipients who work and those who do not is $126. Under the administration's proposals, this would shrink to $29. In New York, the average monthly income of AFDC recipients who work would fall from $704 to $533, just $15 more than the average income of nonworking families. In Louisiana, the difference would vanish entirely. In California the difference would shrink from $188 to $15.

This is ironic, to say the least, for this is an administration that in other pronouncements appears committed to the proposition that welfare recipients must work. Indeed, another of the reforms that has been proposed would reinstitute the practice—which has been on the Federal statute books since 1964 but has been "suspended" since 1968—of requiring welfare recipients, except those with very young children, to engage in community service in return for their monthly check.

All this bespeaks a politically fashionable but fundamentally inaccurate view of public assistance. The program we know as aid to families with dependent children is first and foremost a program to aid dependent children. Of the 10.3 million individuals receiving AFDC benefits in 1979, only 3.1 million were adults; 7.2 million were children, 4.2 million of them under the age of 10.

The typical AFDC recipient is a child living in a fatherless home. Fatherless for any of a number of reasons: Death, desertion, divorce, illegitimacy. But a child, nevertheless.

The number of such children is growing. According to data that I published in the spring issue of the Journal of the Institute for Socioeconomic Studies, approximately one-third of the children being born this year will live in a female-headed household that receives AFDC benefits at some time before their 18th birthday. One child in three. That makes AFDC second only to public education as the Government program with the widest impact on American children.

Recent history is not encouraging. Only 7 percent of the children born in 1940 could expect to spend a portion of their minority in a female-headed family receiving AFDC benefits. Seventeen percent of those born in 1950; 22 percent of those born in 1960.

These are dependent children. And AFDC exists in order to keep roofs over their heads, food in their mouths, and clothes on their backs. It embodies the response of society to the elemental needs of dependent youngsters.

It is not a lavish program. In New York State, for example, the average monthly cash benefit today for a family of four is $373. Other than a slight increase in the "shelter allowance," this is the same benefit as was provided in 1974. That means its purchasing power has been eroded 64 percent by inflation in the 7 years since it was established at its present level.

But for all its inadequacies, it is first and foremost a program for children. And chances in it should be evaluated in terms of their impact on dependent children. That is why one grows weary of debates about "welfare policy" that are couched in terms of the behavior of adults. It is not a program for adults. That some adults are also supported by it—96 percent of them husbandless women with children—is a consequence of the fact that most dependent children live with one parent.

Of course, some of those adults can work. This is amply demonstrated by the fact that more than one in five of them do work. That we would like all who can work to work is attested to by the existence, since 1967, of the work incentive program, which requires adult recipients to register for work and, when jobs are available, to take them. Taking away the economic incentive to work will not reduce dependency. To the contrary. Does

it not risk consigning AFDC recipients to permanent dependency? Does it not reverse two decades of progress in American social policy? It should be resisted. I, for one, will resist it.●

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 360(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that eight such notifications have been received: One on March 23; six on March 24; and one on March 25.

Interested Senators may inquire as to the details of these preliminary notifications at the office of the Committee on Foreign Relations, room 4229, Dirksen Building.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 23, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Southwestern Pacific country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., March 24, 1981.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Northeast Asian country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERNEST GRAVES,
Director.

DEFENSE SECURITY ASSISTANCE AGENCY,

Director.●

ALASKA'S DOUBLE LOSS

● Mr. MURKOWSKI. Mr. President, I recently learned that Lt. Gen. Winfield Scott and Maj. Gen. Theodore Jenes, the ranking Air Force and Army commanders in Alaska, are leaving their current posts for new assignments outside Alaska. Lieutenant General Scott, the commander of all Air Force units in Alaska and the ranking U.S. military officer in the State, will now be serving in Seoul, Korea. Major General Jenes, the commander of U.S. Army forces in Alaska, is moving to a post at Fort Leavenworth, Kans.

These gentlemen have made outstanding contributions to both the military and civilian communities in Alaska. I am personally acquainted with these outstanding military officers and commend them for their excellent leadership during their tours of duty in Alaska. They will sincerely be missed—a fact reflected in a recent editorial printed in the An-

chorage Times on March 7, 1981. Mr. President, I ask that my remarks and the Times' editorial be included in the RECORD.

The article follows:

DOUBLE WHAMMY

Over the years Anchorage has become accustomed to the rotation of military families, taking from the community's midst some vibrant people and sending them on to new assignments elsewhere. It's a sad time, usually, because friendships only so recently made become severed by the miles that separate Anchorage from the new duty station of those involved.

But it's one of those things that is part of being civic neighbors to military establishments.

Even so, that doesn't lessen the regret produced by the double whammy that the top brass has handed to Anchorage in the past couple of weeks.

Almost simultaneously came orders transferring Air Force Lt. Gen. Winfield Scott to Seoul, Korea, and Maj. Gen. Theodore Jenes to Ft. Leavenworth, Kans.

Gen. Jenes, who heads Army forces in Alaska, will be leaving almost any day now—pending on word from the Department of Army as to his successor. The replacement for Gen. Scott, the top-ranking military man in all Alaska, was announced at the same time his new assignment was made public, and his departure date—the last day of this month—already is set.

The result is that two of the most popular—and best—of the distinguished military leaders who have served in Alaska will be leaving at virtually the same time.

Those who come after them will find big shoes to fill.

Quite apart from their individually heroic records as combat officers, both Gen. Scott and Gen. Jenes have distinguished themselves as concerned leaders of the men and women who serve with them and for them.

They may be general officers in rank, but their hearts and their dedication are to the junior officers and the enlisted personnel who make up the units they command. The soldier in the field, the airman at the remote early warning radar station are the ones most often in the minds of these two compassionate generals.

And their concern for the welfare of the troops is genuine. There is nothing phony about this special pair.

They likewise have maintained a respected rapport with civilian community, and have even further solidified the unique relationship that exists between Anchorage and the Air Force base and the Army for which are our neighbors.

Over the years this has been a rich and mutually rewarding experience for both the military and the civilian communities. Despite the barriers which sometimes are placed between military forces and neighboring towns and cities elsewhere, there always has been an effort here to stress common interests rather than differing goals.

In place of friction, there has been respect. In place of aloofness, there has been a blending of social activities and the nurturing of friendships at all levels.

Gen. Scott and Gen. Jenes have encouraged this feeling and, indeed, have been ardent supporters not only of the military in in Alaska but of Alaska itself.

They will be missed. We wish them Godspeed and all good fortune in their new assignments.●

1981 NATIONAL CONFERENCE OF CHRISTIANS AND JEWS BROTHERHOOD AWARD

● Mr. GLENN. Mr. President, on March 25 in New York City, Howard Goldfeder, president and chief executive officer of Federated Department Stores, Inc., of Cincinnati, Ohio, received the 1981 National Conference of Christian and Jews Brotherhood Award. Mr. Goldfeder is the third chief executive of this nationwide department store chain to receive this award. In 1951, Fred Lazarus, Jr. received the award and in 1975 the recipient was Mr. Ralph Lazarus.

In a speech accepting the award, Mr. Goldfeder's comments concerning the needs of the cities and his company's dedication to staying in the core cities are most timely. As government reduces its funding, volunteer organizations must do a better job, he notes.

Mr. President, I ask that a portion of Mr. Goldfeder's remarks be printed in the RECORD.

The excerpt follows:

REMARKS OF HOWARD GOLDFEDER

Federated Department Stores plan to use funds from a newly established $15 million Federated Foundation to move towards doubling our contributions in terms of the portion of our pretax profits used for this purpose.

In 1980, overall company giving, including Federated's 20 divisions, amounted to $3.5 million.

Another part of our tradition is a dedication to the cities we serve. I think it is fitting that a diversified retail firm like Federated should have a commitment to America's cities. A recent book by a Berkeley professor named Gunther Barth says the department store was one of five developments that allowed the American city to prosper. The others were the apartment house, the metropolitan press, the vaudeville palace and organized baseball.

Cities, in turn, have been good to us. Unlike organized baseball, we don't intend to leave.

This is not to say it will be easy. These are difficult times for American business in general and retailers in particular. Inflation increases both the cost of the merchandise we buy and the cost of running our operations. Intense competition severely restricts our ability to reflect these increases in our prices.

The fact that the retail price index of department store goods in 1980 rose at a rate of only about half the overall inflation rate is a measure of the competitive environment.

So just running the business in a business-like way is a big challenge. What we need today is a combination . . . the aggressive pursuit of sales combined with the kind of innovation and discipline in our operations that will keep our business healthy. No easy task.

But more is needed as well. In this respect we are not one bit different than is the rest of the country, and perhaps particularly America's cities. Our cities have all had a difficult time of it in the recent past and will face fresh challenges in the 80's. Many of these fresh challenges will come because of changes in direction for our country as a result of the last election.

Most of us in the business community see these changes in direction as important to the very survival of America. I don't mean survival of America as a huge market for consumer goods. Or survival of America as a place in which corporations can make large profits and corporate executives can make large salaries. I do mean survival of America as the symbol of equality and justice and brotherhood for Christian and Jew, black and white, man and woman, young and old.

We could not survive to guarantee these things given the direction in which we were going. A bankrupt nation is not a nation in which brotherhood has any particular meaning.

Now that we have the change in direction, it is up to us to make sure the benefits of the change are as fairly divided as we are convinced they can be. We must make sure that as methods change, goals and ideals do not.

For we must remember, as all these programs fall by the wayside in the name of much-needed government economy, that the goals of the programs were almost always good, and founded in the highest possible ideals.

So if the cutbacks we're all reading so much about today mean a stronger America, better able to benefit all its citizens but without the mushrooming cost of the past, this is all to the good.

But we can't let less government in our lives and less cost to taxpayers mean less fairness to our minorities, less equality in American life, less opportunity for good jobs and a good education, less honesty in the marketplace, less health, less safety, less security for our older people, less art and culture available to fewer people.

How can we make sure this doesn't happen?

We can do this, I believe, by looking at this period in American history as an obligation for us to do more, rather than an opportunity to do less.

If we do not look at it this way, we will have failed our country and failed ourselves, as well. For in effect, we have been saying for many years that we can do the job better without so much government. We have made that promise and that promise must now be fulfilled.

We have promised to provide more and better jobs for our minorities, without mindless quotas.

We have promised to treat women in the workplace in the same way in which we treat men, without bureaucratic prodding.

We have promised to strike sensible balance between environmental concerns and the need for economic growth, without an interfering government.

We have promised to let the marketplace regulate prices, without needless rules and regulations.

We have promised to protect the health and safety of the men and women who work for us, without armies of inspectors.

We have promised to run our business in a way that is fair to our customers, without government interveners.

These promises must be kept. There are plenty of people who believe they will not be kept. If we do not keep them, we may never have another chance to have our convictions taken seriously.

So those of us who lead American businesses must make sure the businesses we lead are managed in such a way that these promises are kept.

We must also make sure that private not-for-profit organizations on which Americans have traditionaly depended for help in time

of need and for cultural enrichment are efficiently and effectively led and adequately financed.

It seems to me that we in the business community can do three things here.

First, we can make sure that we and our associates are providing the kind of high-quality volunteer leadership that is going to become increasingly important as the government steps away from a broad range of social and cultural programs. Strong volunteer organizations were once one of the unique hallmarks of American life. A tendency to turn vast areas of human and cultural services over to the government weakened many of these organizations. We must, through our efforts, rebuild them.

Second, we must make sure the organizations we support are meeting real needs. As the government pulls back, needs will increase. Those of us who volunteer our time and contribute our money will have to do a better job than we have done in the recent past to set priorities and put more effort into those organizations which meet real needs.

And third, we are going to have to make sure those organizations that are filling real needs are adequately financed. A recent Conference Board study indicates that fewer than 30 percent of the two million corporations in the United States make any kind of charitable contributions at all.

Those companies that do not make contributions must be encouraged to do so. And those of us who do make contributions must be encouraged to do more. For many years, Federated has contributed considerable sums of money to charitable organizations. Last year our contributions totaled about three and one-half million dollars.

The new challenges of the 80's, however, make it clear that this is not enough. We have recently funded a charitable foundation with $15 million. Our current plan is to use funds from the foundation to move towards doubling our contributions in terms of the portion of our pretax profits used for this purpose. We won't do this overnight. But as needs increase we will increase our contributions to do our part to help meet them.

This is one way in which it is our intent to keep our promise to America. But keeping the promise is more than big companies giving away large sums of money.

Keeping the promise is a job for all of us as we go about our daily lives. I'm sure we will all do our part.●

PROPOSAL TO CAP MEDICAID

Mr. BAUCUS. Mr. President, I should like to engage in a brief discussion with the chairman of the Finance Committee regarding the proposal to cap the medicaid program.

It is not my intention to involve the Senate in a lengthy debate or vote on this proposal. However, it is my intention to express my disapproval for the cap. A cutback of Federal support for medicaid of this magnitude has the potential for doing great harm. As the director for the medicaid agency in my State recently said—

The proposals take the heart out of basic human services.

In addition to expressing my reservations about the medicaid cap, I am hopeful that the Senator from Kansas will engage in a discussion of possible alternatives. I am also aware that several of my colleagues share my misgivings. The Senator from New York is here and also wishes to make some remarks about this issue.

The administration is proposing to limit the entitlement nature of the medicaid health insurance program for low-income people. In this fiscal year, roughly 18 million people will receive medical services under the medicaid program.

Just who are these people who depend on medicaid?

Two children, age 2 and 6, in an AFDC family of three. The father deserted the family. The monthly income is $252. The family lives in Great Falls.

A 45-year-old woman who spent 17 years of her life in a State mental hospital because no one was able to diagnose her disease as cerebral palsy. She was subsequently released, placed on medicaid and entered an intermediate care facility. Soon after she was able to move into a group home and is now leading a more independent life. She lives in Helena.

A foster care child, born illegitimately, who suffers from spinabifida. No one wants to adopt the child because of the medical expenses involved. The child lives in Billings.

A 70-year-old widow who lives on an SSI payment of $238 a month. She lives in Roundup.

A 45-year-old man, a former logger, who was disabled at work. He lives with his wife and three children. Their total subsistence income is about $500 per month. The family lives in Missoula.

These examples drawn from my State of Montana illustrate that the medicaid program is, indeed, benefiting the truly needy. It is a vital safety net that must be preserved.

The administration proposes to limit Federal expenditures for the program in fiscal 1982 to a 5-percent increase over the prior year and set the spending increases in subsequent years to the inflation rate, as measured by the GNP deflator. This restriction in growth will reduce Federal medicaid spending by $15 billion over the next 5 years. It would reduce spending by over $1 billion in fiscal 1982. These estimated cutbacks are conservative and could be substantially higher.

The administration's rationale is ostensibly to slow the growth of the medicaid program until fundamental reforms can be implemented. We still do not know much about these fundamental reforms.

I say to my colleagues that I have earnestly studied the proposal. I have genuinely tried to appreciate the rationale behind the measure. I have listened to Secretary Schweiker explain the necessity for the cap and assure me that States can absorb the cutbacks.

But in spite of these efforts, the logic behind the cap simply escapes me. It just does not make sense.

I fail to understand it because I look at Montana and I see that my State is now projecting a cost overrun of some $7.5 million and may be forced to abolish all optional services.

I do not understand it because I know furthermore that over half the States are facing similar large-scale medicaid cuts even before the cap is imposed.

A sudden and substantial limit on Federal expenditures will further threaten medical care for the indigent at a time when State medicaid budgets are already hard pressed.

In my judgment, the proposed cap is ill conceived and ill designed. It does nothing to address the endemic causes of rising health care expenditures. The effect of the cap will, in my view, shift costs to States and localities and diminish access to basic health care services for millions of our less advantaged citizens.

The proposal is flawed in many respects.

First, it punishes States—such as New York and Michigan—that have adopted or are implementing rational cost containment strategies. These State efforts need to be encouraged. A sudden loss of funds will imperil the innovative reforms States are now adopting.

Second, the cap puts the cart before the horse by cutting back on Federal funds before fundamental program reforms are proposed and implemented. These reforms may ease the regulatory burden on States and provide greater freedom and flexibility in administering State programs.

But, can we seriously discuss limiting the entitlement nature of medicaid before we know precisely what the administration has in mind when it talks about fundamental reforms? And, how can we seriously discuss limiting the entitlement nature of medicaid before we understand the degree to which this greater latitude will enable the States to reduce the costs of their program without eliminating essential benefits?

Third, many States are experiencing unexpected growth in their medicaid caseloads due to economic circumstances beyond their control. The proposed cap penalizes individuals in States that are economically hard hit.

Fourth, many States including my State of Montana, are now considering regulations to drop optional beneficiaries and services from their medicaid program. For some States there is no more fat to cut. They have cut back to the bone. I shudder to think how these States will absorb further shortages in funds.

For all of these reasons I strenuously object to the imposition of a cap on medicaid. The Finance Committee will be instructed to save over $1 billion in fiscal 1982 in its health programs. The Senate Budget Committee has already indicated that these savings can be accomplished in ways other than capping medicaid.

I look to my chairman of the Finance Committee for reinforcement here. It is my sincere hope that we can—with a little imagination—save this money without doing harm to the most neediest members of our society.

The Senator from Kansas is one of the most compassionate, sensitive Members of this body. He is widely respected for his concern for those among us who are less fortunate.

The Finance Committee is well known for developing innovative cost-saving proposals. As in past years, the staff has developed several alternatives for the committee's consideration.

Can the Senator offer me some assur-

ance that we in the Finance Committee will not take the easy way out? That we will seriously explore alternatives that will not impact directly on the medically indigent?

In my view, the imposition of the cap on medicaid is a shortsighted answer with long-term, irreversible consequences. I look to the Senator from Kansas for his wise advice.

Mr. DOLE. Mr. President, to balance the budget represents an enormous task. To do so, it will be necessary to break the momentum of spiraling Federal costs that has built up over the past quarter century. As many have pointed out, in just the last 10 years Federal spending has increased from $211 to $655 billion.

A balanced budget will certainly require a fresh look and a healthy skepticism toward programs that have often been built up laboriously over the years and strongly supported by proponents. Medicare and medicaid must certainly be included among those programs to be reevaluated.

The total health component is currently about 10 percent of the budget and 13.5 percent of the nonmilitary portion of the budget. The increases in this component have been rapid—from $1.8 billion in 1965 to $73.4 billion in 1982. In fact, medicare alone will account for about $48 billion in 1982.

Until recently, increases in the price of health care, as measured by the Consumer Price Index (CPI), consistently exceeded price increases in the rest of the economy. A major exception to this trend occurred during the economic stabilization program (August 1971 to April 1974 for health) when medical care prices increased at lower rates than general price levels. After these controls were lifted, medical care prices immediately began to increase faster than all consumer prices. Recently, medical care prices in total have been increasing faster than all consumer prices, with hospital room rates leading the way.

As a first step toward bringing these costs under control, the President has proposed a reduction of almost $2 billion in Federal spending in the medicare and medicaid programs in fiscal year 1982.

The Senator from Kansas is concerned, as are many of his colleagues, that these cuts, and any additional cuts which we decide upon during the course of our discussions today, be made very carefully. Numerous days of hearings have been held by the Senate Finance Committee to afford us the opportunity to hear from the public about the administration's proposals. The Senator from Kansas is grateful for the number of suggestions made by these witnesses, and I hope we can sort out these proposals and come up with specific spending reduction recommendations that are responsible, equitable, and help spread the burden of these cuts.

We will also consider those suggestions made by the Budget Committee and the administration. It is our belief, however, that both medicare and medicaid must be examined during this process. While recognizing that proposals for long-term reform are in the works, we believe some reasonable changes at the current time are both possible and desirable.

The medicaid cap which my distinguished colleague from Montana has raised for discussion at this time is one specific proposal that will be reviewed very carefully. The Senator from Kansas agrees that maximum flexibility for the States is a desirable goal. However, in providing this flexibility with one hand, we must not limit their funds so drastically with the other hand as to inhibit any positive innovation.

As my colleagues are well aware, for some time the States have requested increased administrative freedom with respect to medicaid so they themselves could design more cost effective programs. The President's proposal is designed to allow States the freedom to implement any number of changes, which could well result in a medicaid program better suited to each individual State while at the same time produce significant savings.

While the decision regarding a budget target will be set in the context of this debate, the details with respect to the specific proposals to reduce spending must be made within the appropriate authorizing committees. The Senator from Kansas assures his distinguished colleagues from Montana and New York that Finance will examine the medicaid cap and all other proposals very carefully.

The Budget Committee's recommendations to the Finance Committee do not bind us to any specific proposals. They are intended to leave us sufficient flexibility to achieve savings through various options. We may well want to consider alternatives to this proposal. I would like to maintain that flexibility for the Finance Committee and not begin a lengthy debate on specific proposals before the committee has had the opportunity to fully consider its options. I do believe, however, that the committee will be able to find the required savings. It seems to me that our concern today should be whether or not we can live with the Budget Committee number. I believe that we can.

Mr. MOYNIHAN. Mr. President, I thank the Senator from Montana for giving me an opportunity to join in this discussion.

I stand here as a representative of a State with 932,000 children who, through no fault of their own, will continue to need the assistance of the medicaid program. I mention children because 47 percent of the total medicaid population are children. I also represent 100,000 elderly and chronically disabled persons who will continue to require some form of long term care services provided by the medicaid program.

Like every other Member of the Senate, I am concerned about the cost of health care services. We are charged with looking at different ways of delivering quality health care in a more cost-effective manner. That is, and will continue to be, a fundamental challenge. Let us, therefore, pause and look to see whether the current proposal will help or deter us from reaching that ultimate goal.

I have carefully reviewed the proposal to cap the medicaid program and found that it would, if implemented, place community-based and noninstitutional programs more at risk than established institutional programs; that it would force States to reduce payment levels to financially hard-pressed health care providers; that it would cause States to start eliminating optional services and recipient classes from coverage; and that it would entirely exclude certain classes of providers from participation in medicaid.

As Senators, it is our responsibility to deliberate on these matters. We need to take a close look at the medicaid program as it is administered today. There are 52 separate medicaid programs with different eligibility standards and benefits; a Federal matching rate that arbitrarily penalizes States with large medicaid populations; 11 States with experimental and alternative reimbursement programs designed to reduce the cost of health care; and a program that still does not provide health care for millions of poor people. We are now being asked to reduce this program further. Let every Senator understand two things: First, we are not talking about reductions in a program that has covered all of those in need; and, second, the changes to come will occur because of fiscal pressures imposed by this administration, not because the need has suddenly vanished.

Again, this is the challenge to all Senators, and especially to those of us who sit on the Finance Committee, for it is under the jurisdiction of that committee where these decisions will come about. There are alternatives, some of them good, and we will look at them all.

I do have one last concern that I am compelled to state at this time: That this Congress not forget in its efforts to reduce the cost of the medicaid program the cost containment efforts of States like New York and Michigan. My State, along with others, learned years ago that health care costs could not continue to rise unabated. Therefore, New York State passed its own laws that would allow it to curtail the rate of increases in the medicaid program, and since 1975 the State has saved $2.4 billion. Because New York's cost containment efforts have been so successful in eliminating excess health care costs, this State would be especially penalized by the proposed medicaid cap. It is only fair that these efforts be given consideration in the coming debates.

AMERICAN CONCERN WITH FOREIGN POLICY AND NATIONAL DEFENSE

● Mr. GLENN. Mr. President, it seems to me evident that we are at a watershed in our foreign policy and in our views of what constitutes an adequate military instrument to support that policy. The ominous rise of Soviet adventurism and an exponential increase of our dependence of importing critical materials have contributed to a quickening of American concern with foreign affairs and national defense.

Immediately after World War II, the Soviet threat was seen mainly as the

danger posed by a massive Red Army ready to strike from its bases in Eastern Europe. More recently, the Soviets embraced détente because of their military weakness. All the while, however, the U.S.S.R. was embarked on a campaign to achieve military superiority.

Throughout the past decade, Soviet military spending has far outstripped that of the United States. And as they have grown stronger, the Soviets have become more adventurous. They have sown the seeds of violence in Africa, in Asia, and in the Middle East, and Latin America. For the first time since World War II, the Red Army marched out of the Soviet bloc to invade Afghanistan.

That the United States has grown increasingly dependent on imported raw materials was brought into sharp relief by the OPEC oil embargo of 1973. But there is now an awareness that other imports such as cobalt are also critically vital to us. Without these materials, we could be as severely crippled as if we had been ground under the heels of an invading army.

At this same time of expanding Soviet adventurism and material interdependency, we are also embarking on strengthening our long-neglected military forces. Given the great expense and long lead times necessary for this renewal of our defenses, the general directions of our military programs that we initiate now will largely determine the capabilities and limitations of our military forces into the next century. Unless we factor in our relevant foreign policy interests, we may find ourselves later in a position where military limitations restrict our foreign policy options or where the capabilities we do have dictate less than satisfactory choices. The jury-rigging we have had to do to project a modest military presence in the Indian Ocean region should be a sufficient lesson to us in this regard.

I ask that Gen. Maxwell D. Taylor's splendid article that recently appeared in the Washington Post be entered in the RECORD. Entitled, "Tell the Military Exactly What You Want," General Taylor endorses views that have been held by some of us for a number of years: Namely, that the general shape of our Nation's military forces should be determined by our national interests abroad and by the foreign policies we adopt to protect those interests.

I ask also that my attached letter to the chairman of the Foreign Relations Committee be entered into the RECORD. Dated nearly 2 years ago, the letter calls for a definition of our likely future interests and the foreign policy requirements that would guide our defense planners.

The material follows:

[From the Washington Post, Mar. 11, 1981]

TELL THE MILITARY EXACTLY WHAT YOU WANT

(By Maxwell D. Taylor)

At a time when President Reagan is asking sacrifice and greater efficiency in the civil sectors of government, he would be well advised to display equal toughness in examining the military policy recommended by the Pentagon. To do so, he should require evidence of how major military requirements relate to the protection of specific national interests and to the support of the foreign policy he expects to carry out. Thus, he could verify the correlation of military with foreign policy before committing himself to the vast new military programs, consisting largely of high-priced weaponry, now being pressed upon him.

No such linkage between foreign and military policy has even been effected in the past. A recent example of failure of policy correlation was the sudden proclamation last year of the Carter Doctrine in response to the Soviet invasion of Afghanistan. With little warning, the armed forces found themselves responsible for the defense of the Persian Gulf region, barren of bases and allies and practically on the doorstep of the Soviet Union. The Department of Defense is still struggling to give some credibility to the political decision by shifting naval forces needed elsewhere to the Gulf while touting the creation of a Rapid Deployment Force. The latter, to date, consists only of several hundred officers and men, a few contingency plans and a couple of robust interservice feuds.

As it takes a fresh look at our overall foreign policy today, the Reagan administration has a precious opportunity to demand from Defense a clear and timely military policy consistent with its major political objectives. But the civil leaders must be ready to give the military specific guidance of a sort generally lacking in the past.

For maximum utility, such guidance should clearly outline the major tasks the armed forces would be expected to perform in the next five to 10 years. In the case of the strategic forces, it would likely reaffirm their primary task as the deterrence of a Soviet strategic attack on us or our allies. But what kind of forces would produce this deterrent effect? The guidance might properly prescribe that adequate forces be able to destroy certain specific Soviet target systems under certain stated conditions with a minimum acceptable percentage of probability. On the other hand, it might revert to the fallacy of seeking parity with the Russians in numbers of weapons.

For the general-purpose (non-nuclear) forces, it would no longer suffice to say, as in the past, merely that they should be able to fight one-and-one-half or two-and-one-half wars simultaneously without indication of where and how long they would be expected to fight without benefit of major reinforcement.

In NATO, the immediate question is how to offset the increase in the strength of the Warsaw Pact and, in so doing, how to obtain a larger military contribution from our allies. Our military chiefs will need to know to what extent, if any, they should plan to modernize NATO weaponry despite allied coolness to the idea and whether to consider a further increase in our own forces currently deployed there. In the latter connection they need to know what percentage of our current combat strength can be safely committed to this area beyond an ocean that our Navy may not be able to control.

In the Middle East, the first question to answer is whether the Reagan administration adheres to the Carter Doctrine unchanged and expects the Pentagon to give it military meaning. If so, what level of defense is desired—a military presence merely to show the flag, or a tripwire force big enough to force the Soviets to attack and face the possibility of unpredictable escalation? Or will the eventual goal be a major defensive front comparable to that currently in Western Europe? In any case, where will the trained manpower come from to provide combat-sustainable forces without a return to peacetime conscription?

Because of the costs involved, the military planners should receive guidance as to the level of readiness to be required of operational forces. It will not do to say merely that all forces should be ready to fight anywhere at any time but, rather, that specified task forces should be ready to go to certain places in an order of priority. A trained combat unit in the United States has little timely value without the ships and aircraft to move it to its destination overseas and a supply line to forward it munitions, supplies and loss replacements. Task readiness of this sort requires carefully coordinated interservice planning—something we have done imperfectly in the past.

In addition to these longstanding threats in Europe and the Middle East, there are new conditions arising worldwide affecting our interests that a new military policy must recognize. Three are particularly important: the growing dependence of the economy on access to overseas markets, the instability and turbulence resulting from excessive population growth in many Third World countries of vital interest to us and the dangers to our citizens and our overseas assets of international terrorism. To cope with the foregoing, our military leaders are entitled to know what role the armed forces will be expected to play where and under what conditions.

With comprehensive guidance of the sorts I have mentioned and a presidential mandate to produce and maintain forces capable of the tasks indicated, the Department of Defense should be able to produce an appropriate policy and force structure. If so, the results could be extraordinary.

For the first time, we would have an appropriate linkage of foreign and military policy and, at the same time, a sound basis for justifying military needs.

We would have established task-readiness as the measure of military sufficiency and, in so doing, rejected the fallacy of matching numbers with the Russians.

The armed forces would be protected from their innate inclination to prepare for the kind of war they would prefer to fight.

In due course, the president would regain a voice in international councils strong enough to ensure the close attention of all present—especially the Russians.

COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., October 11, 1979.

Hon. FRANK CHURCH,
Chairman, Foreign Relations Committee, Washington, D.C.

DEAR MR. CHAIRMAN: When the SALT Treaty came before the Senate Foreign Relations Committee, I was in full harmony with those who hoped that the Treaty could be considered on its own merits and not linked to other matters. In the course of the hearings, however, the Armed Services Committee, former Secretary Kissinger, and the Joint Chiefs of Staff expressed their concerns regarding the trends in the growth of our military capability vis-a-vis the Soviet Union. Their support of the Treaty in large measure hinged on making adequate provision for our future military strength.

While I share those same concerns and think we must deal with them, I nevertheless had hoped that once the concerns had been expressed, they could be put aside while we went ahead with our consideration of SALT. Debate on the military concerns, with the Foreign Relations Committee taking its very proper role of assessing the implications of a military buildup, would follow. As you know, things have not worked out as I had hoped.

Instead, the Administration has taken up these concerns now in an effort to gain SALT support, and in my view—despite Secretary of Defense Brown's statement to the contrary—have linked military concerns very definitely to the SALT Treaty. For example, they are going to pull defense matters out of the budget for early presentation (by late November according to testimony of Secretary Brown).

They say that the percentage they are going to submit would have been submitted with or without SALT, but it is no secret that discussions are under way in the Administration, at the highest level, to submit not only a 5-year plan, but to also address the proposals for a 5 percent increase demanded by those who have linked their support for SALT to an increased military budget.

This means that some very basic decisions regarding size of the military budget and of at least some of the equipment therein will be started by those who have linked their support for SALT solely to the issue of increased defense expenditures, with careful consideration of other foreign policy matters and all the international implications thereof, receiving little initial consideration.

This can be one of the most important decisions for our foreign policy, and the military back-up to that policy, that has been made by the United States in the last 20 years. It has been at least that long since we have made such major commitments, and these new commitments may well determine our military programs and our foreign policy direction for the next 20 years.

It seems to me that even a casual observer of the world scene would recognize that we are truly at a watershed period in our foreign policy, and our military alignments around the world. In early post World War II days, we still had the big powers exerting a major influence around the world, but from those days when the United Nations was formed with 51 nations, we have seen the breakdown of big power influence around the world. The British are no longer "east of Suez". The French, British, Belgians, etc. are no longer holding sway over major portions of Asia and Africa. Membership in the United Nations has risen to 151 nations, with many of the LDC's organized into "nonaligned" status. Simultaneously there has been a tremendous growth in Soviet military power, particularly in conventional weapons. We are also all familiar with the new technique of using surrogates to perform missions around the world on behalf of the Soviets.

With our dependence on Middle East oil, we have noted a Soviet coup in Afghanistan, moves by Cuban surrogates across Africa from Angola to Ethiopia and Somalia, with moves into South Yemen on the Saudi Arabian border, as well as an increased presence in the Indian Ocean astride our oil supply lines. In Asia the Soviets have significantly increased the number of combat troops on disputed islands north of Japan and have expanded the Soviet/Viet Nam war against Cambodia. Closer to home the Soviets have absolutely refused to accommodate us when their move into Cuba was discovered. Moreover, other moves apparently are going on in the Caribbean—Grenada, for example.

We can no longer ignore this Soviet expansionism around the world. Very fundamental issues of American foreign policy are involved that I believe should be very carefully considered before the defense budgeting matters now linked to SALT, are put into place or are decided upon even in a tentative fashion. Although the Armed Services Committee will not consider the arms alignment that we need in a policy vacuum, it seems to me that these are considerations in which the Foreign Relations Committee must also be involved and play a very vital role.

We have not had considerations of this kind even vaguely discussed before the Foreign Relations Committee this year because of all the emphasis on SALT. Now that there is linkage occurring in this bigger defense budget context, it seems to me that we must address the foreign policy implications or we will be in the position of seeing what would normally be a Foreign Relations Committee responsibility go to the Armed Services Committee by default. It will do us little good to discuss foreign policy alignments that might have better contributed to U.S. security once the weapons buys and military alignments are set on course.

I know of your personal concerns regarding the situation in Cuba and your belief that those troops must be withdrawn or at least certified as non-combat before you believe SALT has a chance of passing. You have also stressed the fact that the nearness to our shores is a most important factor. Important as those factors are, however, it seems to me that one of the most important aspects of the Cuba situation is that it highlights a pattern of Soviet expansionism around the world with which we now must come to grips.

There seems to be at the present time, however, an urgency to move SALT mark-up, which I admit I do not fully understand. To be pushing for such rapid mark-up just to have SALT II through the Committee and "at the ready" for a propitious moment to occur on the Senate floor hardly seems to be necessary when we have some of these other momentous items that we have not yet considered, and I refer to the Armed Services deliberations of the defense budget as well as your immediate concerns about the situation in Cuba.

I believe that military forces and alignments should be based on a well-thought out foreign policy and not vice versa. As I have discussed with you before, I have hoped for a long time that we could work much more closely with the Armed Services Committee because our efforts are so intertwined.

It seems to me that with defense expenditures and alignments being now linked to the SALT Treaty, it is incumbent on us to move toward policy considerations which are the province of the Foreign Relations Committee. I suggest we set aside our scheduled mark-up sessions on SALT and engage in policy discussions as the defense budgeting is brought to the Congress. I believe the immediate future will see us setting in place the direction for our military alignments for perhaps the next generation, and to let the policies involved in those decisions be made with little or no consideration by the Foreign Relations Committee is to me not fulfilling the jurisdictional role we have for the United States Senate. Those decisions will go to the Armed Services Committee by default.

Thank you for your consideration of this matter, which I hope we can discuss at our next business meeting.

Sincerely,

JOHN GLENN,
U.S. Senator.●

IRS PERSONNEL CUTS—PENNY WISE AND POUND FOOLISH

● Mr. BAUCUS. Mr. President, last week the Senator from Iowa, who is chairman of the Finance Subcommittee on Oversight of the Internal Revenue Service, expressed his concerns about the cuts in the budget for the Internal Revenue Service. As the ranking member of that subcommittee I want to join with the Senator in this matter.

Mr. President, the American tax system is founded on the principle of voluntary compliance. The very effectiveness of our tax system depends upon the willingness of taxpayers to accurately assess themselves and voluntarily pay their taxes. But the President's fiscal 1982 budget request for Internal Revenue Service personnel continues a pattern that threatens to undermine our voluntary compliance system.

Despite evidence that clearly shows that IRS is the one case where additional expenditures contribute to reducing the deficit—additional IRS personnel yield much more in increased revenue than the cost of their salaries—this administration plans not only to continue, but to increase, the cuts in IRS staffing. The President's 1982 budget proposes a 3,500-position cut in IRS personnel over the Carter administration's January budget. These cuts are penny wise and pound foolish.

I support efforts to reduce the size of the Federal Government. But I find it hard to understand why this administration, which has made a balanced budget a major goal, would continue the unsound practice of reviewing revenue-producing programs with the same criteria used to assess revenue-spending programs and thereby fail to fund sufficiently the Federal Government's main revenue-producing agency.

The President's budget package states that because proposed reductions in marginal tax rates are expected to enhance voluntary compliance, the slight increase in IRS enforcement personnel proposed in the January budget, other than those for collection of unpaid taxes, will not be necessary.

The facts do not bear this out. There are dangerous consequences from continuing the current understaffing of IRS: revenue collections will continue to suffer; voluntary compliance will continue to decline; and the tax protest movement will continue to grow. IRS is currently overwhelmed by millions of delinquent accounts, with unpaid taxes increasing from $13.3 billion at the end of 1979 to $15.8 billion at the end of 1980. These are taxes legally due and owing—taxes shown due on returns when filed, taxes withheld from employees' wages by employers and not paid over to the IRS, and the like. At the same time, the percentage of returns audited has continued to drop, inducing more and more taxpayers to play the "audit lottery."

During hearings last October before the House Committee on Government Operations, testimony and documents were presented that vividly illustrate the shortsightedness of OMB's decisions on IRS budget requests that have apparently been the rule for several years. These documents describe the growing problems resulting from continued underfunding of IRS and show how the Treasury Department has tried to persuade OMB of the critical need for increases in the size of IRS. The following is from a 1977 Treasury policy document:

> Sizable revenues have been and are being lost by continuing inadequate levels of tax administration. Compliance measurement studies show a projected under-reporting of $80.3 billion in recommended individual income tax for the fiscal year 1977–83 period. In contrast, the cumulative additional tax recommended through the IRS audit program will total approximately $11 billion at current resource levels. This amounts to a windfall for those not paying their fair share of about $70 billion over the 1977–83 period. Our self-assessment system depends on taxpayers' perceptions that all are paying their fair share of taxes.

The following is from an attachment to a September 8, 1977, letter from

Treasury Secretary Blumenthal to OMB Director Bert Lance:

Treasury is in a unique position to help achieve the goal of balancing the budget by 1981 by increasing revenues through improved enforcement of our tax laws. The budget process has suffered from a perennial problem of setting expenditure ceilings without due consideration to the effect this has on the ability of revenue producing programs to assure the adequacy of federal receipts. This has resulted in needless increases in deficits and the national debt. Thus, the traditional budget approach aimed at restricting all expenditures has created a paradox. The funding of revenue-producing programs has been viewed as competing with, rather than facilitating, virtually all remaining programs of the government without regard for the fact that receipts vary with the size of the tax administration effort.

A 1978 letter from Secretary Blumenthal to OMB Director McIntyre stated in part:

As discussed last year with the President, we believe it is counterproductive to unduly restrict the budget of the IRS when expenditures for appropriate activities return substantial additional revenues. . . . Aware of the President's overriding goal of keeping employment and expenditures at the lowest feasible level, the Department this year is not submitting additional revenue raising proposals. We feel that such restrictions on the principal revenue-producing activities of the government are short-sighted. We strongly believe that such expenditures would be cost-beneficial and would help to lower the budget deficit.

And finally, in another letter from the Secretary of the Treasury to Mr. McIntyre, dated November 19, 1979:

The Service is simply unable to handle the work load requirements placed upon it with the level of resources it has in Fiscal Year 1980. Over the past few years, most programs have eroded to the point where the IRS's decreased capabilities may themselves soon adversely affect the level of voluntary compliance.

A review of IRS's budgets for this period, as well as a review of the budget deficits—$45 billion in 1977 to $59 billion by 1980—indicates that OMB was unswayed by these arguments. The fiscal 1982 budget demonstrates that OMB's current decisionmaking process is apparently the same—revenue-producing programs continue to be treated the same as revenue-spending programs.

At the present time, there are disquieting signs that tax enforcement needs to be increased, not reduced—among them the growing number of illegal tax protestors and the widespread broadcasting of techniques used to avoid reporting income. We all have read reports of the tax revolt among the Michigan autoworkers. Some workers have said that if the tax revolt gets big enough, they will join.

There was a time when the American Federal income tax system was the envy of governments all over the world. In some countries, like France and Italy, cheating the tax collector is almost a matter of honor. But, in the United States, while people might complain about their taxes, as good citizens they have always paid them. But the numerous reports of a growing "underground economy," of the tax revolt, of surveys that indicate a large number of Americans have no qualms about cheating on their taxes, show just how far from that idyllic era we have come.

One of the major causes of this change is the continuing erosion of IRS enforcement activities. A 1979 Roper tax survey revealed that 29 percent of taxpayers believe that cheating is high, while another 27 percent believe that there is a medium level of cheating. The potential for self-fulfilling disaster to one of the great sources of strength of this country is so serious that it warrants the urgent attention of Congress and the administration.

I am not advocating increasing taxes. I am proposing that the IRS be given enough staffing to be able to deal more effectively with those taxpayers who are failing to pay their taxes or who are evading their fair share of the tax burden through elaborate tax avoidance schemes, such as the well-known "silver-straddle" and other questionable or outright illegal tax shelters.

The 1982 budget states that due to cuts in personnel, the IRS will have to curtail some of its efforts to match information documents to returns, which is aimed at locating those who fail to file returns or who fail to report all their income; that there will be 225,000 fewer audits than in 1980; and that delinquent accounts will increase by 872,000 from 1980, to a total of over 2 million delinquent tax accounts. In fairness to those who report their income and pay their taxes, the IRS should be staffed sufficiently to pursue those who evade paying their taxes.

At the same time as I am urging adequate staffing for IRS, I am also well aware of the many complaints against the agency—that it is already too powerful. I am concerned about these complaints and therefore I will be reintroducing my taxpayers' bill of rights which provides important protections for taxpayers against IRS abuses.

However, if the taxes already due and owing could be collected and if taxes could be assessed and collected on even a percentage of the growing unreported income—estimated by the IRS to be as high as $135 billion in 1976 and by others to be as high as $600 billion today—the resulting revenues would probably more than cover the projected budget deficit for 1982. It is therefore mind numbing that President Reagan's budget cutters are proposing a 3,500-position reduction in the IRS, thereby making tax fraud even more attractive.

The 1982 budget shows decreases in key IRS enforcement personnel: revenue agents are decreased 108 from 1980; tax auditors are down 719; and special agents, those who investigate corporate and individual fraud, organized crime figures and narcotics traffickers, and illegal tax protestors, decreased by 90. These cuts, coupled with recent statements by the Attorney General that enforcement activities will be concentrated more on street crime than on white-collar crime, sends a message to the American public, whether or not intended, that the Federal Government is less concerned with enforcing the tax laws.

The goal of balancing the budget requires not only stringent expenditure controls, but also effective production of revenues. One of the causes of unbalanced budgets and bigger deficits over the past several years has been the fact that the Government has been losing significant revenues, due in large part to inadequate funding for revenue-producing programs.

Direct expenditures for IRS revenue-producing programs yield impressive returns—collection programs are the highest, with a net yield-to-cost ratio of approximately $20 to $1, while the ratio for the examination program is $5 or $6 to $1. In addition, a ripple effect can be expected from stepped-up tax administration efforts, which further increase receipts through higher voluntary compliance and contribute significantly to future balanced budgets.

As the figures show, IRS is a remarkable bargain—the average citizen would think the Government is crazy not to spend $1 to take in $5 or $6, much less $20. But the figures which show the growing amount of unreported income also indicate that the IRS is clearly not supplied with enough staff to search out effectively those who cheat.

Americans who voluntarily pay their correct taxes justifiably resent the fact that those who cheat and evade paying taxes and are not caught make the burden greater on all honest taxpayers. If IRS were provided sufficient staffing, those who have been evading and cheating can, at long last, begin to supply some of the very large amounts of revenues that our Government needs to work out of its current economic problems.

I ask that the following two articles be printed in the RECORD.

The articles follow:

[From the Los Angeles Times, Mar. 2, 1981]

STOP, THIEF! TAX CHEATS ARE NOT AMUSING—THEY STEAL FROM THE REST OF US

(By Ernest Conine)

There was a time when the American federal income-tax system was the envy of governments all over the world. In France and Italy, cheating the tax collector—or at least trying to—was almost a matter of honor. But in the good old U.S.A., people might grumble about the taxes but as good citizens they were willing to pay up.

Two recent items in the news show how far from that idyllic era we have come.

The Internal Revenue Service disclosed that it was moving to quash a growing tax revolt among 3,500 Michigan workers who have tried to escape income-tax withholding from their paychecks by claiming as many as 99 dependents.

In a separate action, the service charged that up to 4,000 airline pilots had participated in a massive tax-fraud conspiracy involving the creation of fictitious income-tax deductions amounting to perhaps $100 million.

With the April 15 filing deadline only a few weeks away, a lot of people are no doubt tempted to look on such violations with amused tolerance.

They shouldn't. Any American who deliberately cheats on his taxes is a thief stealing from the pockets of honest citizens just as surely as though he stuck a gun in their ribs. To the degree that the tax cheat pays less than his lawful share of the tax bill, honest taxpayers must pay more.

Whether he works on an auto-assembly line or in the cockpit of a Boeing 747, the

tax evader who is caught and convicted deserves jail or a heavy fine.

Having said that, it is pretty obvious that something also needs to be done about a national climate that is beginning to make tax cheating fashionable among otherwise law-abiding citizens.

A survey of 5,000 households across the nation, commissioned by the Internal Revenue Service, found that almost a third admitted being "less than absolutely honest" in reporting their incomes or their deductions to the tax collector. The amounts of unreported income ranged from $1 to $6,000. Those surveyed admitted to false or exaggerated deductions ranging from $2 to $2,000.

Although most of the cheating is petty, it adds up to big bucks. Mortimer Caplin, one-time commissioner of internal revenue cites studies suggesting that as much as $135 billion of taxable income went unreported in 1976. The figure would be larger now.

If taxes could be collected on this unreported income, the resulting revenues would by themselves finance a pretty substantial across-the-board tax cut. In other words, if everybody paid what he owed, nobody would have to pay as much.

The trouble is that seemingly millions of Americans have convinced themselves that, because taxes are higher than they think they ought to be, they are entitled to arrange do-it-yourself tax cuts. According to the study cited by Caplin, an astonishing 35 percent to 40 percent of all income earned by self-employed people—doctors, lawyers, plumbers, repairmen and the like—is never reported. A third of all rental and royalty income goes unreported, the study concluded, as does some 20 percent of capital gains on property sales and up to 16 percent of interest and dividend income.

Obviously, a serious deterioration has occurred in the once-vaunted willingness of the American taxpayer to pay what he honestly owes.

Part of the answer lies in a lack of tough, credible enforcement. It's mind-numbing to note that President Reagan's budget-cutters propose to make tax fraud even more attractive by firing hundreds of the revenue service's investigators.

Inflation itself is a major villain. Although the average American's purchasing power has gone up little if any in recent years, inflation has pushed him into higher and higher tax brackets.

As he casts around for a way to cope, the taxpayer has the example set by businessmen and other upper-income people, egged on by their lawyers and tax accountants, in seeking out tax shelters.

Not all tax shelters are bad, of course. Most were enacted to encourage investment in socially useful or productive channels. And genuine efforts have been made to close the blatant rip-offs resulting from willful distortions of legal intent.

But, as tax lawyer Gerald J. Robinson wrote in the New York Times, "As soon as loopholes are closed, clever tax attorneys hired by the promoters invent others."

Most people, however, have neither the money nor the know-how to play the game. About the only tax shelter available to them is the interest paid on their home loans. A certain number are tempted to create their own shelters through petty and not-so-petty cheating.

But explanation is one thing, and justification quite another. Every citizen is entitled to complain about taxes, and to work within the system to have them reduced; he is not entitled to go outside the law. Proposition 13 shows that an aroused citizenry can make its fight within the system and win.

The average citizen is also entitled to demand that his elected representatives do a better job of outlawing abusive tax shelters and keeping new ones out of the law.

But let's face it. We have high taxes because we have high government spending. And we have high spending because we expect Washington to provide for national defense, pay Social Security, support the educational and health-care systems, subsidize farming and scientific research, and throw a lifeline to the needy.

The Reagan Administration is reflecting a public consensus that government has grown too expensive. If enough people let their congressmen know that they agree, spending cuts will open the way for tax cuts. Just as rising taxes have helped make crooks out of honest people, falling taxes can help reverse the process.

Meanwhile, it's incredible that so many Americans wink charitably at the charlatans who, by giving themselves a free ride, make fools of the rest of us.

[From the New York Times, Mar. 15, 1981]

STOP TAX CHEATS, HELP THE ECONOMY

(By Harold W. Felton)

The Internal Revenue Service has estimated a revenue loss of $35 billion for 1976 and of $50 billion for 1979. Such is the extent of the "underground economy," which pays no income taxes.

Figures of this size seem worthy of serious consideration by President Reagan in his effort to avert the day of reckoning.

In his report for 1979, the Commissioner of Internal Revenue, Jerome Kurtz, disclosed that $75 billion to $100 billion in individuals' 1976 income from legal activities were unreported. The result was a loss to the Government of $13 billion to $17 billion in taxes. The commissioner also estimated that individuals engaged in illicit drug sales, illegal gambling, and prostitution in 1979 escaped the payment of $6 billion to $9 billion in taxes from an estimated $25 billion to $35 billion in unreported earnings. Many others believe all of this is but a small part of the underground economy. Later studies put the total of taxes so evaded in 1976 at $35 billion. For 1979, the activities of the underground economy resulted in an estimated tax loss of $50 billion.

Government officials have estimated that additional agents, searching out and uncovering those who file no returns, would produce $12 for each $1 spent.

The President may very well find these circumstances worthy of serious consideration as he fights to improve the nation's economic condition, which he describes as a calamity.

There is a fair and simple way to resist some tax cheats. That is enactment of a law providing for withholding of taxes on dividends and interest.

The I.R.S. has estimated that unreported interest and dividends amounted to $7.5 billion to $14.1 billion in 1976. The tax loss amounted to $1.25 billion to $2.3 billion. Also, fiscal observers believe that very substantial amounts of tax money could be recovered by reporting of, and withholding of tax on, payments made to independent contractors.

It is fair to say that money spent by the I.R.S. is a remarkable bargain for the public. In 1979, it cost a mere 46 cents to collect $100 in taxes. However, the I.R.S. is not supplied with enough money to search out tax cheats or to examine many returns. Financial need restricts it to the examination of about 2 percent of individual returns.

The process yields about $5 in tax for each $1 spent. That seems to be money well and profitably used.

More money for more examinations obviously would supply more revenue as well as long-delayed justice for tax cheats. In 1980, 2.02 percent of individual returns filed (for 1979) were examined, resulting in $1.977 billion additional tax and penalty recommendations, an average of $5,212 per return. No change was made in 39 percent of the returns examined. In 1980, 6.48 percent of corporate returns filed were examined, resulting in $6.008 billion additional tax and penalty recommendations, an average of $44,972 per return. No changes were made in 21 percent of the returns examined.

Some, or most, of the recommendations of additional tax and penalties arise out of the serious problems that honest taxpayers experience in attempting to make correct returns in the face of the obviously arcane provisions of the Internal Revenue Code and the Regulations.

Taxes are the lifeblood of the nation. Honest taxpayers justifiably may resent the fact that tax cheats fail to contribute to this all-important blood bank.

If President Reagan communicates the stark reality of the present condition to the people in the fashion he seems capable of doing, the honest taxpaying public will respond enthusiastically. Perhaps tax cheats can then, at long last, supply some of the very large amounts of money the Government needs to work its way out of the economic mess.

Mr. Reagan has said that there will be no sacred cows in the changes he proposes. Among the most sacred of sacred cows have been the tax cheats. They are waiting to be milked, with the others who honestly and voluntarily undergo the process.

There is a great Augean stable waiting for the President's attention. The miasma that suffocates the Internal Revenue Code with exceptions, deductions, exclusions, complications, irrationality, tax shelters, and loopholes, is worthy of a new Hercules. But in order not to get lost in all of that now, the first order of business is to allow the tax cheats to join in the solution of the nation's problems.

Harried citizens, eager to pay their fair part, may hope that President Reagan will agree with William Jennings Bryan, who said: "When I find a man who is not willing to bear his share of the burdens of the government which protects him, I find a man who is unworthy to enjoy the blessings of a government like ours."●

LEGAL SERVICES CORPORATION

● Mr. HART. Mr. President, as Congress continues its efforts to reduce Federal spending and achieve a balanced budget each of us has a responsibility to identify programs that do not work, are no longer necessary, or can be deferred. We have worked over the past month to do that and have successfully proposed savings of more $40 billion. We have an equally important responsibility, however, to identify and preserve those programs that are critically needed, do work well, represent an efficient use of Federal dollars, and successfully accomplish their intended objectives. The Legal Services Corporation is such a program. When the Budget Committee begins consideration of the first concurrent budget resolution for fiscal year 1982 next week, I will propose restoring approximately $260 million of the $321 million for the Legal Services Corporation which the President has proposed to terminate.

Two plain facts about the Legal Services Corporation support its continued existence at an adequate level of funding. First, it serves an absolutely critical public need which would otherwise not be served. Second, it serves it well, with a degree of efficiency and effectiveness almost unmatched by any other Federal

program. By the President's own standards this is a program his administration should support, if not look to, as a model of how to allocate scarce resources.

The Legal Services Corporation provides access to legal assistance for millions of Americans who would otherwise have nowhere else to turn. This access to justice is the basic underpinning of any society based on law. Equal enforcement of our laws is one of this Nation's oldest ideals. All Americans, Democrat or Republican, liberal or conservative, black or white, subscribe to it, and cherish it. But there can be no equal enforcement of the law unless all citizens can participate in the legal process.

Federally funded legal services are currently available to more than 30 million people living at or below the poverty line. The Legal Services Corporation now funds more than 300 legal aid programs which operate more 1,450 offices throughout the country. All 3,000 counties in the United States are served by the program.

Last year legal services handled more than 1.5 million legal matters affecting the lives of millions of low-income Americans. Such legal assistance is absolutely essential when the law increasingly pervades every aspect of citizens' lives, particularly the lives of those who depend on Government aid for food, shelter, and other vital services. The Corporation-funded legal programs helped these individuals resolve routine family law matters, housing problems, consumer disputes, and other similar legal problems. Through the programs funded by the Legal Services Corporation the poor have been able to make our justice system work for them.

In my own State of Colorado, low-income people receive assistance with their civil legal problems through four nonprofit legal services programs. These programs receive 80 percent of their funding from the Legal Services Corporation. With this funding, legal services were provided to 12,633 low-income people in the last fiscal year.

Legal services clearly meet one of our society's most essential needs. Without Federal funding this need would not be met. Legal Services Corporation funding supplies approximately 85 percent of the total funding for civil legal services nationwide for the poor. The remaining 15 percent is supplied by private attorneys, foundations, and others. The Reagan administration has not offered a shred of evidence to indicate that any other resources would be available to substitute for or replace Federal funding of legal assistance. Pro bono services meet only the smallest fraction of the need. And State and local officials have never viewed as their responsibility to fund legal aid lawyers who may sue them on behalf of low-income clients.

The Federal legal services program has worked exceedingly well since it was initiated in 1965. It is a model of administrative efficiency and has proved to be an economical and effective structure for funding legal assistance to the poor. Overhead costs are less than 3 percent of its total budget.

The Legal Services Corporation does not provide legal services directly. Rather it funds State and local legal service programs across the country. Corporation-funded programs are all locally controlled through boards of directors made up of residents of the communities they serve. This local control allows each program to effectively meet the particular needs of its clients.

Because the legal services program meets essential basic needs and has a demonstrated record of efficiency and effectiveness I will strongly oppose the administration's proposal to terminate all funding. Like other Federal programs the Legal Services Corporation must be prepared to accept some cuts in its budget. Anything greater than a 20-percent cut would, however, seriously damage the program and undermine its ability to efficiently provide needed legal assistance. Accordingly, I intend to propose restoring approximately $260 million for the Legal Services Corporation both in the Senate Budget Committee and on the Senate floor if necessary.

I will oppose any efforts to include legal services in some kind of block grant proposal, because such a funding mechanism would also seriously undermine continued aggressive legal representation of the poor.

A block grant approach would require a total restructuring of legal services. Block grants would create conflicts of interest for State or local officials responsible for allocating funds since the poor's legal disputes are often with the same public officials who also make decisions about low-income housing, welfare, health care, and other issues of particular importance to the poor. Block grants would also impose a new layer of bureaucracy in a program that has consistently been a model of administrative simplicity. Finally, it will destroy the political independence essential to insuring access to justice to the poor.

The Legal Services Corporation represents government at its best. It should be maintained at a level of funding adequate to insure that all Americans will have access to our system of justice.●

NEED FOR A LIBERAL GUESTWORKER PROGRAM

● Mr. SCHMITT. Mr. President, on February 5, 1981, the Las Cruces, N. Mex., Sun-News published an editorial dealing with proposals by the Select Commission on Immigration. This editorial was reprinted from the Milwaukee Journal, an area far-removed from the Southwestern border and New Mexico. It is interesting to note that even in Milwaukee the need for a liberal guestworker program is needed, at least for a period of time. The editorial stated:

> First, the nation needs to greatly expand its present guestworker programs so that aliens could legally enter the United States for jobs that Americans don't care to do.

I and others who have studied this issue know that a guestworker program is not the entire answer but only a part of the solution. I have introduced legislation, S. 47 (The United States-Mexico Good Neighbor Act of 1981), cosponsored by Senators LAXALT, LUGAR, HATFIELD, MCCLURE, GOLDWATER, and GARN, which would set up such a program. Identical legislation (H.R. 1650) has been introduced by Representative LUNGREN, a member of the House Judiciary Committee.

Mr. President, I request that the editorial I referred to earlier be printed in the RECORD. I also request that a fact sheet on S. 47 be printed as well.

The material follows:

[From the Las Cruces (N. Mex.) Sun-News, Feb. 5, 1981]

HANDLING THE FLOW OF THE ILLEGAL ALIEN

(Reprinted by permission of the Milwaukee Journal)

If the United States ever hopes to control the excessive flow of immigrants, it must be able to easily identify who is and who is not in this country legally. To its credit, a federal commission studying immigration policy came to grips with that reality in recommending that some kind of national identification system be established.

The Select Commission on Immigration, at work for the last 18 months, now proposes the creation of some kind of identification procedure by which an employer could be assured, before hiring, whether a prospective worker was a U.S. citizen or legal alien. Currently, millions of aliens annually enter and stay in the United States illegally, lured by the prospect of wages far beyond what they could earn in their native countries. The biggest source of such illegal alien labor is Mexico.

The commission's recommendation was not easy to reach. There are justifiable concerns about civil liberties under any such ID system. No one should want a totalitarian-type internal passport system similar to that in the Soviet Union. An improperly designed ID system also could promote overt discrimination against "foreign-looking" minorities. Such people, citizens or not, might be the only ones continually asked to verify their status.

However, the enormity of the illegal immigration problem outweighs the ID program's risks, in our opinion. And a well-thought-out ID system could keep those risks to a minimum. For instance, one method being considered would involve a tamper-proof Social Security card that an employer could check to determine a worker's status. The key to any system would be assurance of verification.

A worker-ID system alone would not halt the flow of illegal immigrants seeking jobs. The lure of pay would still be here. Some employers probably would continue callously to exploit such workers by paying substandard wages (but higher than the aliens could ever earn at home). Other steps would need to be taken, too, to curb the problem.

First, the nation needs to greatly expand its present guestworker programs so that aliens could legally enter the United States for jobs that Americans don't care to do. Second, stiff penalties should be imposed on employers who continue to hire illegal aliens. No longer should employers be able to claim that they innocently did not know a worker's status.

Even that approach would not completely halt illegal immigration, but it would provide better tools to control the flow across U.S. borders. Current immigration laws can't cope with the problem.

THE UNITED STATES-MEXICO GOOD NEIGHBOR ACT OF 1979

This bill would amend the Immigration and Nationality Act to establish a temporary worker visa program between the United States and Mexico. Under the program, workers would be issued six month visas which

would allow them to enter the United States to seek employment.

THE CURRENT IMMIGRATION SITUATION

The United States shares a 2,000-mile border with Mexico. In no other part of the world does a developing country with severe economic problems border such a technologically and economically advanced country. The combination of unfilled jobs in this country and substantial unemployment and underemployment in Mexico has created a massive migration to the United States. Changes in the immigration law have caused much of this migration to become illegal. From 1942 to 1964, the bracero program admitted large numbers of Mexican workers to perform agricultural work in the United States. The end of this program and the imposition of a ceiling of 20,000 immigrant visas per year in 1976 have contributed to the problem.

Most illegal workers enter this country to seek temporary employment. They come for short periods of time, work to meet specific economic needs and then return to Mexico. They have no intention of permanently migrating to the United States.

The workers normally take jobs which are unattractive to American workers who have unemployment compensation and welfare as an alternative. While over two-thirds of illegal aliens contribute to Social Security and pay income taxes, fewer than one-tenth collect unemployment or welfare benefits, enroll their children in public schools or receive free medical assistance in the United States.

This illegal migration benefits Mexico by absorbing workers who would otherwise be unemployed or underemployed. It also helps slow migration to the overcrowded cities. Finally, Mexican workers in the United States send large portions of their income home, providing income for their families and improving Mexico's balance of payments.

PROVISIONS OF THE BILL

Findings—This section recognizes the necessity of establishing a legal framework for Mexican labor in the United States and points out the advantages of this program over other proposals.

Establishment of Visa Program—Section (e)(1): This section directs the Attorney General to establish the program in consultation with the Secretary of State. The section specifically mandates that the visas shall "permit each alien to temporarily perform services or labor within the United States for a period not to exceed 240 days during any calendar year". Further, the section disallows the requirement of a petition from a prospective employer. Finally, the section prohibits any limitation on geographical area or type of employment.

Section (e)(2): This section sets a penalty for violation of the visa restrictions of ineligibility for five years. It also sets a ten year ineligibility as a penalty for illegal entry into the United States.

Section (f): This section allows the Attorney General to put specific restrictions on employment under this program at the request of the Secretary of Labor. This request would follow a demonstration by employers or employees that aliens would displace domestic workers at a specific site.

Section (g): This section directs the Attorney General to set numerical quotas for visas, considering such factors as the number of workers sought, the availability of domestic labor and the projected needs of prospective employers.

United States Consulates in Mexico—This section authorizes the Secretary of State to expand the Consulates to implement the program (paragraph A) and act with Mexican officials to insure awareness of the program (paragraph B). It also directs the Secretary of Labor to take steps to inform Mexican aliens in the United States about the program (paragraph C).

Nonimmigrant Category—This section amends the classes of nonimmigrants in the definitions section of the Immigration and Nationality Act, 8 U.S.C. 1101(15).

Effect of Deportation—This section amends 8 U.S.C. 1182 to prohibit the Attorney General from consenting to the readmission of an alien deported for violating provisions of this program.

Prohibition on Adjustment of Status under Temporary Worker Visa Program—This section amends 8 U.S.C. 1255 to prohibit the Attorney General from adjusting the status of a temporary worker to that of a permanent resident.

Report to Congress—This section requires the Attorney General to report to Congress semi-annually about the program.

Bilateral Advisory Commission—This section proposes the establishment of an Advisory Commission to advise the Attorney General in establishing the program.

Authorization—This section authorizes the necessary appropriations.

Terminates—10 years after enactment.

THE EFFECT OF THE PROGRAM

This program will bring a large proportion of Mexican labor within the law, increasing the credibility of the immigration law. As legal workers, Mexicans can insist on adequate wages and decent working conditions. By eliminating the need for smugglers and dangerous border crossings, the program will attract those workers who are currently entering the country illegally.

The program will allow U.S. employers to obtain needed workers in a free market system. At the same time, it will benefit domestic workers by changing an exploitable competitor into a legal work force, competing on equal terms. The restriction of certain worksites will insure that domestic workers are not displaced by the temporary workers, while avoiding the abuses of a prearranged contract system.

This bill recognizes that a significant number of Mexicans supplement their income by temporary work in the United States and that this country has need for such short term labor. The temporary worker visa program provides a legal framework for this situation.●

NATIONAL RECOGNITION DAY FOR VETERANS OF THE VIETNAM ERA

● Mr. SARBANES. Mr. President, I want to express my strong support for Senate Joint Resolution 40, designating April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era."

That such a resolution should be necessary reflects one of the unhappier aspects of our recent history. As the preamble to the resolution declares, "the valorous service of Vietnam veterans has never been properly commemorated or recognized." It is long past time to correct this situation, and to pay tribute to the hundreds of thousands of American men and women who honored their Government's call to military service.

Expressions of respect and support for our Vietnam veterans, however, are not enough in themselves. The difficult challenges which veterans faced of readaptation to civilian life, after a combat experience that had no parallel or precedent in our history, long went unrecognized. Only after all combat had ended, and most veterans had returned to civilian life, were programs developed to help meet the problems of readjustment that confronted veterans returning from Vietnam.

The readjustment counseling program for Vietnam-era veterans, created by the Health Care Amendments Act of 1979 (Public Law 96–22), has been one of the most effective of these programs. Staffed principally by Vietnam veterans, outreach services were provided through 91 centers to 50,000 veterans and 12,000 members of their families between April 1980 and January of this year. The veteran's vocational rehabilitation program and of course veterans' medical and surgical services have also been particularly important.

In light of the proven effectiveness of these programs, it is incomprehensible that the administration proposed to terminate or curtail them. Whereas for the current fiscal year Congress appropriated $11.2 million for the existing counseling program and an additional $6 million for its expansion into 44 new areas, the administration asked that the program simply be eliminated next year. Other budget proposals would make impossible full staffing of veterans' vocational rehabilitation, and would require reduction of 20,000 in the staff of the Veterans' Administration's Department of Medicine and Surgery by 1986. These policies are being advocated despite overwhelming congressional support for legislation enacted in the last Congress to improve medical care in the VA system and, most important of all, despite the demonstrated success of the programs themselves. I am pleased that the Congress has moved to check and reverse these ill-advised administration proposals.

Senate Joint Resolution 40 calls for designation of April 26, 1981, as a National Day of Recognition for Veterans of the Vietnam Era, and for appropriate programs and ceremonies of commemoration. Such recognition is long overdue. To have more than symbolic importance, however, it must be accompanied by a renewal of our commitment to the veterans of Vietnam, to the new programs established to meet the unique problems associated with service to Vietnam, and the longstanding programs through which we have traditionally recognized the Nation's responsibility to those who have served in the Armed Forces.●

AN INNOVATIVE LEADER IN AN INNOVATIVE COMPANY

● Mr. DOLE. Mr. President, today marks the end of an era at the General Electric Co. After 41 years with GE, Reginald H. Jones retires as chairman of the board, a post he has occupied since 1972.

Reginald Jones is more than just a good business executive. He is an opinion leader among opinion leaders. During his career with GE he was often seen taking early positions on issues concerning public policy; issues which many of his colleagues came to later. He is a man not unwilling to take an unpopular position among his colleagues when he felt it to be in the best interests of the corporate, public, and private good. He was

a man many times in the forefront as a proponent of embryonic notions which later came to fruition throughout the entire business community as accepted practice, procedure, and policy.

Since his graduation in 1939 from the University of Pennsylvania, he has remained dedicated to academia as well and his current status as a member of the board of trustees of the Wharton School must not be overlooked when reviewing his career accomplishments to date.

Mr. President, there is a great deal which can be learned from the career of Reginald Jones, and it is to his credit that his advice and counsel has been sought by both Government and corporate officials.

Today as we continue debate on the budget resolution, there is perhaps an important theme expressed many times by Mr. Jones which might be prudent to remember. What I am referring to is his belief in the need for long-term investment based growth and planning as opposed to a short-term, quarterly profit orientation. In a recent interview, Mr. Jones stated his feeling that there appeared to be a "management malaise" within the corporate boardrooms. He partially attributes this "malaise" to executives more attentive to short-term benefits than to the long range needs of their organizations.

Mr. President, this message while carrying with it more of a business orientation makes a great deal of sense when applied to the budget battle going on here today. The analogy simply stated is that we must look down the road and see what our actions on the budget today will produce in the years to come. We have two options: First, we can work with the administration to bring inflation rates down, get the budget under control and restore solvency and stability to our economy in the future, or second, we can concentrate on the short-term gains to be made by increasing various functions within the budget without regard to their long-range effects. I, along with Reginald Jones, believe that the choice is quite clear.

In closing the legacy of corporate-social responsibility, long-range economic planning and the commonsense approach to business and government which Chairman Jones leaves behind will long be remembered and practiced at GE, in the business community and hopefully in government.

I wish all the best life has to offer him and his family as they enter a new phase of life, and I salute his decision to remain an active and responsible voice and participator in both the public and private sectors.●

THE LIBERAL WHO DEFIED THE RIGHTWARD TIDE

● Mr. BURDICK. Mr. President, the Outlook section of Sunday's Washington Post contained an excellent profile of the newest member of North Dakota's congressional delegation, BYRON L. DORGAN. BYRON brings a special blend of energy and intelligence to the Congress, and we in North Dakota are proud to have him representing our State in the House of Representatives. I ask that this article be printed in the CONGRESSIONAL RECORD.

The article is as follows:

[From the Washington Post, Mar. 29, 1981]

THE LIBERAL WHO DEFIED THE RIGHTWARD TIDE

(By Al McConagha)

Almost unnoticed in the conservative tidal wave washing over Washington is the arrival of a newly elected prairie populist straight from the traditions of William Langer and Hubert Humphrey.

Somehow out of that heavy Republican sea, this old opponent of the Vietnam War and friend of Kennedy politics splashed into the House looking remarkably like a liberal although he calls himself a progressive.

North Dakota's Byron Dorgan was the only Democrat in the nation to win an open House seat previously inhabited by a Republican, and he did it in what was widely viewed as a classic showdown between a liberal Democrat and a "New Right" Republican.

This 38-year-old scourge of corporate America defeated State Sen. Jim Smyowski with 57 percent of the vote in a state that favored Ronald Reagan by more than 2 to 1 and threw all other Democrats up for reelection out of office.

Even more unusually, Dorgan made this leap to Capitol Hill from his post as state tax commissioner, demonstrating that he may be the first popular tax collector since his predecessors were driven from the temple.

Of course he wasn't uniformly loved as the state's tax man. Indeed, he used to get a lot of mail addressed to Byron L. Dorgan, SOB.

"Being an optimist and a Norwegian," he said recently, "I preferred to interpret that address to mean, Byron L. Dorgan, State Office Building."

He goes to the stump with whimsy. "It's true I'm smart," he used to tell skeptical voters. "I'm so smart I graduated in the top five of my high school class . . . Nine of us graduated that year in Regent, North Dakota."

"We wrote to a woman to find out why she filed a tax return one year and didn't the next," the former taxman told one crowd. "Her husband wrote back, 'Dorgan, I received your letter. It is with regret I inform you that my loving wife passed away last year and I am taking care of her affairs.

" 'I want you to know that in the matter of the income tax my wife has gone to heaven. And I hope you go to hell.' "

Instead Dorgan last year headed the North Dakota campaign of Sen. Edward Kennedy because he felt, among other things, that Jimmy Carter "did not deserve reelection." Once Carter was renominated, however, Dorgan supported him against Reagan.

It was his effort to nominate Robert Kennedy in 1968 that led to his first political office. Dorgan had returned to his native North Dakota from Colorado to manage Kennedy's campaign when he caught the attention of Gov. William Guy, who appointed him to fill a vacancy as state tax commissioner.

In 1972 Dorgan acquired some national attention as the only state tax official to write Richard Nixon that the Christmas bombing of North Vietnam made him feel ashamed to be a tax collector.

That year Dorgan ran for the post of tax commissioner—it is the only elective state tax collection job in the country. He prevailed with 70 percent of the vote and settled down to his crusade against tax-evading corporate America.

He has discovered that many large corporations earning income in North Dakota never filed returns. Moreover, others were paying less than they should by making it appear they made most of their money in low-tax states.

"It was easy to send an auditor to the drug store or the gas station or the mom and pop store in Fargo or Grand Forks," Dorgan said. "But North Dakota never bothered to send them to the big corporate headquarters of firms that were competing against them."

"I don't mean to assert that all corporations are crooks," he said. "But there are some that are very derelict. Some flagrantly violate all principles of accounting and walk the thin line between fraud and unethical practices."

So he started sending out auditors: "We'd send a guy to New Jersey for three weeks and he comes back with a check for $625,000. It was phenomenal, incredible. We would start checking on these people and they would just pay up."

Not all were that easy. One of his bigger coups was Western Electric. This AT&T subsidiary was the prime contractor on the ABM development near Grand Forks and was pretending to be some nontaxpaying extension of the Department of Defense.

"We couldn't get their attention," Dorgan said. "So we sent them a bill for $54 million, which under North Dakota law is fixed unless protested within 30 days. Well, that got their attention. Within weeks they were there with eight lawyers and a general.

"The first thing they tried to do was say, 'Hey, you're crazy. Nobody has ever tried to tax a missile system.' Then we went to court. Three years later North Dakota got [in a settlement] over $4 million."

This was part of the some $23 million he collected in unpaid corporate taxes and helped develop his potent political theme: "Little people slave and pay taxes while big corporations duck everything possible."

He also went after individual tax evaders. At one press conference he declared he would prosecute 250 unnamed "hard core" evaders with incomes over $10,000 a year. Within two weeks 280 people who had never filed somehow got around to it.

"It's funny. People started calling me at home at night apologizing. They would say they had just forgot to send in their returns but they would be getting them right in in the morning."

Meantime, he ran for the House in 1974 against former Rep. Mark Andrews, who was elected to the Senate last year. Andrews, who usually won with about 70 percent, was held to 55. "I singed his tail a little bit," Dorgan said. In 1976 he was reelected tax commissioner, with almost 80 percent of the vote.

Last year, when that House seat opened up, he was ready again. He promised to vote for a strong America but talked also of the need for meaningful arms limitations talks and was anxious about the proliferation of nuclear weapons.

While he spoke of cutting waste from the federal government, he also called for increasing medical benefits for the elderly and the poor.

"I consider myself a progressive politician. I want to speak up for the little person who otherwise doesn't seem to have a voice in government. But I don't like liberal/conservative labels.

"I regard myself as liberal on some issues and conservative on others. The progressive label fits pretty well.

"People think it was a conservative year. But I think you can go out and be a voice for the folks who don't own big blocs of Exxon. You can be a voice for the people buying gas at the pumps who are angry that it is helping Mobil buy a department store.

"I think you can be a voice for these people."●

COSPONSORSHIP OF S. 63—AMENDMENT OF THE CLEAN AIR ACT

● Mr. DURENBERGER. Mr. President, I am pleased to announce my support

and cosponsorship of S. 63, a bill to amend the Clean Air Act to provide compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization of the steel industry.

This bill is in response to the unique capital formation and environmental problems of the steel industry and recognizes the progress in environmental control by the industry. That progress is demonstrated by the fact that while only 32 percent of air pollution sources were in compliance or on court-ordered compliance schedules in July of 1978, by the end of this year that number will be up to 85 percent.

The 3-year extension would allow until the end of 1985 for these requirements to be met. Air emissions for the entire industry will have been reduced by 97 percent from uncontrolled levels by that time.

The bill is the result of a compromise agreement reached by representatives from the Environmental Protection Agency, the steel industry, the United Steel Workers, and the environmental community. It must be passed as introduced, without amendment, because of the requirement to maintain the balance achieved in the bill through the efforts of the several interests represented.

The bill responds to the fact that the U.S. steel industry is badly in need of modernization in order to be competitive with steel producers in Japan, Germany, and other industrialized nations.

Japan, for example, has 50 percent of its capacity using the continuous casting process—which provides for more efficient energy use and greater yields from raw material—as compared with 17 percent of U.S. capacity. The Japanese average about 20 percent greater efficiency, and have been spending 50 percent more per ton on capital investment than the U.S. steel industry.

The industry must modernize to remain competitive, but is in poor financial condition. The bill would allow the industry to negotiate the consent decrees on each steel producing facility and any money deferred from installation of emission control devices would be dedicated to modernization of the steel producing facility.

A stable, competitive, efficient steel producing industry is of utmost importance to the entire country, but to some of the citizen's of Minnesota it has special meaning.

The Minnesota iron-mining industry suffered one of its worst years in 1980. Employment dropped 20 percent and production 25 percent from the year before. That meant a layoff in October of 1,600 workers at Erie Mining in Hoyt Lakes, 1,100 from National Steel Pellet Co., in Keewatin in September, 550 workers out for 5 months at Butler Taconite Co., in Nashauk, 180 workers out at Reserve Mining Co. Silver Bay, and a reduced work week for 4,200 hourly employees at United States Steel Corp. at Minntac. Almost the entire production of taconite is used in U.S. steel mills and demand is very much a derivative of domestic production. Modernizing the U.S. steel industry is of paramount importance to Minnesota.

The industries' efforts to negotiate and find a balance with the other values and concerns of importance in this country are to be commended.

The bill is designed to avoid seriously degrading air quality while freeing urgently needed capital for use in the modernization of steel facilities. To provide this flexibility, the industry has agreed to be in compliance by the end of the 3-year period with the present standards in the Clean Air Act and to seek no further steel specific amendments to alter clean air requirements and deadlines.

Finally, I would urge the Senate to take prompt and favorable action when the bill is reported out of the Environment and Public Works Committee.

The steel industry needs to know that the bill as introduced is supported so that the decision concerning hundreds of millions of dollars needed immediately for capital investment in either pollution control equipment or modernization can be made in a timely manner. The present 1982 deadline is not far off. The industry deserves to know our decision. The people working in the iron mines of Minnesota need to know as well. Their hope for the future is intimately tied with our decision regarding the future of this basic industry.●

AUTHORITY FOR COMMITTEE TO FILE A REPORT

Mr. COCHRAN. Mr. President, I ask unanimous consent that the Committee on Armed Services have until midnight tonight to file a report.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR JEPSEN AND SENATOR BUMPERS TOMORROW

Mr. COCHRAN. Mr. President, I ask unanimous consent that, following the recognition of the two leaders under the standing order on tomorrow, the Senator from Iowa (Mr. JEPSEN) be recognized for not to exceed 15 minutes and the Senator from Arkansas (Mr. BUMPERS) be recognized for not to exceed 15 minutes.

Mr. CRANSTON. Mr. President, those requests have been cleared and there is no objection on our side.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. COCHRAN. Mr. President, I move, in accordance with the previous order, that the Senate stand in recess.

The motion was agreed to and, at 11:29 p.m., the Senate recessed until tomorrow, Thursday, April 2, 1981, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate April 1, 1981:

DEPARTMENT OF COMMERCE

William H. Morris, Jr., of Tennessee, to be an Assistant Secretary of Commerce, vice Herta Lande Seidman, resigned.

DEPARTMENT OF DEFENSE

Lawrence J. Korb, of Virginia, to be an Assistant Secretary of Defense, vice Robert Burns Pirie, Jr., resigned.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Dorcas R. Hardy, of California, to be an Assistant Secretary of Health and Human Services, vice Cesar A. Perales, resigned.

DEPARTMENT OF STATE

Lawrence S. Eagleburger, of Florida, a Foreign Service officer of the class of Career Minister, to be an Assistant Secretary of State, vice George S. Vest, resigned.

DEPARTMENT OF THE INTERIOR

Garrey Edward Carruthers, of New Mexico, to be an Assistant Secretary of the Interior, vice Guy Richard Martin, reseigned.

FEDERAL HOME LOAN BANK BOARD

Richard T. Pratt, of Utah, to be a member of the Federal Home Loan Bank Board for the remainder of the term expiring June 30, 1981, vice Jay Janis, resigned.

Richard T. Pratt, of Utah, to be a member of the Federal Home Loan Bank Board for the term expiring June 30, 1985. (Reappointment)

SECURITIES AND EXCHANGE COMMISSION

John S. R. Shad, of New York, to be a member of the Securities and Exchange Commission for the remainder of the term expiring June 5, 1982, vice Harold Marvin Williams, resigned.

John S. R. Shad, of New York, to be a member of the Securities and Exchange Commission for the term of five years expiring June 5, 1986, vice Stephen J. Friedman, term expiring.

EXTENSIONS OF REMARKS

TRIBUTE TO BUDDY HUFF

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. CHAPPELL. Mr. Speaker, recently, O. D. "Buddy" Huff, a constituent of mine was elected to the Florida Citrus Hall of Fame. This historic event was detailed in an article which ran in the March 3 issue of the Ocala Star Banner.

Because Buddy contributed so much to our State's citrus industry and because I personally think he is one of the finest people in my district, I would like to present to all of my colleagues the full text of the article on Buddy Huff, in order to provide all of the Members of this body with an example of a dynamic and influential leader.

The newspaper account of Buddy Huff's contribution follows:

GROWERS ELECT MCINTOSH MAN TO CITRUS HALL OF FAME

(By Frances Devore)

MCINTOSH.—It's a long way from a small-town citrus packing house at the end of the Great Depression to the Florida Citrus Hall of Fame, but Buddy Huff completed that journey at Winter Haven, where he received accolades from state citrus officials.

The citation from the Citrus Grower/Industrial Selection Committee naming Huff to the highest honor the state citrus industry can bestow described the Marion County man as a grower, packer, gift fruit shipper, and dynamic and influential leader.

"O. D. "Buddy" Huff may be one of the best loved and most respected men in the Florida citrus industry," the committee said. "The respect and admiration is well-deserved and stems from years of dedicated service to the citrus industry. He is best recognized for his leadership during an unprecedented industry growth period."

The plaque notes that Huff served on the Florida Citrus Commission from 1962-71, when the citrus industry saw production and sales increase in unequaled proportions in Florida.

During six of those years, Huff was commission chairman, something of a record in itself. During his 10-year tenure, Huff fostered many programs contributing to the success of the industry, particularly through leadership in opening new markets and in innovative advertising and promotion programs.

One of Huff's innovative ideas was to move advertising visuals into orange groves. He said this came about after tourists were questioned at Florida roadside Welcome Stations on their reasons for visiting Florida. The primary reason was the Florida beaches, and the second most popular was to see the state's orange groves.

A canny businessman, Huff has more than four decades of grassroots experience. He entered the industry in 1939, with a small packing house operation in the old Christian-Neal building where McIntosh Meats is now located.

In 1941, he moved a block downtown, where he constructed the building the firm occupies on U.S. 441, north of Ocala.

Over the years, there have been many changes in the industry, Huff says. Where it was once a fresh fruit operation, the industry today is mostly an orange-concentrate enterprise.

Huff recalls that when he entered the business, hucksters from states to the north came down several times during the picking season and purchased fruit, taking it back home to peddle.

He says he has enjoyed a good business, with repeat customers year after year, mainly because his packing house in north Marion County was the first tourists encountered when driving south. He says they saved time and money by not having to go all the way to Leesburg for fruit.

Later, trains took much of the fruit to northern markets, but the McIntosh depot and others along the way are closed now and the tracks are being taken up. Fruit moves primarily by trucks headed south to the concentrate plants.

The need to make a few extra dollars in hard times led to the present-day concentrate industry, Huff said. It came about when the old Lykes Pasco Processing Plant in Dade City offered to buy fruit unsuitable for shipping.

"Before that, such fruit was just dumped," Huff said. "When Lykes offered to buy it, I hired a crew of women to pick out the best of the culls and sent them to Dade City for concentrate. We only made a few dollars, but a dollar was worth a whole lot more then."

"Now we couldn't exist without concentrate," he adds.

Huff said when he became chairman of the citrus commission in 1965, 70 million gallons of citrus concentrate were sold in Florida. Six years later, sales were 140 million gallons.

The importance of concentrate to the industry might best be shown by the devastating freeze this winter. Through quick harvesting for concentrate, many growers headed off what could have been economic ruin.

Huff said the concentrate process was developed in California. Ironically, however, California growers cannot make use of the process, because the Golden State's citrus fruit does not have the flavor to bring it back to fresh-fruit taste when it is reconstituted, he said.

Huff branched out as a grower by gradually buying up neglected or abandoned groves, bringing them back to production and filling in gaps left by dead trees with new ones.

"If you take care of a citrus tree, it will renew itself," Huff said. "Those old trees are about as tough as pine trees. They always respond to good care, even after real abuse."

Smiling, he added, "If you take care of them, they'll come back. A tree will fight its own battle; all you have to do is maintain it."

That's the reason Huff feels the Florida citrus industry, especially in central Florida, will come back in good shape, despite the devastation this year from Florida's record-breaking winter weather.

"I think there is no doubt we will have citrus right along," he said. "I feel a lot better about it now, but I was awfully worried at one time."

He and other growers are watching a record flush of bloom on groves throughout the state that looks good but is vulnerable at this point to late frosts.

"Nothing can stop this flush of new bloom and leaf growth; only God can stop it," he said. "We just have to wait and see what happens. It looks like most groves are putting out nicely; the next thing will be to see if the bloom can stick and make a crop."

Huff said the crop will probably be small this year and maybe next year, but he said that a short crop will bring higher prices, giving the growers about the same amount of money as a full crop.

Citrus troubles began this year on Jan. 13, when temperatures fell as low as 11 degrees in Marion County. Prolonged cold of 27 degrees or lower poses a real threat to unprotected groves.

Huff said he did not fire smudge pots that night, because of the high price of fuel and the forecast for three nights of sub-freezing weather. Instead, the cold let up the next night.

He said the defoliated trees look in worse shape than they are. Leaf loss is actually a good sign, showing that the tree is still alive. If there is wood damage, there is no way for the sap to get through and throw off dead leaves.

According to Huff, some groves in Florida "were hurt bad, but others look pretty good."

He said trees in the Marion area actually suffered less damage this winter than those further south, because cold weather before the January freeze "cold-conditioned them and made the dormancy deeper."

Also, he said, the deep cold mass coming into the state was extremely dry, with virtually no humidity, keeping out moisture that could have caused wood splitting.●

HANDGUNS

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. MINISH. Mr. Speaker, our common concern and outrage over the bloody attack upon President Reagan and his party must not be allowed to dwindle without producing effective action. We cannot take any single direct action which alone will dispel the climate of terrorism which has swept the world in recent years, but we can take practical steps to stem the proliferation of handguns which menace our society.

There are too many handguns floating around, and they are too easy for

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

anyone to get: the criminal, the insane, or simply the careless. I know that the demands for effective national gun control will bring cries of that calculated cliche, "Guns do not kill; people do." This is nonsense. If his assailant had not had a handgun, President Reagan would be going about his business today, and those hurt with him would not be fighting for their lives, which are still in the balance. I do not care what motives prompted this attack, since there is nothing we can do about them; the part we can control, access to such weapons by the assassin, demands our attention. There is no way this assault could have taken place without a concealable handgun.

The Constitution guarantees our right as citizens to keep and bear arms, but it does so in the context of a "well-regulated militia"—a context which those opposing all control always fail to mention. We do not have a militia in working terms any more, but we can make the use of firearms "well-regulated." If we restrict the traffic in handguns beyond the present uncontrolled glut all over the country, we will be better able to deal with the crime which stalks our people. I have introduced a practical bill on this matter, H.R. 1413, "The Handgun Crime Control Act of 1981", and I know that other Members are offering similar legislation. Let us get on with the business of taking concealable handguns without any legitimate sporting purpose out of the hands of criminals.

Mr. Speaker, I would close with the note that the people of New Jersey all rejoice that the President has apparently come out of this vicious attack with prospects of a full and speedy recovery. Our deep concern for those injured with him and for the families of all involved goes hand in hand with our commendation of the Secret Service and police officers who, in carrying out their responsibilities may well have prevented further injury to the President at the risk of their own lives, and who speedily apprehended the suspected assassin. Our hopes and prayers go to all of them.●

EL SALVADOR POLICY

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. LaFALCE. Mr. Speaker, one of the interesting aspects of the whole crisis over the administration's new policy toward El Salvador has been the relative free ride which the press has given the administration.

Although some criticism has surfaced, much of the press blandly accepted the findings of the administration, as they appeared in the El Salvador white paper which was issued by the Department of State. For example, the press did not question the importance of the Communist aid being provided to the insurgents; and yet a Pentagon official later stated that the 200 tons of military equipment would be used by a 200-man company in only 1 week. If that Pentagon official is correct, then the press was skillfully manipulated by the administration concerning the need for massive amounts of U.S. military assistance.

I have always believed that the press has a solemn duty to act as a type of loyal opposition, carefully examining every administration initiative and policy. That does not include criticism for criticism's sake, but it does include a willingness to subject government policies and statements to the proper amount of scrutiny for the national interest.

The former spokesman for the Department of State, Hodding Carter III, has made precisely that point in an article concerning press coverage of the El Salvador policy. The article appeared in the March 19 edition of the Wall Street Journal and is entitled "The El Salvador Crusade". I want to commend Mr. Carter's penetrating article to the attention of all of my colleagues.

The article follows:

THE EL SALVADOR CRUSADE

(By Hodding Carter III)

Aside from the fact that it has been gloriously inept, there is nothing particularly unusual about the Reagan administration's attempt to fine-tune the press accounts of its anti-Communist crusade in El Salvador.

Every administration suffers from the delusion that the press exists to run its handouts on delivery and stop running them on demand.

Thus when some officials in the upper reaches of government decided last week that the growing emphasis on a possible "new Vietnam" was not useful, they reacted according to an old script. They sent an errand boy out to stage a backgrounder dedicated to the proposition that coverage of the developments relating to El Salvador was being overdone.

"This story has been running five times as big as it is," acting Assistant Secretary of State John Bushnell told a group of diplomatic correspondents, "and we figured that if we talked to you about it, you might not make this thing such a big deal."

Backgrounders by assistant secretaries do not just happen. They are carefully cleared from above. That made it a little out of the ordinary when White House Press Secretary James S. Brady, after an interesting pause of several days, disowned the backgrounder on behalf of the President. That goofy number was the press briefing equivalent of Dunkirk and left Mr. Bushnell lying on the beach while Gen. Haig evacuated.

But this byplay, and the press's predictable reaction to it, should not obscure a more important matter.

The real story is that the administration's propaganda blitz went virtually unchallenged for several weeks. Reacting instinctively, print and broadcast journalists alike initially gave Washington's claims about the El Salvador civil war the kind of over-eager, over-credulous respect which warms the heart of every government flack.

It is hard to understand why, instead of complaining, the State Department didn't hand out commendation medals for outstanding press cooperation. The press play in the opening weeks of the campaign to convince us that El Salvador is the place to roll back the Iron Curtain demonstrated that big government sets the terms of public discussion about major issues far more often than the press likes to admit or the public understands.

How else can the virtually unquestioning press response to the administration's El Salvador white paper be explained? It was swallowed whole and regurgitated in a fashion not equaled since the Johnson administration's white paper on Vietnam 15 years ago.

How else, too, is it possible to explain that for weeks most American press accounts cast the El Salvador conflict in simplistic terms of Communist insurrection against moderate government, with rightist thugs in the wings? Such characterizations flew in the face of the Roman Catholic Church's leading role in opposition to the status quo, the labor movement's courageous efforts to create long-overdue economic changes and the testimony of one diplomatic expert after another that the caricature bore no relationship to reality. Yet, the expert witnesses were overshadowed as El Salvador was suddenly discovered to be the focal point of the conflict between East and West.

Playing the story close to the way it was presented by the Reagan team made for dramatic theater. It was theater presaged by earlier press fixation on notions such as "The Castro Connection" to encapsulate revolutionary stirrings in Central America. ("The Repression Connection" or "the Poverty Connection" were apparently not as sexy when it came to televised explanations.) There is a long, if not precisely happy, tradition of similar press behavior in this country, although many in the press business have been busily telling each other that they had learned something from their experiences involving Vietnam and Iran, if not from the Watergate story.

If it weren't for that tradition, the question of what the allegedly massive Communist assistance to the revolutionaries really meant might finally be answered. A tantalizing hint was offered in a quote from an unnamed Pentagon official buried deep in the second of two long articles on the El Salvador situation in The Washington Post. He said that the 200 tons of military equipment the administration says were provided by Communist regimes would be used up by a 200-man company in one week of hard fighting. In other words, the 200 tons of equipment is a molehill instead of a mountain.

Which also could be an absolutely wrong assessment. The point is that the public has no way of knowing, because no one in the mass media has pursued this line of questioning to its conclusion. Too many other similar lines of inquiry were also ignored while the administration set the terms of the national debate on the question of El Salvador.

Many reporters did eventually start asking the hard questions. The record is clear, thanks to Mr. Bushnell, that the administration didn't like the way the story was beginning to develop.

But the administration's reaction, whether Mr. Bushnell's or Mr. Brady's, is largely irrelevant. What is relevant to the American people's ability to decide public issues for themselves is the determination of the press to look quickly below the surface of the official line and to demand clear answers to tough questions at the outset of any such story.

The government—any government—will always try to put the best possible face on its policies. The press has a responsibility to subject each one to rigorous questioning from Day One. It is a responsibility which cannot be met by playing catch up ball six weeks after the government side has opened the game.●

BALANCE THE BUDGET

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. FINDLEY. Mr. Speaker, the concept of living within your income is an economic reality the Federal Government tries to teach the citizens of this country. Yet the Federal Government is itself the largest violator of this basic piece of economic commonsense. The sad truth is Uncle Sam does not keep a balanced checkbook.

Earlier this year, Congress was forced by harsh reality to increase the national debt limit. How can the Federal Government expect the citizens of this country to limit their debts and balance their budgets when the Government does not practice what it preaches?

For that reason, I am today introducing a joint resolution "to amend the Constitution of the United States to provide for balanced budgets." If we in Congress are to prove we are serious about bringing the Federal budget under control, then we must prove we are able to balance our own checkbook.

Text of bill follows:

H.J. RES. 222

Joint resolution to amend the Constitution of the United States to provide for balanced budgets.

Resolved by the Senate and House of Representatives of the United States of American in Congress assembled (two-thirds of each House concurring therein), That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within three years after its submission to the States for ratification:

"ARTICLE —

"SECTION 1. During the fiscal year beginning after the ratification of this article, total outlays of the Government shall not exceed total estimated receipts by more than 50 per centum of any excess of outlays over receipts in the preceding fiscal year. For each succeeding year, total outlays of the Government shall not exceed total receipts.

"SEC. 2. In the case of a national emergency, Congress may determine by a concurrent resolution agreed to by a rollcall vote of three-fourths of all the Members of each House of Congress, that total outlays may exceed total receipts.

"SEC. 3. The Congress shall have power to enforce this article by appropriate legislation.".●

TARGETED ASSISTANCE REVITALIZATION ACT

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. RANGEL. Mr. Speaker, the continued loss of business and jobs from our central cities over the past 20 years has had a devastating effect on the economic well-being of the people who live there. The loss of manufacturing and commercial jobs has hit working poor and lower middle class communities the most. Where once there was a possibility of finding work, now there is no hope unless you are willing to uproot your family and move. The statistics of the 1980 census bear this out. Population growth in our older cities has either remained constant or dropped while the number of people in the Sunbelt has dramatically increased. This has resulted in urban centers where only the very rich and the very poor live.

We cannot continue to talk about people living off the taxpayers' dollars through such programs as welfare, food stamps, housing assistance, medicaid, and so on when they have little if any opportunity to find employment. The unemployment rate in almost everyone of our older cities is well above the national average. The loss of employment opportunities has all but eliminated the American dream of a better life if you work hard for yourself and your children. You cannot work hard if there are not any jobs where you live.

In order to reverse the decline of our most economically depressed communities, I have today introduced the Targeted Assistance Revitalization Act. This act is designed to attract businesses to economically depressed communities by offering tax incentives which will reduce the cost of doing business and in so doing shorten the time it takes for a business to become profitable.

The Targeted Assistance Revitalization Act will establish a partnership between Federal, State, and local governments for an effective urban revitalization program.

This proposal is the first urban development initiative that establishes a major State role. Several existing urban development programs establish a strong working relationship between the Federal and local governments. However, the Federal Government has historically made its urban development funding decisions outside the context of State policies. States possess tremendous urban development potential and several States have existing urban development programs that are not currently maximized through integration with Federal programs. States also possess greater financial flexibility and resources than many depressed communities to meet the needs of these local governments.

I have worked with several States in my efforts to develop a bill which will revitalize our most depressed communities. Governor Carey of New York State, in his recent testimony before the House Ways and Means Committee, discussed my proposal and has already submitted appropriate legislation to the State Legislature in Albany to implement the proposal I have introduced today.

In addition, the Governor has agreed to work with the Coalition of Northeastern Governors and the National Governor's Association to develop the Targeted Assistance Revitalization Act.

An outline of the proposal follows:

TARGETED ASSISTANCE REVITALIZATION ACT

The Targeted Assistance Revitalization Act would work in the following manner:

TARGETED AREAS

1. The targeted universe would be defined from data available under the 1980 census. This would include all census tracts where:

A. The number of welfare recipients is 150 percent of the national median, or

B. The number of unemployed is 150 percent of the national median, or

C. 70 percent of the people have 80 percent of the statewide median income.

2. A governor would then be able to select 25 percent of those census tracts within his state which qualify.

TAX INCENTIVES IN TARGETED AREAS

1. Increase the present 10 percent rehabilitation tax credit for structures by 15 percent for a total credit of 25 percent.

2. Provide a 15 percent credit for building new structures.

3. Eliminate the present $100,000 limitation on the use of the investment tax credit for the purchase of used equipment.

4. Targeted Jobs Credit:

A. An employer may take a tax credit for 50 percent of wages paid a targeted worker on the first $10,000 of salary regardless of whether he works in a targeted area or not. In the second year of employment, the employer could take a tax credit on 25 percent of the first $10,000 of wages paid and in the third year the credit would be 15 percent of the first $10,000 of wages paid. (This changes present law from 50 percent of the first $6,000 of wages paid in the first year and 25 percent of the first $6,000 of wages paid in the second year of employment.)

B. For a targeted worker in a targeted area the credit would be increased each year by 15 percent. Thus in year one an employer would receive 65 percent of the first $10,000 of wages paid; in year two 40 percent of the first $10,000 of salary paid, and in year three 30 percent of the first $10,000 of salary paid a targeted worker.

C. For any worker hired after December 31, 1981 within a targeted area an employer would received a 15 percent credit for the first $10,000 of wages paid.

D. Eliminate from eligibility for the Targeted Jobs Tax Credit co-operative educational students.

E. Merge the WIN credit into the Targeted Jobs Tax Credit.

F. Make all economically disadvantaged youth 16 through 18 eligible for the Targeted Jobs Tax Credit.

5. Tax Incentive to attract capital:

A. Provide investors with a 10 percent tax credit on interest received from loans made to businesses doing business within a targeted area.

B. Limit the tax credit on interest to $100,000 for individuals and $300,000 for partnerships and lending institutions per year.●

POSITION ON DAIRY PRICE SUPPORT SUSPENSION

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. DANNEMEYER. Mr. Speaker, I wish to take this opportunity to indicate, in the public record, how I would have voted had I been present during the session of the House of Representatives on Thursday, March 26, when the dairy price support bill was before the House.

I was unfortunately and unavoidably absent in order to attend a meeting I convened in my district office to discuss the status of the McColl site, a controversial waste dump in my congressional district. This meeting of local and State, public and private parties, was scheduled some time ago in order to bring about coordinated action on the dump site problem. I am pleased to report that the meeting was very constructive and worthwhile.

Had I been here last Thursday, I would have supported the dairy price support bill which specifically removed the requirement that the price support level be increased on April 1. In light of mushrooming Federal expenditures for dairy price supports and the existing level of immense surplus stocks of dairy products, I believe that passage of the bill is in the best interest of the American consumer and taxpayer. Estimates are that failure to pass the bill, thus allowing the scheduled adjustment to take place, would have increased the price of a gallon of milk 7 to 11 cents. Suspending the price support increase will also save the Federal treasury an estimated $147 million in fiscal year 1981 and $86 million in fiscal year 1982.

Mr. Speaker, the law under which the dairy price support program is authorized expires this year. In my comprehensive budget reduction study of last November, I included savings from the total elimination of the dairy and other price support programs. I strongly recommend that the Congress look very closely at the need for this program. At a minimum we should revise the price support system so as to inject a greater degree of free market economic principles into the process. The existence of a substantial surplus and the market distortions introduced by the price support mechanism are yet another example, if one were needed, of the overriding disadvantages of Government attempts to allocate economic goods and services.

The vote on the dairy price support bill was heralded as the first substantive cut in the budget under the President's program for economic recovery. One hopes that it is the first of many such cuts.●

REVISION OF THE FEDERAL CRIMINAL LAWS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. CONYERS. Mr. Speaker, on Wednesday, March 25, the Subcommittee on Criminal Justice began discussions concerning revision of the Federal criminal laws. The effort to bring equal justice and logic to the Federal criminal laws, to define the proper balance between the Federal and State Governments in the enforcement of criminal laws, and to provide an adequate deterrent to criminal conduct without sacrificing such essential liberties as due process and free speech, began 15 years ago with the establishment of the National Commission on Reform of Federal Criminal Laws. Since the Commission's report in 1971, both Houses of Congress have worked diligently to produce a new code acceptable to all concerned parties.

There is little question that our current system of Federal criminal laws begs for revision. Although our criminal laws have been consolidated, reordered, and revised technically three times in our Nation's history, these corrections were, for the most part, limited to eliminating gross inconsistencies. As a result, the Federal criminal law has remained a body of law drafted by different groups to deal with problems on an ad hoc basis. Our current criminal laws are pervaded with uncertainty and inconsistency. The sentence assigned to a particular offense depends more upon the time at which the offense was enacted than upon the seriousness of the offense. Similarly situated persons convicted of the same offense often receive widely disparate sentences. A word may have one meaning when used in defining one offense, and another when it appears elsewhere in the same Code. The elements of a particular crime frequently depend upon the court of appeals circuit in which the trial occurs.

Bringing some semblance of reason, compassion, and justice to the criminal system of necessity entails cooperation among both Houses of Congress and the Executive. In an effort to ascertain a mutually acceptable method of proceeding on this important project, I have sent the following letters to the Honorable William French Smith, Attorney General, and the Honorable STROM THURMOND, chairman of the Senate Judiciary Committee. It is my sincere hope that these communications will mark the beginning of a process which will yield concrete results from the efforts of the past decade and a half. In the meantime, the Subcommittee on Criminal Justice will continue to hold regular meetings in order to formulate a realistic plan for achieving reform.

COMMITTEE ON THE JUDICIARY,
HOUSE OF REPRESENTATIVES,
Washington, D.C., March 12, 1981.

Hon. WILLIAM FRENCH SMITH,
Attorney General of the United States, Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: During the past 15 years, the Congress and the Department of Justice have cooperated in a monumental effort to correct the deficiencies of the current Federal criminal laws. There is little question that some form of remedy is necessary, for the problems of the current law are many. First, and foremost, is the uncertainty in the law that has developed. The courts of appeals are divided regarding the interpretation of certain laws, and enforce a different "Federal" law in various regions of the country. The uncertainty is not confined to differing interpretations of the same provisions. It runs throughout the Federal criminal code where one word is used in a number of provisions. Another source of confusion is the legislative practice of defining Federal crimes in such a manner as to make the Federal nexus an element of the offense, indistinguishable from other elements. Because particular constitutional grounds for prohibiting conduct have been used for each offense, the present approach also leaves gaps and inconsistencies in the application of Federal criminal laws.

The sentencing structure of present Federal criminal law also cannot escape criticism. Indeed, the present structure is riddled with irrationality and inconsistency. In title 18 alone, there are no fewer than 17 different maximum prison terms, apart from the death penalty, and 14 different fine levels. Grading of offenses is also erratic; similar conduct is often treated disparately.

The absence of a comprehensive Federal sentencing policy is further demonstrated by the lack of meaningful guidance to the judiciary with respect to the appropriate range of penalties for similarly situated offenders. This lack of direction has produced significant, and unwarranted, variations in sentences imposed on offenders. Sentencing in Federal courts is also hampered by the lack of clearly delineated procedures for the resolution of factual disputes, by the absence of statutory provisions for the use of alternatives to incarceration, and by inad-

equate fine levels for corporate and white collar offenders.

Despite the consensus on the need to make the Federal criminal laws more consonant with the constitutional dictates of due process and equal protection, there is serious question regarding the proper method of proceeding. In 1971, the National Commission on Reform of Federal Criminal Laws recommended an omnibus reform, replacing current title 18 of the United States Code with an entirely new structure. During the 95th Congress, the Subcommittee on Criminal Justice conducted a painstaking review of that recommendation. The Subcommittee noted that the National Commission either assumed, without discussion or analysis, that the omnibus approach was the better way to proceed or else it did not focus upon whether an omnibus or incremental approach was preferable. the Subcommittee, rejecting the omnibus approach, concluded that—

"Truly modernizing criminal laws means making substantive changes in them—reforming them to conform them to modern mores and to integrate court interpretations into statutory language. An omnibus reform bill, however, stands little chance of success because constituencies against change multiply in proportion to the number of reforms involved."

"* * * In our Federal system, the States are primarily responsible for law enforcement, and the Federal criminal law is a collection of separate and distinct statutes which supplement State criminal statutes. Federal criminal statutes are intended to protect or vindicate substantial Federal interests. Reforms in Federal criminal laws, therefore, are appropriately dealt with separately, after a careful, thorough and conscientious consideration of all of the policy issues and constitutional questions that each prospective change presents.

"Federal criminal laws ought not be the product of extensive horse-trading. The greater the numbers of substantive changes made by a bill, however, the more likely it is that such trade-offs will occur * * *.

"The subcommittee believes that the incremental approach—processing a series of bills each of which makes appropriate substantive changes in a discrete area—is the most appropriate way to go about modernizing and updating Federal criminal laws. This approach permits the thorough and careful study, analysis and drafting that ought to go into changing any Federal law, and especially Federal criminal laws."

Nonetheless, in the 96th Congress the Subcommittee, under the leadership of Bob Drinan, undertook the enormous task of drafting a comprehensive bill. Although I have great respect for the energy and effort expended by the Subcommittee in that task, the failure of the 96th Congress to enact any reform further demonstrates that shortcomings of the omnibus approach.

I would greatly appreciate learning your views concerning methods of revising the Federal criminal laws. Although I have consistently supported an incremental approach to such revision, I retain an open mind on the issue and believe your views would be of considerable assistance to the Subcommittee in its determination of the proper method of proceeding. In addition, in view of the Administration's frequently expressed concerns regarding "big government" and Federal interference in matters of State and local concern, I would appreciate hearing your views about the appropriate role of the Federal government in the enforcement of criminal laws, an area which has traditionally remained primarily in the province of the States.

I would like to begin the Subcommittee's hearings at the earliest possible moment. I would therefore ask that you have someone from your office contact Thomas Hutchison or Michael Ward of the Subcommittee staff concerning the time at which you would be prepared to present the views of the Justice Department.

I sincerely hope that during this Congress we may be able to cooperate in a bipartisan effort to finally achieve some progress in ameliorating the sorry state of the Federal criminal laws.

Sincerely,

JOHN CONYERS, JR.,
Chairman, Subcommittee on Criminal Justice.

COMMITTEE ON THE JUDICIARY,
HOUSE OF REPRESENTATIVES,
Washington, D.C., March 27, 1981.

Hon. STROM THURMOND,
Chairman, Senate Judiciary Committee, Washington, D.C.

DEAR SENATOR THURMOND: As the new chairman of the Subcommittee on Criminal Justice, I am very interested in achieving some concrete results from the decade and a half of work that has been devoted to bringing equal justice, logic and consistency to Federal criminal laws. I am confident, because of the great effort and dedication you have expended on criminal code revision during past Congresses, that you share this goal.

The history of the criminal code revision effort has been one of cooperation—between both Houses and both parties. The creation of the National Commission on Reform of Federal Criminal Laws was recommended by a Democratic President, the late Lyndon Johnson. Its mandate derived from legislation introduced by former Representative Richard Poff, a distinguished Republican. Members of both Houses, from both parties, served on the "Brown" Commission. Following the Commission's report, the initiatives during the 93rd and 94th Congresses were primarily in the Senate, under the able direction of Senators McClellan and Hruska. During the 95th Congress, as you and Senator Kennedy assumed leadership of the Senate efforts, this Subcommittee undertook a detailed examination of previous proposals. In a bipartisan report, the Subcommittee concluded that the underlying assumption of the National Commission, that reform could best be accomplished through "omnibus" legislation, had never been adequately examined. The Subcommittee stated:

"Truly modernizing criminal laws means making substantive changes in them—reforming them to conform them to modern mores and to integrate court interpretations into statutory language. An omnibus reform bill, however, stands little chance of success because constituencies against change multiply in proportion to the number of reforms involved.

"* * * In our Federal system, the States are primarily responsible for law enforcement, and the Federal criminal law is a collection of separate and distinct statutes. Federal criminal statutes are intended to protect or vindicate substantial Federal interests. Reforms in Federal criminal laws, therefore, are appropriately dealt with separately, after a careful, thorough and conscientious consideration of all of the policy issues and constitutional questions that each prospective change presents.

"Federal criminal laws ought not be the product of extensive horse-trading. The greater the numbers of substantive changes made by a bill, however, the more likely it is that such trade-offs will occur * * *.

"The subcommittee believes that the incremental approach—processing a series of bills each of which makes appropriate substantive changes in a descrete area—is the most appropriate way to go about modernizing and updating federal criminal laws. This approach permits the thorough and careful study, analysis and drafting that ought to go into changing any Federal law, and especially Federal criminal laws."

During the 96th Congress, the House Subcommittee on Criminal Justice took a different position. Under the leadership—again bipartisan—of Representatives Robert Drinan and Thomas Kindness, the Subcommittee devoted an unprecedented number of meetings to developing its own version of a criminal code reform bill. The Subcommittee's bill was eventually approved by the full Judiciary Committee with support from both sides of the aisle.

I need not detail with you the serious deficiencies of current Federal criminal laws—the different interpretations of the same provision of law in different Courts of Appeals, the various meanings given to the same word as it appears in one or another section of law, the disparate treatment of similarly situated defendants convicted of identical offenses. I share with you a dedication to correcting these deficiencies. Although I am in sympathy with the views of this Subcommittee during the 95th Congress, I intend to pursue whatever approaches appear most likely to result in significant progress toward the achievement of a just and fair criminal law.

I believe that this Subcommittee can best determine the most effective method of proceeding by continuing in the tradition of bipartisan cooperation between the two Houses. I would, therefore, appreciate the opportunity to meet with you to discuss the future of the criminal code revision in this Congress. Through such a meeting I hope to be able to reach agreement on the areas in which we may best be able to achieve concrete results, and on appropriate methods of proceeding.

I look forward to hearing from you in the near future.

Sincerely,

JOHN CONYERS, JR.,
Chairman, Subcommittee on Criminal Justice.●

THE SMALL BUSINESS TAX ACT OF 1981, H.R. 2949

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. DREIER. Mr. Speaker, small business is undoubtedly the most talked about, but least acted upon sector of our economy. While almost everyone will readily agree that small business is the backbone of the Nation's economy, too often those same people do nothing to encourage the survival of this vital sector.

Small businesses account for 43 percent of the Nation's gross national

product, provide virtually all new private sector employment, and are responsible for more than half of all major innovations. However, America's small businesses are failing at an alarmingly high rate.

It is essential that policies be implemented to create an environment in which individual initiative and ingenuity can prosper. Instead, a complex and inequitable Tax Code threatens the very existence of many of America's small enterprises.

To address this intolerable situation, I am joining with three of my distinguished colleagues to introduce the Small Business Tax Act of 1981, H.R. 2949. This vital legislation is a bipartisan effort to attack the most pressing problems of our Nation's small businesses. I am pleased to join Mr. HEFTEL and Mr. ARCHER, of the Committee on Ways and Means, and Mr. NOWAK, my colleague on the Committee on Small Business, in introducing this measure.

The five provisions of the Small Business Tax Act seek to:

First, allow small businesses with gross receipts under $500,000 the option of electing the cash method of accounting. Currently, the accrual method of accounting must be used, which taxes businesses on the "paper profits" derived from the inflated value of their inventories.

Second, establish a more graduated corporate tax rate structure as follows:

Current scheme		Heftel-Archer-Nowak-Dreier	
Amount	Rate (in percent)	Amount	Rate (in percent)
$0 to $25,000	17	$0 to $25,000	12
$25,000 to $50,000	20	$25,000 to $50,000	15
$50,000 to $75,000	30	$50,000 to $75,000	20
$75,000 to $100,000	40	$75,000 to $100,000	30
$100,000 and up	46	$100,000 to $150,000	40
		$150,000 to $200,000	43
		$200,000 to $250,000	45
		$250,000 and up	46

Third, allow a capital gains tax deferral on the sale of an asset when the proceeds are invested in a qualifying small business.

Fourth, increase the amount of used equipment eligible for the investment tax credit from the $100,000 under current law to $200,000.

Fifth, ease the initial penalty imposed when a firm changes from the first in first out (FIFO) to the last in first out (LIFO) method of accounting, by allowing a 10-year averaging on required increased inventory values.

The provisions of this act are critically important to the revitalization of a healthy small business sector. These are concepts which hold the strong support of the small business community.

I ask my colleagues to cosponsor the Small Business Tax Act, which will provide relief for America's small business sector. We must all work to enact legislation which will nurture, not destroy, the foundation of the American free enterprise system.●

NRTA AND AARP LEGISLATIVE COUNCIL RECOMMENDATIONS TO PROMOTE EMPLOYMENT OPPORTUNITIES FOR OLDER WORKERS

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. PEPPER. Mr. Speaker, only about one out of every eight persons 65 years or older is employed. Unfortunately, false stereotypes prevail in our society concerning the desirability and feasibility of employing older persons.

Today many older Americans believe that advancing age shuts them off from purposeful activity. The House Committee on Aging has heard repeatedly from elderly persons who deeply resent being placed on the shelf.

Forced idleness can cause a sharp reduction in income, at a time when inflation is placing millions of older Americans in a financial squeeze. However, there are other important considerations which should not be overlooked. Forced retirement can be psychologically damaging, especially for individuals who have lived active and vigorous lives.

Fortunately, the Congress has taken steps to promote greater employment opportunities for older workers. One of the most significant was the 1978 Age Discrimination in Employment Act Amendments which raised, in effect, the mandatory retirement age from 65 to 70 for millions of workers. That legislation also abolished mandatory retirement completely for about 95 percent of all Federal employees.

In addition, the Congress approved legislation to promote part-time employment and flexible work schedules for Federal employees. Older workers are expected to be among the major beneficiaries of these innovative work arrangements.

However, other important actions are needed if our Nation is to develop a comprehensive policy to maximize employment opportunities for older Americans.

Recently, the Legislative Council for the National Retired Teachers Association and the American Association of Retired Persons developed a blueprint for action on several fronts.

Several of the recommendations, I am pleased to say, are either similar or identical to proposals that I have supported, including abolishing mandatory retirement, liberalizing the social security earnings limitation for persons 65 or older, expanding the title V senior community service employment program, and others.

These recommendations take on added importance as our Nation prepares for the 1981 White House Conference on Aging.

The NRTA and AARP legislative council's employment program is a comprehensive package which merits the attention of this Congress.

Mr. Speaker, I ask unanimous consent that these recommendations be printed in the RECORD.

EMPHASIZING EMPLOYMENT AS A SOURCE OF INCOME

Given current economic, demographic, and elderly labor force participation trends, Government policy ought to permit and encourage greater elderly labor force participation. Increased elderly employment activity would generate additional tax revenue for use at all levels of Government. The economy in general would benefit from the added value of goods and services produced. The elderly would benefit by being able to supplement their incomes from other sources with income from employment, thus increasing their ability to maintain their standard of living and do it with a form of income—wages—that has better prospects for keeping up with inflation than most other forms of income. Given the national commitment to the maintenance of reasonable levels of income among the elderly, any share of that income that can be generated through the work effort of willing and able elderly individuals represents a share that need not be borne by other workers through taxes.

To reverse the elderly's labor force participation trend, a national, coordinated older worker employment strategy is needed. One component of such a strategy entails the elimination of existing elderly employment barriers, the greatest of which is mandatory forced retirement.

In 1978, Congress enacted amendments to the Age Discrimination in Employment Act (ADEA) that prohibit mandatory retirement before age 70, with a few exceptions, and protects most Federal employees completely against age-based retirement. These amendments, however, do not go far enough. First, we recommend that forced retirement based solely on age should be completely prohibited under ADEA. Statutory sanctions which exist in current law, such as the bona fide occupational qualification provision, should be eliminated. Finally, the Equal Employment Opportunity Commission should enforce the ADEA as vigorously as possible to assure that the act's full potential is realized in the case of middle aged and older workers who continue to be victims of various discriminatory practices.

The second major component of an older worker employment strategy involves the elimination of existing work

disincentives. Although the social security earnings limitation and other factors within the structure of the social security programs have already been discussed, other factors exist which serve to discourage work effort by older groups. One such disincentive that must be addressed is a law which mandates that States reduce a person's unemployment compensation by the amount of any pension income received. Although the law was amended in 1980 to limit the applicability of the offset, a person's unemployment compensation will still almost always be reduced by one-half of the amount of any social security benefits received. The associations recommend that the unemployment compensation offset be repealed in its entirety.

The third component of an older worker employment strategy involves the creation of strong work incentives—some focused on the older workers themselves, others on potential employers. One such incentive focused on the individual worker, an increased delayed retirement credit, was discussed in the context of social security. However, other incentives could be created that would fall outside of social security. For example, credits against Federal income tax liability could be established for older workers who avail themselves of job training or retraining programs that are designed to prevent skill obsolescence.

To provide employers with incentives to employ and/or retain older workers, the Federal tax structure appears to be the most appropriate vehicle. For example, the employer portion of the social security payroll tax that would otherwise have to be paid with respect to older workers could be reduced or eliminated. A tax credit for a certain portion of the older worker's wages could also be used to encourage employers to hire them. Such changes would effectively reduce the cost of hiring older workers, compensating to some extent for any real or imagined productivity decline associated with age that an employer might otherwise entertain. These changes would also tend to counter any disincentive effect that the minimum wage might have on an employer's willingness to hire or retain an older worker. In addition, the tax laws could be used to encourage employers to introduce a host of job training, retraining, part-time and flex-time programs aimed at older workers.

To complement the other components of an older worker employment strategy, job opportunities must be made available to older workers through Federal Government employment programs. At present, there are only two such programs—the senior community services employment program (SCSEP), funded under title V of the Older Americans Act, and the Comprehensive Employment and Training Act (CETA) program.

The SCSEP is the only categorical program focused exclusively on older workers. It provides a small number—52,250—of part-time jobs for workers age 55 and over who have been chronically unemployed and are at or below the poverty level at program entry. This program emphasizes on-the-job training and placement of trained workers in permanent unsubsidized jobs.

The associations support increased funding for SCSEP so that the number of jobs provided by the program can be expanded. SCSEP has been an effective program, free from fraud and abuse. But it has only begun to fill the large need which the low-income elderly population has for jobs.

Over the longer term, a nationwide, categorical, centrally directed older worker program like the SCSEP should be created that would include full as well as part-time jobs.

The other primary vehicle for dealing with the employment difficulties of older persons is CETA. Older worker participation in CETA, however, has been well below what might be expected on the basis of the number of unemployed older workers.

In an attempt to correct this situation, Congress added to the 1978 CETA Amendments an older worker section and an emphasis on displaced homemakers. These amendments require prime sponsors to submit comprehensive plans which must describe specific services for those workers facing severe handicaps in obtaining employment, including those 55 years of age or older. The associations urge that this provision be more effectively implemented and backed up by adequate funding to enable CETA manpower programs to respond to the special needs of older workers. Should Congress decide to phase out or eliminate the CETA program, the needs of the elderly workers should be addressed in any program that replaces it.●

THE ATLANTA CHILD MURDERS

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. MINISH. Mr. Speaker, it is with a heavy heart that I rise today to express my sorrow and deep concern for the tragic rash of child slayings in Atlanta. This is a topic with which, unfortunately, we are all too familiar as the horror of the senseless murders haunts our daily newspapers. May the families and friends of the victims know that the American people are mourning with them.

There are moments in our lives when words are useless in expressing a depth of sorrow and despair which can only be felt. The death of a child is one such moment, for in the dark void left by the child's absence comes an inevitable questioning of the very nature of existence.

Yesterday we received the news that one more child was found dead. With 21 children murdered and 1 still missing, our human hope begins to fade—hope that those responsible will soon be apprehended, and hope in the basic integrity of our society. But I believe it important that we do not abandon hope, for the absence of hope represents another type of death.

With those ideas in mind, I introduce H.R. 2607, a bill to require the Law Enforcement Assistance Administration to provide funds to aid the investigation in Atlanta. Funds are needed to provide for the services of FBI officials and other law enforcement personnel.

Reports coming from Atlanta state that a cloud of fear permeating the city has severely altered individual and family relationships. The fear is understandably greatest among blacks in the areas where most of the crimes have occurred. However, the terror also seems to have penetrated throughout the city. Even some children who have not been directly affected by the murders have reportedly exhibited symptoms of emotional distress and maladjustment at home and at school. I also wonder about the larger societal implications for an entire generation of our Nation's youngsters.

Such an emergency situation calls for constructive Federal assistance and I believe that H.R. 2607 provides exactly that. During this period of budget austerity, let us be mindful that there are still needs for which the use of Federal funds are just and appropriate.

Mr. Speaker, I pray that the killer or killers are soon apprehended so the children of Atlanta no longer live in fear and so we may begin to heal the scars resulting from this tragedy.●

HANDGUNS AND CRIME

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. McCLORY. Mr. Speaker, an illuminating article on the subject of handgun control appeared in the March 27 edition of the Christian Science Monitor.

The article, written by the veteran Washington bureau representative of this prestigious journal, Richard L. Strout, follows:

COVER-STORY CRIME

WASHINGTON.—It takes the news magazines four or five weeks to prepare a take-out cover story, and Chief Justice Burger made his startling speech on crime before the American Bar Association in Houston on Feb. 8. Time and Newsweek had their simultaneous articles rediscovering crime on the newsstands March 16, predated to March 23. They were embarrassingly alike.

If you bought Newsweek you were facing an ugly five-caliber handgun aimed right at you under the title "The Epidemic of Violent Crime." If you bought Time you confronted an even scarier picture—a futuristic masked manikin with another snub-nosed revolver—labeled "The Curse of Violent Crime." Were the magazines in collusion? Does Time tell Newsweek? There must have been editorial chagrin at the similarity of the products.

Both magazines referred to Mr. Justice Burger, the essence of whose warning was that America's "capability of maintaining elementary security on streets, in schools and for the homes of our people, is in doubt." What with the chief justice and the weeklies I guess it can be said that violent crime has been rediscovered. Maybe it is even a "crisis."

In my career I have covered four federal crime commissions and it begins to look as though I will have one more. The first was the Wickersham Commission (1931) and the latest Milton Eisenhower's (1969). Attorney General William French Smith has now appointed an advisory committee to study the problem and advise the government what to do. I sense a crime commission coming up.

I was not satisfied with the weeklies' stories on the problem. Neither appeared to have studied past investigations. Newsweek said crime "warps U.S. life," a mouth-filling phrase. Time agreed that "a pervasive fear of robbery and mayhem threatens the way America lives." True, of course, but that is just language; what are we going to do about it? The magazines' researchers had not discovered the melancholy common theme of past studies; the reports of commissioners that, yes, violent crime is a shame and disgrace; yes, America is worse than other countries, and that—well, probably not much will be done about it.

Newsweek dismissed the American handgun problem briefly. It said at one point, "It is clear that there are too many guns on the street. Houston police estimate that one-third of the city's motorists are armed. I defy the editors to read those sentences in France, West Germany, England, Japan, Canada—without being overwhelmed by the astonishment and indignation of the foreigners. The U.S. lets handguns be sold promiscuously? No wonder it has such disgraceful murder rates!

Time, by contrast, devotes a page to "The Duel Over Gun Control." Polls show, it says, that the public wants handguns controlled. But it explains that Congress won't vote it. "As long as that is the case," it adds lamely, "America will have to live with one of the world's worst murder records." Quite so. Comparative murder statistics per 100,000: Japan 1.6; Britain 1.3; West Germany 1.3; the U.S. 9.7. I don't see how you can take seriously the protest over America's shameful violent crime rate when those protesting won't go along in urging registration of handguns.

Commissions over 50 years have urged handgun control. Dr. Milton Eisenhower wrote in his subsequent book, "The President Is Calling": "Every civilized nation of the world, other than our own, has comprehensive national policies of gun control." He added that when he urged gun control "vitriolic mail at once poured into my office, nearly all of it instigated by form letters and cards distributed nationally by the rich and powerful National Rifle Association."

Poll director George Gallup on Feb. 3 summarized findings of his organization: "The public is overwhelmingly of the opinion that laws concerning the sale of handguns should be made stricter. As early as 1938 Americans favored more stringent control on handguns."

Some 50 million handguns may be in possession of Americans. How many Americans want a new crime study?●

THE CLAYMONT MUSTANGS

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. APPLEGATE. Mr. Speaker, this being the season of basketball championships, I take great pride in announcing to this distinguished body a recent championship in Ohio involving a school in my congressional district.

On March 21, 1981, the Claymont High School girls basketball team, located in Uhrichsville, Ohio, won the State class AA crown by a score of 52 to 45 over a tough Canton Central Catholic team. The game was played in St. John's Arena on the campus of Ohio State University in Columbus, Ohio.

The Claymont Mustangs, whose overall season record was 26 wins and only 1 loss, and the head coach, Ms. Rhonda Funkhouser, are to be congratulated on such a fine performance. It is teams like this and the personnel that make it up that have given girls basketball great credibility in recent years. These young women are to be congratulated, on not only their individual and team efforts in winning this championship, but also on their contribution to the advancement of women in sports.

On behalf of Ohio's 18th Congressional District, I congratulate and commend these athletes on their accomplishments.●

SILVERFINGER—PART I

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. McDONALD. Mr. Speaker, in July 1980 Playboy magazine ran its own version of the Bunker Hunt story and the silver market. While parts of the article really had no bearing on the machinations of the silver market, parts did show how Mr. Hunt was squeezed out of some of his holdings by a sudden change of the rules by the Commodity Futures Trading Commission. Therefore, I am placing part I of this article in the RECORD today, less some extraneous matter, which has been deleted. The item follows:

SILVERFINGER: HOW BILLIONAIRE BUNKER HUNT TRIED TO CORNER THE SILVER MARKET—BUT CORNERED HIMSELF INSTEAD

(By Harry Hurt III)

In the summer of 1979, an invisible hand reached out from an island in the Atlantic and quietly began tightening its grip on the world's supply of silver. The fingers of that hand extended to London, New York, Dallas, Zurich and Jidda. But the only visible clue to its existence was a newly formed Bermuda shell corporation called International Metals Investment Company Ltd. That dull-sounding little trading company was not just another offshore tax scam but the operating front for a secret partnership seemingly capable of controlling the world price and supply of silver.

Appropriately enough, two of the principals in that cosmic alliance were Saudi Arabian businessmen with connections to the Saudi royal family. But another principal, the real genius behind the deal, was an American oil billionaire, the head of a clan sometimes referred to as "the royal family of Texas." Though not quite as rich as the Saudi royalty, this man was one of the few private individuals in the world capable of playing in the same league. A lover of intrigue, in the past he had made international headlines with his mysterious wheeling and dealing. Before long, he would again blaze across the front pages. But for the time being, he remained in the shadows, operating behind the corporate veil of International Metals. His name: Nelson Bunker Hunt.

In that same summer, just before the price of silver exploded, an extraordinary invitation went out from Dallas to most of the better-known Texas millionaires. The invitation informed recipients, "You, together with your wife or husband if convenient, are cordially invited to be our guest at a very important meeting that could help determine the destiny of civilization."

The invitation went on to promise that participants would "hear and discuss plans and strategies that are not only having a profound moral and spiritual impact upon many nations but are also a critical deterrent to the avalanche of evil that is threatening to engulf the world."

As revealed on the front of the invitation in black letters, the sponsor of that urgent conference was Here's Life, a branch of the controversial and archconservative Campus Crusade for Christ. The host-committee list included such luminaries as Roy Rogers, former Nixon patron W. Clement Stone, two U.S. Senators, the cofounder of Holiday Inns and the owner of the Dallas Cowboys.

Also listed on the host committee was a scion of one of right-wing Christianity's most prominent families—a man whose image could hardly be called charitable. But his philanthropy had made the headlines on one occasion: the day back in 1977 when he had publicly pledged to help raise one billion dollars for Campus Crusade. Now, by contributing his letterhead and his money to Here's Life, he was fulfilling his pledge. His name: Nelson Bunker Hunt.

Silver and salvation, two aparently unrelated commodities, are vitally intertwined in the prodigious person of Nelson Bunker Hunt. As the son of the late H. L. Hunt, the eccentric and irascible Texas oil billionaire,

Bunker is still driven to prove himself a money-maker in his old man's image. But his great silver play of 1979–1980, like many of his other dealings in the past decade, is not only the expression of his desire for gain; it is also a fundamental expression of his world view, one that is usually labeled archconservative. Like his father before him, Bunker Hunt envisions an international Communist conspiracy and the Eastern-liberal-establishment-Rockefeller-CIA conspiracy. For reasons that are alternately well founded and fantastical, he believes himself and his family to be victims of both. Even more fundamentally, he possesses a vision of the apocalypse, a conviction that the world is heading down the road to doom.

True to family tradition, Bunker Hunt does not intend to sit idly by while catastrophe descends upon the planet. For him, hoarding silver is not just his way of hedging inflation: It is also part of his attempt to create his own independent economy, his own money. The government treasuries of the world used to be the ones to issue currencies backed by precious metals. Like the United States, most countries have long since ceased that practice. Bunker has been trying to revive it—for himself and his silver-buying partners. Hoarding silver is part of his scheme to replace paper with something of "real" value. It is his hedge against the "avalanche of evil" he fears is engulfing the world. Ironically, it was also what brought about a personal and public financial apocalypse of the first order.

The story of Nelson Bunker Hunt is the story of his money. Along with his brothers and sisters, he controls what may well be America's largest family fortune. Since the Hunt wealth is privately held, there are no published balance sheets for the empire as a whole. In addition, arriving at an exact determination of the family wealth is complicated by varying appraisals that can be given to real-estate and oil properties, and by discount factors that must be figured in because of certain asset illiquidity. But according to inside sources and those figures that are publicly available, the so-called first family of H. L. Hunt controls assets that were worth roughtly 12 to 14 billion dollars when the price of silver peaked in January of this year. The flagship of the family wealth is Placid Oil, the world's largest privately owned oil company, with reserves worth in excess of six billion dollars. But the family also has extensive holdings in coal, real estate, cattle, sports teams and, of course, silver.

Since silver's crash, the family's asset worth has depreciated to the eight-to-ten-billion-dollar range. The Hunts have also taken on a considerable amount of debt. In addition to multibillion-dollar borrowing done in the normal course of business operations, the silver play alone has added roughly one and three-quarters billion dollars to their liabilities, which itself exceeds the amount of the much-publicized Government-guaranteed loan to beleaguered Chrysler Corporation. Nevertheless, it is a good bet that these Hunts would still come out at least three to five billion dollars ahead if all their asserts and all their debts were liquidated tomorrow.

Bunker's interest in silver began one day at the Hunt's Circle T ranch outside Dallas. The year was 1970 and Bunker was sitting in one of his favorite places, the kitchen, talking with a New York commodities broker named Alvin J. Brodsky. A short, excitable man, Brodsky had flown down to Texas to make what would turn out to be one of the most important sales pitches of his career. His method was simple but graphic. As the cattle grazed outside, Brodsky gestured at the items in the room—the tablecloth, the utensils, the food—and he asked a single question:

"Bunker, do you believe you're going to have to pay more for these things next year than you did this year?"

Bunker allowed that he did.

"Well, then," Brodsky said, "you should consider silver."

Simplistic as it may have sounded, Brodsky's pitch jibed perfectly with Bunker's financial situation and his total world view. At the time, his Libyan oil venture had reached payout, and income was pouring in at a peak rate in the neighborhood of $30,000,000 per year, all of it tax-free. Bunker had to find a place to put it. However, both domestic and world oil prices were at "depressed" pre-embargo levels of two and three dollars per barrel, and most of the so-called experts were saying that there were enough available foreign and domestic reserves to meet America's demands for decades. The per-ounce price of silver was also at a low of about a dollar and a half, an even lower unit price than oil. But Bunker believed that silver might be in for an enormous increase in price.

They bought slowly at first, making purchases in 5000- and 10,000-ounce "penny packets," mostly through Bache Halsey Stuart Shields, the commodities outfit with which Brodsky was associated. The total amount of those investments was only a few hundred thousand dollars, small change by Hunt standards. The initial results, however, were of the sort Bunker and his brother could readily appreciate. Between 1970 and 1973, silver rose to about three dollars an ounce.

With the world apparently crumbling all around him, Bunker decided to go heavily into silver. This time, he and his brother Herbert—aided by second-family in-law Randy Kreiling, a commodities expert—began buying into the market with what would soon come to be known as the typical Hunt style. The key elements in their strategy were size, secrecy and surprise. Working through Bache and a variety of other brokers, they purchased not just penny packets but millions and millions of ounces. Their first huge order was a 20,000,000-ounce December 1973 contract. Other big orders followed, and by early 1974, the Hunts had accumulated contracts totaling 55,000,000 ounces, or about seven to nine percent of the total estimated world supply. That gave them more silver than anyone on earth save the governments of a few countries and the silver exchanges themselves.

In most modern markets, talk of a corner would have been dismissed as just that—talk. The classic definition of a precious-metals corner is when an individual holds enough bullion and enough futures contracts to have a virtual monopoly on the total supply—and thus effective control of the price of both bullion and futures, since anyone who wanted the metal would have to come to him. Few people or groups have the skill or the financial resources to pull one off. Indeed, the last time anyone cornered the silver market was when the Bank of England accomplished the feat in 1717. As the veteran traders knew, however, silver was potentially more vulnerable than other commodities. Unlike gold, it has a wide range of industrial uses (most notably for photographic film), as well as a value in jewelry making. Annual production in 1974 was only about 245,000,000 ounces, while annual consumption was about 450,000,000 ounces. Exactly how much the total world supply amounted to was anybody's guess. Estimates ranged from 600,000,000 ounces to 800,000,000 ounces. Of that total, only 200,000,000 ounces was believed to be available for delivery against silver-futures contracts. While silver from tea sets, silverware and other sources had a way of coming out of the woodwork in times of high prices, many traders believed that it would take a lot less than 200,000,000 ounces to corner the silver commodities market. But how much less? Had Bunker Hunt found the magic formula? Was he now ready to cash in?

In April of 1974, Bunker stopped in New York to visit the floor of the Commodity Exchange for the first time in his life. When he walked onto the floor, all activity came to a halt. The traders dropped what they were doing and simply stared at the overweight, spectacled Texas in the cheap blue suit. Later that day, Bunker granted a rare interview to a reporter from the financial journal Barron's. Although he politely refused to reveal the size of his silver holdings, Bunker did give the world a glimpse of his long-term intentions. As he put it in typically twisted syntax, "Just about anything you buy, rather than paper, is better. You're bound to come out ahead in the long pull. If you don't like gold, use silver, or diamonds or copper, but something. Any damn fool can run a printing press."

The Hunt-Saudi silver buying began in mid-July, and began big. Working through both the Commodity Exchange (Comex) in New York and the Chicago Board of Trade (C.B.O.T.), the group purchased some 8600 silver-futures contracts, the equivalent of 43,000,000 ounces. All of the contracts were due for delivery that fall.●

HIRED GUN

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. FINDLEY. Mr. Speaker, the lead editorial in last Friday's Washington Post puts the situation in southern Lebanon in proper perspective. As the editorial states:

The Israelis have a right to defend themselves against Palestinian terrorists, but they have no right to let a hired gun [Major Haddad] conduct an arrogant independent policy against the U.N. peacekeeping force and the Lebanese Government alike.

The Post editorial was critical of the Reagan administration for letting "the Israelis get away scot free when they are at fault" in failing to restrain Haddad and his band of "buccaneers." It is significant that the Washington Post has now joined the Washington Star and a growing number of thoughtful and informed Americans in demanding that Israel act more responsibly in its use of military force in the Middle East. Hopefully, Israel and its many friends in the United States—of whom I am one—will realize in time the need to temper naked force and

power with reason and diplomacy in order to achieve a comprehensive Middle East peace settlement.

Text of the Washington Post editorial follows:

HIRED GUN

So complicated is the situation in southern Lebanon, where Palestinian guerrillas, Lebanese militia, Syrian forces, Israeli troops and U.N. peace-keepers all contend, that it is easy to throw up one's hands when a violent incident occurs and distribute blame indiscriminately all around. "Cycle of violence" is the usual culprit. But that is a lazy and dangerous way to go about approaching this troubled corner of the Middle East. It permits the guilty party to get away with murder. That is why it is necessary to assess the incident in which three Nigerian members of the U.N. peace-keeping force were killed and 20 other soldiers wounded.

They were shelled by the Christian militia forces of Major Saad Haddad, whom the Israelis set up in a buffer along their northern border when they ended their invasion of Lebanon—an invasion undertaken to counter Palestinian raids—in 1978. But why was Major Haddad firing? Against Palestinian guerrillas, ostensibly the enemy? No. He was firing because the government of Lebanon had moved a platoon of its own soldiers into the village where the U.N. unit was stationed. Major Haddad evidently feels—and rightly so—that if the Lebanese army reasserts its control in the south, his "Free Lebanon" is doomed.

In the U.N. Security Council, the usual Arab-Communist combine started grinding out a resolution condemning not only Major Haddad but his Israeli patrons. The Reagan administration allowed and joined—and anticipated—a condemnation of the Haddad action but, seeking "balance," prevented censure, or even mention, of Israel. This is fine. The U.N. majority long ago surrendered its claim to be a forum to which rights and wrongs of matters involving Israel deserve to be submitted.

Those who appreciate seeing the abuse of the United Nations diminished, however, have an obligation not to let the Israelis get away scot free when they are at fault. And in this instance, they are at fault in not asserting control over Major Haddad, who, despite his and Israel's pretenses, is not a sovereign but simply a buccaneer. The Israelis have a right to defend themselves against Palestinian terrorists, but they have no right to let a hired gun conduct an arrogant independent policy against the U.N. peacekeeping force and the Lebanese government alike.●

TIME FOR SERIOUS THOUGHT ON THE MX

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. MATTOX. Mr. Speaker, there is no question that we must increase our defense capability. However, I think it would be a mistake to sign a blank check made out to the Pentagon for $227 billion without the most careful kind of perusal of what that money is going to buy. I am not at all sure that the MX missile project as currently conceived is the best kind of ICBM system we can devise.

The March 29, 1981, New York Times Magazine, and the Dallas Times Herald, carried an article by Stansfield Turner, retired admiral and former Director of the Central Intelligence Agency, that questioned the value of the MX and suggested alternatives. I believe other newspapers carried this article as well, and I am very glad that it was so widely distributed. It is an article that urgently needs to be read as we in Congress grapple with these issues. I particularly recommend it to my colleagues on the Budget Committee:

THE MX IS A SERIOUS MISTAKE, SAYS STANSFIELD TURNER, THE FORMER CIA DIRECTOR

The changing balance of strategic nuclear forces between the United States and the Soviet Union has in the last few years been a major focus of attention for the American intelligence community. Until the late 1960s, the United States was militarily stronger than the Soviet Union by virtue of its superior nuclear arsenal. We felt secure. The Soviets didn't, and they set out to correct the imbalance. The result has been that in the last several years all of the best studies have shown that the balance of strategic nuclear capabilities has been tipping in favor of the Soviet Union.

The Carter administration recognized this imbalance and developed an ambitious plan to build a mammoth new intercontinental ballistic missile system known as the MX (for "missile experimental"). Congress has provided initial financing, and already major contractors from California to Massachusetts are plunging ahead—building test sites and hiring designers and workers. Thousands of workers are already involved.

I believe the MX project as presently conceived is a serious mistake.

The official estimates of the total cost of the MX run from the Air Force's $36 billion to the General Accounting Office's $56 billion. Each missile will weigh 95 tons, two and a half times more than our most current intercontinental ballistic missile (ICBM)—the Minuteman III—and will carry 10 separate warheads. To construct a base for it will require, according to some estimates, 40 percent of the country's total cement production for three years, and more dirt will have to be moved and more land sequestered than for the Panama Canal.

MX is also a new concept in ICBMs. Our present Minuteman ICBMs are loaded in fixed, underground silos of concrete, reinforced to help them withstand nuclear attack. MX, in contrast, will be semimobile. Twenty-three shelters about a mile apart, are to be built for each MX. Each of the 200 missiles will ride on a 201-foot-long transporter-launcher, weighing more than a million pounds, over the special highways from one of its 23 shelters to another. The Russians would be forced into a kind of shell game, if they considered an attack on our ICBMs; each MX would force them to worry about 23 targets rather than just one.

The U.S. strategic strength—strategic strength, in this context, refers to the major powers' centrally controlled nuclear forces, which are targeted against each other—is built on three legs known as the TRIAD. Each leg represents a weapons system that is launched differently: one from land bases, the second from airplanes and the third from submarines. Each leg presents the Soviet Union with a different problem should it decide to attack. While it might be able to cripple one leg, the inability to knock out all three should deter the Soviet Union from attacking at all.

The MX specifically strengthens the land—that is, the ICBM—leg. This leg is important because the size of the warheads and the accuracy of the missiles make it the most powerful part of our strategic arsenal. It is quickly responsive to a decision to launch, because the missiles can be maintained in a constant state of readiness and we have reliable, instantaneous, secure communications to them. It provides minimum warning of attack to the Soviet military, because the time from launch in the United States to detonation over the Soviet Union would be only about 30 minutes.

The other legs of the TRIAD have different virtues. Submarine-launched ballistic missiles (SLBMs) provide greater assurance than either of the other weapons systems that they will survive a surprise attack. Submarines can be constantly moving and they are virtually impossible to find in broad ocean areas. Bombers can carry a large number of weapons, so they provide great destructive potential and, because the bombers themselves can be called back before they actually launch their missiles, this leg of the TRIAD is the most flexible.

Most authorities agree that today the land-launched ICMBs, our Minuteman missiles, are the most vulnerable of our strategic forces because their location is fixed, making them easy targets. But is the MX the best replacement?

The undertaking is so central to our national security that it is important that doubts about it be resolved.

First, what do we mean when we say that balance of strategic nuclear forces is tipping against us? How is that balance measured? One quantitative measure is the number of weapons the United States and the Soviet Union each has. Here, America is clearly ahead: We can attack more individual targets than the Russians can. Another measure is the ability to inflict damage. Here the Soviet Union is well ahead.

The Soviets hold both an absolute lead in total number of ICBMs and a relative lead in the ability to destroy missiles that are housed in hardened silos. This advantage reflects, first, the fact that there are 400 to 500 fewer ICBM targets in the United States than in the Soviet Union. Second, it reflects a basic trend in strategic warfare. Improvements in weapon accuracy are more than offsetting any efforts to harden silos. Direct hits can destroy even hardened silos.

We could do two things to right this imbalance. We could increase our ability to attack hardened targets in the Soviet Union and we could make our ICMB forces less vulnerable. But whatever we do, it must not only correct the actual imbalance of capability, it must also correct the perception of imbalance. It must be made clear in the minds of Soviet officials as well as other world leaders that the Soviet Union does not have an edge on the United States in strategic nuclear strength. A major step in doing this is to create the impression that the United States is seriously committed to improving our strategic forces, even if in reality some of the actions we take will contribute only to overkill. Changing the world's perception that we are falling behind the Soviet Union is as important as not falling behind in fact. Deterrence is the

key goal of strategic nuclear forces, and what will or will not deter a nuclear attack is something more psychological than quantifiable.

The MX would, indeed, meet these objectives. It is designed to hit hard targets. It is less vulnerable than Minuteman because each missile can shuttle among the 23 alternative launching shelters rather than sit in one fixed silo. And, proceeding with the most expensive public-works program ever contemplated would certainly give an impression that America was serious about restoring the strategic balance.

But the MX has significant liabilities. One is the response it can be expected to draw from the Soviet Union. The current plan is to put 200 MX missiles in place and to build 4,600 shelters. If we presume that the Soviet Union will want to be able to knock out essentially all MX missiles with a surprise attack—as it could our present 1,000 Minuteman ICBMs—it would need 4,600 more warheads than are required now for Minuteman. Could the Soviet Union deploy another 4,600 warheads? Yes, easily, even under the limitations of the proposed strategic arms limitations treaty (SALT II). The United States would not, of course, stand still if the Soviet Union deployed more warheads. It would probably deploy more MXs and build more shelters. Then the Soviet Union would probably build still more warheads. Where would it all stop?

Stability is a function not only of the number, size and survivability of weapons, but of other characteristics as well. The more threatening a weapon is, the more nervous it makes a potential adversary and the more destabilizing it becomes. A high-accuracy ICBM is a destabilizing weapon because it can be launched on short notice, because it has a short flight time and therefore gives little warning and because it can destroy even hardened targets like ICBM silos. ICBMs like Minuteman and MX are at the most destablizing end of the weapons spectrum because they combine all of these characteristics. Most other systems have some but not all. Thus, building the MX, rather than stabilizing the strategic balance, would probably destabilize it further.

The United States could avoid the risk that the Soviet Union's military response to the MX would both offset its effectiveness and lead to more dangerous instability by simply canceling the project. But just deciding not to build the MX would also be a serious mistake. It is essential that the United States make a commitment to some clearly defined program lest the nation permit the strategic imbalance to worsen, or allow the perception that it is indecisive undermine what it finally decides to do. It should cancel the MX only under two conditions: that it do something else instead; and that whatever it does will meet its strategic objectives.

There are excellent alternatives to the MX. The best would be a diverse mix of systems, all of which would be more mobile than the MX and could be deployed in much larger numbers. Both the mobility and the large quantity of these systems would make them very difficult for the Soviets to attack with confidence.

Intercontinental cruise missiles on a variety of launching platforms would be one ingredient in the mix. A cruise missile is relatively small—some the size of a torpedo; it is self-guiding and flies in the atmosphere, whereas the much larger ICBM is shot out into space before it returns to its target. Modern technology will permit the United States to place cruise missiles in small packages and to give them even greater accuracy and penetrability than ICBMs.

Other ingredients of the mix would be land-mobile ICBMs and the existing SLBMs on submarines. The United States ought to develop a small, road-mobile ICBM, just as the Soviet Union has already done (the SS-16). Ours could be deployed in the remote areas of Alaska, for example. It could even be disguised in large trucking vans and moved around the United States at random. This same ICBM could be placed on ships and carried in aircraft as well.

This mix of more mobile systems also lessens vulnerability better than the MX. The less mobile the system, the more vulnerable. The fixed ICBM is the most vulnerable strategic system. It cannot move and it is difficult to hide from modern reconnaissance systems. Next to the fixed ICBM, the semi-fixed MX is the most vulnerable. It can move, but only between fixed shelters whose positions are well-known to the Soviet Union.

The MX may also fail to achieve the third objective—that is, correcting public perception, demonstrating a new momentum toward righting the strategic balance. In our democratic society, environmental and political activists may well delay the MX deployment, limit its size, or even prevent its development entirely. If we proclaim publicly that the MX is to be our solution to the changing strategic balance and then cannot follow through with an adequate deployment, we will have demonstrated that we are incapable of doing so. How much greater will the corrective measures have to be then to overcome that negative perception?

The final issue is whether a mix of more mobile strategic forces would meet national objectives better than the MX. I believe it would.

One of the arguments for continued reliance on ICBMs is that we need to preserve the concept of a triad of strategic forces (ICBMs, bombers and submarines). I agree that we cannot rely entirely on one type of weapon lest some counter to it be developed. I agree, too, that we do not want to depend excessively on one form of basing lest it become especially vulnerable. But diversity in these areas should come from a careful mix of the least vulnerable systems that we can devise, not by retaining the existing mix no matter what common sense tells us. The proposed set of mobile systems would be a far healthier and more diversified mix.

There is little time left to reverse the momentum of the MX. A prompt but thorough review of where the MX may be taking us, as well as what alternatives there are to the MX, is crucial to America's long-term security.●

RELIEF FOR MEDICAL PERSONNEL

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. GONZALEZ. Mr. Speaker, several years ago I was surprised to discover that the medical personnel in our Armed Forces were not immune from individual suit or civil liability for acts performed while in the scope of their employment with the Federal Government, even though those medical personnel with the Veterans' Administration and the Public Health Service had this immunity. I immediately introduced legislation and with the support of the Armed Services Committee and the Defense Department had the bill approved by Congress and subsequently signed into law.

Since that time I have discovered another very small group of individuals working for the Federal Government who are still not protected from individual suit. This group is the medical personnel of the U.S. Soldiers and Airmen's Home. Thus, today I am introducing a bill that would grant these medical personnel the protection that they need from being sued as individuals and held individually liable for incidents which occur while they are performing their duties on behalf of the Government. At the present time a ward physician at the home's hospital is required to pay a premium of $2,500 per year for malpractice insurance. These civil service personnel should not be expected to absorb these premium costs when their counterparts in the military departments are relieved from personal liability for medical malpractice, and thus from the necessity of carrying such insurance. It is not fair for these medical personnel, who are serving their country, to be expected to pay for private insurance. The medical personnel of the U.S. Soldiers and Airmen's Home provide a great service for the old, invalid, or disabled enlisted and warrant officer personnel of the Regular Army and Regular Air Force.

Medical personnel will only be able to continue to offer their valuable services if they are allowed to enjoy the same medical malpractice protection as their counterparts employed by the Federal Government and I urge my colleagues to support this measure.●

SPENDING CUTS: AN EDITORIAL VIEWPOINT

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. BEREUTER. Mr. Speaker, in the weeks since President Reagan presented his economic recovery program, Congress has been barraged with information and conflicting reports about the nature of and impact of various proposed cutbacks in Federal spending. The intensity of the debate, I believe, has caused us to lose sight of one important fact.

Even if the President's entire package of budget reforms is adopted, Federal spending for fiscal year 1982 will still be more than $40 billion above this year's spending.

The following editiorial from the Omaha World Herald helps place this matter in perspective. I recommend it to my colleagues:

[From the Omaha World-Herald, Mar. 12, 1981]

MORE LEFT TO SPEND DESPITE THOSE "DRASTIC" REAGAN CUTS

With all of the headlines about Ronald Reagan's proposed spending and tax rate cuts, readers might think that Western civilization as we know it is about to come to an end.

Liberals fear that the federal budget is about to be ravaged and the entire process of government is in jeopardy. The rich are going to escape paying most of their taxes and all sorts of scary things are going to happen to the poor.

And a lot of conservatives are cheering because they think if Reagan's program gets through Congress, the bureaucracy will immediately start shrinking, the fat will all be sliced away, the government's finances will be made sound and the private sector will soon control a greater share of the national income.

So maybe, now that more concrete statistics are available on the Reagan proposals, it is time to put a little perspective on them.

1. The federal budget is not going to be reduced. The actual outlays for fiscal 1981 are now estimated at $655.2 billion. Under Reagan's proposal for 1982, they would be $40.1 billion more, or $695.3 billion.

2. The total receipts from the individual income tax are not going to be reduced. The actual receipts for 1981 are now estimated at $277.4 billion. Under Reagan's proposal, they would amount to $10.8 billion more, or $288.2 billion.

Those massive cuts that everyone is talking about are not true cuts measured against the spending and taxes of the current fiscal year. They are simply cuts from the swollen budget that Jimmy Carter had proposed for 1982.

The momentum of the gigantic federal government is so great that even with those drastic Reagan reductions in the Carter plans, spending and taxes are still going up.

What will happen, if the Reagan plan is adopted more or less intact by Congress, is that the rate of the growth will be less than it would have been under Carter.

And, of course, there will be shifts within the budget on the spending patterns—more for defense, less for some other programs.

Even if all Reagan can do is slow that rate of growth just a bit, it would be a significant accomplishment.

The growth has snowballed so in recent years that the budget is now almost, if not completely, out of control.

And if Reagan and the Congress can keep applying the brakes to the government spending until national production begins to catch up, things might eventually get turned around.

But it will be a tremendous job and those touted 1982 spending and taxing cuts—welcome as they are for some and feared as they are for others—are actually only a modest beginning.

The ship of state has not yet been turned around; its course has been changed by only a few degrees.●

IT'S A GIRL

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. GARCIA. Mr. Speaker, I take this opportunity to congratulate Mike and Eileen Ferrell on the birth of their first child, Catherine Brennan, who was born at Georgetown University Hospital in the District of Columbia on March 27 at 4:41 a.m.

The baby weighed 10 pounds, 1 ounce and measured 22 inches at birth. Baby and mother are doing fine.

Catherine's birth was a momentous event but, I also understand that March 27 was Mike's 30th birthday as well.

As my colleagues know, Mike Ferrell is counsel to the Subcommittee on Census and Population which I chair. Eileen is the service director of the Washington, D.C., office for Kelly Health Care Services.

I know my colleagues join with me in wishing the new family good health and much happiness in the years ahead.●

U.S. INTERNATIONAL COMMUNICATIONS AGENCY, RADIO FREE EUROPE, RADIO LIBERTY, AND NATIONAL SECURITY

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. MICHEL. Mr. Speaker, I bring the following correspondence to your attention because I think it is of vital importance. Let me briefly offer some background as to what it contains:

Last month I happened to read a publication of the Atlantic Council of the United States titled "The Successor Generation," dealing with the question of attitudes among young Europeans. One article in the study was written by former U.S. International Communications Agency officer Alex Klieforth. In discussing attitudes in the Federal Republic of Germany (FRG) Klieforth wrote:

Not publicly known is that almost every American military officer stationed in the FRG believes that unless there is a change, growing opposition to mobility and support of U.S. Forces in Germany will make it eventually impossible for USAREUR to carry out its mission, that is to stem attack.

I found that statement most alarming especially since it came from an information officer widely known for his informed views on West Germany. I therefore wrote to Secretary of State Alexander Haig and Secretary of Defense Caspar Weinberger to discover if, in their experience, they had found Klieforth's claims to be true.

As you will see from the attached copies of the responses they sent to me, Secretary Haig and Secretary Weinberger appear to have differences of opinion as to the accuracy of Klieforth's statement. But I find no contradiction here. It may well be, as Secretary Weinberger points out, that public opinion polls in West Germany show "German youth today are more pro-American than their elders." The polls may reflect this but not reflect the intensity of dislike of Americans of those members of the younger German generation who are not pro-American. In any event, when the Secretary of State of the United States says that "deep cuts in the funds available for public information work on a worldwide basis have hampered" American ability to communicate with influential members of other nations, I find that of extreme importance.

All of this was made even more evident in a piece appearing in the Washington Post, Sunday, March 29, 1981. The headline reads: "Europe's Anti-Nuclear Movement Worries NATO Defense Officials." The article datelined Bonn, stated:

A grass-roots movement against nuclear armament is growing in several key Western European countries, leading some Western officials to worry that it could become a political force strong enough to erode NATO unity.

During a recent week of high-level interviews in several key NATO capitals, defense officials repeatedly attributed development of the antinuclear movement to a diminished sense of the Soviet threat, particularly among European youth.

"It is a generational thing," said a senior West German defense official. "There is a lack of history among the young, especially in this country, and this results in a lack of awareness for the need for certain security policies."

The fact is, Mr. Speaker, we are in grave danger of losing the war of ideas carried on throughout the world. How close we are to losing may be debatable—what is not debatable is the unquestioned fact that the Soviet Union and its allies outspend the United States and its allies on information—and, in the Soviet case, disinformation—programs.

Whether you accept the generally optimistic picture offered by Secretary of Defense Weinberger or the more critical comments of Secretary Haig—who, I need not remind you, has first-hand experience in West Germany—you cannot help but be concerned by what most experts tell us is the decline of our information program in recent years.

In short, Mr. Speaker, the time has come to recognize that the U.S. International Communications Agency—including its international broadcasting section, the Voice of America—and Radio Free Europe and Radio Liberty need to be seen as parts of our national security system, as vital and as nec-

essary to our survival and progress as weapons, manpower, and strategic concepts.

At this point I insert in the RECORD the letters to me from Secretary of State Alexander Haig and Secretary of Defense Caspar Weinberger:

THE SECRETARY OF DEFENSE,
Washington, D.C., March 18, 1981.

Hon. ROBERT H. MICHEL,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN: This is in response to your recent letter concerning an alleged common perception by American military officers that anti-American attitudes are increasing among Germans. Information available to me indicates that such a perception is not the case among military officers. In fact, recent survey data indicate the opposite of what Mr. Klieforth suggests.

In the fall of 1980, a survey of military officers' perceptions of approval of Americans and the U.S. Army in Europe was conducted. The results of this survey were that seventy percent of those questioned believe the U.S. Army in Europe is approved of by the Germans.

In addition, in January 1980, the highly respected Allensbach Institute in Germany conducted a periodic series of polls regarding German attitudes toward other nations. In response to the question, "Do you like the Americans?", a trend was found that was again counter to Mr. Klieforth's claim. Results of these polls indicate that German youth today are more pro-American than their elders.

I hope that this information will be of assistance as you and your colleagues address the many national security and defense issues in forthcoming months.

Sincerely,

CASPAR WEINBERGER.

THE SECRETARY OF STATE,
Washington, D.C., March 16, 1981.

Hon. ROBERT H. MICHEL,
House of Representatives,
Washington, D.C.

DEAR MR. MICHEL: Thank you for your thoughtful letter of February 6, in which you called to my attention some recent comments by Alexander A. Klieforth on developments in the Federal Republic of Germany.

Until his retirement last summer, Mr. Klieforth was the Public Affairs Officer in our Embassy in Bonn. He is recognized as one of the leading American experts on Germany. During his long association with the Federal Republic of Germany in the postwar era, Mr. Klieforth, as well as many other expert observers, became increasingly concerned over trends in German public opinion which could, if not countered, create a negative environment in the Federal Republic for the continuation of the close relationship which has existed to date between the United States and the Federal Republic. During my years as Supreme Allied Commander in Europe, I had an opportunity to become familiar with this problem at first hand, and I must say that I share the concern which Mr. Klieforth has expressed regarding the long term potential of these trends unless corrective action is taken.

It is important to keep in mind that what Mr. Klieforth was describing in his article on the "successor generation" was a situation which might arise at some point in the future and not the conditions which currently prevail in the Federal Republic. During his tenure in Bonn, Mr. Klieforth participated in the development of a variety of programs designed to counteract these negative tendencies, and these programs, have, of course, been carried on by his successors. I might add, however, that deep cuts in the funds available for public information work on a worldwide basis have hampered these programs. You may be sure that we will do everything we can to ensure that the public environment in the Federal Republic for the execution of our common obligations in the defense of Western interests will continue to be favorable. In this effort, we have the full support of the German government. Both Chancellor Schmidt and Foreign Minister Genscher have made clear on numerous occasions their concern over certain negative trends in German thinking, particularly among younger people, on the Atlantic Alliance and their determination to counteract these tendencies.

Sincerely,

ALEXANDER M. HAIG, Jr.●

MARINE MAMMAL PROTECTION ACT REAUTHORIZATION

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. BREAUX. Mr. Speaker, I am today introducing a bill to extend the authorization for appropriations for the Marine Mammal Protection Act for 1 year. The bill I am introducing would continue the existing level of funding for 1 year and is designed to serve as a vehicle for hearings to be held by the Fisheries and Wildlife Subcommittee of the Committee on Merchant Marine and Fisheries on April 7, 1981.

The reason I am introducing a 1-year reauthorization rather than the more traditional 3-year authorization is that I believe there are several problems in the act which should be allowed to be addressed this year. A prime example of this is the section which allows for the waiver of the moratorium on the taking of marine mammals and the return of management to the State where the animals are found. The U.S. Fish and Wildlife Service tried to return management of a healthy population of walrus to the State of Alaska but the State found it could not accept management because of a preference in the law for Alaskan Natives which violated the State constitution. The net effect of the failure to return management is that virtually no management resources are being allocated by the State or the Federal Government and a substantially unregulated harvest is taking place.

Another problem which needs a solution concerns the controversial provisions relating to the protection of porpoises from incidental takings during tuna fishing operations. Sufficient statutory protection is built into the Marine Mammal Protection Act for porpoises, but there are ambiguities which need clarification in order to avoid continuous litigation. We will also attempt to find a solution to this problem at a later time this year.

I hope that we can begin to address this and other problems in the April 7 hearings. I doubt, however, that any reasonable solutions can be developed before the May 15 deadline for authorization bills to be reported out of committee. We plan to have additional hearings this summer and fall and to work with the industry, the environmental community, the States, and other concerned parties to develop a reasonable solution to the problems with the act. I sincerely hope that solutions can be found and we can pass an amendment package later this year that would contain a longer authorization.●

SHELL GAME OR SUM

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. DASCHLE. Mr. Speaker, the New York Times editorial I am inserting aptly points out the absurdity of basing the MX missile on a series of racetracks in the Nevada/Utah desert. Though no basing system can avoid all problems, it makes eminently more sense, in the absence of a SALT II treaty, to conceal the MX at sea, where it will be more survivable. SUM advocates believe the system can be developed for at least $10 billion less than the MPS, and it is less likely to be tied up in litigation during the period of our greatest vulnerability. All things considered, I hope my colleagues will see the merits of the small submarine underseas missile plan and support legislation—H.R. 1955—which I have introduced to authorize the research, development, testing, and evaluation of this proposal. Following is the text of the editorial:

[From the New York Times]

MUST MX BE A SHELL GAME?

Why, Defense Secretary Weinberger has been asking his military advisers, does the mobile MX missile have to be part of a "shell game"? Why must it be based in concrete shelters in Utah and Nevada, tearing up the countryside and formenting wide public resistance? Why not base it at sea, perhaps aboard small submarines in deep ocean, a few hundred miles off the Atlantic and Pacific Coasts?

The new Secretary says he has found Pentagon minds all made up: the present "shell game" plan with 200 missiles shuttling among 4,600 shelters is the best answer to the vulnerability of silo-based ICBM's. But to his credit, Mr. Weinberger has not settled for that answer. He has now put his questions to a panel of outside defense experts, to report to him in June.

There are two fat objections to the MX plan favored by the military. It did not foresee the surge of public opposition in the Western states. Environmental lawyers could tie things up in court for years. In the background, there is "an element of the unreal," as Mr. Weinberger has noted, in building so complex a system, of almost Rube Goldberg dimensions and costing $34 billion, to conceal such a small number of missiles. Is there no other way?

Yes: Put the MX on submarines, which will provide automatic concealment in two million square mile of ocean.

Then why hasn't the Pentagon gone in that direction already? Because existing submarine-launched missiles are not as accurate as land-based missiles and are not as responsive to command and control. Current missile subs are scattered over the globe and unable to communicate without revealing their location. And shifting MX to submarines would eliminate one leg of the strategic "triad"—bombers, land-based missiles and submarine-launched missiles.

But those arguments do not apply to small offshore submarines, aided by coastal guidance and radio systems. Such vessels should be able to achieve survivability, with missile accuracy and communications at least comparable to a land-based MX system and at no greater cost, according to preliminary findings of a study by the Congressional Office of Technology Assessment.

The study identifies two main problems with this system, known as the small-submarine underseas mobile plan. Some unforeseen breakthrough in antisubmarine warfare might one day create a simultaneous threat to both the Trident and coastal submarines. Shortages of shipyard capacity might delay deployment until the early 1990's.

But the originators of the small-sub concept, Sidney Drell of Stanford and Richard Garwin of I.B.M., are convinced that the small sub is practical. It would differ enough from the big Trident sub so that no single antisubmarine warfare breakthrough would threaten both systems. Also, small submarines are being made in West Germany and some could be bought there until American models are available.

The small-sub idea also has other virtues. It could begin adding invulnerable missiles to the American inventory from the very first submarine deployed. The shell-game system, by comparison, would gain nothing for American security until there were more shelters than Soviet warheads capable of destroying them. To build that many shelters would take nearly until 1990, by which time construction of a small submarine fleet could also be well under way.

Mr. Weinberger is right to take a new look at the small-sub system. The Air Force would not be overjoyed to put its new missiles on Navy vessels. But the system has advantages at a time when the strategic arms treaty is in doubt. The shell game makes little sense without SALT limits on the Soviet missile buildup, which could require 8,250 MX shelters by 1990 and 12,250 by 1995. Small subs could survive a SALT failure.

More important, the small-sub idea offers a valuable bargaining chip. Deployment could be curtailed in return for a favorable SALT agreement. That would save money while adding a reasonable quota of survivable missiles to the American arsenal.●

RAYNHAM, MASS., 250 YEARS OF PROGRESS

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mrs. HECKLER. Mr. Speaker, it has been said that American life is an ongoing celebration of freedom. Even as we look constantly to the future, to the challenges to freedom that lie ahead, we remain keenly aware of this country's unique history and heritage of individual liberty—because the best way to prepare for the future is to learn the lessons of the past.

The people of Massachusetts, who have played a critical role throughout our Nation's history, take a justifiable pride in marking the anniversaries of past events that have contributed, one by one, to the building of America. And it is with that same sense of pride that I rise today to help mark the upcoming anniversary of one of the major events in the Commonwealth's history—the 250th anniversary of the founding of the town of Raynham, in the 10th Congressional District of Massachusetts.

It was on April 2, 1731, that the British Crown granted a petition to the townspeople of Raynham to set up their own town, separate from what is now the city of Taunton. Like so much of our early history, this move for independent township was prompted by deeply held religious motives: The belief of the citizens of Raynham that they should be allowed their own churches and schools, which served as the centers of colonial life. In petitioning for their own town the people of Raynham served notice that the Colonies were growing larger and more complex, and that the drive for independent thought and worship could not be ignored—the same drive that 45 years later would result in our Declaration of Independence.

Throughout its 250 years Raynham has played a vital role in the development of our Nation. As the site of the first successful ironworks in North America, Raynham was a part of the beginnings of the Industrial Revolution that propelled America to the first rank of the world's economic powers. And it was that same foundry that is said to have produced the anchors for the U.S.S. *Constitution*—"Old Ironsides," the venerable frigate that still symbolizes American naval and military strength.

Indeed, for two and one-half centuries the town of Raynham has been an essential part of the growth and maturing of Massachusetts, and America. Now, as a part of one of the Commonwealth's most important manufacturing areas, it will continue to play a key role in the growth and revitalization of our economy, which is our greatest challenge in the future.

Mr. Speaker, I believe that the history of the town of Raynham is, in many ways, the history of the United States in miniature. From colonial days, through revolution and war, through great social and economic change, it has grown and adapted, yet always maintained a strong pride in its own individuality. And as we all look forward to a future of growth and change, I am proud to help pay tribute to a town and its people who are celebrating 250 years of progress, innovation, and pride—a town that this week celebrates its past as it prepares for the challenge of the years ahead. I am happy to salute my constituents, the citizens of Raynham, on their town's 250th anniversary, and I ask all my colleagues in this House to join me in that tribute.

Thank you.●

THE 63D ANNIVERSARY OF THE PROCLAMATION OF THE BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. HYDE. Mr. Speaker, there are an estimated 1½ million Americans of Byelorussian descent in the United States, about 100,000 of whom live in the Chicago area. On March 25 the Byelorussian American communities commemorated the 63d anniversary of the proclamation of the Byelorussian Democratic Republic which took place in Minsk, the capital of Byelorussia, on March 25, 1918.

As Chicago Tribune reporter Barbara Brotman pointed out in a recent article, few Americans really known what Byelorussia is. Her March 26 column on Chicago's Byelorussians is interesting and helpful in understanding the plight of the Byelorussians and I am very pleased to share it with my colleagues as we commemorate this important anniversary:

INDEPENDENCE BRIEF, BUT CHICAGO'S BYELORUSSIANS REMEMBER

(By Barbara Brotman)

On Sunday, Vera and Witold Romuk, Father Vladimir Tarasevitch, and their compatriots in the Chicago area will celebrate their Fourth of July. It is the 63d anniversary of the declaration of Byelorussian independence, but the speeches and proclamations may lack a little celebratory oomph: Byelorussia's independence, declared on March 25, 1918, lasted only nine months.

But that little silver of 20th-Century freedom, sandwiched between German occupation and Russian occupation, is a cherished memory for the estimated 100,000 Byelorussian emigres in the Chicago area. "This is not the same as your Fourth of July," said

Father Vladimir, who admits that the chances for regaining independence are slim. "But in a spirit of hope and prayer, it's a goal we are trying to attain; something we had and would like back."

Few Americans really know what Byelorussia is, and it might be easier to begin the explanation by saying what Byelorussia is not. It is not Russia. Byelorussian emigres are most emphatic on that point; in fact, some call the place Bielarus to differentiate it from Russia.

It is the homeland of a Slavic people who trace their ancestry to the settlement of tribes around the 6th Century. In the Middle Ages, the area became a feudal principality called Polacak, and later was at the heart of the Grand Duchy of Litva, or Lithuania, an empire much larger than present-day Lithuania. In 1795, an expansionist Russia took over Byelorussia as well as other formerly independent Slavic and Baltic states.

Russia also gave Byelorussia its name, which means White Russia—not to be confused with the White Russians who opposed the Red Bolsheviks.

Byelorussia had the ill fortune to enter the 20th Century bounded by Poland, Russia, the Ukraine, Lithuania, Latvia, and Estonia. It was not a good place to be. In 1915, the advancing German armies invaded and occupied Byelorussia. The 1918 Brest-Litovsk treaty divided Byelorussia between Germany and Russia. But while the Czar's regime was being toppled by the Bolshevik Revolution, the Byelorussians took the opportunity to declare their independence.

Unfortunately for them, the new Soviet Russia did not approve, and once Germany collapsed, incorporated the little nation into the Soviet Union as the Byelorussian Soviet Socialist Republic.

Then Poland invaded, and the 1921 Riga treaty divided Byelorussia between Poland and Russia. And during World War II, the Byelorussians were caught between the hated Soviets and Nazi Germany. Those who weren't killed by one side often were killed by the other. One fourth of Byelorussia's 5.5 million people were killed, including virtually all of its 737,240 Jews.

Vera Romuk remembers those times. "I was 8 when the Russians came, 10 when the Germans came. Life was like a hell," she said. "In the daytime, you would see the villages set on fire by the Germans, because at night Russian guerrillas would come out of the forest and set mines. We were caught between fires."

Her family eventually fled to Germany, where her parents and older brother worked first sewing army uniforms, then cutting leather for holster, before emigrating to the United States in 1957.

By the time Romuk, now 49, graduated from high school, she had attended schools run by the Poles, Russians, Germans, Lithuanians, and Byelorussians. Only the Germans allowed Byelorussian-language schools. But her family and other Byelorussian immigrants retained a fierce love of their folk culture, of Slavic cross-stitching on white aprons, of woven blankets, and straw-inlaid boxes.

Their organizations—and the Byelorussian Coordinating Committee of Chicago (of which Romuk is secretary) incorporates three of them, including a youth group—are dedicated to preserving that culture. An exhibit of their wares at the Daley Center runs through Friday, commemorating the independence anniversary.

But there is a distinctly political side to their activities. American Byelorussians say that in supporting independence from the Soviet Union, they are speaking for their friends and relatives in Byelorussia who cannot express their views.

"When I was 12 years old and I left Byelorussia, my relatives said, 'As long as you are alive, you must speak out for us,' " Romuk said. "They should worship freely, move freely—whatever system they want, let them decide. But let Minsk (the capital of Byelorussia), not Moscow, decide for the Byelorussian people."

"It would be foolhardy to say to the Byelorussians, 'We're coming to rescue you,' " said Father Vladimir. "But what is hoped is that through such groups there will be relaxation, freedom of movement between our country and Western countries, freedom to visit friends and relatives."

Romuk said Russian authorities are quite aware of groups such as hers, which exist in London, New York, Cleveland, Detroit, Los Angeles, Colorado, and Canada. She said that in the Soviet press she has been called a swine and a prostitute for the Germans, and that neither she nor her 21-year-old daughter dare return to Byelorussia, lest they be detained.

Father Vladimir stays in the U.S. for other reasons. He can find no other Byelorussian Catholic priest to replace him. He was recalled from studies in Rome to replace his late uncle as pastor of Christ the Redeemer Church, founded by his uncle in 1955. The building is a converted insurance company firehouse on West Fullerton and is the only Byelorussian Catholic Church in the Western Hemisphere; two-thirds of Byelorussians are Orthodox.

If the young people speak Byelorussian, it is with an American accent, he said, and there are those who say Byelorussian churches like his and St. George Byelorussian Orthodox Church have outlived their usefulness.

Still some young people are changing their names from Anglicized versions to the Byelorussian originals. And the older generation keeps the faith, campaigning for the homeland, patiently explaining the difference between Byelorussia and Russia. "We fought with the newspapers to identify Olga Korbut as Byelorussian," Romuk sighed, "but they didn't listen."

Romuk and the others don native dress and get their pictures taken with politicians on independence day; the mayor and governor issue proclamations of Byelorussian Independence Day; the faithful publish Byelorussian newsletters, historical monographs, and samizdats. They keep in touch with the Catholic bishop-in-exile, who lives in London, and the Byelorussian president-in-exile, in Ontario, Canada.

Romuk and her husband, pediatrician Witold Romuk, say there is a strong dissident movement in Byelorussia. "And we heard there were strikes last June," Dr. Romuk said hopefully.

They even count the United Nations seat of Byelorussia, a founding member, as a victory, although Byelorussia votes with the Soviet Union. "Culturally, it's important," Vera Rimuk said. "At least they can't deny the country exists."●

THE ATLANTA MURDERS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. WEISS. Mr. Speaker, I would like to commend our colleague WYCHE FOWLER for giving us this opportunity to address the continuing tragedy of violence in our country, specifically the recurring murders of children in Atlanta.

Yesterday the Nation was shocked by the shooting of President Reagan and of three others with him. Today we were deeply saddened to learn that yet another senseless attack has resulted in the slaying of a black child in Atlanta, adding the 21st name to the tragic toll in that city. In recent months these murders have become symbols of our maddeningly persistent national problem of violent crime.

All too often in the last year I have joined with Members of this body to mourn the violent deaths of such outstanding individuals as Allard Lowenstein, Michael Halberstam, and John Lennon. As we remember today the disappearance and killings of these 21 children, let us reaffirm Federal support fo the city of Atlanta's efforts to end the murders and reaffirm congressional commitment to national policies which would help prevent such deeds in the future.

I share the sense of loss and frustration of the people of Atlanta that no one responsible for any of these crimes has yet been arrested. I know I join every American in hoping for a swift resolution to the situation before another child is slain.●

DOES OSHA ACTION AUGUR WIDE BACK-DOOR ATTACK ON REGULATORY LAWS?

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. GAYDOS. Mr. Speaker, every department of Government, by its actions, not its words, sets a policy on doors, and Secretaries are known by the doors they keep—some have had open doors, which is good, and some practiced behind closed doors, which is not so good.

But a back-door policy is deplorable. It has no place in governing the United States. Based on trickery, it destroys the elements of good faith and honest bargains necessary to make this Government work well for everybody.

It is early to make judgments on how the Department of Labor and the

Occupational Safety and Health Administration will handle their doors.

However, some critics are beginning to say they are inclined to want the back door in matters of regulation, or, more specifically, regulatory reform.

Developments of last week, possibly a seminal one in the administration's reform policy, have caused some observers to wonder if its regulatory reformers are trying to chisel in stone what amounts to vast new regulatory law without giving Congress the opportunity to express the will of the people.

If the assessment is correct, it truly is a back-door policy.

The reformers want to use a new regulatory concept called cost-benefit analysis, but nowhere is the idea recognized in statutory law establishing regulation. It is a vague concept right now. Although you read the phrase often, no officer of the administration has explained to any committee of Congress, or anyone, what is to go into it. Cost-benefit analysis now is just a nice-sounding concept—like the words "ice cream." But the Nation has general agreement on what ice cream is, it is good. We know nothing of cost-benefit analysis. However, cost-benefit analysis have been mentioned in several court cases involving OSHA, including one now pending before the U.S. Supreme Court.

In this pending case, a lower court held this concept of cost-benefit analysis is not a relevant consideration unless the industry to be regulated is threatened. Cost-benefit analysis is before the Court on appeal.

And last week the Assistant Secretary of Labor for Occupational Safety and Health, Thorne Auchter, posted in his set of on-appeal standards—cotton dust—notice that he will remake the rules to give consideration to cost-benefit analysis and will use the proceeding to decide whether he will use it on everything. His "Advanced Notice of Proposed Rulemaking" put it this way:

> To evaluate the practicality of cost-benefit balancing by investigating the concept in the manner of an actual standards in a manner which permits public comment.

The Supreme Court is to be informed of all this in a memorandum from the Solicitor General in the case.

Of course, the memorandum also takes OSHA out of the posture of defending its standards and somewhere close to the posture of suggesting to the Court that the Justices should write cost-benefit analysis into the law.

If the Court follows that lead, its regulatory theoreticians would have a free hand to use a concept as yet unknown, unexplained, and untested content. And it will be one which the people had no say through their elected Representatives in Congress.

Meanwhile, the Vice President gave notice cost-benefit analysis will be applied to just about every regulation on the books. Mr. BUSH did not explain, however, the ingredients of cost-benefit. As his task force on regulation made its first public report.

However, Mr. Auchter, of OSHA gave a hint last week.

His notice said OSHA's consideration of cost-benefit will include "the financial strength of the industry, its capital needs, its structure, and so forth * * *."

And so forth?

"And so forth" covers a lot of ground. It truly qualifies as vague. It is something Congress should help firm up.

Other questions are being called to my attention.

Was cotton dust chosen for the first development and application of cost-benefit analysis, as critics of the action say, because the concept is before the U.S. Supreme Court?

Do the regulatory budget cuts, particularly the massive reductions planned for the National Institute of Occupational Safety and Health, represent austerity and an attempt to control spending in one of the reachable places? Or do they stand for an attempt to slow down the pace? Or are they meant to cut off what is seen as the head of the regulatory snake?

Regulation, particularly occupational safety and health regulation, was created by Congress because the people wanted it, demanded it. Yet nothing was ever written, designed, or born that cannot be made to function better with honest bargaining and good faith.

The front door is the door of good faith, and the honest tradesman, and the open door is the best of all.

And the time is rapidly drawing near for the administration's regulatory experts to tell us what they have in mind and how they want to do it.

The theoreticians should understand the back door is the entrance of the trickster and con man. Through that door is only momentary advantage, not progress.

But it still is too early to make judgments on how the administration's agencies will handle their doors. Whatever the case, Congress will not be a doormat.●

PUBLIC EDUCATION: A SUPPLY-SIDE INVESTMENT

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. MATTOX. Mr. Speaker, we have been hearing a great deal these days about supply-side economics and other such theories.

Basically, we are told that we can solve all the Nation's woes if we will simply unleash the productive side of our economy. This can be accomplished, the theory goes, through Government intervention designed to encourage private sector investments.

As far as the private sector goes, I do not disgree with this simple concept. In fact, insofar as it remains a simple conceptual theory, untouched by the hard realities of our complex world, this economic theory has my basic support.

But those of us in Government have a greater mandate—if you will excuse the expression—than to live solely in the stimulating realm of economic theories. Indeed, we have an obligation to encourage another type of investment—the public sector investment in the public education of our youth. This is an investment that requires the aggregate participation of our society—and it is one that mandates us in Government to act with responsibility and sensitivity.

Mr. Speaker, this year the city of Dallas, Tex., will be honored to host the annual convention of the National Association of School Boards (NASB). For the benefit of my colleagues and others who may be interested, I would like to share the text of the NASB testimony which was presented to the House Budget Committee's Task Force on Human Resources Programs and Block Grants.

Although I do not have the privilege of serving on this particular task force, I found the NASB testimony interesting—particularly the portion entitled "Addressing the Perception that Advocacy for Public Elementary and Secondary Education Stems From a Selfish Special Interest."

Mr. Speaker, the people who make up our local boards of education are responsible, civic minded individuals. For the most part they serve their communities with little or no remuneration and are motivated by a genuine desire to improve the quality of public education. They come from all walks of life and represent no selfish special interest.

The NASB is not objecting to the administration's education proposals in toto—but as responsible community leaders have made a persuasive case for the need to look closely, and even critically, at some aspects of that program.

They would be the first to agree, as would I, that some of the Federal education policies have not been carried out effectively—but this is no reason to take a meat ax to the education budget. Cuts are necessary to be sure, but we must not be stampeded into rubber stamping the administration's program simply because David Stockman and his fellow supply-side theorists have asked us to do so.

It may very well be, Mr. Speaker, that an administration that is quick to criticize as selfish, those who raise legitimate objections to portions of its program, is itself behaving in a selfish manner.

The text of the NASB testimony follows:

TESTIMONY ON BEHALF OF THE NATIONAL SCHOOL BOARDS ASSOCIATION, PRESENTED BY AUGUST W. STEINHILBER

SUMMARY

Federal funding for elementary and secondary education is an investment in the nation's future economic productivity. the federal government's contribution to the support of the educational program in school districts is substantial—particularly for those children with special needs.

The National School Boards Association (NSBA) believes that federal funding for on-going programs should be maintained without rescission at the level now in the FY 1981 Continuing Resolution on Appropriations (P.L. 96-536). In FY 1982 these programs are recommended for a 7% increase, as the Reagan Administration recommends, but on the FY 1981 base without rescissions.

The number of federal reductions for public schools proposed by the Reagan Administration in the areas of school lunch and energy, if enacted by Congress, are in addition to the sweeping education program reductions. Consequently, the fiscal impact on public school districts will be much more profound than has been evidenced by the Administration. School districts work with very little or no budget flexibility. Therefore, any reduction will eliminate educational programs or require additional local and state tax funds. The magnitude of the service cuts to local communities and the state make the likelihood of achieving an increase in taxes from these sources unlikely for the majority of school districts.

NSBA supports a consolidation of some education programs. Over the years, the complexity of the laws and their accompanying regulations have grown. Part of this growth stems from the understandable need for Congress to assure for themselves that the funds are spent for its authorized purpose. Others stem from the desire to compromise between the special interest groups who wish to influence local schools from the national level. Regardless of the source, the complexity and direction now contained in the laws have made them increasingly difficult for school boards to govern.

Specifically, NSBA will support a consolidation proposal if the proposal meets, at minimum, the following criteria.

The federal purpose in education must not become obscured.

The funds must flow directly to the local school districts and not through the state government.

The reason for consolidation must not be to drastically cut funding levels.

School board members must have more flexibility in the management of these programs than they now have under existing law.

INTRODUCTION: STATEMENT OF GENERAL CONCERN

The federal government provides to public schools approximately 10% of their revenues. Thus, the federal government plays a significant role in helping our public schools achieve quality programs so that the American people have an equal opportunity to succeed or fail in our economic system. Therefore, school board members reacted well to the President's commitment to deal with the five economic problems he identified on February 18th of this year.

He described "runaway inflation" as a major problem. We agree because school board members are responsible for the fiscal oversight and management of their school districts. The inflationary increases have steadily eating into our capability to deliver services.

We wholeheartedly agreed with the second problem: "excessive regulation." In many communities the federal regulations have eroded the local governance powers of school boards and have exasperated the school administrators to the degree that some have begun to see the federal government's money as an instrusion rather than a help.

In the area of tax burdens, we also commiserated. School board members know how difficult it is to raise the local and state funds that are required to competently operate the schools. We know that it is difficult to convince the public that without adequate revenues they will lose services that will cost much more to provide privately than publicly. Educating 90% of our nation's elementary and secondary students is one such service area. We are also concerned about the increasing budget deficits, and the growth of the federal budget. School board members recognize the danger of irresponsible fiscal decisions.

Nevertheless, we were deeply disquieted when it became apparent that the President noted these problems and then proposed, as part of the solution, a deep cut into the funding for elementary and secondary education programs. It seems to be a belief of this Administration that the only way to invest in the future is to spend through tax expenditures. NSBA differs with the Administration perspective at this point. To cut education to the quick, and then claim that the "truly needy" will not be harmed, assumes that federal education funding is an overgrown welfare program.

When elementary and secondary education programs are cut, an investment program is being cut. Education funding is one of the most important ways this country can invest. It invests in the capability of its citizens to produce both economically and socially. The National School Board Association is deeply troubled that the Administration has apparently missed this connection between the schoolhouse and the corporate office.

The Administration's proposed reductions in every one of the major federal education programs ignores the function of schools in our economic infrastructure. The recent examinations of Japanese economic productivity is tied by most observers to that country's educated workforce. For example, Nation's Business this month quoted William S. Anderson, President of NCR Corporation saying that "it is no exaggeration to say that Japan is today the most literate, best-educated nation in the world. * * * They transplant more easily into higher-technology jobs".[1]

[1] William S. Anderson, "What We Are Learning From Japan" in Nation's Business, March 1981, pp. 39-41.

The National School Boards Association (NSBA) does agree, that changes—in some cases major changes—in the manner by which things have been done in the name of the public good must be altered. We are willing to do our share of the work and to do our share of sacrifice. But our willingness has been misread by some as meaning that education is an easy target for funding reductions that are far out of proportion for any viable arguments that all will participate equally in a national attempt to stabilize our economy. The National School Boards Association will not, in the name of cooperation, permit an attempt to undermine the concept of a free public education that is actualized by the nation's public schools to remain unchallenged.

Federal funding for public education

Since February 18, the President has changed his education funding levels three times. In his February 18 document titled A Program for Economic Recovery, he projected that elementary and secondary education in FY 1982 would receive 80% of the levels in the 1981 Continuing Resolution on Appropriations (P.L. 96-536). Within the next two weeks, we learned by newspaper that the Office of Management and Budget had made an estimating error and that $7 to $10 billion more in cuts could be expected. Soon afterward, we were informed by the press that elementary and secondary education would receive an additional 5% reduction and could anticipate a 25% cut from FY 1981 to FY 1982. In all cases, school districts were promised a consolidation package of major programs so that some of the troublesome, unnecessary and costly regulations could be lifted from the shoulders of school districts. Then, last week on March 10th, we were informed that the Administration is proposing a 25% cut in FY 1981—this fall. In addition, there would be no consolidation legislation to lessen any of the impact. From this base of 75% of the FY 1981 level, education is given a 7% increase for FY 1982. Even this increase is dependent upon the actualization of the Reagan economic forecast.

As you are aware, the federal education programs are advance-funded. Programs receive their budget authority in one year and begin to receive the funds 9 months later on July 1. This 9-month period gives the schools the opportunity to plan for the best use of the money. This year this responsible management strategy has been turned against the public schools. Since the schools have not had the opportunity to spend their funds, these funds have been irresponsibly attacked as a cache to be robbed.

School districts over the nation have finished their budget cycle for the school year (1981-1982) which begins this fall. They are depending upon the federal government to keep its commitment. On behalf of local school board members and on behalf of the children they represent, we urge you not to rescind the elementary and secondary education FY 1981 funds upon which these local communities have been counting. Using the FY 1981 Continuing Resolution on Appropriation base figures, we urge you to consider a 7% increase in FY 1982 over FY 1981 as the Administration has suggested (See Table I).

TABLE I.—THE NATIONAL SCHOOL BOARDS ASSOCIATION FISCAL YEAR 1981 AND 1982 FUNDING RECOMMENDATIONS

[In thousands of dollars]

	1981 continuing resolution (Public Law 96-536)	1982 budget
Grants for disadvantaged:		
Grants to local educational agencies	$2,824,880	$3,022,622
Concentration grants	142,142	152,092
Emergency school aid:		
Grants to school districts	107,800	115,346
Special programs and projects	75,083	80,333
Magnet schools	30,000	32,100
Education for the handicapped:		
State grant program [1]	[1] 922,000	[1] 1,089,660
Preschool incentive grants	25,000	26,750
Vocational Education	779,241	833,787
Impact Aid	790,000	845,300
School Lunch	3,464,000	4,464,000

[1] This program is held at an average of 12 percent of the extra costs required to educate a handicapped student.

School lunch program

The 40% cut of $2.5 billion in the school lunch program raises serious questions about the survival of this program in the local schools. The Department of Agriculture estimates that for every 1¢ increase in the price of a lunch, there is a 1% drop in participation. This estimate is drawn from the Department's experience with the program since the program's inception in 1947. Given these figures, we can expect a 40% drop in school lunch participation.

The Reagan Administration claims that the "truly needy" will be protected under this budget. Therefore, he has taken the cut by eliminating the subsidy for children from families with an income above $15,630. For the child who received a reduced-price lunch because his family's income is at the upper end of 125% to 195% of the poverty line, the shock will be even more profound. He will find his lunch jumping in cost from 20¢ to over a dollar should the Administration achieve their objective in reducing the eligibility requirement from the 195% to 185% of poverty. The shock this price increase will give to the community will raise prices drastically for the school lunch, push down participation and in many cases close school kitchens. When school kitchens close, no one will be served meals, including the "truly needy." At the point the "safety net" has failed.

The relationships between Federal funding and local control

An argument being utilized as a justification for the severe reductions in education funding by this Administration is that schools are the major responsibility of local and state governments. NSBA is committed to keeping the governance of the public schools in the hands of the representatives of local communities. However, this commitment is not based on a narrow provincialism that divorces the local governance responsibilities of school boards from important national interests. There is a national interest in education that transcends but does not violate the fact that the state governments have the legal responsibility for educating our school children. There is tacit acceptance of this national interest even by the states when they pay approximately 50% of the staff in state departments of education with federal dollars.

School board members object when the federal government and the states over-regulate federal programs to the extent that they have almost no control over programs operating in the school districts for which they are held responsible. However, there are things best instigated at the federal level in partnership with local school districts. For example, the Education for All Handicapped Children Act (P.L. 94-142) improves the opportunity for handicapped children to receive an equal education.

This program is an excellent example of the investment at the local level the federal government is making in the nation's economic future. This program provides the educable handicapped student with the basic skills required to keep individuals from a lifetime of institutionalization and often provides basic job skills that permit a contribution rather than a handout from society. For less handicapped students the special programs permit the acquisition of skills to overcome a handicap. In these cases and there are many of these, the lack of the program could lead to the frustration from school failure with the well-known consequences for society.

The program serves a clear national interest that is of high priority. The same statement can be made about Title I of the Elementary and Secondary Education Act where educationally disadvantaged children in elementary school are given an opportunity to make faster progress in school; it can be made about vocational education where work skills are provided to students; and it can be made for Impact Aid where school districts are reimbursed for the loss of revenue as a result of federal activities in their communities and other programs.

The best method for the federal government to make an investment in the educational process is by creating a partnership with local school boards. The federal investment in the public schools serves the general public good of the nation when it enhances the capability of people to participate in it. Participation in the sense that NSBA is using the concept includes that of governing and being governed, meaningful and useful employment, and service in the defense of the country. Education is an investment to assure the level of participation that is essential to a democratic society in each of these areas. The federal government has a national interest in this participation and thus a responsibility for funding elementary and secondary education in partnership with local school boards.

Addressing a perception that advocacy for public elementary and secondary education stems from a selfish "special interest"

It is with grave concern that the National School Boards Association notes that among the variety of justifications used to defend the severe funding reductions is the dismissal of education advocates as "special interest" groups. Our objection to the FY 1981 cuts are dismissed in some quarters as the predictable shrieking of a "special" interest group whose advocacy of particular spending represents an unhealthy drain on resources needed to support the general public good. NSBA's interest in federal funding for public elementary and secondary schools springs from a commitment to public service directly benefiting children of school age in every local community. Our interest is special but not in a narrow selfish sense. Education is not a special interest where funding benefits only a select group. The education process that is generated and enhanced through federal dollars serves a broad national economic interest.

Neither are school board members representative of one type of education professional or one type of community. They do have one thing in common: a belief in the local public schools' capacity to educate. In 16,000 districts where board members serve to improve and enhance the educational system in their communities, most receive little or no reimbursement. With the threat of decreasing funding levels, their task is much more difficult. If the funding reductions proposed by this Administration are supported by this Congress, most communities will not be able to raise the funds to operate programs in the schools.

CONCLUSION

The magnitude of cuts that will affect local communities from other proposed federal reductions such as highway and sewer constructions, higher education, CETA, mass transit and others, will make it necessary for communities to absorb these costs. It is going to be extraordinarily difficult to raise the funds in the future to operate the schools. School board members are going to face excruciating decisions. Our early evidence indicates the nature some of the decisions that will be made. Teachers will be laid off, thus pushing up community unemployment rates. Inadequate salaries will be further eroded, thus limiting our capability to attract the most talented individuals for teaching jobs. Special programs will be limited with the result that some children who were formerly given that extra help to succeed will now fail. Court cases will multiply as services for those who should have special programs are cut. Any "savings" achieved from a sweeping 25% plus reduction in our education investments will be short-term at best. Our interest in protecting the federal funding that addresses the two major federal goals of equal opportunity and quality are not selfish from either the perspective of those who serve as school board members nor from that of the school children who are the ultimate recipients of school board service.●

IN HONOR OF GREEK INDEPENDENCE

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. PEYSER. Mr. Speaker, on Sunday, over 90,000 marchers, 31 floats, and hundreds of thousands of people in the city of New York joined the nation of Greece celebrating the 160th anniversary of her struggle for independence. On behalf of the people of the 23d Congressional District of New York, I want to take this opportunity to honor the valiant fight of the Greek people for their freedom.

As we examine the common bonds between our two nations, I am certain my colleagues share my sense of awe at the extent of the contributions the people of Greece have given to our country and the world. Everywhere we look we find the imprint of the people of the Greek city-state on our culture and heritage. Whether it is in our language, literature, the arts, science, mathematics, architecture, commerce, medicine, philosophy, law, or government we are indebted to the ancient Greeks for their gifts and insight.

As a college major in the classics, I have a particular fondness for the great literature Greece has given the world. But while each of us can point to the treasures of Greece that enrich our individual disciplines, it is the Greek's sense of freedom, love of learning, and search for truth which are most significant. The fundamental principles of our Nation are rooted in the ideals of ancient Greece. The concept of democracy to which they gave birth has enabled the people of our Nation and those of many others to live in freedom and dignity. While it may not yet flourish in all corners of the world, it is still our promise for the future.

The spirit embodied by the people of Greece, I believe, serves as a model for all the people of the world. For much of modern history, their greatly beloved democracy was lost to them. Their subjugation at the hands of the rulers of the Ottman Empire lasted nearly 400 years. I can envision no crueler fate for the architects of the ideals of freedom and liberty than to be conquered and enslaved.

On March 25, 1821, when a small band of Greek patriots began the revolt which was to lead to their freedom, it inspired the entire world and attracted the support of freedom-minded people everywhere, including Lord Byron who gave up his life by coming to the aid of the Greek people.

The fight for Greek independence was to last 11 difficult years. Perhaps the example of our successful Revolution strengthened their resolve to shed the tyranny of their oppression. Indeed, many parallels exist between the American Revolution and the fight for Greek independence. Just as our Revolution caught fire after the battles of Lexington and Concord, so the Greek independence movement spread after uprisings in the Peloponnesos and some of the Aegean islands. As in our case, their formal declaration of independence was not declared until a year after the initial skirmishes. Both revolutions had to fight mercenary armies and were aided late in the conflict by European allies. Furthermore, both revolutions at the start had no standing army and no currency, but were carried to victory by the spirit of their people.

As many of my colleagues join me this week in honoring the Greek heritage and the Greek's struggle for independence, I am sure we share the same overwhelming realization that no greater recognition can be made of her lasting achievements than the activity in this forum. For each day as we enter this Chamber to consider, debate, and vote on the issues before us, we, in effect, are paying tribute to the ideals and practices born in Greece of over 2,500 years ago.

So, during this week, when the people in every village, town, and city in Greece celebrate their independence, Americans in every community join in paying our respect and in wishing Greece and her people continued prosperity.●

REAGAN'S TAX PROPOSALS AND PROBLEMS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. WEISS. Mr. Speaker, the President's proposals to cut social programs that mainly benefit the poor, and the proposed adoption of tax policies that favor high income brackets are not only inequitable, but could have little impact on inflation and unemployment.

An article by Prof. William Nordhaus of Yale, which appeared in the New York Times, effectively argues that the President's tax package would subject low-income households to the highest tax rates. He also demonstrates that the Federal Government and Federal deficit are not the primary causes of inflation.

The article follows:

THE NEW BRAND OF ECONOMICS

With two major speeches, an audit and a gaggle of fact sheets, President Reagan has staged an economic thriller, full of heroes and villains. We can now see the details of the new President's economic vision. The starting point for the program is the Administration's "Brand-New Economics." What are its tenets?

First, the excessive scope of Government is held responsible for the economic ills of the day.

Second, by getting Government's house in order, we can regain the golden age of low inflation, high productivity and low unemployment.

Third, the brand-new economics rejects the view of the dismal old economics that slack is necessary for breaking out of today's stagflation. Demand management is eschewed, so there is no apparent connection between the budgetary policies adopted and the level of unemployment or inflation. In short, do not fear policies that stimulate rapid economic growth as long as they are led by expansion of the private sector.

Behind the banner of reducing waste and unleashing the private sector, the brand-new economics represents an attempt to reverse the redistributed impact of Government policies.

In the expenditure field, the redistributive impact is seen by the exemption of sacred middle-class programs—defense, Social Security, etc. The remainder contains $75 billion of programs that are designed, however ineptly, to protect the poor. As Mr. Reagan proposes to trim these substantially, the net effect is to redistribute resources from the poor to defense and taxpayers.

The regressive feature of the brand-new economics can be seen as well in the tax package. The personal and business taxes are effectively reduced, while Social Security taxes and the earned-income tax credit, features heavily affecting low-income families, are unchanged.

Moreover, the personal tax cuts—the Kemp-Roth cuts—are proportional to taxes, so that the upper-income groups benefit far more than the lower-income groups. And the biggest winners of all are those with the largest property income. On the margin, their take-home pay goes up 60 percent.

How much sense does the brand new economics make? Central questions involve the supply-siders' tunnel vision, the indictment of Government, the inflation diagnosis, the expenditure cuts and the longer-run outlook.

The most striking irony in the brand new economics is the focus on incentives for the rich, while ignoring those for the poor. Surprisingly, low-income households face the highest "tax rates" (more precisely, the benefit-reduction rates). Upon landing a job, they may find that their disposable income declines as a result of tax rates built into programs such as food stamps. Poor families, then, may well face marginal tax rates over 100 percent.

A true supply-sider might wonder whether such rates do not stifle work effort. Yet, the brand-new economics actually raises the tax rate on the poor by technical changes in the food stamp program.

Are tax incentives only for affluent job holders? Is it accurate to state that reckless Government tax and regulatory policies have caused the poor productivity and growth of the United States economy? Would that it were so simple. Most economic studies attribute at most a quarter of the productivity slowdown to Government mismanagement.

Other features of the last decade, such as rising oil prices, changing demography, sectoral shifts and tight money, are more significant. I cannot see how the brand-new economics will significantly alter these trends.

A third feature of the brand-new economics is to attribute the inflation to Government deficits. (Actually, they appear uncertain on this issue, sometimes money growth is considered the villain.) On occasion, Presidential simplification can serve as a useful rallying cry. But associating inflation with Government deficits is simply an old husbands' tale.

The years in which inflation rose in the United States, 1973 and 1979, were periods in which the public sector was in surplus. Moreover, countries that have shown superior recent inflation performance, West Germany and Japan, had at the same time much larger Govenment deficits relative to their economy than the United States. Blaming the affairs of state for our entire economic mess is politically chic, but economically groundless.

The aspect of the brand-new economics that has most promise is the expenditure cuts. Although many cuts are regressive, the package attacks several long-standing abuses. Many, such as dairy price supports or waste treatment grants or public service employment, have been criticized by policy analysts for years. Unfortunately, their reservations were often overridden by political "realism."

If the Reagan list is supplemented with prudence in defense spending, as well as concern for poorer citizens, it can form a useful start for a thorough fiscal spring housecleaning.

The central political and economic issue concerning the Reagan economic package is, will it work? While there has been no comprehensive study of the validity of the brand-new economics, two pieces of analysis

cast doubt on the validity of the supply-side panacea:

Data Resources simulated the effects of large personal tax cuts in their model. The impact on productivity and inflation by the mid-1980's is extremely small, less than one-tenth of a percentage point. The report of the outgoing Council of Economic Advisers contains a careful analysis of the impact of alternative tax packages. They conclude that a 10 percent reduction in personal tax rates would have a negligible effect on inflation and productivity.

In sum, Mr. Reagan's branch-new economics may well succeed in helping trim Federal waste, and upper income groups may get a bigger share of the pie. In terms of the nation's central economic problems—inflation, productivity, unemployment, high interest rates—we are likely to witness another half-decade of stagflation and dashed hopes.●

BILINGUAL EDUCATION

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. BEREUTER. Mr. Speaker, I would like to bring to my colleagues' attention an editorial I read in one of the major newspapers in my congressional district, the Lincoln Journal.

The editorial expresses my feelings on the issue of bilingual education. The conclusion stands out:

American citizens, regardless of place or original birth or home environment, should get their principal schooling in English. And much more emphasis ought to be placed on teaching of other languages, which are foreign only to our minds, tongues and perceptions.

I commend the complete editorial to my colleagues' attention.

[From the Lincoln Journal, Mar. 20, 1981]

YES, ENGLISH FIRST, BUT * * *

The Reagan administration's scrapping of Carter administration rules requiring that every public school district having at least 16 students with a first language other than English teach them in that language was a sound decision.

President Reagan's subsequent personal reinforcement of that judgment also was well grounded.

Competency in English should be the first priority for all non-English speaking Americans, he said. We agree.

That is not a narrow-minded attitude. To the contrary, a common language in this polyglot continental nation of 225 million people is fundamental. We must have the capability of talking to and with each other with some basic level of comprehension.

The sharpest critics of the Reagan decision against mandatory bilingual educational programs are Americans who came from homes where the only language was/is Spanish.

They profoundly understand that language and culture are eternally bound, and if children are directed away from Spanish as a primary tongue, their proud cultural links may also be weakened. But they must also agree they are Americans before they are hyphenated anything else.

Unofficially, of course, Spanish already is this country's second language. Those who do not agree probably have not traveled much through the American Southwest and Florida in the last quarter century.

Take away Quebec in Canada and Brazil in South America, and Spanish is the primary language of the "New World" beyond the borders of the United States.

Perhaps what school districts across the Republic really ought to be considering is requiring several years of instruction in Spanish as a basic. If you don't think bilingual and multilingual fluency won't be increasingly important for Americans in the 21st century, you haven't kept up with current events, amigo.

Generally speaking, modern-day Americans are grossly deficient in language arts. That deficiency has handicapped our ability to win international hearts and minds, to say nothing of competitive trade.

Beyond that, the lack of skill in other languages discourages anything other than superficial understanding of cultural attributes—even imperatives—which move peoples around the world.

The bottom lines, then, are twins. American citizens, regardless of place of original birth or home environment, should get their principal schooling in English. And much more emphasis ought to be placed on teaching of other languages, which are foreign only to our minds, tongues and perceptions.●

THE SUPPLY SIDE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. PHILIP M. CRANE. Mr. Speaker, President Reagan stated in his dramatic address to Congress that "we will restore the freedom of all men and women to excel and create. We will unleash the energy and genius of the American people—traits which have never failed us." This affirmation of American ability finds its most eloquent expression in the President's tax reduction bill.

President Reagan's commitment to supply side economics is not unique to him. A former President, usually characterized as liberal, had the same vision of the ability of the American people. President John Kennedy concluded his 1963 tax message to Congress with the following confidence in America's ability to grow under the proper conditions:

The most urgent task facing our nation at home today is to end the tragic waste of unemployment and unused resources—to step up the growth and vigor or our national economy—to increase job and investment opportunities—to impove our productivity—and thereby strengthen our nation's ability to meet its worldwide commitments for the defense and growth of freedom.

Providing America the opportunity to grow and produce is an issue that should transcend party lines or philosophical labels. In that spirit, I offer for the edification of all my colleagues an insightful speech by J. William Middendorf II, president of the Committee for Monetary Research and Education, Inc., explaining the wisdom of the growth philosophy embodied in the President's tax reductions.

SUPPLY-SIDE ECONOMICS: A PRACTICAL GUIDE

(By J. William Middendorf II)

On July 14, 1977, Congressman Jack Kemp and Senator William Roth took the concept of supply-side economics out of the arcane realm of academic theorists and into the real world of political policy debate.

On that day, with few supporters, Kemp and Roth introduced legislation that would reduce tax rates by 30 percent across the board over three years. Little did the Keynesians realize that that bill, more than any single act, spelled the end of 45 years of dominance by the bankrupt economic principles of Lord Keynes.

Less than four years later, supply-siders dominate the new national administration. The revolutionaries have come to power. Not surprisingly the Keynesians deny failure. The social engineers refuse to accept the facts that show their policies inadequate to deal with the triple horrors of inflation, unemployment and inexorably rising taxes.

Now the supply-siders face a different problem. As Paul Craig Roberts pointed out last week in the Wall Street Journal. "The problem (now) isn't in controlling the policy but in controlling the explanation of it."

Until recently the supply-siders have been on the offensive in a guerrilla war. Now in power, they must broaden their base of public and political support. Administration policy objectives must be translated into legislative accomplishments. Just as important, federal objectives must filter down to the state and local level. Other than a failure to properly implement supply-side policy in Washington, the greatest threat to proving the viability of this modern economic theory will be the failure of states, cities, and counties to throw off the reins of Keynesianism.

If federal tax cuts are simply replaced by increased taxes in the states and localities—whether through inflation or legislation—the people will not enjoy the renewed economic freedom to save and invest in the ways needed to improve business productivity and increase employment. This could frustrate the federal program.

My purpose, therefore, is less to extol the virtues of supply-side policy than to recap the arguments needed to popularize it—the need and the proven success stories. In doing this I hope to address what I see as a growing national threat: the danger that opponents of supply-side economics will so distort the facts that political implementation of this important new policy will be impeded.

We must not lose the battle of semantics. Too often our opposition cleverly twists terms that are favorable to our viewpoint to their own use and adopts negative sounding generalized cliches to define our principles. For example, a whole generation of economic students have been weaned on self-incriminating phrases like "robber baron," "bucket shop,"' and "sweat shop" as the definition of capitalism, bringing to mind old causes and sainted names. At the same time, anything opposed to capitalism was "progressive," "liberal," "enlightened," "concerned," and "environmentalist." In the battle of semantics we clearly lost.

A current distortion is the term "unearned income" which evokes images of fat capitalists in easy chairs clipping their cou-

pons while looking out the bay windows of their clubs at the peasants below. The IRS is the principal proponent of the distinction between earned and unearned income: "Earned income" is described as wages, salary, consulting fees, etc. involving your personal service. "Unearned income" is all other income whether it be from a savings bank or dividends. The latter is therefore any income which postponed current consumption for future income (hopefully greater). It is this postponement of current pleasure which builds new competitive plants that create new jobs and increases the long term demand for labor which makes wages rise. Ludwig von Mises in the introduction of his book Liberalism called this an example of "reasonable (human) action." "Reasonable action is distinguished from unreasonable action in that it involves provisional sacrifices, since they are outweighed by the favorable consequences that later ensue."

Let me begin with some undisputed facts which, collectively, develop a conclusive case for sharply reduced taxation and government intrusion in the private sector (the heart of supply-side economics).

Fact I: The rate of personal saving has dropped steadily throughout the 1970's, standing now at about 60 percent of levels at the beginning of the decade.

The reason is very simple. Traditional types of saving are, today, money losing propositions. Inflation and taxes combine to reduce the value of savings and accumulated interest. Rather than saving, therefore, people "invest" by consuming. Let's face it: people are a lot smarter than most policy makers think. They see the value of their savings being eroded and they're doing something about it. Unfortunately by doing so, traditional savers fuel inflation by bidding up the price of consumer goods and by denying the investment capital needed to create the new plants and tools for modernized basic industries. When it takes more than $30,000 of new capital to buy the modern machinery needed to put one worker to work in our major industries, it is no wonder jobs are being lost to foreign competition using more modern technologies.

Fact II: The total assets of money market funds recently topped $100 billion.

On the surface, this might seem to refute the fact that saving is declining. As in so many cases, the surface impression is an illusion. This huge pool of funds is invested exclusively in debt rather than equity securities, and many of these instruments are sold by the Federal Government. Much of the pool comes from individuals who have sold equity investments for the sole purpose of establishing a hedge against inflation. Money funds are both riskless and non-productive. They represent simply an investment shift into high interest rate vehicles and not an infusion of new capital. And, of course, money funds owe their very existence to inflation.

Fact III: The rate of personal indebtedness has recently risen substantially faster than income.

The increase in the use of installment credit by consumers parallels the drop in consumer saving. It's the buy-now-pay later method of fighting inflation. But its impact is substantial. It not only drains credit from more productive uses but places a growing number of consumers into an increasingly precarious financial position.

Fact IV: During the 1970's the so-called underground economy has tripled as a percentage of GNP as more and more people seek largely illegal ways to avoid reporting income.

Using methodology developed by Professor Peter Gutmann of Baruch College, it is calculated that the underground economy jumped to nearly $265 billion in 1978 or from about 3-4 percent of GNP in the 50's and 60's to 12.6 percent in 1978. Through a host of illegal activities millions of people are findings ways to avoid reporting income. It must be assumed that the vast majority of these people are not hardened criminals. Given lower tax rates many of these people would not seek to end-run the tax system. Therefore, inflated tax rates not only remove a large source of government income but actively encourage illegal activity.

Fact V: The use of tax shelters has skyrocketed in recent years.

As tens of millions of people find their inflation-propelled income at or near the highest tax brackets, more and more are seeking legal ways to shelter income. No aggregate figures on tax shelters exist, but one small piece of data illustrates the problem. According to the National Tax Shelter Digest, the total annual investment in limited partnerships has skyrocketed from $1.8 billion in 1974 to a projected $9.6 billion in 1981. And that's only the tip of the iceberg. Only a relatively small number of sophisticated investors use oil and gas or equipment leasing partnerships as a means of tax postponement. The number of people who have recently bought investment real estate or tax free bonds would, I suspect, be a real shock.

And remember one thing about tax shelters. They are investments designed solely to reduce taxes. Clearly that's not a very productive form of investment for either business or government. Neither is it a new response to excessive taxation. In 1920, then Treasury Secretary David Houston noted that high tax rates left over from World War I were "rapidly driving the wealthier taxpayers to transfer their investments into the thousands of millions of tax-free securities." Houston went on to add that, "The effective way to tax the rich is to adopt rates that do not force investment in tax-exempt securities" (in effect reduce tax rates, and, almost by definition, increase tax revenues.)

Fact VI: Unemployment is today stuck at levels which, in the 1950's and 1960's, we would have considered disastrous. Reported unemployment among the poor, the young and minorities is approaching the proportion of a national scandal. (Many of the underprivileged are being induced into the underground economics of narcotics, street crime, etc. Minimum wage requirements particularly impact the youth in this regard.)

Again, the reason is simple. A stagnant economy, starved of productive capital drained off through excessively high tax rates and government deficits provides business with no ability and no incentive to modernize and expand and thus to hire and train new workers. Simultaneously, a combination of high public benefits and high tax rates gives the unemployed little incentive to look for jobs.

All of these facts suggest a common theme. People, whether potential investors or the unemployed, need incentives to participate fully and productively in the economy. Without incentives they will find ways to drop out. They will borrow and consume rather than save; they will shift capital into non-productive uses; they will seek illegal or sheltered income to avoid the big tax bite; they will opt for leisure rather than work.

The most powerful incentive of all is simply allowing the individual to enjoy the fruit of his labor, to see a positive improvement in his standard of living, and to have the freedom to spend or invest his income without the disincentives inherent in high taxes and high inflation; in other words, to keep his eye on resource enhancement rather than tax avoidance.

Past policy makers have assumed that the economic pie is fixed in size, that we can only argue about which groups in society get how large a slice. As a result, today an incentive for one is a penalty for another. This once fashionable philosophy has been written about by Professor Lester B. Thurow of M.I.T. in his book, *The Zero-Sum Society*, where he favored redistribution of wealth by mandatory government programs in a permanently stagnant society. This bankrupt philosophy was also espoused by the Club of Rome, the Brandt Commission report on North-South relations, the New International Economic Order, and by many of the environmentalists.

Supply-siders say that is wrong. Rather than fighting over the size of slices, we should be enlarging the pie. The result will be larger slices for everyone, especially the poor, minorities, the unemployed, the better off, and even government.

That is the essence of supply-side economics.

And history shows it works. This is not economic snake oil. During the 1920's under prodding from Treasury Secretary Andrew Mellon, taxes imposed during World War I were drastically reduced. The result was one of the most prosperous decades in American history. Real GNP rose 54 percent; output per man hour rose 66.5 percent.

And for those who believe a cut in tax rates would benefit the rich at the expense of the poor, it is instructive to note the actual tax impact of the Mellon cut on those with the highest incomes. In 1920, 3,649 tax returns showed income of $100,000 or more and generated $321 million in taxes. By 1928, nearly 16,000 tax returns reported income of $100,000 or more and government revenue from them, at substantially reduced rates, more than doubled to $714 million. Part of the difference simply reflects increased wealth generated by a growing economy. But another important factor is that at lower tax rates the wealthy simply had no further need to hide income in a host of tax shelters.

The Kennedy tax cut of 1963-64 had similar results. Personal tax rates were cut an average of 20 percent across the board. Far from reducing government income, the tax cut so stimulated economic growth that tax revenue grew substantially. Of particular interest to the social engineers, tax revenue from the wealthy increased steadily throughout the 1960's. Unemployment dropped by nearly half between 1961 and 1969 while unemployment among black males dropped from 11.7 percent to 3.7 percent in the same period.

Also take capital gains rates, for example. At 100 percent the tax revenues to the government would necessarily approach zero, of course. In 1969 capital gains rates were nearly doubled from a 25 percent tax rate. Revenues plummeted from this source and of course the venture capital that finances new industries substantially dried up. In 1978, the Steiger Amendment reduced the maximum capital gains rate to 28 percent and tax revenues increased rapidly while venture capital formation revived. Where

venture capital exists, new technology and new plants follow.

Other examples abound.

In Puerto Rico a series of tax cuts totalling 15 percent between 1977 and 1980 has resulted in one of the greatest periods of growth in the island's history.

Proposition 13 in California has helped push the state's growth well beyond the national average.

The phenomenal growth of the Japanese economy was fueled in part by a steady stream of 11 cuts in overall tax rates between 1954 and 1974.

My point is proved also in the reverse.

As Jude Wanniski points out in his epic work The Way the World Works, a good laboratory case of supply-side theory compares neighboring Ghana and the Ivory Coast since 1960. Ghana imposed heavy taxes (especially at the margin-progressive disincentives on the higher brackets) while the Ivory Coast did not. Although both started with similar natural resources, ethnic structures, and per capita incomes, today the Ivory Coast has many times the per capita income of Ghana.

Sweden, often seen by social engineers as the model economic structure, has some of the highest personal tax rates in the world. As a result, the Swedish economy is in total stagnation. No less an expert than Gunnar Myrdal, a major architect of the Swedish social economy, has stated that the Swedish income tax system bears much of the blame.

In Italy, another country that leads the pack in personal income tax rates, it is estimated that as much as 50 percent of all income comes from the underground economy. High taxes have made tax avoidance a major Italian challenge and virtually guarantee that investment is channelled into unproductive uses.

Probably the most notoriously excessive tax in this country is the high rate charged on cigarettes in New York. The result is a booming cigarette smuggling industry from out of state that is thought to source as much as 50 percent of the cigarettes sold in New York City.

The point of these examples is clear. Supply-side policy works. No, let me state it more strongly than that. No other economic strategy can create a growing, innovative and increasingly productive economy which will spur investment, increase jobs and cut inflation.

Supply-side pioneer Arthur Laffer has explained the fundamental principle of taxation that lies behind supply-side economics in a remarkably simple and graphic manner. His "Laffer curve" is not only an economic truism but also a very basic statement of behavior.

What Professor Laffer shows is that people respond to incentives. Up to a certain point marginal tax rates—the rate paid on the next dollar earned—will not keep people from earning and investing savings to increase earnings even more. Beyond that point, when taxes are pushed up by inflation or law, more and more people will seek ways to hide income or will simply decide that working is not worth the effort, since the rewards are not great enough.

Of course, it is argued by the Keynesians and the social redistributors—the so-called "Robin Hood" groups—that a tax cut is fine but only if the benefits go to those in the lowest income brackets.

In fact such a tax cut would virtually guarantee increased inflation by encouraging consumption while doing little to promote production, or the supply of goods and services to be consumed.

An even-handed reduction in tax rates would have quite a different impact.

At lower income levels there clearly would be some additional consumption, but also part of that excessively high level of installment debt would be paid off which in itself is a form of saving.

At higher income levels saving and investment would be powerfully stimulated since a larger proportion of the income from investment would be tax free. In addition, the incentive to hide or shelter income would disappear and investment would become both more productive and more lucrative.

More important, those at lower income levels would be given a real incentive to increase earnings by working harder and working more productively.

Finally, there are those who would cut business taxes while leaving personal taxes high. This, too, would be counterproductive.

True, it would give existing industries and existing firms more money to plow back into existing businesses. But it would do nothing to encourage entrepreneurs to invest in wholly new ventures. It would provide no incentive for new companies to enter existing industries, thus stimulating competition and innovation.

Business tax cuts are needed, but only in conjunction with personal rate reductions. The combination will maximize incentives to earn more across the board. One recent news item is more than a straw in the wind. The powerful Chairman of the Democratic Study Group, Congressman William M. Brodhead, has drafted a bill to reduce tax rates on income from savings from 70 percent to 50 percent at the highest brackets.

This is the supply-side economic story. It needs telling. The point, simply put, is that government, at all levels, must avoid erecting barriers that destroy incentives to innovate, to improve productivity and encourage the retooling of American industry.

Further, we must continue to remove ill-conceived economic regulations so that enhanced competition will achieve the desired results.

We must make government predictable so business and individuals will be able to plan.

None of this implies that government does not have a role to play in protecting consumers, workers, and investors. It means simply that laws and regulations must permit innovation and should not be so inflexible, capital consuming and diverting that business simply throws up its hands and ceases to innovate.

Overall, supply-side policy is a declaration of economic independence, of personal freedom. As such, it provides the framework in which the economic pie can grow, benefiting every person in our still free nation.●

THE LATEST VICTIM OF AMERICA'S HANDGUN WAR

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. OTTINGER. Mr. Speaker, the world is in shock over the assassination attempt on President Reagan. I pray for his rapid recovery, and that of Press Secretary James Brady, Secret Service Agent Timothy J. McCarthy, and District of Columbia Police Officer Thomas Delahanty also shot in Monday's tragedy.

President Reagan is the latest victim of our Nation's handgun war, which claimed nearly 11,000 lives in 1979 and may have inflicted an even greater number of casualties in 1980. How many of our leaders, performers, children, and ordinary citizens must become victims of handgun violence before we take measures to stop, once and for all, the proliferation of handguns? The time has come for all Americans to band together and declare: "We have had enough." Congress simply must enact legislation to control the possession and distribution of handguns.

At the least we should proceed immediately to register all handguns and license their owners, prohibiting licenses to criminals and those who, like President Reagan's accused attacker, have histories of mental imbalance. Indeed, such a law nationwide would probably have avoided Monday's tragedy.

This crisis shows that no one is immune to the horror which handguns cause. We must take immediate steps to help prevent yet another replay of Monday's tragedy.

Mr. Speaker, in further support of our Nation's desperate need for handgun control laws, I am including in the RECORD at this time an editorial which appeared in today's New York Times. I commend this to the attention of my colleagues:

WRONG AND RIGHT REASONS TO LIMIT GUNS

Would a tough national gun-control law have prevented Monday's attempt on President Reagan's life? Would it bring any relief from the street crime now routinely acknowledged, if not accepted, as a fact of everyday urban life?

Nobody knows for certain, but opponents of gun control are sure to argue that this is no time for a rush to judgment—that emotions aroused by the shooting are hardly a meaningful basis for serious legislation.

They are right—and wrong. Gun control is unlikely to stop cold-eyed, or wild-eyed, would-be Presidential assassins. But any considered look at the subject demonstrates the wide national benefit of new gun-control legislation.

There is a knee-jerk quality to the simple assertion that reducing guns will reduce crime. Especially in rural areas, Americans have always owned guns. The gun lobby likes to point out that only one-half of one percent of all the handguns in circulation are ever used in crimes. Research shows that gun laws may only shift crime from "hard" targets, like banks, to softer ones, like old people.

But such complexities do not weaken the case for gun control. Research also shows that assault victims are far more likely to die from gunshot wounds than from stab wounds, and that since most murders are committed on impulse, the distinction is important. It also shows that gun control laws can work.

New York City's Sullivan law, taken seriously by the police, has hardly rid the city of gun crimes, but experts believe it holds down the murder rate. In Massachusetts, a study found that a heavily publicized gun

law resulted in a 16 percent decline in gun assaults and a 40 percent decline in gun homicides.

More important, rural Americans have always owned guns, but only recently have urban Americans begun to arm themselves in a big way. Handgun sales rose from an annual average of 600,000 before 1964 to 2.8 million in 1968, when they leveled off. Most of the new sales apparently occurred in cities that experienced riots in that period. Last year's Miami riot may have set off a new wave of gun purchases. These urban guns are surely more likely to be involved in crime than guns in rural areas.

Since the American population is so mobile, there is need for a national gun law rather than a welter of state and local laws. If such a law would not reduce crime from its present levels, there is plenty of factual evidence to suggest that it would reduce killings and hold down future crime increases.

These ideas are not the result of emotionalism in the wake of the attack on President Reagan; they are the result of considered research over a period of years. Congress would do well to act on them.●

PRESIDENT'S COMMISSION FOR A NATIONAL AGENDA ON THE 1980's

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. EDGAR. Mr. Speaker, I recently learned about the testimony of Stuart Eizenstat before the Intergovernmental Relations Subcommittee of the Senate Governmental Affairs Committee on the report of the President's Commission for a National Agenda on the 1980's. Formerly the chief domestic policy adviser of President Carter, Mr. Eizenstat is in a particularly good position to discuss the pros and cons of the report of the panel on metropolitan and nonmetropolitan America. As one who is deeply involved in the problems of our older, industrial cities in the Northeast and Midwest, I greatly appreciate Mr. Eizenstat's perceptive remarks.

The testimony follows:

TESTIMONY OF STUART E. EIZENSTAT

Mr. Chairman, Members of the Committee, I appreciate this opportunity to appear before you to discuss the report of the President's Commission for a National Agenda for the Eighties concerning "Urban America in the Eighties." There are many areas of the report with which I agree—including their emphasis on people-oriented programs, improving mobility for the disadvantaged, uniformity needed for welfare programs, and recognition that people remaining in cities have needs government must respond to. But, as one who worked to formulate and carry out President Carter's National Urban Policy, I am deeply concerned with some parts of the report and with the manner in which it has been read.

My disagreements with the report grow out of what I believe to be its determinist view of the forces affecting American cities, its presentation of unnecessary conflicts between the policy choices available, its misreading of the methods and objectives of the Carter Urban Policy, and its vagueness and shortsightedness in posing policy options for the future. Further, all of these flaws have been magnified by the public's incorrect perception of the report as advocating the wholesale abandonment of older central cities by government and by the people who live in them.

Looking first at the report, I take issue with its perception of the movement of jobs and population away from older central cities as "immutable," as the expression of some kind of ultimate, market-based truth, which government is helpless to influence, foolhardy even to try. Believing in this irresistable force, the report postulates a series of conflicts between policies which attempt, fruitlessly, to oppose it and those which seek, wisely, to accommodate it. Thus, we are told that we must choose between programs that are "people oriented," that is, which aid people regardless of location, and those which are "place oriented," focusing on particular types of areas. Similarly, the report asserts, government must choose whether to promote national economic development or urban revitalization, whether to bring people to jobs or jobs to people, whether to try to restore cities to their precise former status or to accelerate their decline, and whether, in the report's terms, to "adjust . . . to redistributional trends, rather than attempt to reverse them." Given these choices, it is not surprising that the report sees the Carter Urban Policy and other efforts to spur commercial development in the cities as misdirected and doomed to failure.

The realities of urban America are quite different and considerably more complex. First, the report ignores the role played by government policies, whether, unintentional or not, in creating and accelerating the decline in older urban areas. The Federal government which opened the West and continues to this day to help it grow through needed water projects and subsidized irrigation, which brought electricity and new technologies to the South, which paved the highways and financed the subdivisions for the suburbs, which controlled the numbers, nationalities, and entry ports of immigrants, and which determined how commerce should be subsidized, regulated and taxed, has had a critical impact on the locational choices of businesses and individuals.

We should recognize that state and local decisions as to discrimination against minorities, levels of public assistance, tax burdens, labor practices, and incentives to industry have been equally influential.

Nor is it true that pure market forces operating without conscious government direction will necessarily produce the most efficient allocation and use of economic resources. For example, a company may have good business reasons to close an older, central city plant in favor of building a new, suburban one, or to abandon a high tax, strong labor state in favor of a lower tax, right-to-work one. Yet, the societal costs of unemployment, empty housing, and unused capacity in the areas abandoned, and of providing housing and infrastructure at the new sites may far exceed what it would have cost government to retain a company in its original location. What is profitable for one business is not necessarily efficient for the Nation.

The report also fails to consider adequately the extent to which the trend away from central cities may moderate or reverse in the immediate future. A number of factors could contribute to such a change—high energy costs; smaller household sizes; the growth of single-parent households, dependent upon community-based services and facilities. At the same time, it is becoming increasingly clear that there are limits to the willingness and capacity of newer areas to tolerate continued growth. The extreme inflation of housing prices in many areas of California, the spread of exclusionary zoning practices, the increasing popularity of "no growth" policies, and the water problems of the southwest all suggest that it may be more difficult for businesses and individuals to relocate to such areas in the future. These many elements will not alone revitalize cities, but they should create a willingness on the part of many people to return to cities—if there is something left to return to.

This leads to my fundamental disagreement with the report. A sound urban policy—the kind which the Carter Administration worked to carry out and which I believe the Nation needs—is not directed to restoring cities to some unattainable former glory—as the report asserts. Here I believe the report quite correctly notes the permanent transformation of older cities from manufacturing centers to service centers. A sound urban policy, instead, is directed to preserving American's cities, assisting them to adopt the changes that are taking place, but with a minimum of social cost and human suffering.

To do this will require that we view national development trends not as immutable forces of nature, but rather as the product of a range of technological and social changes, and of a host of governmental actions. And, we must appreciate our power to affect these trends—to accelerate or retard them, to direct them, to create varying impacts in different types of cities or on different population groups.

In this context, a sound urban policy will require both "people oriented" and "place oriented" programs. The people oriented programs—federalization of welfare, improved job training, mobility—would, as the report notes, help to alleviate the distress of lower income people living in the cities. But, such programs would also help to moderate and contain the decline of cities. They would help to break the cycle of decay, in which the loss of jobs and middle income residents leads to higher tax burdens and declining services for those who remain, thereby stimulating further departures and erosion of the tax base. In addition, "people" programs which genuinely equalized assistance benefits throughout the country and which encouraged mobility would help to reduce the public assistance burden borne by any particular area. Thus, such people programs would help to produce precisely the kind of result which the report claims is unattainable—arresting the decline of central cities.

But, "place oriented" programs have an equally important role to play. As one who still bears scars from the Carter Administration's welfare reform effort, I can safely predict that it will be some time before the federalization of welfare lifts this disproportionate burden from the cities. Indeed, President Reagan seems to be moving in precisely the opposite direction.

While we await the millenium of the welfare reform, it is clear that cities will need other help—place oriented help—to enable them to retain jobs and tax base.

But, properly targeted development aid does more than compensate for transient

disparities among localities. It can offset the marginal profit advantage which would otherwise motivate businesses to move. It can tip the scales toward preservation in the face of earlier government policies which, perhaps inadvertently, promoted waste and abandonment. It can hold communities together, maintaining decent lives for the people who remain in cities, instead of seeing them condemned either to dispersal or decay.

Note that I stress the retention of business and the development of new opportunities, not the restoration of industries that have departed, as the report suggests. The mill towns of New England, the garment center of Manhattan, the steel mills of Ohio may not be restored to their former functions—any more than western Pennsylvania will regain the oil industry from Louisiana, Texas, Alaska, and abroad. But, these areas can benefit from new business opportunities, can retain their economic viability and share in new growth—if they are not written off by the rest of the country.

A sound urban policy will reject the unnecessary choices posed by the report. The challenge is not to decide whether to revitalize cities or to promote national economic development, but rather to work for improvements in the national economy which benefit all regions. The choice need not be between bringing jobs to people or people to jobs; it should be, rather, to provide social welfare and education policies within a healthy business climate, thus permitting mobility where people desire it, but enhancing the stability and retaining the value of our urban centers. The question is not whether to seek to stop development trends or to accelerate them, but rather how to shape those trends so that they provide the maximum benefit to all Americans.

This brings me to my final concern with the report, and that is the manner in which it has been presented publicly. There is much in the report that is thoughtful, many recommendations, such as the federalization of welfare, which would help to stem the decline in our urban areas. The report does not call for the abandonment of older central cities, but rather for policies that will help them adjust to a changed role in the future. When it proposes that government accelerate the processes that have drawn people and industry away from cities, it does not seek to produce a vacant, decaying urban America, but instead, smaller cities with new functions.

Unfortunately, however, that is not the direction of the report's major emphasis. Some may unfortunately take it as a pretext for inaction on urban problems. It may be used to justify a policy argument unique in American history—that distressed areas should be ignored simply because they are distressed and because it is more consistent with those immutable forces of progress to allow, even promote, urban deterioration.

I do not believe this argument will prevail. The American people worked—successfully—to rebuild the South. They worked—successfully—to make the dust bowls of the Depression bloom again. They worked—successfully—to bring water and power to the West. They worked—successfully—to develop the human and natural resources of this land. And, the American people can and will work—successfully—to break the cycle of decay and preserve this Nation's great cities.

Without such an effort, oriented to distress areas and urban communities there is a very real threat of the United States being divided into sick and healthy regions—something we should seek to avoid.●

CLASS A GIRLS' BASKETBALL TOURNAMENT

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. APPLEGATE. Mr. Speaker, it is, indeed, unfortunate that in every sporting contest there must be a loser in addition to a winner. Such is the case with Buckeye Trail High School girls' basketball team, located in Old Washington, Ohio. However, while the team may have been on the lower end of the final score, they cannot be considered simply losers.

This high spirited and highly successful team, coached by Mr. Dave Linn, lost to Anna High School in the finals of the Ohio State class A girls' basketball State championship tournament played in Columbus, Ohio, on March 21, 1981. The score of the tense game was 54 to 52. The team and coaching staff are, nevertheless, to be commended on such a fine performance. It is teams like this and the personnel involved that have given girls' basketball great credibility in recent years. These young women and the coaching staff are to be congratulated on not only their individual and team efforts, but also on their contribution to the advancement of women in sports.

I would also, Mr. Speaker, like to draw attention to the achievements by two particular individuals on the team.

Ms. Connie Doutt, a member of the Buckeye Trail High School girls' basketball team was named class A State Player of the Year. She was also chosen for the first team on the all-State squad and also to the all-tournament team.

Ms. Susan Shugart, also a member of this team was chosen for inclusion in the all-tournament team.

Both of these girls have excelled in their objective and are to be congratulated on their efforts and achievements.

On behalf of Ohio's 18th Congressional District, I congratulate and commend these athletes on their accomplishments.●

BUDGET CUTS AND THE ELDERLY IN NEW YORK

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. WEISS. Mr. Speaker, President Reagan has presented his economic package with the stated goals of eliminating waste in government and revitalizing the American economy. But I believe that the way he has chosen to achieve these goals promises even more severe problems for America than we now face.

According to the President, government "must not be used to regulate the economy or bring about social change." In other words, he would drastically reduce the role of the Federal Government in social programs and the economy.

I support budget cuts that help to achieve more efficient government or eliminate waste of public funds. I support the principle of a balanced budget, and would be happy to see taxpayers' dollars withdrawn from support of special interests.

But in too many cases the President's cuts ignore the real value of Government programs, and make unbalanced, meat-ax slashes instead of fair, reasoned reductions. For example, nutrition programs are to be cut by some $5 billion, while the defense budget will rise by six times that amount.

Government is not the problem we face today. The problem we face is inflation, and unemployment, both of which have been caused by global economic problems and by inappropriate and ineffective American responses. Far from being the cause of our troubles, government must be an integral part of the solution. The question we face is not how to restrain government's use; it is how can we best use it to solve our economic crisis.

While the President is claiming that his program provides a safety net for the truly needy, on close examination this is simply not the case. In fact, the cuts will hit hardest among those often considered to be the most vulnerable members of society—the elderly. According to the Census Bureau, after a decade of decline the number of elderly persons below the poverty level jumped from 13.9 percent in 1978 to 15.1 percent in 1979. And 24.7 percent of elderly persons are in the near poor category—those with incomes within 125 percent of poverty. These are frightening statistics, yet I fear that many, many more senior citizens will become part of these statistics if the President's economic program becomes reality. In New York State alone, it is estimated that during 1982 the low-income elderly will lose over $250 million in critically needed program benefits. These programs include medicaid, food stamps, title XX social services, social security, and subsidized housing, among others.

The administration budget recommends that Federal medicaid spending be capped at $100 million below the $16.2 billion that had been previously estimated for fiscal year 1981. This figure would be increased by 5 percent in 1982 and by the rate of inflation in

future years. This arrangement would replace the existing system of Federal Government matching expenditures by the States for health care for the needy. Currently, New York State has budgeted $4.2 billion for medicaid expenditures of which 41.6 percent will be spent on care for the elderly. Reagan's medicaid cuts would not reduce expenditures below current levels, rather it would be aimed at reducing the rate of expansion in the program. It can be assumed, however, that access to services in the future will became much more restricted given the additional financial burdens which are likely to be placed on State and city budgets. In New York City, for example, many doctors, hospitals and nursing homes may begin to refuse accepting medicaid patients or be forced to cut the quality of care provided.

The administration proposes a $2.6 billion reduction in spending for food stamps. The number of older persons receiving food stamps has increased dramatically in recent years, so that this budget cut has a particularly strong impact on the elderly. For example, persons with incomes over 130 percent of the poverty level would be denied food stamp eligibility. Hearings held by the House Committee on the Aging have shown that many needy older persons are just over the poverty line and would be negatively affected by these eligibility changes. In New York State as many as 35,000 elderly households could lose their food stamps, and the value of coupons received could be cut by over 12 percent—to average less than $77 a month per household.

President Reagan's budget contains several changes in social security including the elimination of the minimum benefit. It has been estimated that about 220,000 older New Yorkers receive a total subsidy of $132 million a year under the minimum benefit program. In New York City 13,000 low-income elderly stand to lose an average of $50 a month in the minimum benefit. These recipients would be mostly women and minorities who generally have a shorter work history. Under the Reagan plan, some individuals could lose the total amount of their subsidy provided by the minimum benefit. Although it is intended that supplemental security income (SSI)—will replace these benefits, many low-income elderly people who could not qualify for either SSI or public assistance because of strict eligibility requirements would lose their social security minimum benefit.

The Reagan budget will result in cuts in subsidized housing, severely affecting the elderly. These cuts are in the section 8 rent subsidy and low-income public housing programs and will total 4,100 units statewide. While the proposed budget does provide for funding of the section 202 housing program for the elderly at approximately last year's levels, a total of 1,880 units for the elderly will be lost under all subsidized housing programs in New York State under the President's plan. With the decrease in funding of these programs will come a rise in the number of applicants placed on the city's waiting lists for public housing which is currently 20,000 people long. In addition, New York City, which needs about 35,000 new units of section 8 and public housing, would only receive enough subsidies for 14,500 units under these programs. The elderly would lose almost 1,000 of that amount and those already receiving rental assistance will face rent/income ratio increases from 25 percent to 30 percent of earned income.

Title XX—social services for the poor—is a major source of funding for a wide range of programs having a direct impact on the elderly. These funds would become part of a block grant along with approximately 40 other human service programs and would be funded at 25 percent below the level currently provided by these individual programs. Since the funds would become part of a single block grant to the State, there is no assurance that the present allocation to the elderly would be maintained, affecting such programs as in-home services, homemaker/housekeeper assistance, and protection services. Tragically as many as 48 senior centers in New York City funded under title XX could close, turning away the 10,000 elderly persons taking advantage of these services each year.

The home energy assistance program is also to be consolidated into a block grant program with a 25-percent reduction in funding. Approximately 350,000 elderly households in New York State are expected to receive low-income energy assistance to help pay heating and cooling costs this year. A 25-percent reduction would mean that 85,500 fewer elderly households would receive energy aid, without even taking the increased price of energy into account next year. In addition, because of the block grant system, States would have complete flexibility to determine what fuel assistance or emergency programs they wished to provide the elderly and the needy. Up to 62,000 low-income elderly households in New York City might not be served if the State does not deem energy assistance a priority for older people.

The proposed elimination of public service employment programs (CETA) by the end of fiscal year 1981—for a savings of $4.6 billion—may have an impact on older persons much greater than the relatively small number of older persons who have worked in this program may otherwise indicate. Many CETA workers have provided vital services to the elderly such as homemaker services or in senior centers. In New York City alone over 11,500 CETA employees will be jobless after June 1981. Although it is difficult to detail the precise number of CETA employees in senior centers, the total elimination of these public service jobs will be devastating to the elderly as well.

These programs represent some of the major areas most seriously involved with the elderly, though many others will be cut or eliminated under President Reagan's budget. Yet, huge portions of the Federal budget have been overlooked in the rush to slash Government spending. These include increases in expenditures for the military, subsidies for multinational corporations, oil depletion allowances, and highway projects. We must work in Congress toward a more equitable and humane approach for resolving our Nation's economic ills. We must oppose current efforts which would further penalize and overburden the elderly, the sick, the blind, the disabled, and the millions of other Americans, young and old, who by any honest definition can be described as being truly needy.●

WOMEN ARE NOT MADE FOR ORDEAL OF COMBAT, MARINE GENERAL INSISTS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. McDONALD. Mr. Speaker, our military services continue to perpetuate the fiction that men and women are somehow physical equals. Women continue to be fed into so-called combat support units where many of them will die when a war starts. Men and women were physically designed for different roles in life by our Creator. Brig. Gen. William Weise of the U.S. Marine Corps recently pointed out some of the facts in this issue. What follows is the story of his remarks as they appeared in the Chicago Sun Times of March 23, 1981:

WOMEN ARE NOT MADE FOR ORDEAL OF COMBAT, MARINE GENERAL INSISTS

PARRIS ISLAND, S.C.—The second-in-command at the Marine Corps' East Coast boot camp says women are neither physically nor emotionally equipped to handle the rigors of combat.

"I've been in quite a bit of combat," Brig. Gen. William Weise said. "I do not feel the average woman is equipped physically or emotionally to handle it.

"I would not want to see my daughters or female friends of mine in a combat situation if I could avoid it."

Weise made the comments as he watched female recruits receive defensive combat training at Parris Island.

Weise, 52, who served as a mortar section leader and rifle platoon commander in the

waning days of the Korean War, won the Navy Cross, the Silver Star, the Legion of Merit with the combat "V" and three Purple Hearts during a 1967 tour in Vietnam as a battalion commander.

The general, who jogs almost six miles each day around the recruit depot, said he was speaking primarily of women in ground force units who could be caught in combat.

"They are capable under certain circumstances, like defending their homeland, but not generally as a professional organization," he said.

"The ardors of combat are unlike any other human experience.

"The average woman is 105 pounds. If you put 35 pounds of combat gear on her, plus her helmet (six pounds] and her weapons [a six-pound M-16 rifle and 14-ounce grenades], it is a great physical strain," he said.

While Weise, discounted the ability of women to withstand the rigors of combat, he defended the familiarization training in defensive combat techniques the Marine Corps began giving its female recruits last week.

"Basically, we are teaching them how to live in the field," he said as recruits rappelled down a 46-foot tower in front of him. "On the modern battlefield, the enemy can land a force in your rear, and you have to know how to defend yourself.●

BUDGET IMPACT ON THE POOR

HON. WALTER E. FAUNTROY

OF WASHINGTON, D.C.

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. FAUNTROY. Mr. Speaker, the Congressional Black Caucus has been deeply concerned that the administration's budget proposals will disproportionately impact on the poor and low-income citizens of this country. We have been particularly concerned that the budgetary process will not allow adequate time to review the ramifications of the administration's proposals on those who are currently served by Federal social programs. The House Education and Labor Committee, however, has chosen to conduct extensive oversight hearings on the cutbacks to programs under their jurisdiction. My distinguished colleague, the gentlelady from New York, SHIRLEY CHISHOLM, testified before the Education and Labor Committee on the CBC's concerns about the impact of President Reagan's budget proposals on the poor. I am submitting her testimony for the benefit of our colleagues:

TESTIMONY OF CONGRESSWOMAN SHIRLEY CHISHOLM (D-N.Y.) ON BEHALF OF THE CONGRESSIONAL BLACK CAUCUS BEFORE THE HOUSE EDUCATION AND LABOR COMMITTEE

Mr. Chairman, members of this committee, it always gives me great pleasure to appear before my colleagues on the Education and Labor Committee. Although I am no longer amongst its ranks, the work of this Committee remains very dear to my heart. I wish to thank you, Mr. Chairman, for the efforts you are undertaking in this series of oversight hearings on President Reagan's Budget package, "A Program for Economic Recovery."

Too many of my colleagues have forgotten that the "Great Society Programs" were created because of the unmet needs of the poor and disadvantaged. Many of these needs still exist today. Your hearings reaffirm your interest and concern for those who are the "least of these." The Caucus commends you for your efforts in this area.

Earlier this year, the Congressional Black Caucus met with President Reagan regarding the then contemplated approaches of his economic recovery program. At that time, we asked the President not to balance the budget on the backs of the poor and place additional burdens on those who already have been hardest hit by inflation and unemployment. Upon reviewing the budget proposals outlined by the President in his message to the nation, the Congressional Black Caucus concluded that the Administration's economic recovery program will have a devastating impact on the poor, the disadvantaged, the elderly, and those with limited incomes. The Caucus has gone on record, and we reiterate today, our fundamental disagreement with the Administration's program. The Caucus has taken up the President's challenge to produce a better economic alternative.

In the past month, we have heard a great deal of talk about the Administration's budget proposals leaving a number of programs intact to form a "social safety net" for the "truly needy". Let me say, that the Congressional Black Caucus is at a loss to explain which Americans are defined as the "truly needy". Further, we believe that the seven programs which constitute the "social safety net" do not really address the needs of the poor. As David Rosenbaum observed in a recent New York Times article, the "safety net" for the needy, assist not only the poor but also many people who are not poor and some who are quite well off."

When President Reagan announced his economic package on February 18, before our joint session of Congress he declared that: "We will continue to fulfill the obligations that spring from our national conscience. Those who through no fault of their own must depend on the rest of us, the poverty-stricken, the disabled, the elderly, all those with true need, can rest assured that the social safety net of programs they depend on are exempt from any cuts."

A study conducted by the Project on Food Assistance and Poverty, a research organization sponsored by the Field Foundation, shows that 23 percent of the 25 million Americans with incomes below that poverty line receive no benefits from the seven safety net programs that are exempt from reductions, and that 60 percent receive either nothing or no more than a free meal for their children on school days.

That 60 percent is composed largely of welfare mothers and their children. The University of Chicago Center for the Study of Welfare Policy has calculated that such families would lose $12 million a month for each child because of cutbacks in the food stamp program and probably much more depending on how they are affected by reductions in Aid to Families with Dependent Children, Medicaid, emergency fuel assistance and other programs.

The Chicago Center's study found that the working poor would be among the hardest hit by the proposed reductions. The study showed, for example, that a typical poor working mother in New York with two school-age children would have her disposable monthly income reduced by about 15 percent, from about $700 to about $600, if the Reagan program was enacted.

Let's examine the Administration's budget proposals under this Committee's jurisdiction which will impact negatively upon the poor in America.

BLOCK GRANTS

With respect to the block grant approach, it is the firm belief of the Caucus that Federal programs should meet certain criteria: they should be national in scope, accountable, efficient and equitable. It is clear to us that the block grant approach violates all of these criteria.

The Administration's rationale for block granting social service programs is clearly outlined in the February 18, budget document, "A Program for Economic Recovery", "The Administration's block grant proposal will enable States to plan and coordinate their own service programs, (and) establish their own practices . . .".

The Caucus believes that any budget proposal which give states total discretion to "establish their own priorities" for social service programs would be a disaster for the poor. Many of the programs in the proposed block grant provide services to targeted populations because of a national recognition of their special needs. The President's block grant proposal contains no method by which assistance will be specifically provided to these special needs populations. We would urge the Committee to remember that the poor would clearly be endangered by a block grant system of social service funding. The probability that funds will be shifted from survival programs into programs that appeal to the middle-class voters or local power structures is all too great. These fears are confirmed by the history of the community development block grant program, general revenue sharing, and by the historic vulnerability of poor people to local pressure groups.

COMMUNITY SERVICES ADMINISTRATION

The Community Services Administration, CSA, formally succeeded the Office of Economic Opportunity (OEO), in 1975. CSA still administers a nationwide network of Community Action Agencies (CAAs), local community-based and community-controlled organizations charged with the dual mission of service delivery and advocacy for the poor.

The Community Services Administration, in fiscal year 1980, administers 900 CAAs and about 40 Community Development Corporations (CDCs). A number of small, categorical grant-in-aid programs (e.g., Senior Opportunities and Services, Community Food and Nutrition) also are operated by CSA, with CAAs and CDC's serving as grantees for much of this assistance. Finally, the Agency provides some training and technical assistance through regional and national grantees and conducts demonstrations and national evaluations of other Federal programs for the low-income.

President Reagan proposes to eliminate the Community Services Administration and to place antipoverty activities into a $3.8 billion social service block grant to be run by the Department of Health and Human Services. At the heart of the community action concept is the tripartite governing board consisting of local elected officials or their representatives, low-income individuals elected by their community, and representatives of business, labor, religious or other major organizations in the area. The block grant proposal offers no mechanism for the continued involvement of a broad cross-section of the community in antipoverty activities.

Further, the potential conflicts under a social services block grant, which I discussed earlier, already exist between Community Action Agencies and local government. Community Action officials say that their role as advocates for the poor often places them in an adversarial position with their local governments. This situation currently jeopardizes their abilities to receive funds from these governments for service delivery. CSA, and its predecessor, OEO, was created because state and local governments had neither the resources, the ability nor the interest in working effectively with the poor. Certainly, we can not now expect that these same governments are willing to use their social service funds to promote service delivery for the poor.

I would remind this Committee that the social service block grant lumps some programs together including CSA, and reduce their total budgets by 25 percent. Under the plan, states could spend the block grant money in any proportion they choose and they do not have to fund every project in the block. Consequently, there is no guarantee that the 1.5 million elderly poor will continue to receive SOS services or that the rural poor will receive technical assistance for rural development programs. Indians and migrants could also lose demonstration funds aimed at finding new ways to lift them out of poverty. New York state would lose $58 million in low-income energy assistance funds. All of us would agree, I believe, that the above groups can be called "truly needy" and yet they face a long fall through the President's "safety net".

Activities currently funded under Title VII, of the Economic Opportunity Act will not be part of the social service block grant but they will be transferred to HUD's community support block grant. As you can see "block granting" is as fashionable as "jelly beans." Under this title, Community Development Corporations have been used to spur the creation of programs in which low-income people can participate and improve the quality of life in this community. In fact the first CDC grant was made to the Bedford-Stuyvesant Restoration Corporation in my Congressional district. The development of Bedford-Stuyvesant Restoration Plaza has contributed greatly to the revitalization of Central Brooklyn. A revitalization which I believe is possible for hundreds of other communities across this nation. The big question is whether CDC's, under the new formula, can remain "responsible to residents of the area" they serve, as mandated by the legislation.

As part of President Carter's urban initiative, CSA had joined with the National Credit Union Administration to provide seed or expansion money to some 15 to 30 community development credit unions. A one-time appropriation of $6 million was made in fiscal year 1980 to finance a revolving loan fund for this program, which will provide training and technical assistance as well as capitalization loans. This program also would be subsumed under the HUD block grant. Like the social service block grant, there is no certainty that states or local governments would spend their community support block grant for community economic development programs.

The Caucus is aware that CSA has had a number of negative oversight reports by the House Government Operations Subcommittee on Manpower and Housing. The Chair of that subcommittee, Congresswoman Cardiss Collins is also a member of the Congressional Black Caucus. Let me assure this Committee that she supports the Caucus' perspective that CSA should be retained as a separate entity. We are very heartened by the decision of Chairman Ike Andrews, of this Committee, is proceed with reauthorization of CSA. The Caucus believes that the reauthorization process is the forum to evaluate CSA's performance. The poor will be better served by a careful review process than an arbitrary decision to "block grant" poverty programs.

Since today's hearings cover the impact of the President's budget on the poor, I would like to discuss some of the issues which concern the Caucus in areas which many of us may not readily consider as affecting the poor.

CETA

I understand that tomorrow's hearing will be devoted to employment issues and I am certain in that my distinguished colleague, Congressman Gus Hawkins of California will focus on CBC concerns in this area. I believe it is important however, to illustrate the impact CETA cutbacks will have on many programs which service the poor.

As the Committee knows, the Administration proposes to eliminate all federally-funded public sector employment programs under CETA Titles VII and II-D. In New York City, for example, 11,500 jobs and $178 million would be lost in federal aid in fiscal year 1982.

The City currently utilizes 8,800 CETA workers to perform services in the Sanitation, Police and Health Departments, in the Board of Education, and in other agencies. Private community-based organizations employ another 2,700 CETA workers for such tasks as weatherizing homes, caring for the elderly, and arson prevention. For example, $1.5 million in CETA funds are used to support the operation of Older American Act Programs in New York state. New York City may be able to retain some of its CETA workers by transferring them to City tax levy positions. But community organizations, which have come to rely on CETA workers to perform a variety of services for their neighborhoods, have no other sources of funding to sustain their current staffing levels.

I am sure all of us are pleased that Headstart has been included in the social "safety net" of programs. Cutbacks in CETA, however, will damage this program. John Busa, Acting Administrator for the Administration on Children, Youth and Families indicated that a loss of PSE jobs would probably cost Headstart programs nationally, $25 million. He also admitted that the loss of these jobs could mean a reduction in the number of children served.

The facts suggest, therefore, that the social "safety net" programs will even be affected by the elimination of CETA public service jobs. The Caucus believes that this spill over effect is only a further example of the damaging effects of President Reagan's budget on the poor.

CHILD NUTRITION

Certainly, food and nutrition programs are vital to the maintenance of the health and well-being of Americans, particularly those we have designated as the poor in this nation. Yet the Administration wants to cut close to $1.8 billion out of the approximately $4.5 billion budget for child nutrition programs, which include school lunch, school breakfast, and the Child Care Food Program.

All subsidies for middle- and upper-middle-class children who purchase school lunches would be eliminated, and subsidies for reduced-price lunches would drop by 37¢. Some $400 million in cuts that are now effective for FY 1981 only would become permanent. These cuts include reducing the reimbursement rates for all school lunches by 4.5 percent, lowering eligibility for reduced-price lunches to 185 percent of the poverty level, and adjusting reimbursement rates for inflation once rather than twice a year. Last, schools would be required to verify 10 percent of all applications for free and reduced-price school meals.

The severity of the proposed cuts in the school lunch program could force many schools to shut down their programs. Thus, students who receive free lunches would be hurt despite Reagan's promises to protect them. And the reimbursement rates for child care centers participating in the Child Care Food Program would also be cut under the Reagan proposals. By law these rates are tied to those of the school lunch programs; when the school lunch rates are cut, so are the child care food rates. The Administration has also proposed eliminating all meal supplements (or snacks, such as fruit or cheese) from the Child Care Food Programs.

EDUCATION PROGRAMS FOR THE DISADVANTAGED

For years, this nation debated the question of Federal aid to education. The proponents of Federal aid to education took the position that many states were actually denying education opportunity and educational equity to certain school children, and that therefore the Federal government should assume the role of protector of the educational and constitutional rights of all children in this regard. An important element of this "protector" role was the requirement that Federal funds be used to supplement State and local financial efforts and not supplant them. According to Reagan's budget document, "A Program for Economic Recovery", this requirement, along with all requirements for State and local matching funds, would be eliminated.

The block grant supporting local education agencies would consist of about 12 programs currently providing educational services for the disadvantaged, handicapped, adults requiring basic education, migrants, and school districts undergoing desegregation. The State block grant would consist of about 35 programs that (a) provide direct educational services for handicapped, neglected and delinquent children, (b) improve staffing and services of State agencies, and (c) indirectly support improved school services including assistance to school libraries, curriculum development and technical assistance. All of these programs are the very backbone of support to poor, educationally deprived, and handicapped children. They would be lumped together and stripped of provisions that ensure targeting, procedural safeguards, individualized programming, parent involvement and civil rights enforcement. State and local educational agencies would be freed from all legislative and regulatory prescription and allowed to set their own priorities on the amounts and manner in which programs for vulnerable populations of children are to be funded and implemented, if at all.

The Congressional debates on educational opportunity and educational equity eventually led to the passage by Congress of the Elementary and Secondary Education Act of 1965 (Public Law 89-10). A key element in Public Law 89-10 was Title I, which authorized a national education program for disad-

vantaged children, and is the largest program included in the local education agency block grant.

Section 101 of that law, as amended, states: In recognition of the specific educational needs of children of low-income families and the impact that concentrations of low-income families have on the ability of local educational agencies to support adequate educational programs, the Congress hereby declares it to be the policy of the United States to provide financial assistance (as set forth in this part) to local educational agencies serving areas with concentrations of children from low-income families to expand and improve their educational programs by various means (including preschool programs) which contribute particularly to meeting the special educational needs of educationally deprived children. Later the law was amended to: meet the special needs of migrant children (1966); correct abuses of inadequate fund allocations to the disadvantaged; and require local school districts to measure achievement in the basic areas of reading and mathematics (1978).

Title I programs serve 5.9 million low-income and educationally deprived children in 90 percent of our nation's school systems. Two-thirds of these students are poor or near-poor, 54-60 percent are white, 35 percent are Black and 11 percent are Spanish-surnamed. The block grant proposal would eliminate more than 1.0 million children from participating in the Title I program.

The education block grant raises another serious concern with members of the Congressional Black Caucus: the potential competition for funds with other disadvantaged groups. For example, the provisions of Public Law 94-142, the Education for the Handicapped Act, requires that every handicapped child must be provided with a free appropriate public education. This legal standard means that a successful law suit could probably be brought against an LEA to spend 94-142 funds for the education of handicapped children. Without a change in law, Title I children, in particular, would be at a distinct disadvantage in the competition for block grant monies since there is no Federal or State law requiring that disadvantaged children receive "a free, appropriate public education."

Although Title VII, bilingual education programs, were removed for the LEA block grant, a number of States require bilingual education programs. A State might choose to augment its bilingual funds from block grant monies in order to serve all children required to be served under state law, further reducing the amount of funds available for compensatory education.

The Caucus does not support a weakening of legal protections for the handicapped child or the child with limited English proficiency. However, we view the potential competition between these children and the disadvantaged child as harmful to public education and to the children themselves. Consequently, we believe that this problem is a further illustration that the block grant proposal is bad public policy.

Also the evidence on State monitoring and management of Title I programs is further reason to oppose the block grant approach. In 1977, the Rand Corporation concluded that "the federal role not only can be effective in helping to meet the needs of local districts with high concentrations of target pupils, it is a necessary ingredient in the accountability process. Indeed, effective implementation of Title I at the state and local levels deserves more rather than less attention from the federal government, though such attention should be based upon a realistic understanding of state problems and conditions."

Budgetary cuts of 25 percent are awesome in themselves but the Administration's proposal obliterates all categorical aid with little or no provision for Federal oversight, nor any assurance that the original Federal goals would be carried forward by the states. The General Accounting Office has urged that proposals to consolidate Federal education programs "should be preceded by a careful analysis of their impact". The Caucus feels that the Administration's block grant proposal has failed this test; therefore, we oppose the Administration's plan and the budgetary reduction of 25 percent to education programs.

JUVENILE JUSTICE

In testimony before the House Judiciary Committee, Attorney General William French Smith indicated that programs currently administered by the Office of Juvenile Justice and Delinquency Prevention will be included in an HHS block grant. However, in examining the Administration's current information on their HHS block grants, there seems to be no evidence that juvenile justice programs will, in fact, be part of a social service block grant. Juvenile crime and delinquency problems are major criminal justice issues. Many of the Juvenile Justice programs serve the minority disadvantaged youth. Seventy percent of the youngsters in the diversion program are minorities and 80 percent of the delinquent youth served by prevention initiatives are disadvantaged minorities. Localities obviously need assistance in dealing with juvenile delinquency problems. Since many of these youngsters will be impacted by cutbacks in some of the youth employment programs, there is an even greater need to retain federal assistance for juvenile justice concerns. This Committee made great strides last year in establishing a separate office for juvenile justice programs and developing a specific focus on the serious youth offender. The Caucus would hope that this Committee will continue its strong support for juvenile justice and oppose the elimination of the OJJDP and its programs.

CONCLUSION

The late Senator Hubert H. Humphrey summed up our differences best in his last speech on Capitol Hill. He said: "The moral test of government is how it treats those who are in the dawn of life, the children; those who are in the twilight of life, the aged; and those who are in the shadows of life, the sick, the needy and the handicapped."

The Caucus believes that the Administration's budget fails this moral test. We believe that there has been a conscious political decision to reduce those programs which serve the poor. Someone has decided that other groups are more deserving of federal "safety net" protection than the poor. Of course, the Administration believes that "the poor in this country have always benefited much more from a boom economy than from any government plan." But as New York City's former Human Resources administrator, Stanley Brezenoff says the Administration is insisting "that the labor market will suddenly absorb people it has never been able to absorb before."

If the Congress allows these budget reductions, it will end two decades of remarkable progress for poor people. Conservative politicians claim that President Lyndon Johnson's Great Society failed by throwing money at problems. Some of the programs were inefficient, but they have helped to halve the number of people living below the poverty line—from 22.2 percent of the population in 1960 to 11.6 percent in 1979. And if non-cash payments to the poor, such as food stamps, are counted, the gains are more dramatic. Only 3.1 percent of the population now lives below the official poverty level. In summary, at least 15 million people have been lifted out of poverty.

Even at current program levels, poverty has not been eliminated. Everyone is not insured against total deprivation, and some go without necessary food, shelter, and health care because of gaps in current programs. These are the pressing issues to be addressed, not program cutbacks.

The Caucus urges this Committee to continue those programs which provide for the needs of America's poor.

Thank you.●

DECRYING LIES ABOUT SLAIN AMERICAN NUNS

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. ECKART. Mr. Speaker, slander of the four slain American nuns in El Salvador is an outrage that offends us all.

I raised this issue in a hearing held by the Inter-American Affairs Subcommittee, but the lies and insinuations spread about the nuns by a group that seeks to advance its own hysterical purposes disturb me so profoundly that I wish to expose them to all my colleagues. The press release I am reprinting below exhibits the extent the lies about the nuns has reached.

Archbishop James A. Hickey of Washington, formerly bishop of Cleveland, has said about the nuns, "They gave their lives in the service of the poor and of the Gospel." It is a tragedy that the Council for Inter-American Security is resorting to the slander of missionaries for its own self-serving purposes:

MURDERED NUNS IN EL SALVADOR SUSPECTED OF AIDING GUERRILLAS

WASHINGTON, D.C.—The four American church women slain in El Salvador may have been working with left-wing guerrillas to overthrow the government, according to evidence uncovered by the Council for Inter-American Security (CIS).

All but one of the murdered women were members of the Maryknoll Society, which has earned a reputation for championing radical politics and "liberation theology".

Two of the nuns were killed when returning from Nicaragua, where another member of the Maryknoll Society, Sandinista Miguel D'Escoto, is Foreign Minister. D'Escoto edited Maryknoll magazine for ten years.

It is unknown what the women were doing in Nicaragua at a time when vast quantities of arms were being sent through Nicaragua to the guerrillas in El Salvador.

"Leftists in Washington say that one of the nuns had been active in Nicaragua's revolution that overthrew Somoza and installed the Sandinista regime," observed CIS Publications Director Roger Reed.

The slain women were "committed" to the movements working to overthrow the government in El Salvador, according to Maryknoll nun Peggy Healy, who is connected with the left-wing Washington Office on Latin America.

The press in El Salvador say that there are indications that the missionaries were involved with the guerrillas seeking to take power.

The families of three of the women recently signed an ad in the New York Times soliciting contributions to the Committee in Solidarity with the People of El Salvador, a group that supports a takeover by pro-Castro guerrillas.

United Nations Ambassador Jeane Kirkpatrick has said: "the nuns were not just nuns, they were political activists and we should be very clear about that."

CIS is an independent foreign policy research and education organization in Washington, D.C.●

MASSACRE IN EL SALVADOR

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. HARKIN. Mr. Speaker, as supporters of U.S. intervention in El Salvador seek to justify that policy, there is much talk of a beleaguered centrist government, under fire from the left and the right. A horrifying massacre occurred last year, which, if the U.S. press had reported it, might have clarified the true nature of the moderate Salvadoran Government that millions of American tax dollars are supporting.

On this occassion, the Salvadoran Army attacked fleeing refugees who were trying to cross the border into Honduras. Church witnesses estimate that as many as 600 women and children were slaughtered. The sadism and depravity displayed by the troops, as reported by the following article from the London Sunday Times of February 22, 1981, is one of the most horrifying examples of violations of human rights that I have ever read.

VICTIMS OF THE MASSACRE THAT THE WORLD IGNORED

Lolita Guardado was awakened at about 4 a.m. by a strange noise. There was the usual sound of the persistent drizzle pouring through the roof of closely packed palm leaves and through the wall of mud and sticks.

But outside, across the Sumpul river, she could hear men shouting. Groups of peasants gathered anxiously in the grey dawn to watch as Honduran soldiers formed a line on the far bank and ran to and fro, carrying stones from the riverbed. They built a low wall. Only later that day, after her family, friends and neighbours had been slaughtered, did she fully understand why they were there.

Lolita, here husband Genaro and their eight children are Salvadoran peasants. They lived along with about 1,500 others, in Las Aradas, a settlement which lies a few yards inside the Salvadoran border on the banks of the Sumpul, the frontier with Honduras.

There were few comforts. Lolita was considered fortunate because at least she had a hut. Most of the others lived under trees, with sheets of plastic to protect them from the rain. There was no electricity, no clean water, no medicine, barely enough food and no road. But Las Aradas, they believed, had one virtue. It was so remote that they were safe from the violence between the left and the right that wracks El Salvador. They had fled from their houses and land—away from the soldiers, the national guard, the secret police, the right-wing death squads and left-wing guerrillas to this haven.

That morning a group of 300 peasant refugees, mostly women and children, had arrived after a three-day trek through the Salvador mountains. Few of them would survive the day.

As Margarita Lopez, a bright and pretty 16-year-old was preparing tortillas for the new refugees, 300 Salvadoran soldiers from Chalatenango army base were already taking up position behind the nearest hills. Beside them, merging into the forest, were two olive-green helicopter gunships, each with machineguns and bombs. On the other side of the Sumpul, 150 Honduran soldiers stood behind their stone wall.

El Salvador and Honduras, although technically still at war after 11 years, were about to carry out their first joint military venture. The Salvadorans call it an "operacion de limpieza"—a cleaning operation.

The decision to carry out the attack was made, according to Honduran sources, at a joint meeting between Honduran and Salvadoran military commanders at El Poy, a town on the border about 13 miles from Las Aradas.

The motive was clear. In the border area are the camps of the left-wing guerrillas, against whom the Salvadoran ruling junta has been fighting a bloody civil war. It is also one of the main channels for arms shipments from Nicaragua and Cuba. The Hondurans were keen to help because they feared both the war spilling over into their territory and their neighbor falling into communist hands.

The only flaw in the plan was that Las Aradas was not a guerrilla base. It seems not a shot was fired in defense by the people there. But for the Salvadoran military mind, the distinction between peasant and guerrilla is academic: they are, indeed, often one and the same.

Also, the guerrillas need peasant support if they are to achieve popular insurrection and more immediately they need the peasants to provide food and shelter when necessary. For the Salvadorans this made the peasants a fair military target.

The "cleaning" began at about 10 a.m. on May 14 last year. Margarita remembers a deafening explosion of gunfire which would continue for the next six hours: "the bullets came in fistfuls. They went through the walls of houses, people were falling and cattle were dying. The bullets were everywhere."

Genaro Guardado heard the thud of bombs falling outside his hut. With his 17-year-old daughter, Ernestina, he grabbed five children, all under 12, who were standing outside, and ran, Rosabel Sibrian, a 22-year-old, saw the gunships buzzing low over the trees and heard the rattle of their machineguns. Then he saw soldiers standing round his friend, Amanda Rodriquez: "She begged them not to kill her. They all opened fire. They shot her 11-year-old son."

The troops has surrounded the settlement. The obvious escape route was across the river into Honduras—that was when the peasants learned the function of the Hondurian soldiers.

The peasants "ran to the river in flocks," said Genaro. It was the beginning of the rainy season and the river was flowing deep and fast. Margarita ran into the water and found it came up to her neck: "Children were drowning. The Salvadoran soldiers stood on the bank and fired at us. My two friends were killed next to me."

As Genaro jumped into the water with about 70 people, his daughter Ernestina was shot dead in the back of the head. First he walked, pulling the five children, across to the other bank. He left them there and went back for Ernestina's body. Then, carrying the body, he walked up the bank towards the Honduran soldiers: "They grabbed Ernestina and threw her into the river. Then they pushed us back into the river. We pleaded with them. Begged them. They just pushed us. They didn't fire their rifles, but they wouldn't let us through."

He returned to the Salvadoran side, to face the guns. "The Salvadorans fired from the hip and kept their guns low. I suppose they didn't want to shoot the Honduran soldiers. But they fired into the river." Those who survived the crossing were herded together by the Salvadoran soldiers, who tied their hands and made them lie, face down on the ground. "They beat us with their rifle butts. They kept asking, "Where do you keep the guns? Who are the guerrillas?"

"They took groups to one side and machine-gunned them. I had my children with me. Then a soldier cut my bonds. I don't know why he did that. But I ran with my children. Only three others survived."

Rosabel Sibrian, who hid between some rocks, says the main slaughter took place on the river bank, near Las Aradas: "There were 50 soldiers and they gathered a big group together. Then they shot them. The people were screaming. Those who would not die were beaten on the heads with rifle butts."

He says, and this is corroborated by other eye-witnesses, that the soldiers were aided by members of Orden, a paramilitary right-wing group, distinctive in their black shirts with skull-and-crossbones insignia. "Some soldiers and Orden people gathered children and babies together," said Sibrian. "I saw them throw children into the air and then slash them with long machetes. They cut their heads off and slit their bodies in two." One soldier told the mother of a child: "We are killing the children of subversion."

Sibrian tried to run downstream, carrying his baby son. Soldiers chased him and a bullet smashed into Sibrian's leg: "I couldn't run with my baby any more. I left him beside a small ditch, then rolled away and crawled through the bushes. I thought the soldiers would kill him." But, in one of the few acts of humanity carried out by the Salvadoran army that day, they did not. "They picked him up very gently and carried him away. Later I heard they bought him milk in a local town. I think he is in a children's camp. I am trying to find him," said Sibrian.

Lolita was not so fortunate. Just after the first bombs dropped at 10 a.m., she had lost sight of her husband. So, with her brother-in-law, Angel, and three of her children, she made her way slowly upstream, hiding for long periods in the bushes until soldiers and

paramilitary men had passed. she went for a mile along the Sumpul until the cordon of Honduran soldiers on the opposite bank had ended. Then at about 4 p.m. she started to cross the river.

She walked over the rocks and had just reached the water when she heard rapid firing behind her and felt "a burning pain" all over her body. She fell backwards into the Sumpul. Her body lay in the water, her head resting on a rock. She had been hit by 15 bullets, in an arc from her thigh across the small of her back. One bullet passed through her hand. Two of her children lay dying in the water beside her. One died quickly—a bullet had passed through his armpit into his chest; the other, shot in the testicles, did not. "He lasted half an hour," said Lolita. "I couldn't move. I couldn't comfort him." Her brother-in-law was dead, too. She lay with her surviving child three-year-old Ovidio, clasped to her breast. He had been hit in the leg and the scalp.

"Ovidio kept crying and shouting. He called out 'Uncle Angel, Uncle Angel! Come. Come see my mother. Her leg is bleeding into the water.'" He kept talking to his two brothers long after they were dead. He shouted at them: "Why don't you talk to me?"

After dark, Lolita says that occasionally soldiers walked along the bank. She tried to hold Ovidio still and keep him quiet: "The baby cried with pain, but I told him to be silent. I heard a soldier say: 'Hit them. hit them again.' But another soldier said: 'I have hit them already. Let's not shoot again. They will just die.'

"I had a terrible thirst. The water was full of blood. It was the blood of my children. But I kept drinking water, drinking water."

That night she felt an object bump against her in the river. Then it floated off downstream. It was, she says, the head of a child. The next morning a Honduran fisherman pulled in his nets. They contained the bodies of three dismembered children.

Lolita lay in the river until after dawn, when a group of four Honduran men saw Ovidio moving. They crossed the river and put Lolita in a hammock, then carried her to a Honduran's home. It was another 15 days before she received hospital treatment.

For the peasants, the behaviour of the army at Las Aradas was not new, just a little more extreme than usual. The Salvadoran soldiers have a single tactic to discourage peasant support for guerrillas—terror. Lolita and her husband had fled to Las Aradas after soldiers had decapitated some of their neighbours. The heads had been left neatly by the side of the road to ram the lesson home. Most refugees have stories of such appalling brutality it is difficult to believe that it became almost a way of life.

Officially they were all victims of a massacre that never happened. The government of El Salvador has denied that any killings took place at the Sumpul river on May 14. On June 25, the military leader of Honduras, President Policarpo Paz Garcia, said on national radio that the massacre did not happen. One of his army chiefs, however, Colonel Ruben Montoya, head of the third military region, denied that the Honduran army had taken part, while admitting that the incident took place: "The Honduran troops did not help in the killings of civilians."

At first the American embassy in Tegucigalpa, the Honduran capital, told reporters that there was no evidence to support claims of a massacre. But like the government, the Americans later changed their line, admitting "something happened" at the Sumpul river that day.

At noon the day after the massacre, a Roman Catholic priest from the Capuchin order walked over the hills towards the Sumpul. If he had not, then the massacre might have become just peasant folklore. Father Earl Gallagher, 35, comes from Brooklyn, New York City. He has worked in Honduras for four years. Because of his prematurely grey hair and prowess at climbing the hills, he is known by the peasants as "the old billy goat."

He noticed that the river banks looked strangely black. When he got closer he saw why. They were covered in a thick carpet of buzzards. In the village of Talquinta he met his first survivor, a 10-year-old boy with bullet wounds in his mouth, thigh and shoulder.

"I heard that Salvadoran troops were coming back to kill the survivors," said Gallagher. "I felt I had to make it public and perhaps that would help them." It did not help the little boy. A month later he fled from the Honduran army back to El Salvador, where he was killed.

Gallagher returned with a camera and tape-recorder and took down the stories of dozens of survivors. He could not visit the Sumpul itself because it was still patrolled by members of Orden, who shot intruders. Meanwhile, dogs and buzzards picked the bodies clean.

On June 24, Gallagher's report condemning the massacre and the role of the soldiers of both El Salvador and Honduras was published as a joint declaration by the priests of Santa Rosa de Copan.

Gallagher immediately received death threats over El Salvador Radio. He was threatened with expulsion and condemned by the Honduran government. The then minister of foreign affairs, Eliseo Perez Cadalso, said on July 1: "The church declaration responds to a well-orchestrated campaign with the purpose of destabilizing the convivial and highly democratic climate in which the people of Honduras live."

Gallagher's report reached Washington, where the only person who paid attention was Senator Edward Kennedy. He had it placed on the congressional record on September 24, and said: "I am deeply concerned by reports of increasing hardship and often death that face innocent men, women and children who try to escape the escalating violence in El Salvador."

But the world paid scant attention, inured perhaps by the daily stories of violence in Latin America. The Sumpul massacre was mentioned in a few newspapers which ran part of Gallagher's report. It was almost completely ignored by the American press at the time. "Our thing was: it happened. Come and have a look. And nobody did," said Gallagher.

The misery for the Sumpul survivors and the 29,000 refugees who have fled El Salvador for Honduras did not end on May 14.

"They live in fear," Gallagher said last week. "Their only hope is international attention."

He and other priests have compiled a list of incidents against refugees since the massacre. It runs into several pages, a litany of murder, rape and cruelty.

Hundreds of refugees have been handed to Salvadoran troops to face certain death. In the Honduran town of Santa Rosa last week an 18-year-old girl described her life in El Salvador. She lived near the Honduran border with her husband until soldiers took him away and shot him. She moved in with her four brothers. Last year, Salvadoran national guards took them out of the house and sprayed them with liquid from cans they carried. "Their skin went black. Their eyes melted," she said. Her brothers were pushed into a cornfield and killed with machetes.

Last week we spoke to Lolita, who now lives with her husband and five remaining children in an adobe hut deep in the Honduran hillside. Life for her is not convivial. She is afraid, and for good reason. The Honduran government has refused, at the urging of El Salvador, to grant Lolita or the other refugees "refugee status." This means their movements are tightly restricted and they cannot find work. They are constantly threatened with expulsion.

There are also signs that the Honduran government is growing more repressive. A week ago a colleague of Gallagher's, Father Fausto Milla, was arrested by security men. He was blindfolded and interrogated for three days. He had just returned from a human rights conference in Mexico City where he presented the testimony of Lolita and other Sumpul survivors.

The day we saw Lolita, she had been visited by a Honduran security man, who threatened her with expulsion back to El Salvador. "They may as well kill me here," she said. "It's easier."●

CIVIL AIR PATROL ANNUAL REPORT

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. RAHALL. Mr. Speaker, as newly named commander of the Civil Air Patrol's congressional group, I would like to take this opportunity to share with my colleagues a letter I have received from Brig. Gen. Johnnie Boyd, national commander of the Civil Air Patrol. I received this letter along with a copy of the CAP's 1981 annual report.

Due to space limitations, I am unable to include the entire report, but I would like to share General Boyd's letter with the House at this time.

CIVIL AIR PATROL,
MAXWELL AIR FORCE BASE, ALA.,
March 11, 1981.

Hon. NICK JOE RAHALL II,
House of Representatives,
Washington, D.C.

DEAR MR. RAHALL: I am pleased to forward your personal copy of the 1981 Civil Air Patrol Annual Report to Congress. This year's report highlights our emergency services mission and provides an update of our activities in support of the cadet program and promotion of aerospace education; our other two missions as assigned by the Congress.

In addition to continuing progress and innovation in Aerospace Education and the Cadet Program, 1980 was a busy year for the Civil Air Patrol in the search and rescue area. Most significantly, CAP saved or shared in the saving of 115 lives over the course of the year while responding to requests for help from the United States Air Force, Aerospace Rescue and Recovery

Center. This number of lives saved established a new all time high record for the Civil Air Patrol. Yet, the record was set while participating in 175 more missions but logging almost 4,000 fewer flying hours than in 1979. This favorable comparison is attributable to our better use of the latest in search and rescue techniques and equipment to reduce flying time, thereby saving energy. Of signal importance to our emergency service efforts in the future was the passage of legislation which will allow the Air Force to reimburse members for maintenance costs incurred while participating in USAF requested rescue missions.

As National Commander of the Civil Air Patrol I take great pride in presenting you this report of our achievements in 1980. As we enter our fortieth year, the 59,312 volunteer members of CAP join with me in thanking you for your continuing strong interest in and support of our programs.

Sincerely,

JOHNNIE BOYD,
Brigadier General, CAP,
National Commander.

Mr. Speaker, I am proud of my association with the Civil Air Patrol, and I am sure my colleagues will share the pride of CAP members all over this Nation, in the services rendered by the Civil Air Patrol in 1981.●

AMERICAN INVOLVEMENT IN EL SALVADOR

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. LELAND. Mr. Speaker, I would like to include here for printing two articles that address the ongoing debate on American involvement in El Salvador. I would call the attention of my colleagues to the growing concern among our constituents that U.S. policy mistakes the true nature of El Salvador's internal conditions and prescribes the wrong solution. It is becoming increasingly clear that El Salvador's Government is not truly centrist, nor its opposition truly extremist. It remains perfectly clear—as pointed out by the U.S. Catholic Conference—that the fundamental threat to stability in El Salvador and the whole of Central America has always been economic inequities and political repression. One has only to recall the infamous massacre of peasants in 1932, to realize the deep historical roots of the Salvadoran conflict.

I believe that the people of the United States are reacting wisely to the administration's policy in El Salvador, and asking that policy be reexamined with great care and urgency.

[From the Boston Sunday Globe, Feb. 1, 1981]

TWO SIDES OF THE CIVIL WAR IN EL SALVADOR

(By Stephen Kinzer)

SAN SALVADOR, EL SALVADOR.—This nation cannot look forward to a real solution of our terrible conflict without the reincorporation of socialists and social democrats in the normal political process," says President Jose Napoleon Duarte.

"These people are being used by the leftist terrorists. The moment will come when they see that this is not the way to bring change to our country."

Most leftist politicians here have abandoned conventional opposition and joined the insurgent Democratic Revolutionary Front (FDR). President Duarte said in an interview that he would encourage them to participate in elections scheduled for next year, but warned that he could not guarantee their safety. "In a climate like this," he said, "nobody can protect anybody."

Duarte, dressed casually and appearing at ease after two months in office, told an interviewer that the central problem of this strifetorn country is that "for 50 years authority has been imposed by killing. The extreme right still has people, both in the army and outside it, who believe killing is the way to establish order. They pinpoint anyone who does not believe what they believe as a Communist.

"On the other side, the left is training children to hate, to kill, to destroy. It is very difficult to make these young boys realize that they are doing wrong."

Duarte acknowledged that "we have not yet achieved social justice in our country. We are aiming at this goal, but it is a long and difficult process."

Although the Salvadoran military has repulsed several major attacks by the large, powerful rebel army in recent weeks, Duarte was reluctant to claim victory.

"This is not the end," he concede in his well-guarded office, gesturing often with his gnarled fingers, which were infected after his fingernails were pulled off by army torturers in 1972. "We cannot call this a victory.

"The revolutionaries have their machinery established. Their leaders are trained. They have support from abroad. They have thousands of active supporters."

Asked how long it would take his government to subdue the rebels, Duarte would only remind his questioner that "in Venezuela it took more than 15 years. In Colombia it took more than 30 years. In Argentina it took more than 12 years."

As he has done repeatedly in the past, Duarte characterized his government as a moderate regime caught between two violent extremes.

"The radical left seeks to implant drastic social and economic changes under a totalitarian system," said the 55-year-old Notre Dame graduate. "The extreme right is also totalitarian, and hopes to prevent all change through massive repression. We Christian Democrats seek to avoid both these solutions," and instead take the "difficult" middle ground.

That claim is bitterly disputed by revolutionaries here, who accuse the government of acting in concert with rightist forces to prevent change in El Salvador's feudal society.

"There is definitely no center in El Salvador today," asserted a university professor who backs the rebel front. "There are only two sides: the people and the government. But that does not mean both sides are necessarily extreme.

"Anyone who opposes the government here is automatically considered an extreme leftist. Anyone who acts on humanitarian priciples and denounces the brutality of the army is condemned as a subversive."

Spokesmen for the opposition are almost impossible to find here, since anyone who criticizes the regime is in immediate danger. But after several days of searching, a reporter was able to talk with an American-educated intellectual who vigorously—though not publicly—spoke out against the Duarte government.

"Part of what is happening here is to pretend that nothing is happening," he said. "Duarte and his friends are increasing their propaganda, claiming that the economy is getting better, that they are pacifying the country, that they are willing to negotiate with the left.

"But their actions directly contradict their public statements. They have declared a state of siege, revoking all constitutional guarantees. They have passed laws prohibiting labor organization.

"They send soldiers to check who is staying away from work when strikes are called, and those people disappear soon afterwards. They have abolished most legal processes and given the military the right to make and enforce any laws they like. They forbid any unofficial news to be published or broadcast.

"Worst of all, they are actively massacring our people. Killing 10,000 Salvadorans, as our army has done during the last two years, is equivalent to killing 650,000 Americans." I ask you, how would the people of the United States respond if their army killed 650,000 of their own people?

The spokesman, who asked not to be identified, agreed that a rebel victory in El Salvador would mean sweeping changes in the political and economic structure of this long-suffering country. "The economic situation of El Salvador is such that the free market economy, as defined by the Department of State [U.S.] and powerful groups here, is not a viable alternative. And in a country where every election for 50 years has been fraudulent, republican democracy is also not viable.

"How can we accept an economic system imposed by those who have shamelessly exploited our country for generations?" he asked. "How can we believe elections will be fair if those who make that promise are precisely those who have stolen every election in our history?

"The American view is that a revolutionary government is unacceptable because it will lean to the left. You must understand, to us Salvadorans, this is not a strong argument."

The young activist had harsh words for the American role here.

"Without the backing of the United States, this regime would quickly fall," he asserted, voicing a widely held view. "This alone is a powerful argument against the regime's claim that it has popular support.

"I ask you this?" he concluded rhetorically, "if the left has no popular support, as the Americans say, then how is it possible that between May and December of last year, 6000 people related to the left have disappeared? How was it possible for the left to launch a national military offensive?

"Why does the government surpress all independent news sources if it is not afraid of the truth? Why does it need exceptional measures like a national curfew and military courts to maintain itself?

"If the government was truly in control of the country," he said, "some steps would be taken to loosen these measures. The fact that this has not been done and will not be done is proof that Duarte and the Christian

Democrats themselves do not believe what they are saying."

[From the Dallas Times Herald, Mar. 27, 1981]

SALVADOR ISSUE IN DALLAS

(By Bronson Havard)

The sudden thrust of American foreign policy to make San Salvador the test of the United States' global stand against communism stirs sensitivities in this country that President Reagan and Secretary of State Alexander Haig failed to anticipate.

Perhaps they thought there would be a wave of protest from liberal and youthful Americans fearing another Vietnam, but they surely did not realize that many Americans of all ages and across the political spectrum are sympathetic with the struggle of most Salvadorans for democracy and social justice.

No better evidence of this miscalculation of foreign policy moves by the new administration is available than a development this week in Dallas—the part of Texas and the nation that gave Mr. Reagan some of the strongest political support in his election campaign for the presidency.

Among the strong pro-Reagan electorate were Catholics. Many of them saw in Reagan's conservative political and social stands some reflection of their own religious philosophical view of life.

But this week the Bishop of Dallas, Thomas Tschoepe issued a proclamation to Catholics of Dallas and the large Northeast Texas area under his apostolic jurisdiction, that tends to firmly support the United States and Latin American Catholic Church's outspoken opposition to any U.S. government policy that shores up an oppressive right-wing government in San Salvador.

Bishop Tschoepe declared March 24 through Dec. 2 the "Year of the Latin American Martyrs."

He wrote, "Dear people of the diocese of Dallas: The missionaries to the poor and oppressed people of Latin America have called upon the Church in the United States to support them in their efforts to bring the gospel to all people."

He went on to point our that March 24 is the first anniversary of the assassination of Archbishop Oscar Romero of El Salvador, who was gunned down while celebrating the Holy Mass.

Romero was the leading figure crusading against the military dictatorship that enslaved Salvadorans for most of their country's history. It is widely believed he was killed by right-wing extremists trying to maintain the social order.

Dallas Bishop Tschoepe also pointed out Dec. 2 is the anniversary of the murder of American missionary women Ida Ford, Dorothy Kazen, Maura Clarke and Jean Donovan.

Their deaths, an increasing accumulation of evidence shows, were at the hands of the Salvadoran governments National Guard.

"We have heard about their deaths, but we know too little about the nearly 100 missionaries who have been killed in Latin America during the past decade," said Bishop Tschoepe. "Their deaths are a witness that the Church is concerned with fighting oppression and injustice wherever it may be found."

The Dallas bishop's proclamation could not he interpreted as a pure political statement because he makes no mention of U.S. foreign policy that is giving increased military aid to the Salvadoran government junta. It does, however, signal that the U.S. foreign policy could once again divide the people of this nation and allies in the world as the American policy in Vietnam did only a short time ago.

A serious error has been made in the Reagan administration, one that has led the relatively conservative Bishop of Dallas to ally himself and his people with what the Catholic Church of San Salvador and some other Latin American countries feel is the real political social struggle in those lands.●

FIRST CONGRESS OF THE INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. FISH. Mr. Speaker, I again today bring to the attention of my colleagues the proceedings of the First Congress of the International Physicians for the Prevention of Nuclear War.

The preamble of the first congress is significant in its recognition of the ultimate consequences of nuclear war. The physicians state their belief that all physicians should join in the effort to eliminate nuclear weapons, and the reasons therefor.

I have also included the first congress conclusions as to what physicians can do to prevent nuclear war, and the role of physicians in the post-attack period.

Again, I urge my colleagues to heed the words of some of the most eminent physicians in the world on the need to prevent nuclear war:

PREAMBLE

Nuclear war would be the ultimate human and environmental disaster.

The immediate and long-term destruction of human life and health would be on an unprecedented scale, threatening the very survival of civilization.

The threat of its occurrence is at a dangerous level and is steadily increasing.

Even in the absence of nuclear war, invaluable and limited resources are being diverted unproductively to the nuclear arms race, leaving essential human, social, medical, and economic needs unmet.

For these reasons, physicians in all countries must work toward the prevention of nuclear war and for the elimination of all nuclear weapons.

Physicians can play a particularly effective role because they:

(a) are dedicated to the prevention of illness, care of the sick and protection of human life;

(b) have special knowledge of the problems of medical response in nuclear war;

(c) can work together with their colleagues without regard to national boundaries;

(d) are educators who have the opportunity to inform themselves, their colleagues in the health professions, and the general public.

WHAT PHYSICIANS CAN DO TO PREVENT NUCLEAR WAR

Review available information on the medical implications of nuclear weapons, nuclear war and related subjects.

Provide information by lectures, publications and other means to the medical and related professions and to the public on the subject of nuclear war.

Bring to the attention of all concerned with public policy the medical implications of nuclear weapons.

Seek the cooperation of the medical and related professions in all countries for these aims.

Develop a resource center for education on the dangers of nuclear weapons and nuclear war.

Encourage studies of the psychological obstacles created by the unprecedented destructive power of nuclear weapons which prevent realistic appraisal of their dangers.

Initiate discussion of development of an international law banning the use of nuclear weapons similar to the laws which outlaw the use of chemical and biologic weapons.

Encourage the formation in all countries of groups of physicians and committees within established medical societies to pursue the aims of education and information on the medical effects of nuclear weapons.

Establish an international organization to coordinate the activities of the various national medical groups working for the prevention of nuclear war.

THE ROLE OF PHYSICIANS IN THE POSTATTACK PERIOD

Considering the known thermal, blast and radiation effects of a one megaton thermonuclear explosion over an industrial city of about four million persons, we know that from 200,000 to nearly 500,000 immediate deaths would result, with an additional 400,000 to over 600,000 injured, depending on the nature of the attack.

Instantaneous death will occur as a result of temperatures greater than in the sun itself, and from immense blast effects. Physical structures will be converted into unrecognizable rubble and social organization will disintegrate. Many injured will die as a consequence of huge fires and intense radioactive fallout. Neither doctors nor the hospitals in which they work will be spared.

In addition to the dead, there will be the injured, some walking with clothes in shreds and skin peeling in sheets from burns, some trapped in buildings or basements. Many of these will be destined to die. Many who are rescued may not survive the crush injuries, multiple fractures or hemmorhages. Others will die in days or in weeks from burns, traumatic wounds or radiation exposure.

Many of those injured by a nuclear blast would have combinations of burns, extensive lacerations and sublethal doses of neutron and gamma radiation. Grave psychological trauma affecting both physician and patient will further aggravate the already severe problems of diagnosis and treatment. These many factors complicate the outcome of therapy and would critically affect the medical decisions on who should receive care and who could only be allowed to die with such minimal supportive measures as might be available. Burn and radiation injuries, regardless of other complications, will place the greatest strain on medical personnel and facilities. From the British experience in wartime London, it is estimated that the acute treatment of only 34,000 serious

burn cases would require 170,000 health professionals and 8,000 tons of supplies.

A city struck by a single one megaton bomb would find its electrical, water and food supplies totally disrupted. The techniques of modern medical care would be seriously compromised if not entirely halted. Much of the essential supply of blood, antibiotics and other materials would be destroyed. A target nation, however, might cope partially with the consequences of having one city struck by a single nuclear bomb. The surviving doctors and other health professionals could respond, supported by help from outside the stricken city, but with severe limitations. The response would fall much below acceptable medical standards.

In peacetime the medical care system can cope successfully with a very small number of the kind of casualties which can be expected in huge numbers from the explosion of a single nuclear bomb. Successful treatments of extensive burns, of crushing injuries, of fractures and lacerations, of perforating wounds of abdomen and thorax, and of sublethal to near-lethal doses of radiation all require the full availability of modern medical technology and the finely developed skills of medical and other support personnel. The medical capacity of any nation would be severely strained, if not for a period overwhelmed, by dealing with the victims of even a single nuclear bomb.

Nuclear war, however, is very likely to involve more than the appalling destruction from a single nuclear bomb, or even a few bombs. With more than 50,000 nuclear weapons in existing stockpiles we must face the prospect of the explosion of hundreds and perhaps thousands of bombs, many possessing hundreds of times the explosive power of those that destroyed Hiroshima and Nagasaki. As tens or hundreds of cities are simultaneously attacked death and casualties escalate geometrically. The fabric of society would disintegrate and the medical care system, deprived of the facilities developed over the years, would revert to the level of earlier centuries. The surviving walking wounded, physician and layman alike, could only provide what mutual comfort the remnants of their individual humanity would permit. The earth will be seared, the skies heavy with lethal concentrations of radioactive particles, and no response to medical needs can be expected from medicine.●

RECOGNIZING THE IMPORTANCE OF FOREIGN LANGUAGE TRAINING

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. FASCELL. Mr. Speaker, all of us who have traveled outside this country and who have dealt with foreign government officials have been impressed by the facility with which so many non-Americans speak our language. It brings home to me the need to encourage foreign language training for students across the United States so that we may work more easily with other countries and establish sound trade relationships. Our colleague PAUL SIMON, a veteran of the campaign to promote language training, has authored an excellent book on this subject, "The Tongue-Tied American: Confronting the Foreign Language Crisis." His findings were reviewed by Flora Lewis in her article, "The Language Gap," published in the New York Times on February 15, 1981. It merits our attention and I am happy to share it with our colleagues:

THE LANGUAGE GAP

(By Flora Lewis)

Talk about restoring U.S. influence in the world has focused on weapons, intelligence, hard political and economic bargaining. But it has overlooked one vital tool in understanding and swaying other countries. Effective use of these other resources requires a knowledge of foreign languages, which we have been losing for over a generation.

United States Representative Paul Simon of Illinois surveyed the situation and found it so bad that he has written a book about it called "The Tongue-Tied American: Confronting the Foreign Language Crisis."

By 1976, he says, (and the trend has probably since been continuing downward) fewer than 4 percent of students in U.S. public schools studied more than two years of a foreign language and fewer than 18 percent left high school with any foreign language study at all.

Even in specialized fields such as diplomacy and trade, our ability to deal with foreigners in their own tongues lags enormously behind the mushrooming growth of countries that are insisting on communicating in their own language. The globe may be getting smaller in terms of the time it takes to get around it, but its babel keeps expanding.

Mr. Simon, calling for an energetic Federal aid program that probably is not at all the best way to reverse the trend, points out the national handicaps of having so few Americans able to deal with people who don't learn English.

The shortage of Persian speakers in the U.S. Embassy in Teheran surely contributed to our lack of insight as the Iranian revolution gathered steam. Our shortage of Japanese-speaking representatives surely inhibits U.S. exports.

These are urgent practical arguments, but they only address the surface problem, because language is not just a way of doing business. It unlocks the compartments of the world.

For a long time, we had an advantage in our ability to see over the walls of national cultures and have a sense of what was going on. As a nation of immigrants, we knew many tongues and many traditions. But the pressure of the melting pot, the urge to create and join a national identity, smelted out these skills. Second- and third-generation Americans rejected the voices of "the old country," and even when ethnic sentiment arose again in the 1960's and 70's, there was not an accompanying revival of interest in other languages.

Sadly, by the time we really came to need the knowledge, it was largely gone. Now it will take conscious effort and a renewed sense of mental adventure to equip America for the global role we want to play. But the effort is well worth while in every sense, including moral and cultural enrichment.

Language is the way people think as well as the way they talk, the summation of a point of view. Its use reveals unwitting attitudes. People who use more than one language frequently find themselves having somewhat different patterns of thought and reaction as they shift. Some phrases cannot really be translated, but grasping for an equivalent gives another perception of the world, which enlarges total vision. This is the great value of learning foreign languages; it goes far beyond the convenience of communication.

Children can learn any language with equal facility and it doesn't seem to confuse them to learn more than one at a time. Later, the main block is in learning a first foreign language; after that each subsequent one comes more easily. The highest hurdle, I think, is the subconscious difficulty of accepting that there is more than one correct way to say anything, after having been carefully taught that there is a right way and that the rest are wrong.

When the validity of difference is acknowledged with everyday words, it is much easier to see why different people—and all the more, people of different cultures—can have varying ideas and priorities. It's like taking off blinders and acquiring side-vision even though you can never look through someone else's eyes.

The gain matters more than ever in a world where people are pressing closer and more abrasively against each other, and language has become the embodiment of identity and aspiration for so many. Even worldly, modern countries such as Belgium and Canada are tearing themselves apart on the language issue because it represents not only access to public power but a sense of community rights and values.

Ironically, in today's strife over the misnamed issue of bilingualism, we are stressing the problem of getting all children to learn one language. Foreign-born children living here should be learning English, of course, and that as quickly as possible. But it is a pity for children born in this country to be consigned to the poverty of a single-language education. The need of all is for more, not less.

A fool in 17 languages is no less foolish than in one. But understanding other people's speech can open a window to their minds and feelings, and it helps open our own. The fact that many people around the world are attracted to American cultural expressions—in song, in food, in clothes—doesn't necessarily help us to get along with them. For Americans to find out how others tick and how best to deal with them, more of us need to learn their languages.●

FACTS ON WELFARE REFORM

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. PARRIS. Mr. Speaker, there has been much discussion in this Chamber on the so-called cruelty of the President's economic program and its effects on the poor people of our country.

Some of those who attack the attempts by the Reagan administration to properly address the issue of welfare reform often cite a study by the Department of Health and Human Services, which projects a reduction of 658,000 clients from the current wel-

fare rolls as evidence of the uncaring attitude of the President's program.

I do not believe that a reduction in the total number of people receiving welfare represents anything but a return to a commonsense approach of providing benefits to those who truly need assistance.

Recently, Mr. Ken Scott, vice president and general manager of WRC Radio, delivered an excellent editorial on the subject of welfare reform. I believe many of my colleagues would find Mr. Scott's statement enlightening and am therefore inserting it in the RECORD at this time.

The statement follows:

If David Stockman and his people have done their job properly . . . they probably are. We hope so. Not because we want to be cast as administration supporters "no matter what" . . . but because as we've said for years, many of the programs of the last two decades are nothing more than well meaning disasters. Disasters that have doubled and tripled the cost of Government at an alarming rate, while achieving little or no success. Disasters that have become self perpetuating sacred cows threatening our very existence.

President Reagan points out that he is accustomed to all these attacks, noting that when a similar move on welfare reform took place in California when he was Governor, fully 350,000 people simply disappeared from the welfare rolls. And there was no indication that any were victims of destitution. There was a similar occurrence some years ago in a suburb of New York City.

Mr. Reagan's Deputy Press Secretary, Karna Small, allows the White House is hopeful some of those 658,000 families mentioned in the Health and Human Services projection will also disappear. We think they probably will.

Frankly, we wish all the doomsayers would disappear, too. Welfare reform doesn't mean attacking the poor. It means getting rid of the bad apples and redefining the terms "poor" and "poverty levels." When we look back over the past twenty years it's like a recurring nightmare. We remember writing alarmed editorials because "the great society" kept doubling the number of poor people in the United States by simply redefining what poor meant. Young married college students from upper middle class families suddenly were classified as below poverty levels because they constituted a household but had no official income. So did wealthy retired widows, widowers and couples. The examples are legion. And the abuse of such definitions along with the outrageous mismanagement and downright dishonesty that was perpetrated by some of those administering the programs combined to bring this country to the edge of bankruptcy. Does anyone really believe that currently a third of all U.S. households should be receiving welfare in some form or another? Not hardly, but they do!

Before good intentions became zealous, grandiose schemes fueled by the questionable aspirations and motives of bureaucrats, a large percentage of those now receiving such welfare would simply have accepted the concept that made America grow. They would have worked to improve their lot and would have done without some of the nonnecessities of life that now seem to be necessities. Things like beer, wine, alcohol, automobiles and color TV sets.

In a nutshell, the drive that Mr. Reagan is making for a new direction in America is a drive to change an insidious attitude that has been sold to the American people. An attitude that this country guarantees everybody a piece of the pie. It doesn't and it never has. It is great because it guarantees everybody an equal chance at as big a piece of pie as a person can honestly earn.

So Government isn't here to provide the pie. It's here to enforce that word "honesty" . . . to guarantee those equal rights . . . and, certainly, to care for the truly needy.●

EL SALVADOR: THE NEED FOR RESTRAINT

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. GARCIA. Mr. Speaker, the crisis in El Salvador concerns us all. As a cosponsor of H.R. 1509, the Studds resolution, I am opposed to military aid to El Salvador. U.S. support must deal with the realities of the tenuous situation that exists in that country. We cannot justify the pumping of military hardware and advisers into a politically and economically unstable nation. We must be more responsible with our actions. Therefore, Mr. Speaker, for the benefit of our colleagues, I insert in the RECORD a copy of an article from the New York Times:

SPREADING BRUSHFIRE TO THE SOUTH

(By Flora Lewis)

The policies now being adopted by President Reagan on El Salvador were essentially already decided by the Carter Administration before last year's elections. And they were already being challenged by insiders on the grounds that they would boomerang against the U.S.

This emerges clearly from a "dissent paper" drawn up by people from the National Security Council, the State and Defense Departments and the C.I.A., dated Nov. 6, 1980. The paper has been circulated inside the Government in the manner prescribed when a policy has been established, but serious doubts remain among an important group of knowledgeable officials about the wisdom and effectiveness of the decisions.

They make some serious charges, including one that an energetic but mainly covert U.S. intervention took place last year "to prevent the crisis in El Salvador from climaxing prior to the elections." Events have developed further since then, but the arguments and insights remain valid. Most important is the charge that vital intelligence contradicting the dominant view, which urges intervention, has been suppressed "within various bureaucracies," not just one.

Already last year, the paper said, the U.S. was training Salvadorans at its bases in Panama in the largest training program it has ever sponsored for any Latin American country in a single year. Argentina had become the second-largest trainer of Salvadoran officers. Chile and Uruguay, where the U.S. ran a highly controversial and nasty counterinsurgency program in the 1960's, were also providing advisers on intelligence, logistics and urban and rural counterinsurgency.

The President of Panama objected publicly to the scope of the program on his territory. Nobody paid attention. Other governments in the region have expressed sharp concern about U.S. action. However, the paper says, right-wing Guatemalan military officers have been talking about their own intervention in Salvador, while opposition guerrillas in both countries have increased cooperation and gained ground.

U.S. intelligence knows about a paramilitary strike force in Guatemala, the report goes on, made up of former members of Somoza's Nicaraguan National Guard, anti-Castro Cubans, Guatemalan military personnel and mercenaries.

Rather waspishly, the dissenting officials note that they haven't substantiated charges that the C.I.A. is promoting this force. But they say its movements and connections with Miami "could not be maintained without the tacit consent—or practical incompetence—of several U.S. Government agencies including the C.I.A., F.B.I., and the Immigration and Customs Services."

Guatemala, it should be remembered, was one of those rather spectacular "wins" in what are now considered the golden days of U.S. strength and dominion. A pro-Communist Government was ousted in 1954 by a C.I.A.-sponsored attack that cost a total of two lives.

But ever since, defeat has been nibbling away at the supposed victory because nothing was done to respond to social grievances. Twenty-seven years and a great many deaths later, Guatemala is again a fragile, dangerous country with mounting insurgency. Even when winning seemed easy, it wasn't enough to settle the underlying issue.

The report also cites intelligence that a hard-line majority in the Honduran military establishment, with which the U.S. Defense Department works closely, encourages Nicaraguan exiles to operate against their own country from Honduran territory and "believes it could win a military confrontation with Nicaragua." The same Honduran officers are demanding a U.S. promise to help Honduras in the event of war with Nicaragua.

The dry, unemotional paper goes on and on, showing how many pitfalls have been overlooked in the U.S. reaction to Salvador's awesomely bloody civil war, the links and implications for the region as a whole, and the grave danger that the policy Reagan is how pressing forward will produce the opposite of desired results.

Nothing is more likely to weaken the U.S. and draw in far more substantial Cuban and Soviet involvement than American military intervention, the report concludes. Instead, it recommends negotiations, if possible without the U.S. and a clear reversal of signals to right-wing extremists throughout the region.

Its recommendations foreshadowed last weekend's proposal by Latin American Socialist parties to mediate, and West Germany's offer to help.

The key point, argued with solid facts and cool analysis, is that U.S. involvement in Salvador's war will almost surely spread the fighting to other countries and bring more, not less, intervention from Communist regimes. Negotiation will be even harder now

than last year, and it is much more necessary.

The Reagan Administration would do well to listen to the paper's authors before the chance for talks is lost, and then make sure Salvador's ruling junta knows that the U.S. seeks a political and not a military settlement.●

CRUCIAL ECONOMIC CHOICES

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. OBEY. Mr. Speaker, Felix Rohatyn, a well-known economic analyst, has written a very interesting essay on the revitalization of our economy which I bring to the attention of Members.

[From the New York Review, Mar. 5, 1981]

RECONSTRUCTING AMERICA

(By Felix Rohatyn)

One of the gravest events in our history is the inner emigration taking place in the United States. During the last decade, Chicago lost 12 percent of its population, Baltimore 14 percent, Cleveland 24 percent, and St. Louis 28 percent. The proportion of taxpayers moving out was undoubtedly greater. During this period, Houston gained 24 percent, San Diego 25 percent, Phoenix 33 percent. A recent study by the Industrial Conference Board measured regional standards of living by examining cost-of-living and household income in eighteen metropolitan areas. By those measurements, residents of northeastern metropolitan areas had living standards 25 to 33 percent below those of their southern and western counterparts.

During the same period, some of the most important America industries have been failing badly. In 1979, US Steel lost almost one-half billion dollars. In 1980, the Ford Motor Company, Chrysler, and General Motors each have lost between $1.5 and $2 billion, International Harvester almost $500 million, and Firestone $100 million.

It is no coincidence that the cities under the greatest strain are tied to the industries in the most severe difficulty, particularly in the region extending today from Baltimore to St. Louis. Existing trends are likely to exacerbate rather than attenuate this situation with the result that another decade like the last one will divide the country into "have" and "have-not" regions with unpredictable but probably highly unpleasant consequences. As taxpayers leave older urban centers, the remaining tax base collapses inward, requiring higher taxes for a population that is unable to pay them and fewer services to people in increasing need of them. In these trends are the makings of social strife.

At the same time, our traditionally powerful industries, the industrial locomotives that drove this country for the last century, are in the throes of a similar self-eviscerating cycle. Harshly affected by foreign competition, unable to raise vast amounts of capital needed to modernize, they live from hand to mouth, not investing in the future in order to survive today. They are also affected by a deep structural shift not only in regional prosperity but, as Emma Rothschild recently pointed out in these pages,[1] in the basic nature of American work as well—the shift away from productive industry and toward consumer and retail services, notably "eating and drinking places" (including fast-food restaurants), and health and business services. As Ms. Rothschild wrote, these three industries together accounted for more than 40 percent of the new private jobs created between 1973 and the summer of 1980. In that period their employment increased almost three times as fast as total private employment, and sixteen times as fast as employment in the goods-producing or industrial sector of the economy.

. . . The increase in employment in eating and drinking places since 1973 is greater than total employment in the automobile and steel industries combined. Total employment in the three industries is greater than total employment in an entire range of basic productive industries: construction, all machinery, all electric and electronic equipment, motor vehicles, aircraft, ship building, all chemicals and products, and all scientific and other instruments.

Allocating blame for all these trends is easy—there is enough for everyone. Government regulation has been costly and ill-advised, and so have government policies, particularly with respect to energy, including the cowardly avoidance of taxing gasoline at much higher rates. Weak managements and shortsighted unions have collaborated in the creation of inefficient organizations whose costs are high and productivity low. Research and development, on which industrial productivity heavily depends, have been inadequate in the US both in quality and quantity. We have produced an educational system that ignores the crafts and a culture that idealizes rock stars.

The fact that practically everyone is to blame does not mean, however, that we should throw up our hands. It means rather that sacrifice can and should be shared by many to reverse the trend. The United States, today, in its basic productive industries, needs a second Industrial Revolution. The currently fashionable notion of backing the winners instead of the losers is as facile as it is shallow. The losers today are automotive, steel, glass, rubber, and other basic industries. That this nation can continue to function while writing off such industries to foreign competition strikes me as nonsense. Nor does it seem to me workable in the long run for a larger and larger proportion of our population to be diverted to such jobs as serving food and processing business paper while the industries that manufacture products for sale at home and abroad fall into a state of decline.

We cannot become a nation of short-order cooks and saleswomen, Xerox machine operators and messenger boys. These jobs are a weak basis for the economy; with their short hours and low pay, they are easily eliminated in prolonged downturns of the economy. To let other countries make things while we concentrate on services is debilitating both in its substance and in its symbolism. The argument that we are substituting brains for brawn is specious; brains without sinews are not good enough.

When our basic industries fail, moreover, the shareholders and the workers who are laid off are not the only ones to suffer. Nothing is more inflationary than unemployment when it is coupled with trade adjustment payments, on top of benefits, on top of welfare. What we have to do is to turn the losers into winners, restructure our basic industries to make them competitive, and use whatever US government resources are necessary to do the job.

This country's goal must be twofold; First, to have a functioning economy, with stable growth and emphasis on the creation of private sector jobs; and second, to have all elements of our society, and all regions of the country, participate in that growth as fully as possible.

It is not only foreign competition that challenges our basic industries. We depend on highly unstable countries not only for our basic energy supply but also for the strength or weakness of the dollar. And the regional shifts in national wealth I have mentioned will partly as a result of oil and gas price decontrol threaten our social or economic stability as a nation, if allowed to continue unchecked.

From 1980 to 1990, decontrol of oil and gas prices will generate about $120 billion of revenues to the energy-producing regions of this country. This is a tax which will be paid by the consuming regions of the Northeast and the Midwest in the form of royalties and serverance taxes. At the same time, a program of heavy tax cuts intended to shore up the "supply side" of the economy is bound to accelerate the trend of manufacturing business away from the northern part of the country. The federal budget cutbacks that will have a heavy impact in the Northeast and the Midwest will be more than made up in the Sun Belt by increases in revenues resulting from energy pricing as well as sharp increases in defense spending.

We will then be faced with a situation in which one city after another in the north of the country will be less and less able to support a larger and larger proportion of its population in need of public assistance. The industries which formerly provided employment and support will continue to decline. Many of those taxpayers who are able to leave will migrate to the Sun Belt, leaving behind a growing mass of unemployed or unemployable people unable to move or afraid to try. Not even a country as large as ours can maintain its democratic institutions half rich and half poor, especially when the economic trends will make it very apparent that for the "have nots" things will get worse and not better.

There has been much talk recently about "re-industrialization" and "industrial policy." The former ("lemon socialism" to its detractors) is described as the government bailing out the large and inefficient. The latter is a policy by which the government would deliberately "pick the winners" and provide for their accelerated development. Except for additional tax benefits for research and development, however, attempts by government to "pick the winners" are for the most part futile. No government agency is capable of doing so, and in fact, the winners do very nicely without being selected for special government help. Such efficient users of new technology as IBM, Hewlett-Packard, Tektronix, Intel have been spectacular successes in the 1950s, 1960s, and 1970s. There is no need for the government to try to identify their counterparts for the 1980s and 1990s; they will emerge by themselves.

It is also counterproductive for government to bail out large, inefficient, or noncompetitive organizations if the only result is to have them limp along, neither dead nor alive, a menace to their healthier competitors and to themselves. A case in point is the so-called rescue of Chrysler, which is nevertheless doomed to failure, at a heavy

[1] The New York Review, Feb. 5, 1981.

cost to the taxpayer, because the remedy was inappropriate to the disease.

What is needed, first, is an industrial policy committed to restructuring basic U.S. industries, to enable them to take their place as healthy competitors in the world markets; and, second, a regional policy whose aim will be to maintain the U.S. as a country in which all geographical areas (and thereby all classes and races) share the burdens as well as the benefits this country has to offer.

The United States must be considered not only as a country but as a continent, and if we are to find remedies we must look at half of that continent as a new hybrid: a highly industrialized but nevertheless underdeveloped country that risks becoming poorer, unproductive, ridden with slums. Italy with its Mezzogiorno, France with it southern provinces have attempted to develop the rural areas that lie outside their industrial heartland. We, on the other hand, must maintain both our own crumbling industrial heartland, possibly on a smaller scale, and the urban centers tied to it. It is in the national interest to do so and therefore it is also in the interest of the faster growing regions.

We need a viable steel industry for our security, not only in the narrow sense that steel is indispensable for weapons but in the larger sense that the US would be fundamentally weakened if it depended on foreign countries for so crucial a resource. We need a viable auto industry because one out of every eight jobs in this country still depends on it. We need to revive our basic productive industries generally because we need an economy with an effective balance of both manufacturing and services. Our world-wide competitive position requires this from the point of view of both domestic employment and of the balance of payments. We must reduce our requirements for imports and increase as much as we can our industrial self-sufficiency and our ability to export in a decade that will see greater and greater trends to protectionism as one country after another attempts to solve the payments problems posed by oil imports.

Greater industrial productivity coupled with exports of grain and coal should be the basis for our strategy to offset payments for oil in the 1980s. Moreover, industry has to provide greater employment opportunities for residents of the inner cities. Nothing will do more to erode the confidence of our allies, and consequently our defense positions throughout the world, than the demonstration that we have a non-functioning economy with an industrial base in disarray. We need functioning northeastern and midwestern cities because the economic and social costs of their failure will be intolerable.

To redevelop the parts of the US that are failing, a Reconstruction Finance Corporation should be created for the 1980s.

Would this simply be a renewal of the New Deal? In fact the original RFC was created by Herbert Hoover in 1918, and under Franklin Roosevelt it was run by the Texas businessman Jesse Jones. The RFC of the 1930s saved numerous banks, some cities, and many businesses, and prevented much larger dislocations from taking place. It financed synthetic rubber development during World War II and new aluminum capacity during the Korean War. It made money for the taxpayer.

The RFC, of course, will be said to interfere with the free market system. But at present the price of our energy is not freely set; nor is the price of our food, or the price at which we borrow money. Free markets are clearly desirable, but we do not in fact live in a free market economy and never will; we live in a mixed economy in which prices and capital are and will be, subject to government influence.

The RFC should provide the kind of capital our older industries sorely lack: equity capital. In exchange for providing capital to industries that have a sound case for it, and the job security that would come with it, the relevant unions would be asked to make their contributions in the form of wage concessions and changes in work rules that would increase productivity. The lenders, the banks and insurance companies, could be asked to convert some loans to preferred stock and to join with the RFC in committing additional capital. Special classes of securities could be created that would each have appropriate credit ratings and would meet the standards of the "prudent man rule," which would make them eligible for purchase by union pension systems. The RFC, like any other large equity investor should have the right to insist on management changes and changes in the board of directors if it deems them appropriate. It should not become a permanent investor, but should act as a revolving fund which can be used to help a given company (or industry) when necessary, and whose holdings can, and should, be sold in the marketplace when it has done its job.

At present, problems like those of Chrysler and New York City can only be dealt with by emergency maneuvers that must take place in front of congressional committees. In the case of New York City, the Municipal Assistance Corporation was able to play a role similar to the one the RFC could play. After its creations as an independent agency by the state legislature, MAC was able to extract concessions from banks and unions, from the city and the state. It was then able to put together a financing package, including federal credit assistance and to impose fundamental reforms which permitted the city to achieve a truly balanced budget in 1980, five years after near bankruptcy.

The case of Chrysler is an example of how not to proceed. Providing government-guaranteed loans at close to 20 percent interest to a company which has too much debt and no net worth can buy some time, but nothing else. Companies like Chrysler in recent years, and possibly larger ones in the period just ahead, need permanent equity capital in the form of new common stock. Only very large injections of such capital can help make a company's survival credible and impel other participants to make the major efforts and sacrifices that have to be made if they are to be put back in shape. Only an RFC that is publicly accountable but is run outside of politics, like MAC in New York State, could provide such capital as well as negotiate the often stringent concessions that have to come with it. That is beyond the capacity of a congressional committee.

Only now, after over a year of wrestling with the problem, is the Chrysler Loan Guarantee Board beginning to take some of the difficult steps needed to give Chrysler a chance to survive. The board is asking for a total wage freeze (including a freeze on cost-of-living allowances) from the UAW. It is also asking the banks to convert half their loans to preferred stock, and to forgive 70 percent of the balance completely; it is pushing the management to seek a foreign merger or a joint venture partner. The tragedy of this is that it is probably too late and too little. Had these actions been demanded two years ago by an RFC which could simultaneously have promised additional equity capital, it might have had a chance of success. As it was, the congressional committees demanded little and gave a lot. The Loan Guarantee Board, in the middle of a presidential campaign, looked the other way. Now reality is sinking in, but the opportunity has probably been lost. Without substantial fresh capital and a merger partner, Chrysler's chances of survival are minimal. An RFC might have created those possibilities two years ago; it is now probably too late.

Chrysler is hardly an isolated case. A good many large industrial companies, airlines, savings and loan associations, and possibly banks could be in serious difficulites if we cannot break out of our current economic miasma of high interest rates, high inflation, and low growth and productivity. Some have great hopes for the new administration's economic program, but there is no guarantee of quick success. Instead of improvising expensive half-measures in the heat of crisis and politics, we should have a safety net to deal with an economic emergency affecting a number of large organizations at the same time.

In each case where a firm sought financing, the RFC staff would have to analyze its chances to survive on a realistic basis, surveying not only conditions in a particular industry but the kind of competition it faced from abroad. The RFC might find that some large firms were beyond help. It might have to insist, as a condition for capital, that the weaker parts of some industries be phased out, that labor contracts be modified, that ways be found to increase productivity. Some firms and unions may find such conditions bitter medicine to take. But it does not seem too much to suggest that, in our current bloated and inefficient economy, the austerities and productivity measures recommended by an RFC could provide a demonstration to other industries of the kinds of reforms that might work for them as well.

An RFC could, at the same time, play a major part in a regional policy. In the Northeast and the Midwest, city after city faces budgetary problems and crumbling infrastructure. The Boston transit system was recently shut down for lack of funds; the New York MTA operates a subway system so old that it poses physical dangers, and it will need $15 billion over ten years to provide adequate service. Bridges and sewers, sanitation and mass transit, schools and firehouses have been allowed to deteriorate. The RFC could provide low-interest, long-term loans to enable municipalities to maintain their physical plants. By improving the quality of city life such investments could help to retain taxpayers while providing jobs to help the existing tax base. As in the case of industrial investments, the RFC could ask for participation by other parties; the various states could be asked to create organizations like MAC to provide local budgetary oversight: the local unions and banks could do their share. As with industry, reform and restructuring would in many cases, have to be the quid pro quo for receiving capital on favorable terms.

How, one might ask, would such an RFC be set up, capitalized, and financed? Congress would have to create a new independent entity with powers to make investments in industries and localities where the RFC deems this in the public interest. Its board

of directors could include experienced people from business, finance, and labor. An RFC could plausibly begin with capital of $5 billion and authority to issue five times its capital, or $25 billion in bonds guaranteed by the US government. Its charter should provide that it could not supply more than 50 percent of the financing for any project, the balance to come from the private sector. It could then generate total investment of up to $60 billion. The RFC need not stay in existence more than seven to ten years, after which it could be liquidated with its assets taken over by the Treasury. Its capital should be subscribed by the Treasury, not necessarily all at once.

The RFC's federally guaranteed bonds could be sold on the open market but a quite different arrangement seems to me preferable: that they be sold to certain of the OPEC countries with large dollar surpluses, such as Saudi Arabia, Kuwait, the United Arab Emirates. It is time to realize that OPEC is more than an insecure energy source; it is also a more and more important source of capital. At current prices, over the next five years, we will pay to OPEC approximately $500 billion for petroleum, about half the present value of all companies listed on the New York Stock Exchange. Possibly a third of that amount, or $150 billion, is likely to be in excess of OPEC's own investment requirements and will consist of short-term dollar balances, most of them belonging to the Saudis, Kuwait, and the Emirates, and subject to the whims and winds of Middle Eastern politics.

We must borrow back, on a long-term basis, as much of these funds as possible in order to strengthen the dollar and relieve the pressure on our credit markets. What can we offer in exchange? To the "moderate" oil producers like the Saudis, military protection, continued attempts to find a rational Israeli-Jordanian solution to the West Bank problem, greater efforts at US conservation and domestic production to lengthen the life of their reserve. The RFC, with its federal guarantees, would be a wholly appropriate vehicle for investment of these OPEC surpluses, and its use of them would constitute true recycling in contrast to the present conversion of deposits into short-term paper.

Another possible source of financing would be the surplus funds to be generated by our own oil-producing regions. In Canada, the oil-producing regions have created the Heritage Fund in order to invest several billions of excess dollars in Canadian industry and other Canadian provinces. A similar arrangement could be set up here to assist the RFC in its regional policy investments. Why not have Alaska invest some of its excess oil funds in an East Coast harbor to export coal mined in West Virginia, Ohio, and Pennslyvania?

An RFC, by itself, could not make an industrial or a regional policy. Tax benefits, changes in federal formulas for welfare and medicaid, different allocation of defense and synfuel contracts, a coal-based energy plan based on the Northwest and Midwest, temporary measures to protect at least some American industries from foreign competition while they reorganize themselves more efficiently—all these will be required. Temporary protection, however, should always be coupled with needed domestic reform. If the automotive industry is granted a three-year period of restriction of foreign imports, this should be conditional on a three-year commitment to wage restraint on the part of the unions and price restraint on the part of the manufacturers. Similar bargains could be required from the steel industry and its unions, as well as from other industries. The RFC should be the central mechanism, the catalyst.

Of course, none of this is likely to happen tomorrow. The current economic theology—the 1980 version of "laissez faire"—is neither Republican nor Democratic. President Carter's Commission for a National Agenda for the 1980s, a prestigious bipartisan academic group led by William McGill, has just recommended that the government encourage the current population shift to the Sun Belt even though doing so will impose "traumatic consequences" for the major urban centers of the North. The commission argues that we must accept the decline of northeastern and midwestern cities as an inevitable effect of the workings of the market.

This view will not stand up to scrutiny. No doubt there are fundamental difficulties in attempting to halt the shrinkage of metropolitan areas, but it is also true that government policies have heavily contributed to the exodus. We might remind the commission that there were fundamental difficulties in going to the moon, in winning World War II, in eliminating slavery. The commission's recommendations epitomize the kind of advice that returned Mr. Carter to Georgia; for it was the perception of him as a president who could not cope with events that defeated him, just as it defeated Herbert Hoover fifty years ago. This country did not become powerful by a mere acceptance of the status quo.

People like the commissioners who throw up their hands at current trends and say "so be it" must be asked to confront the consequences of doing so. In a world where capital will be in shorter supply than energy, is it really a valid use of resources to have to build anew in the Sun Belt the existing schoolhouses, firehouses, transit systems, etc., of the North for the benefit of the new immigrants in the South, instead of maintaining and improving what we already have in place here? Is it rational to think that northern cities teeming with the unemployed and unemployable will not be permanent wards of the federal government at vast financial and social cost? Shouldn't a commission reporting on our so-called urban problems face up directly to the fact that the future of the cities cannot be discussed separately from the acute difficulties facing the black and Hispanic minorities? Doesn't the notion of "taking the people to the jobs" completely ignore that many of those people, in large parts of this country, are unable and unwilling to move? Is it rational, in the name of the mythical free market, to let our basic industries go down one after the other, in favor of an equally mythical "service society" in which everyone will serve everyone else and no one will be making anything?

The United States is probably the only country in the world today whose biggest problems may also provide its biggest opportunities. Becoming self-sufficient in energy, rebuilding our basic industries and our oldest cities—there is work enough here for everyone in this country as far as the eye can see. Certainly we need tax cuts and regulatory reform and a balanced budget. But alone they will not do the job. Strong presidential leadership working with business and labor will be needed to make it happen. This may mean temporary government intervention to control wages and prices, to create an RFC, to tax gasoline at higher rates, to institute some form of national youth service if not the draft, to link inner city school systems to new private employment opportunities, to dismantle farm support programs and other engines of inflation. It does not mean the end of the market system, no more than did the New Deal. On the contrary. However, it clearly does not mean laissez faire.

In New York City, we proved something could be done. In 1975, an activist governor joined with business and labor to keep the city from bankruptcy. We could have simply let the city go, blaming previous mayors, governors, banks, unions; there was also then more than enough blame to go around. The result would have been disaster for the city and great harm to the nation. We chose not to do so. Everyone paid a price: workers with frozen wages and fewer jobs; banks, by providing more and cheaper credit; students, by paying tuition. The riding public was charged higher fares, note holders had to accept a temporary moratorium on repayment. But today the city, with an equally activist mayor, is thriving economically and has a balanced budget.

America cannot survive half rich, half poor, half suburb, half slum. If the country soon wakes up, it will not do so by way of laissez faire; nor will it do so by way of the old liberalism which has proven itself incapable of coping with our present problems. It will do so only by building a mixed economy, geared mostly to business enterprise, in which an active partnership between business, labor, and government strikes the kind of bargains—whether on an energy policy, regional policy, or industrial policy—that an advanced Western democracy requires to function, and that, in one form or another, have been made for years in Europe and Japan. This partnership will have to be as indigenous to our culture and traditions as those of Germans and Japanese have been to theirs, and it will have to be competitive. Much is at stake in making such a partnership work. Our ability to protect ourselves and our friends, and to defer our enemies, depends on maintaining a stable, solid economic industrial, and social base at home. Our national security, our industrial power the strength of our social system itself are all tied to one another and to the need for a new pattern of cooperation to emerge in the United States.●

CONCERN ABOUT FOREIGN CONTROL OF U.S. MINERAL RESOURCES

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. LUJAN. Mr. Speaker, I am concerned over the recent take over activity by foreign interests seeking control of significant U.S. mineral companies. We have no facts regarding the extent of foreign control over our vital mineral resources and no policy on which to evaluate the potential impact on our economy, national security, or other interests.

One specific concern is the current attempt by a Canadian company—the liquor distilling company Seagram—to

take over the vast mineral holdings of St. Joe Minerals, one of America's leading companies in the mining industry. Canadians enjoy the full benefits of investment opportunities in the United States, but Canada is placing stringent restrictions on U.S. investors and prohibiting U.S. citizens from owning and operating companies in Canada. In just the last 2 weeks Canada has denied three U.S. companies the right to acquire businesses in Canada. Moreover, Canada is on the verge of enacting even more restrictive investment provisions—restrictions which clearly violate the reciprocity required under U.S. law.

My concern is that Canadian investors are seeking control over vast U.S. mineral resources at a time when Canada is denying the same right to our citizens. In addition, our Government should consider the impact and effects of foreign control over our vital mineral resources. We currently have no facts on the extent of that ownership and would be unable to formulate any policy or action which may be warranted to preserve national interests.

On March 30 I conveyed my concern to Secretary of the Interior James C. Watt. I insert at this point the text of my letter to Secretary Watt:

MARCH 30, 1981.

Hon. JAMES G. WATT,
Secretary of the Interior,
Washington, D.C.

DEAR MR. SECRETARY: I am deeply concerned about this Nation's mineral development policy as it relates to the ownership of U.S. mineral corporations by foreign entities. Mineral self-sufficiency is more important than ever these days and I find it difficult to understand how we will be capable of achieving that goal while foreign corporations continue to acquire major segments of our domestic industry. The recent announcement by the Seagram Company, a Canadian firm, of a $2.03 billion tender offer for the St. Joe Minerals Corporation of St. Louis, Missouri, is a case in point. St. Joe is a major domestic producer of lead, zinc, gold and coal, and it is my understanding that a major portion of its assets consist of federal mineral leases.

It is my understanding that the Secretary of Interior has the authority, under the Mineral Leasing Act of 1920, to review the question of reciprocity between the United States and other nations. I strongly suggest that you undertake such a review as soon as is reasonably possible to determine what impact acquisitions by foreign corporations are having on our domestic mineral production capacity. I note that the Seagram Company tender offer is scheduled to expire on April 10.

Your attention to this request is appreciated.

Best regards,

MANUAL LUJAN, Jr.,
Ranking Republican Member.●

ZIGZAGGING THROUGH FOREIGN POLICY

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. OTTINGER. Mr. Speaker, I am including in today's RECORD a provocative article by Philip Geyelin which recently appeared in the Washington Post. Mr. Geyelin assesses virtually every foreign policy issue which the administration has addressed, and finds a record of vacillation and confusion. I commend Mr. Geyelin's analysis to the attention of my colleagues:

ZIGZAGGING THROUGH FOREIGN POLICY

It's been two months now since the Reagan administration was supposed to be ready to "hit the ground running" and more than four months since President Reagan was elected with a solemn vow to end the "zagzagging and vacillation" in American foreign policy.

Finally, this country's allies and adversaries would hear one, clear voice. There was to be no more of this business of sending mixed signals that had so eroded the prestige and power of the United States in the world. So what has there been?

The performance, zigzagwise, has been almost ludicrous, even granting that it is early on; key departments are still shot through with unfilled policymaking vacancies; the whole process is still a long way from having shaken down. You could make a case, on the face of it, of incompetence and incoherence, beyond remedy.

But when you examine the zigs and zags closely, you can make a stronger case of an administration, for better or worse, struggling to work its way free of antediluvian dogma and case-hardened arch-conservative doctrine—trying to come to terms with itself and the realities. Examples:

Zig: Secretary of the Navy John Lehman takes it upon himself to propound publicly the argument that there is no legal reason for the United States to honor the provisions of both the expiring SALT I and the unratified SALT II arms control agreements. He would be against doing so, even by tacit arrangement with the Soviets.

Zag: Rightly reading this as elbow-jostling from the far right at a delicate moment in the administration's review of arms control strategy, and mindful of European sensitivities, Secretary of State Haig swiftly repudiates Lehman by name. An unusually blunt State Department statement, rushed to reporters, says Lehman's remarks "were not authorized, nor did they reflect administration policy."

Zig: Secretary of Defense Caspar Weinberger announces that he is in favor of reviving the idea of equipping American missiles and artillery shells in Europe with "enhanced radiation" warheads (otherwise known as neutron bombs).

Zag: Keenly aware again of how touchy the issue is in Europe, and of where it fits into larger alliance defense planning, Haig wisely takes steps to make clear to our allies that this is by no means a final decision.

Zig: With the most elaborate orchestration, "war-torn" El Salvador is elevated to the pinnacle of East-West concern. The State Department speaks of "massive" arms flows from Cuba. Haig warns of "striking at the source." The threat, Soviet in origin, is said to be hemisphere-wide. All Europe, and all Latin America, must join in drawing the line. The U.S. military adviser force is doubled; aid is tripled. This is war.

Zag: The president allows as how there was no real thought of "striking" at Cuba. Political solutions, and the importance of economic help and an end to repression by the U.S.-backed Duarte government, are given equal importance with military measures. Almost laughably, a State Department official complains that the whole story has been overblown by the press. It was only supposed to be a "signal" that, once delivered, should now be turned off. Be good enough, the press was told, to turn your attention elsewhere.

Zig: The secretary of agriculture announces his undying opposition to the embargo imposed by Jimmy Carter on grain shipments to the Soviet Union.

Zag: After examining both the effectiveness of the embargo and the effect of lifting it in return for nothing, the administration sensibly puts that decision on hold.

In extenuation, let it quickly be said that these (and other) zigs owed much to preconceptions made plain, and promises firmly offered, in the course of the Reagan campaign. The president did say that the United States should not abide by SALT II's terms "prior to ratification." He did favor the neutron bomb, oppose the grain embargo and warn of falling "dominoes" in Central America—with Mexico and, ultimately, the United States, the last in line.

So some part of the problem has to be that the administration's top figures hit the ground still running for president, so to speak, still faithful to every jot and tittle of the Reagan line. Some part of it has also to do with the president himself. Left to his own devices (in the interview with Walter Cronkite), he betrays a sort of fierce fidelity to a lot of his much earlier thinking, without much recognition of what may be new and different about today's Cold War.

And some part of it has to do with a sort of "scorched-earth" approach by long-frustrated conservatives finally come to power and determined to erase every fingerprint of the recent past: the Law of the Sea, the Carter refusal to upgrade Saudi Arabian F15s and—above all—human rights.

There remains that part of the zigzagging that has to do with getting organized; the system, quite obviously, is not firmly in place. Meantime, there is one thing to be said for the Reagan vacillation: The second-thought zags have in every instance been an improvement over the zigs.●

TRIBUTE TO MICHAEL PERTSCHUK

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. DINGELL. Mr. Speaker, I would like to pause to pay tribute to the accomplishments of a dedicated public servant whose agency has been the subject of considerable attention by this body in the past 4 years. He is Michael Pertschuk, former Chairman of the Federal Trade Commission.

Mike Pertschuk has served for 15 years in a variety of senatorial staff

positions, including chief counsel of the Senate Commerce Committee. He was appointed Chairman of the Federal Trade Commission by President Carter in 1977, a fitting post in light of the key role he had earlier played in securing passage of legislation which strengthened the FTC's hand to deal with widespread consumer fraud. Mike Pertschuk believes firmly in the FTC as a defender of free and fair competition, and he has led his agency with great distinction and unflagging devotion to the public interest.

First and foremost among Mike Pertschuk's achievements has been his ability to identify and focus on issues of major importance that need to be confronted. The impact of advertising directed at young children, for example, is a subject that troubles millions of parents in this Nation, and Mike Pertschuk was not afraid to raise that issue and explore it in dramatic fashion. For this he paid a heavy price, in opposition by industry members unwilling even to see this matter considered by the Federal Government, but throughout it all, Mike Pertschuk persevered.

Other problems on which Mike Pertschuk has raised public consciousness and contributed substantially to the debate include the impact of private and State restrictions upon competition in medicine, law, and other professions; the impact of increasing economic concentration through conglomerate mergers on our economy, especially on the survival of small, innovative businesses; and the inability of consumers to make a meaningful comparison among the costs of various life insurance policies.

In these and other cases Mike Pertschuk spoke out strongly. And in many of these cases his forthright exploration of tough issues elicited powerful opposition from interest groups that apparently believe it best that such questions not be discussed at all. When the power of these groups was felt on Capitol Hill, Mike Pertschuk became a regular visitor to our offices and committee hearing rooms, patiently and repeatedly explaining to us the activities of his agency, firm in his defense, but always recognizing the appropriate role of congressional oversight.

Under Mike Pertschuk's leadership, the FTC has been a vigorous defender of consumer rights. Last year, in fact, for the first time in the FTC's history, the amount of money obtained by the agency in refunds to consumers who had been victimized by deceptive practices exceeded the agency's entire budget. That is certainly a record of which any administration could be proud.

There are many specific FTC achievements during Mike Pertschuk's chairmanship—in terms of improved competition and real benefits to consumers—to which he can point with pride. He led the FTC's effort to bring down spiraling health care costs by attacking illegal barriers to competition such as price fixing, doctor boycotts, and bans on price advertising for medical services and products. He also fought for the consumers' right to critical information so they could save money by shopping around for products like home insulation and the right to free repair of unreasonable product defects. Mike Pertschuk's record in addition demonstrates his deep concern for special groups of consumers who are without privilege in the marketplace; like elderly consumers, on whose behalf he supported FTC actions to force funeral directors to disclose their prices in advance and to curb abuses by hearing aid dealers.

There is another aspect to Mike Pertschuk's accomplishments, however, that has been less noticed. And that is his unstinting effort to make FTC action truly cost-effective—to strip away the unnecessary and costly parts of proposed rules, and then to implement those parts that are necessary to prevent abusive practices. Although the FTC under Mike Pertschuk has been criticized for overregulation, the reality is that under his leadership the Commission began only one-eighth as many rulemakings as during the 4 years of his Republican predecessors. the FTC under Mike Pertschuk has engaged in relentless scrutiny of those rulemaking proposals begun during the tenure of his predecessors, paring them down in a way that balances serious and responsible concern for the rights of consumers against the necessity to achieve those rights in a way that does not hamstring the legitimate operations of business.

Mike Pertschuk has achieved all of these things with a style, wit, and unpretentious manner that are as refreshing among high officials as they are uncommon. His disarming frankness, along with his willingness to confront the most hostile inquisitors in Congress and in business forums around the country, have earned him respect, and not a few converts.

With the change of administrations, he has been replaced as Chairman of the FTC, but will remain as Commissioner. His successor will do well to build upon Mike Pertschuk's outstanding record of achievements.●

A POWERFUL PROPHET

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. OBERSTAR. Mr. Speaker, by sending military aid to El Salvador, the United States continues to emphasize the military component of the struggle within El Salvador. The people of El Salvador do not need American arms. Former Ambassador White has said that sending military aid puts the United States in the position of arming some of the world's most dangerous men—the so-called security forces of the Government of El Salvador.

The Sunday New York Times magazine of February 22, 1981, published an excellent summary of the conflict by Times reporter Raymond Bonner.

The Times quotes a conservative Catholic priest who said:

> The difference in the violence is that the left kills selectively—Government security forces and members of right wing death squads. Killing by the right and the army is more indiscriminate. When they sweep through a village looking for leaders and leftists sympathizers, they kill a lot of innocent peasants.

The position of the United States ought to be that it does not serve our national interest nor the Democratic principles of our people for us to participate in that killing by sending additional military aid.

Archbishop Carlos Romero was assassinated a little more than 1 year ago. Archbishop Romero saw the terrible injustice committed by the wealthy and the military in El Salvador against the people of that country. He spoke out against U.S. military involvement.

Archbishop Romero was not a marxist, or a leftist. He was a man of deep faith who cared for the people he served. The Government of El Salvador does not do the same.

I would like to share with my colleagues an article on the late archbishop from the March 1981 issue of Maryknoll magazine.

A POWERFUL PROPHET

(By Jon Sobrino)

I met Archbishop Carlos Romero for the first time on March 12, 1977, a few weeks after he had been named archbishop of San Salvador. It was about 11 o'clock at night when I answered the door of the parish house in Aguilares. The Archbishop was standing there, his countenance serious and preoccupied. The pastor of Aguilares, Father Rutilio Grande, had been assassinated a few hours before. (The Jesuit priest would be the first of six murdered priests that the Archbishop would bury.)

The funeral of the slain pastor was the last act of his installation as archbishop. In the first months of 1977, a cruel repression, unprecedented in the country, had been unleased against the Church. More than 20 priests were sized, tortured or expelled, and many others threatened. Thus, Archbishop Romero took possession of his archdiocese in a climate of persecution and martyrdom.

This installation was decisive for Archbishop Romero. Along with the clear persecution of the Church, the prelate discovered something more profound—the repression of the people, the campesinos, the workers, those who live in the barrios and slums. The body of Rutilio signified what was happen-

ing to the Salvadoran people, crucified like Jesus. And in that crucified people, Archbishop Romero encountered God. The God in whom he had always believed and whom he had always faithfully served revealed Himself to him in a new way, as the God who hears the cry of the people, as the God who is in solidarity with His people, even to the cross.

From that moment on, Archbishop Romero did not doubt—God had to be encountered in the midst of poor and suffering people. He made a real option, rising from the most profound Christian and Salvadoran roots: he chose to be on the side of the poor among his people. To this option he dedicated his three years as archbishop, and for this option he spent his life to the very end.

In this way Archbishop Romero became the prophet of the Salvadoran people. He was a prophet in a very real sense because he offered his voice and his word to God—but not to any God. Not to the God of the powerful, really an idol in whose name the poor are put to death; not to the domesticated and non-disturbing God of the middle class; not to the God of some ecclesiastics who prefer to confine Him to sacred services rather than to encounter Him in history. Archbishop Romero offered his word to the God of the poor, and for them he also converted that word, in a very real sense, into the voice of those who are voiceless.

In the name of God, Archbishop Romero spoke to all, and to all he directed a "dangerous" message of the necessity for conversion. He denounced the rich oligarchy, the military officers, opportunistic politicians, the Christian Democrat Party, the social communications media which sold out to the powerful, President Carter for pushing a political plan for El Salvador opposed by the popular majority.

His word became dangerous. Soon insults, threats and persecution were heaped upon him. But in spite of this, he spoke the truth to the end because in the name of the God of the poor he could not tolerate those responsible for the misery of the people; he had to denounce those who turned towns into jails and places of torture.

In the name of that God he unmasked attempts to impose on the people a political plan which, under the appearance of reforms, brought with it cruel repression. "Bloodshed, death touch the heart of God," the Archbishop said. "The result is that neither the government's agrarian reform, nor its nationalization of banks, nor other promised reforms can be fruitful as long as there is bloodshed."

This prophet of the people not only denounced and unmasked the oppressors, he also defended his people with tenderness and courage. To him came mothers and wives of the jailed and disappeared; to him came orphaned communities when their priests were assassinated; to him came people to mediate grave conflicts. But he not only showed compassion and consideration, he also supported and encouraged them to look for their own roads to liberation. He defended to the end the right of the people to organize; he promoted organization so that they would not be indefensible victims of the powerful. He defended every just cause and honorable struggle. And when repression against the people overflowed, he preserved hope in the midst of bloodshed, because hope is the seed of liberation. Like the ancient prophets he said, "Over these ruins will shine the glory of the Lord."

This prophet of the people died as the people of El Salvador are dying today: by murder. He did not seek personal security for himself when death threats piled up because "the shepherd does no want security when security is not given to his flock." On March 24, one year ago, when he was preparing to offer the Eucharist, he fell under the impact of a bullet. His assassins wanted to end his life to silence his message.

That message, however, still lives. The powerful have not understood it, nor those who say they are defending democracy, nor even all the ecclesiastics. But those have understood it who found in his message the word of God: the catechists in the campesino towns, the religious who work in hidden villages, the priests who continue risking their lives in the country, the many Christians who stand firm in their commitment to liberation. And those who have understood it above all, as he himself prophesied, are the Salvadoran people: "I say it without boasting, with the greatest humility. If they kill me, I will arise in the Salvadoran people."

God passed through El Salvador with Archbishop Romero and performed powerful works through him. Through him God showed the weakness of the cross, but He showed also the power of truth, justice and love. The message of Archbishop Romero still resounds with power to scandalize those who place their confidence in money, in manipulation and political calculation, and to console those who follow the sorrowful but hope-filled road of liberation.●

SAL DIMICHINO NAMED CHIEF OF NUTLEY POLICE FORCE

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. MINISH. Mr. Speaker, I would like to take this opportunity to express my heartiest congratulations to a long-time friend and constituent, Sal Dimichino, of Nutley, N.J. Sal reached his lifelong ambition earlier this year when he was named chief of police of the Nutley force.

Mr. Speaker, all of us are fortunate to represent in Congress a number of very special persons, and Sal Dimichino is one of those people. He has lived for 57 years in Nutley and has served the town selflessly for most of those years. Sal has been a member of the Nutley police force since 1947, and attained the rank of sergeant in 1952, captain in 1960, and deputy chief in 1963, before his installation as chief of police this past January.

Sal Dimichino also had a distinguished career in service to his country in World War II as a member of the 20th Air Corps in the Pacific. After the war, in addition to joining the local police department, Chief Dimichino became actively involved in community service groups. His activity continues today.

Among the civic organizations Sal has become involved with is AMVETS, of which he served as commander for two terms. He was honored as AMVET of the Year. Sal was also Cerebral Palsy Fund chairman in Nutley for 2 years. He has played a leading role in the Nutley Boy's Athletic League, the Midget Football League, and he received the Jaycees Distinguished Service Award in 1974.

Chief Dimichino also has played an active role in the Italian American community. He is a past vice president of the Italian American Club and in 1978 was honored as Italian of the Year. For 13 years, Sal has been chairman of the Nutley Elks serviceman's dinner and he has directed programs at the veterans hospital in East Orange and at Lyons Hospital.

Sal is a member of Nutley P.B.A. Local 33 and has been president of the Essex Rod & Gun Club.

Mr. Speaker, I am proud to have the honor of representing Chief Sal Dimichino in the House of Representatives. To Sal, his lovely wife Mary, and to his children and grandchildren, I offer my heartiest congratulations on his promotion.●

THE DANGERS OF NUCLEAR WAR

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. FRANK. Mr. Speaker, a prestigious international delegation of physicians gathered in Airlie, Va., recently to discuss the probable social, medical, and economic impact of a nuclear war. During their deliberations, it became clear that the disaster of a nuclear war would be prolonged and severe, virtually destroying existing economic and social systems, and crippling major sections of the population.

We cannot ignore these consequences as we confront the tough issues of defense and security. I urge all my colleagues to read the pronouncements of the physicians on the effects of nuclear war. Careful and thorough knowledge of the damage that would occur as a result of a nuclear attack is one way to promote prudence as we consider new weapons systems which escalate the nuclear arms race.

The material follows:

PROCEEDINGS OF THE FIRST CONGRESS OF THE INTERNATIONAL PHYSICIANS FOR THE PREVENTION OF NUCLEAR WAR

PREAMBLE

Nuclear war would be the ultimate human and environmental disaster.

The immediate and long-term destruction of human life and health would be on an unprecedented scale, threatening the very survival of civilization.

The threat of its occurrence is at a dangerous level and is steadily increasing.

Even in the absence of nuclear war, invaluable and limited resources are being diverted unproductively to the nuclear arms

race, leaving essential human, social, medical, and economic needs unmet.

For these reasons, physicians in all countries must work toward the prevention of nuclear war and for the elimination of all nuclear weapons.

Physicians can play a particularly effective role because they

(a) are dedicated to the prevention of illness, care of the sick and protection of human life;

(b) have special knowledge of the problems of medical response in nuclear war;

(c) can work together with their colleagues without regard to national boundaries;

(d) are educators who have the opportunity to inform themselves, their colleagues in the health professions, and the general public.

The following statements were developed by working groups at the First Congress of International Physicians for the Prevention of Nuclear War, meeting at Airlie, Virginia, March 20-24, 1981.

PREDICTABLE AND UNPREDICTABLE EFFECTS OF NUCLEAR WAR

The consequences of the nuclear attack on Hiroshima and Nagasaki were disastrous. Yet even they do not serve as adequate precedents for the amount of death and destruction that would follow nuclear warfare today. Given any scenario of a massive nuclear strike in present conditions, the fate of the inhabitants of those two cities would be shared by tens to hundreds of millions of people. Even a single one-megaton nuclear bomb explosion (80 times more powerful than that dropped on Hiroshima) over an urban area would cause death and injury to people on a scale unprecedented in the history of mankind and would present any remaining medical services with insoluble problems. In the event of a major nuclear war there would be thousands of such explosions.

We must distinguish between the immediate and the delayed effects of nuclear war. Among the immediate effects are mass deaths in the first hours, days and weeks after an explosion. These are caused by the simultaneous effects of blast, heat and large doses of penetrating radiation. The numbers of such deaths would be magnified catastrophically by the destruction of buildings, by secondary fires, by disruption of all life-support systems including electric power, communication and transportation, and by the destruction and contamination of the water supply and of foodstocks.

It is difficult for us, as physicians, to describe adequately the human suffering that would ensue. Hundreds of thousands would suffer third-degree burns, multiple crushing injuries and fractures, hemorrhage, secondary infection, and combinations of all of these. When we contemplate disasters, we often assume that abundant medical resources and personnel will be available. But contemporary nuclear war would inevitably destroy hospitals and other medical facilities, kill and disable most medical personnel, and prevent surviving physicians from coming to the aid of the injured because of widespread radiation dangers. The hundreds of thousands of burned and otherwise wounded people would not have any medical care as we now conceive of it: no morphine for pain, no intravenous fluids, no emergency surgery, no antibiotics, no dressings, no skilled nursing, and little or no food or water. The survivors will envy the dead.

It is known from the Japanese experience that in the immediate aftermath of an explosion, and for many months thereafter, the survivors suffer not only from their physical injuries—radiation sickness, burns, and other trauma—but also from profound psychological shock caused by their exposure to such overwhelming destruction and mass death. The problem is social as well as individual. The social fabric upon which human existence depends would be irreparably damaged.

Those who did not perish during the initial attack would face serious—even lifetime—dangers. Many exposed persons would be at increased risk, throughout the remainder of their lives, of leukemia and a variety of malignant tumors. The risk is emotional as well as physical. Tens of thousands would live with fear of developing cancer or of transmitting genetic defects, for they would understand that nuclear weapons, unlike conventional weapons, have memories—long, radioactive memories. Children are known to be particularly susceptible to most of these effects. Exposure of fetuses would result in the birth of children with small head size, mental retardation, and impaired growth and development. Many exposed persons would develop radiation cataracts and chromosomal aberrations.

Delayed radioactive fallout from multiple nuclear detonations would render large areas of land uninhabitable for prolonged periods of time, making it impossible to produce the food upon which the survival of whole populations would depend. Aside from the severe effects in the areas most immediately affected by explosion or local fallout, there would occur effects from both ground and air bursts throughout the world. Fallout would increase the incidence of cancers and of genetic defects in nations and populations far from the targeted areas. These and other effects are difficult to quantify, but it is known that they would occur.

The use of nuclear weapons with an aggregate yield greatly exceeding that of all the explosions (including atomic explosions) in human history poses dangers to the entire planet, and to all of mankind. Among these are profound disruptions of the ecological balance: disturbances to all living organisms, crops, and the atmosphere, with consequences of a nature and magnitude we can only guess at. For example, the release into the atmosphere of large quantities of oxides of nitrogen, formed during multiple nuclear explosions, could disturb the ozone layer of the atmosphere, which protects the surface of the earth from the penetrating component of ultraviolet radiation, and this would probably cause the death of vegetation and animals, and injury to people. In the magnitude, duration, and variety of the dangers it poses to biological and social survival, nuclear war has no precedent in the experience of mankind. The survival of civilized life is at stake.

In one likely and specific scenario that we have considered, an all-out nuclear war between the United States and the Soviet Union in the mid-1980's, it is likely that

(1) The population will be devastated.

Over 200,000,000 men, women, and children will be killed immediately.

Over 60,000,000 will be injured.

Among the injured, 30,000,000 will experience radiation sickness, 20,000,000 will experience trauma and burns, and 10,000,000 will experience trauma, burns, and radiation sickness.

(2) Medical resources will be incapable of coping with those injured by blast, thermal energy, and radiation.

80% of physicians will die.

80% of hospital beds will be destroyed.

Stores of blood plasma, antibiotics and drugs will be destroyed or severely compromised.

Food and water will be extensively contaminated.

Transportation and communication facilities will be destroyed.

(3) The effect on adjacent countries is incalculable.

(4) Civil defense will be unable to alter the death and devastation described above to any appreciable extent.

(5) The disaster will have continuing consequences.

Food production will be profoundly altered.

Fallout will constitute a continuing problem.

Survivors with altered immunity, malnutrition, an unsanitary environment, and severe exposure problems will be subject to lethal enteric infections.

(6) Profound changes in weather caused by particulates and reduction of atmospheric ozone with attendant alterations in man, animal, and plant species may be anticipated.

(7) Among long-term survivors, a striking increase in leukemia and other malignancies will be observed, most severe in those who are children at the time of exposure.

THE ROLE OF PHYSICIANS IN THE POST-ATTACK PERIOD

Considering the known thermal, blast and radiation effects of a one megaton thermonuclear explosion over an industrial city of about four million persons, we know that from 200,000 to nearly 500,000 immediate deaths would result, with an additional 400,000 to over 600,000 injured, depending on the nature of the attack.

Instantaneous death will occur as a result of temperatures greater than in the sun itself, and from immense blast effects. Physical structures will be converted into unrecognizable rubble and social organization will disintegrate. Many injured will die as a consequence of huge fires and intense radioactive fallout. Neither doctors nor the hospitals in which they work will be spared.

In addition to the dead, there will be the injured, some walking with clothes in shreds and skin peeling in sheets from burns, some trapped in buildings or basements. Many of these will be destined to die. Many who are rescued may not survive the crush injuries, multiple fractures or hemmorhages. Others will die in days or in weeks from burns, traumatic wounds or radiation exposure.

Many of those injured by a nuclear blast would have combinations of burns, extensive lacerations and sublethal doses of neutron and gamma radiation. Grave psychological trauma affecting both physician and patient will further aggravate the already severe problems of diagnosis and treatment. These many factors complicate the outcome of therapy and would critically affect the medical decisions on who should receive care and who could only be allowed to die with such minimal supportive measures as might be available. Burn and radiation injuries, regardless of other complications, will place the greatest strain on medical personnel and facilities. From the British experience in wartime London, it is estimated that the acute treatment of only 34,000 serious burn cases would require 170,000 health professionals and 8,000 tons of supplies.

A city struck by a single one megaton bomb would find its electrical, water and

food supplies totally disrupted. The techniques of modern medical care would be seriously compromised if not entirely halted. Much of the essential supply of blood, antibiotics and other materials would be destroyed. A target nation, however, might cope partially with the consequences of having one city struck by a single nuclear bomb. The surviving doctors and other health professionals could respond, supported by help from outside the stricken city, but with severe limitations. The response would fall much below acceptable medical standards.

In peacetime the medical care system can cope successfully with a very small number of the kind of casualties which can be expected in huge numbers from the explosion of a single nuclear bomb. Successful treatments of extensive burns, of crushing injuries, of fractures and lacerations, of perforating wounds of abdomen and thorax, and of sublethal to near-lethal doses of radiation all require the full availability of modern medical technology and the finely developed skills of medical and other support personnel. The medical capacity of any nation would be severely strained, if not for a period overwhelmed, by dealing with the victims of even a single nuclear bomb.

Nuclear war, however, is very likely to involve more than the appalling destruction from a single nuclear bomb, or even a few bombs. With more than 50,000 nuclear weapons in existing stockpiles we must face the prospect of the explosion of hundreds and perhaps thousands of bombs, many possessing hundreds of times the explosive power of those that destroyed Hiroshima and Nagasaki. As tens or hundreds of cities are simultaneously attacked death and casualties escalate geometrically. The fabric of society would disintegrate and the medical care system, deprived of the facilities developed over the years, would revert to the level of earlier centuries. The surviving walking wounded, physician and layman alike, could only provide what mutual comfort the remnants of their individual humanity would permit. The earth will be seared, the skies heavy with lethal concentrations of radioactive particles, and no response to medical needs can be expected from medicine.

THE SOCIAL, ECONOMIC, AND PSYCHOLOGICAL COSTS OF THE NUCLEAR ARMS RACE AS RELATED TO HEALTH NEEDS

Preface

The health of mankind is inseparably connected with social, economic, and psychological strenghts. The greatest risk of the arms race to health is that it increases the likelihood of nuclear war. Even without such a war, precious human, social, medical, and economic resources are presently diverted unproductively to the nuclear arms race, and this diversion adversely affects health.

Social costs

Any social undertaking of the magnitude of the arms buildup is bound to affect social structure and social values, regardless of the bases on which that society is built. In particular, activities develop which generate further pressure for more arms and thus establish a dangerous cycle. Moreover, as the scale of effort increases relative to the size of the social institutions and strength of values around it, these become subverted and re-oriented to reflect the same unproductive and impoverishing priorities and values inherent in the building of arms.

Economic costs

Consideration of economic issues ranges beyond the special expertise of physicians. However, we believe that they cannot be completely ignored. The diversion of a major portion of the world's economic resources for armaments increases the likelihood of nuclear war that would result in death and disability for much of the world's population. This is the ultimate health cost of the arms race, and would devastate economic and social organization. The arms build-up weakens the application of existing knowledge, technology, and resources to the prevention and treatment of health problems that currently affect large numbers of the world's population. The arms race increasingly burdens much of the world's population who live in less developed countries. These countries can least afford to use their scarce resources for arms and will suffer grave health and social consequences in doing so. Of greatest importance is that use of economic resources for armaments diminishes development of knowledge, technology, and manpower that could address global ecological and overpopulation problems. The strains these problems place on the world's limited resources will result, if not resolved, in dire health consequences, and in themselves increase the likelihood of a nuclear war.

PSYCHOLOGICAL COSTS AND EFFECTS

As physicians we can speak about human psychological responses with confidence based on our professional knowledge and experience. Nuclear arms have created a new reality for humanity with profound and widespread psychological effects. The consequences of the use of nuclear weapons defy human comprehension because of the enormity of their destructiveness. This danger grows steadily more acute as nuclear weapons production continues. Studies indicate among other effects, that living in this threatening context is undermining confidence in the possibility of a meaningful personal future. Further studies are needed of the psychological impact of the nuclear arms race upon various groups both in societies which possess nuclear weapons as well as in those that do not.

Living with the possibility of imminent annihilation in a massive nuclear exchange creates an unprecedented threat to individual human beings. Not only does one have to deal with the possibility of one's own agony or sudden death, but one must also confront the potential destruction of all that one loves—humanity itself—forever.

We have identified several psychological mechanisms which can have short term adaptive value for the individual in protecting himself from such disturbing emotions as terror and guilt. At the same time these defense mechanisms increase the likelihood that nuclear war will actually occur by impairing realistic perspectives of those who possess nuclear arms. This prevents the development and use of measures that could take control of the arms race.

(1) Avoidance. The problem is regarded as too big to handle, too overwhelming, too technical. We leave it to others, to the leaders and the experts, to solve. We become numbed and turn away.

(2) Drawing upon old ways of thinking. In the face of the terror evoked by an adversary we seek security as humanity has traditionally done through developing ever more dangerous weapons in increasing numbers, and from spurious notions of strength dominated by false concepts of winning and losing. Such thought patterns have become outmoded by the realities of nuclear weapons.

(3) Fear and impulsivity. The climate of terror created by the super power confrontation engenders a vicious cycle of fear and mistrust. Fear destroys the capacity for rational thinking and adaptive discrimination and promotes panic-driven, impulsive actions. Such actions provoke fear and similar panic responses in adversaries that further escalate the danger of conflict.

(4) Perceptual distortion. As a response to threat, regression to archaic thinking patterns occurs that divides the world into percepts of total goodness and total evil. An adversary comes to be perceived as an enemy that is completely evil, a process which impedes the discovery of areas of common purpose, and reduces the ability to deal realistically with actual threat or danger from this or other sources.

(5) Dehumanization. In order further to justify our hostility toward the adversary we deny to its leaders and people any human value or worthy motives. The distorted perception of human beings as inanimate objects tends to remove inhibitions against destroying them. The impersonality of graphs and pins on targets, or charts of megatonnage and throw weights (in fact the whole obscene jargon of the nuclear weapons race), destroys not only the appreciation of the humanity of an adversary, but one's own humanity as well.

Concluding remarks

War is not an inevitable consequence of human nature. War is a result of interacting social, economic and political factors; it has been a social institution widely used over time to manage conflicts.

To argue that wars have always existed and that this social phenomenon cannot be eliminated ignores history, which has demonstrated a human capacity to change institutions and practices which are no longer useful or are socially destructive. Slavery, cannibalism, dueling, and human sacrifice are among the practices which the human race has recognized to be improper and has abandoned.

The genocidal nature of nuclear weapons has rendered nuclear war obsolete as a viable means for resolving conflict. Because inter-group tensions and conflicts are innate and thus inevitable, effective means for conducting and resolving conflict are indispensable. Human beings have developed and widely used such methods as avoidance/withdrawal, assertive non-violent behavior, unilateral initiative inviting reciprocation, competitive coexistence, negotiation, arbitration, and cooperation.

Rationality and foresight are unique human characteristics which have enabled individuals and groups to override primitive responses, to anticipate future consequences of behavior and, to choose courses of action which offer maximal ultimate benefit.

Wars begin in the mind, but the mind is also capable of preventing war.●

PUERTO RICO/BUDGET CUTS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. GARCIA. Mr. Speaker, the Commonwealth of Puerto Rico is an island and a people inextricably linked

in partnership with the United States. Bound together by history to the U.S. mainland since 1898, Puerto Rico and Puerto Ricans are deeply affected, as all of us are, by the present situation in this country. In short, what affects the mainland United States deeply affects Puerto Rico.

The present situation of severe budgetary cutbacks in Federal programs, admirable as some think it is, has caused severe apprehension in Puerto Rico. The food stamp program is a good case in point.

As of March 1981, the U.S. Department of Agriculture (USDA) estimates indicate that a total of 1,777,041 individuals were receiving food stamp benefits in Puerto Rico, or more than half the population—other estimates have placed that figure at over 70 percent of the population of Puerto Rico. At present, there are more than 22 million Americans participating in this program, and the vast majority of these citizens look to this nutritional program as a means to an adequate nutritional diet. Puerto Rico is no exception to the national norm.

The food stamp program is important to Puerto Rico for several reasons: First, there are a great many families in Puerto Rico living well below the poverty level. In fact, over 92 percent of the participating households in the food stamp program in Puerto Rico had gross monthly incomes of less than $600 per month. Of those households, 77 percent had gross monthly incomes of less than $400 per month. Only 1 percent of participating households had gross incomes in excess of $800 per month and not one participating household had a gross income above $1,000 per month. Second, high food costs and high costs of living in Puerto Rico present the average Puerto Rican family with an especially severe burden. Puerto Rico, as most of you are aware, imports most of its food from the U.S. mainland. The cost of food in Puerto Rico, consequently, is approximately 20 percent higher than in the U.S. mainland. Third, Puerto Rico receives discriminatory treatment in some Federal cash assistance welfare programs and is totally excluded from others. This creates greater demands for food stamps in Puerto Rico than in U.S. mainland areas where those programs apply in full. For example, in Puerto Rico, the blind, elderly, and disabled do not received supplementary security income (SSI) and aid to families with dependent children (AFDC) benefits are restricted by a $72 million ceiling on total spending. SSI benefits and other welfare payments count as income for the purposes of the food stamp program and Puerto Ricans do not receive these benefits. If SSI benefits were extended to the island, payments of approximately $400 million under that program would substantially reduce food stamp expenditures. The average welfare grant in the U.S. mainland is $225.12 per month, while in Puerto Rico, the average grant is an estimated $47.31 per month, for four-person households—a disparity that is obvious. Fourth, the rate of fraud and abuse in Puerto Rico's food stamp program is below the national average. There is 11.3 percent error in Puerto Rico compared to 12.8 percent nationally and 12 percent less fraud and abuse in Puerto Rico than in the program as a whole.

At present, the food stamp program is of vital importance to millions of Americans, the elderly and disabled, poor children, the unemployed, and working families who earn low wages. Puerto Rico is no exception, and is not unique, or separate, from the mainland when it comes to administering a program that had, as its original purpose, the dual task of easing the blight of hunger and malnutrition, and the concomitant but no less important function of helping American food producers, wholesalers and retailers to ease the abundant stock of food products. In short, more than any other single Federal assistance program benefiting individuals, the food stamp program links Puerto Ricans to the United States.

Elimination of Federal benefits to Puerto Rico, especially the federally funded food stamp program, can potentially set off a major exodus of Puerto Ricans to the U.S. mainland. Estimates of this exodus run between a conservative 50,000 and a potential quarter million. With nearly 70 percent of the island receiving food stamps, and other forms of Federal assistance, the potential for severe economic, political, and demographic dislocation are great.

What are the many implications for the South Bronx and Puerto Rico? Obviously, the removal of Federal assistance would be a severe blow to the economic development of Puerto Rico—a blow many economists believe Puerto Rico could not easily weather.

The scenario for the South Bronx does not appear any better, in fact, the immediate and long-term ramifications for the South Bronx, and New York City, are very poor. Already economically impoverished and heavily dependent upon Federal, State, and local assistance, it is extremely unlikely the South Bronx could withstand a major population increase along the lines presently envisioned. If the scenario of a major Puerto Rican migration holds true, following on the heels of the Reagan administration proposed cuts to the Commonwealth, we can anticipate a number of extremely negative responses:

First, the arrival of large numbers of Hispanics in the New York City area will potentially exacerbate existing interracial tensions, between not only Hispanics and non-Hispanics, but between Hispanics and other minorities equally sensitive to changes in federally funded assistance programs. In a period of diminishing resources, budgetary constraints, and fiscal and political conservatism, minority groups must compete for continually shrinking Federal dollars. Competition between minority groups for scarce funds is not only divisive and counterproductive, it is destructive to the very unity that makes minority political action an important economic and political device on the national level. Second, the employment situation in the South Bronx is such that large numbers of Puerto Ricans coming into the South Bronx will inevitably face a frustrating and embittering reality—massive unemployment. Unfortunately, unemployment is just the beginning of a potentially spiraling experience ending in increased unemployment, street crime, drug addiction, and a general worsening of the community as a whole. The fact is, forced migration—which the Reagan budget cuts will lead to—when combined with low job opportunities, tends to result in a general disintegration of the entire social and economic environment.

Taken together, the potential for disaster is great. Each factor tends to feed into another set of possible results, each worse than the last, and each equally difficult to avoid if the present administration continues to insist upon sacrificing the poor and disadvantaged in an effort to convey the illusion of fiscal and budgetary conservatism.●

ENFORCING THE LAWS WE HAVE

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. WHITEHURST. Mr. Speaker, Monday's dreadful events have again raised the issue of gun control, and citizens of good will are earnestly seeking a solution to the growing problem of firearm violence.

In the Wednesday, April 1, 1981, edition of the Washington Post, James Q. Wilson, Shattuck professor of government, and Mark H. Moore, Guggenheim professor of criminal justice policy and management, at Harvard University, had an excellent column outlining ways of dealing with the issue. I found their views thoughtful, moderate, and very much worth considering, and I am pleased to share them with my colleagues at this point in the RECORD.

ENFORCING THE LAWS WE HAVE

(By James Q. Wilson and Mark H. Moore)

Every publicized shooting revives the debate about gun control without bringing the debaters closer together. The deaths of Dr. Michael Halberstam and John Lennon, and the attempted assassination of President Reagan, like the death of Robert F. Kennedy and the assault on George Wallace, stir emotions and but produce no consensus. When people think an issue important but can make no progress toward resolving it, it is probably time to rethink the way in which they define it.

Essentially three views are in contention. One is to do nothing: Guns do not kill, people kill. A second is that a handgun exists only to kill and its production and possession should be tightly restricted. A third is that certain kinds of violent encounters are more likely to have lethal consequences if guns happen to be readily available and that society ought to devise ways of reducing that availability among people likely to be involved in those encounters.

The first view is correct but misleading. People pull triggers. And some triggers are pulled by people so determined that the gun is merely a tool. But many crimes are committed by persons without clear or strong intentions—persons who are enraged, drunk or looking for trouble. In such cases, people let the means at hand determine what kind of force they will employ and against whom.

The second view is wrong, unfeasible and impolitic. There are handguns in at least one-fifth of all American households. The vast majority of these weapons are never used to threaten or injure anyone. Banning the production of new handguns might prevent that stock from increasing. Buying back existing guns might reduce that stock slightly, but it would be enormously expensive and, without production controls, futile. Larger reductions would require confiscation. And even if all these policies were adopted, and even if the reductions in ownership were great (say, by 50 percent), the remaining guns would easily support current rates of robberies at gunpoint for a decade.

But none of these policies is likely to be adopted, and for reasons having nothing to do with the presumed power of the National Rifle Association. The average legislator simply cannot afford to come before his or her constitutents with the following proposal: "Your government, having failed to protect you against crime, now proposes to strip from you what you regard as an effective means of self-defense as well as an enjoyable hobby." Never mind whether the belief about self-defense is true; gun ownership, from the First Lady to the average citizen, is testimony to the unshakeable power of that belief.

The third view is one that we wish policymakers to take more seriously than they have. We should recognize that people have a right to own guns but do not have the right to use them criminally. Moreover, we think that people who are found in possession of guns while committing a crime or participating in a violent dispute should lose both the gun and their freedom. Finally, we think that the police should be more active in intercepting the traffic in contraband guns and apprehending people carrying unlicensed guns in public places and that judges should deal with them more severely.

Federal and state laws now make it unlawful for convicted felons, ex-addicts, and mental defectives to possess a handgun. Moreover, in many states and most big cities, it is illegal to carry a concealed handgun except for a small number of people with police permits. The laws governing possession might usefully be tightened even further—for example, by denying handguns to people convicted of violent misdemeanors (such as assault) or of chronic public drunkenness. The real problem, however, is to motivate the criminal justice system to take these or better laws seriously.

To see what this involves, it is first necessary to understand the different situations in which a weapon affects the outcome of a violent encounter. The first involves disputes—family quarrels, barroom fights, street corner brawls amongs "friends." The traditional police response to such disputes is to pacify the opponents, perhaps separate them for the night and occasionally make an arrest if the assault seems to be serious, the officer's authority is challenged or the "victim" clearly intends to press charges. (Who is the "victim" and who is the assailant in these disputes is often hard to decide. The victim may simply be the person who lost the fight.)

There is strong evidence that the presence of a gun in these situations raises dramatically the chance of a lethal outcome and that people who regularly engage in such disputes are much more likely than others of similar incomes and circumstances to be responsible for, or the victim of, a homicide. Yet there is equally strong evidence that communal disputes are not taken seriously by the criminal justice system. Either no arrest is made or the charges are dropped or the sentence is trivial. This is understandable, given the constraints: If only a simple assault (a misdemeanor) has occurred, the police cannot lawfully make an arrest without a signed complaint. And even if a complaint is forthcoming, the victim is likely to change her (sometimes his) mind the next day. Without an arrest, a search for a seizure of weapons is difficult, if not impossible.

We suggest that state law and police practice be amended so as to take violent disputes more seriously. Following the lead of Minnesota and other states, the police should be empowered to make arrests in these cases if they have probable cause to believe an assault has occurred, even if the assault is not felonious. Following the policy of the New York Police Department, officers should be encouraged to make arrests both to protect the victim and to deter, if possible, future assaults. And incident to these arrests, valid searches should be made for guns improperly in the possession of the disputants. Both the assault and the illegal possession of a weapon in these circumstances should be dealt with more sternly than now is the custom with judges who tend not to regard such matters as "real crime." That attitude may encourage a real crime later because a predisposition to violence is unchecked by sanctions. These sanctions may involve jail or they may involve posting peace bonds, intensive probation or the like. The key is a clear penalty and the removal of the gun.

The second situation is the stranger-to-stranger violent crime—muggings and robberies. The guns used by such criminals are often already possessed in violation of the law. For them, the problem is not tightening the laws involving carrying a weapon, but blocking the access these people have to supplies of guns and increasing the risks from carrying weapons. Moore's research indicates that the largest sources of supply of handguns to people who use them for stranger-to-stranger crimes are thefts and the black market. In short, armed robbers usually violate gun laws in two ways: They have stolen their handgun, or bought it from somebody who did, and they are carrying it without a permit.

To reduce the black-market traffic in guns, the police should consider mounting more undercover "buy and bust" operations (much as they now do with respect to heroin and dangerous drugs) in order to make illegal gun dealers wary of dealing with strangers, to raise the price and difficulty of acquiring illegal guns (perhaps beyond the point that opportunistic, teenage robbers will find it worthwhile) and to deter some people from going into the illegal gun business at all.

To inhibit the carrying of handguns, the police should become more aggressive in stopping suspicious people and, where they have reasonable grounds for their suspicions, frisking (i.e., patting down) those stopped to obtain guns. Hand-held magnet meters, of the sort used by airport security guards, might make the street frisks easier and less intrusive. All this can be done without changing the law.

The success of undercover buys and aggressive patrolling depends partly on the extent to which judges will seriously penalize the unauthorized carrying of concealed weapons. Though judges often give more severe sentences to people who commit a crime using a gun, the available data suggest that a person convicted of illegally carrying or possessing a handgun is generally treated leniently. This is a serious mistake: A person in a public place with a gun and without a permit is often a person looking for trouble.

The Bartley-Fox law in Massachusetts requires a mandatory one-year jail sentence for any unlicensed person who carries a firearm. It was opposed by those who said the law would not be enforced and by those who said it would not have the desired effect. Both criticisms appear to have been wrong—the criminal justice system did not engage in wholesale evasions of the requirements of the law, and three studies that have been done of its effect all point to some decline in the proportion of the assaults that were committed with firearms. Assaults as a whole increased; firearm assaults decreased. The effect of Bartley-Fox might have been even greater if the police had been more aggressive in enforcing it (or less if it had not been so heavily publicized).

Note what we are suggesting: not "gun control" in any comprehensive sense, but rather increased pressure on the particular circumstances and people whose illegal behavior is most likely to be affected by the availability of a gun. Note also that to do these things requires action chiefly by state and local, not federal, agencies. Bear in mind that motivating police and prosecutors to act in these ways is not easy. And note finally that real progress in reducing gun violence almost certainly requires methods—aggressive patrolling, undercover operations, tougher sentences—that liberals instinctively dislike. We think, however, there is no way around these tough choices, and it is time we face up to them●

AMERICANS NEED MORE THAN NICKEL AND DIME TAX CUTS

HON. GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. SOLOMON. Mr. Speaker, today I had the privilege of testifying before the House Ways and Means Committee during its deliberation on the President's tax proposals. I would like to share my remarks with all my colleagues.

The testimony follows:

STATEMENT OF REPRESENTATIVE JERRY SOLOMON ON PRESIDENT REAGAN'S TAX PROPOSALS

Mr. Chairman, members of the Committee, I would like to thank you for this opportunity to share with you a few brief thoughts on the tax proposals under consideration; in particular, the proposal to reduce marginal income tax rates by 30 percent over three years.

Very simply, I come before you today to state my opposition to the $93 billion dollar tax increase which is being debated before this committee.

Now, in case anyone thinks I have walked into the wrong committee room, let me explain. The real issue before us is whether this Congress is going to allow the American people to be socked with the largest tax increase in our peacetime history this year—and even greater increases in the years ahead.

I see the lines of this debate drawn this way: if you are opposed to the massive tax increases which will go into effect between now and 1984, and you want to slow those increases, you will support the administration's tax proposals. On the other hand, I think the American people will realize that those members of Congress who oppose the across-the-board tax relief the President has proposed must support those tax increases and business-as-usual.

I know it has been pointed out before, but judging from the many inaccurate statements I have heard regarding the proposal to cut marginal income tax rates for every American by about 30 percent over three years, I think it is necessary to point out again: this proposal will not mean that the federal government will take in less in taxes. The proposal will do nothing more than to lower the amount of the increase which is already scheduled to take effect under the present tax system.

Let me be more specific: if we leave everything the same, the federal government will collect $609 billion this year, but by 1984, it will collect $917 billion. That's what will happen if this committee and this Congress do not act. But here is what will happen if we do act according to the President's wishes: by 1984 the federal government will still be taking much more in taxes than it does this year—$772 billion in 1984 as opposed to this year's $609 billion. That's still an extra $163 billion coming into federal coffers—and I'm sure the Congress will find a way to spend it.

So we are not here debating whether or not to give the American people a tax cut. The issue is whether we are for or against the tax increases which will take effect if we do not act.

I don't point this out gladly. I wish we were talking about an actual reduction in the amount of money that government takes from the productive private sector. I look forward to the day when we have controlled federal spending and unshackled our economy's productive potential to the point where we can actually cut taxes and still provide for our nation's neediest citizens. But it is a measure of just how out of control the spending and taxing policies of this Congress are that even with a 30 percent rate cut, we are still talking only about reducing the increase in government revenues—not an actual cut.

Now, we've heard some eloquent arguments against the President's tax proposal, which is to say, arguments for a tax increase. Some of the most vocal proponents of more government spending and higher taxes have been heard from by this committee.

We are told that the President's plan would be inflationary; that it would benefit the rich at the expense of the poor; that Americans would spend their extra take-home pay instead of saving it; and that even greater budget deficits would result.

Maybe it's about time someone informed those who are making those charges what has been happening to our economy as taxes have been going up. Since 1976, the tax burden on the average American family has increased by $1,200 dollars, and during that same period, inflation has increased more than 30 percent; Congress has added $244 billion dollars worth of budget deficits to the national debt; and Americans are saving less of their income than ever before in our history.

In other words, every evil predicted to come to pass as a result of reducing tax rates has, in fact, come hand-in-hand with some of the biggest tax increases ever levied on the American people—but not as big as the ones about to be levied on the American people if we don't act.

Those increases have brought us no closer to a balanced budget, greater savings or lower inflation. They have taken us further away. So do we prescribe more of the same, or adopt a different course?

The American people have expressed their desire for the latter. And frankly, I don't think they will have much patience for the stale worn-out demagoguery which attempts to set off one group of Americans from another.

The President's proposal for tax rate reduction is simple, straight-forward and across-the-board. And that's precisely why it is now meeting with resistance in this Congress. Long term, across-the-board tax reform undercuts one of Congress' favorite pastimes: taxing the American people to the point of bankruptcy and then throwing nickels, and dimes back to them in the form of special interest tax cuts, credits and reductions.

Every member of Congress in this room knows exactly what I am talking about. In fact, I did a little figuring this morning and it turns out that no fewer than 225 bills have been introduced since Congress convened in January to provide a particular tax deduction, credit or cut to one segment of the population or another. I have proposed a few and I am sure that each member of the Committee has too. We propose them in good faith, sincerely believing that the tax relief is warranted. But to those who are attacking the President's fair, straightforward proposal as inflationary or too much of a drain on the Treasury, I ask you—can you honestly say that the sum total of all the special interest tax cuts you have endorsed adds up to less of a revenue loss than the President's plan?

It is about time that Congress realize that our constituency is the American people—all the people. And that instead of catering to each special interest group with special interest tax legislation we can best serve all the people by enacting this across-the-board tax rate cut, so that it becomes more profitable for every single working American to go the extra mile to earn that extra dollar.

I know that it has also been suggested that perhaps Congress should enact a one year tax cut and wait and see what conditions are before adopting the second phase of the President's plan. And it has also been suggested, with a great deal of validity, that many members of Congress would rather hold off a vote on subsequent phases of the tax relief package so that those votes can take place closer to the next election.

But ladies and gentlemen, that's business-as-usual, and not only is it not working, but the American people aren't buying it anymore.

We know right now that tax rates will still be too high next year, even after the first phase of the reduction has gone into effect. Isn't it about time this country has a steady, long-range plan which doesn't shift from month-to-month according to the whims of politicians?

Mr. Chairman, members of the committee, on behalf of what I am convinced is a majority of Americans, I ask you to give President Reagan's tax plan a chance—much needed depreciation reform for business and an orderly phased-in reduction of tax rates. Don't allow these massive tax increases to go through. Vote against those increases by voting for the President's plan.●

VIOLENCE IN EL SALVADOR: WHO IS RESPONSIBLE?

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. STUDDS. Mr. Speaker, 80 Members of the House are currently cosponsoring H.R. 1509, a bill to terminate U.S. military assistance to El Salvador. Today, I and several of my colleagues will address one of the major issues involved in the current controversy over El Salvador, the question of violence.

WHO IS THE PRIMARY SOURCE OF VIOLENCE AND TERRORISM IN EL SALVADOR

Current U.S. strategy in El Salvador appears to rest on the assumption that we will be able to successfully mobilize world opinion in opposition to Soviet and Cuban support for the opposition forces in that country, on the grounds that their aid is being used to subvert a sitting government.

The implicit corollary to this strategy is the assumption that equally damaging criticisms cannot be made against the United States for supplying weapons to the Salvadoran military.

Both sides in El Salvador have committed acts of violence which cannot be justified by any standard of human

decency. But I believe very strongly, on the basis of eyewitness accounts provided by refugees, and after consultations with others genuinely familiar with the recent history of El Salvador, that by far the greatest responsibility for violence and terrorism rests with those forces now receiving U.S. guns, helicopters, grenades, and ammunition. There is absolutely no reason to believe that supplying these forces with more weapons will lead to anything other than an escalation of the violence, the further polarization of both Salvadoran and Central American politics, and the radicalization of thousands more within El Salvador.

The violence in El Salvador is one of many factors reminiscent of Vietnam. The rebels are often hard to find for they are peasants, children, women, teenagers. They look, sound and act the same as noncombatants. They blend into villages, and they do not ever seem to go away.

The strategy of the military was summarized by one commander as follows:

> The subversives like to say that they are the fish and the people are the ocean. What we have done in the north is to dry up the ocean so we can catch the fish easily.

The Salvadoran method of "drying up the ocean" is to eliminate entire villages from the map, to isolate the guerrillas and deny them any rural base off which they can feed. This requires a premeditated campaign of terrorism, the burning of homes and crops, making it impossible for people to live.

This violence has produced a steady stream of refugees across the border into neighboring Honduras, and to other countries throughout the hemisphere. The Salvadoran Church now estimates the total number of refugees both within and outside the country at more than 200,000 or almost 5 percent of the total population of El Salvador. These refugees have described in vivid detail the murder and torture of their friends and relatives, the dewombing of pregnant women, the machinegunning of children, the rape of little girls. These are acts committed repeatedly and intentionally by the security forces now receiving U.S. aid. Consider, as well, the following incidents:

It was little more than a year ago that Archbishop Romero, the single most charismatic and beloved figure in El Salvador, was murdered while presiding over a Mass in San Salvador. His killer has not been found, but the evidence indicates he was shot by a professional sharpshooter. It is worth remembering that he died shortly after protesting publicly the granting even of nonlethal military aid to the Government of El Salvador.

In late November, 6 leading members of opposition organizations were kidnaped at a political rally by 200 uniformed members of the security forces. Their bodies were discovered the next day.

On December 3, four U.S. religious workers were raped and murdered while returning from the San Salvador airport. Even the State Department will admit that these individuals were probably killed by security forces. There is excellent reason to believe that the subsequent investigation into these deaths has been obstructed by officials in the Government of El Salvador.

On January 3, gunmen walked into a hotel restaurant in San Salvador and murdered the leader of the Salvadoran agrarian reform institute, ISTA, along with two American agricultural reform technicians. Few people I have talked to, whether Salvadoran or American, revolutionary or State Department official, has expressed any doubt that these murders were committed by or on behalf of the military.

Last June, Amnesty International wrote in a letter to Secretary of State Muskie:

> Since the January 3, 1980, resignation of much of the Salvadoran Government—on human rights grounds—at least 2,000 Salvadorans have been killed or "disappeared" while in the hands of conventional and auxiliary security forces of El Salvador. Many were tortured and savagely mutilated—arms lopped off, flayed, beheaded.

In December, Salvadoran Archbishop Rivera Damas departed from his own past policy of restraint and silence to describe in detail the campaign of persecution being waged against the church. He concluded by saying:

> Therefore we hold the Security Forces and ultra-rightist groups responsible for the persecution against the Church and specifically for the assassination of priests and lay pastoral workers. We therefore also hold responsible the Government Junta, which given its ultimate authority over the Armed Forces is responsible for actions by members of the military. We lament the fact that past Governments and the present Government Junta itself have not fulfilled their promise to clarify the criminal assassinations of Msgr. Romero, Priests, Sisters and Lay Pastoral Workers.
>
> Therefore, their statements lose credibility. We can no longer accept the customary excuses, after the fact; nor can we accept promises of investigations.
>
> Only an immediate and effective end to the repression and persecution could demonstrate the clear will to stop such acts; only this could exonerate the Junta, at least to some degree, from its responsibility. And only an immediate end to the repression and persecution would give credibility to the repeated offers of dialogue for bringing peace to the country. In any other case, all possibilities for finding a true peace in the country through non-violent means will be strangled.

With the army and the national guard as our allies, any U.S. campaign for the hearts and minds of the Salvadoran people will never succeed—for every martyred innocent is sure to engender the transformation of others into supporters of the revolution and create new and unneeded enemies for the United States.●

EL SALVADOR

HON. MIKE LOWRY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. LOWRY of Washington. Mr. Speaker, I join with my colleagues in calling for the end to violence in El Salvador. Only an end to violence will set the stage for a peaceful settlement.

There are underlying historical reasons for the problems in El Salvador. President Jose Napolean Duarte was quoted in the February 22, 1981, New York Times magazine as saying:

> This is a history of people starving to death, living in misery. For 50 years, the same people had all the power, all the money, all the opportunity. Those who did not have anything tried to take away from those who had everything. But there were no democratic systems available to them, so they radicalized themselves, have resorted to violence. And of course this second group, the rich, do not want to give up anything, so they are fighting.

This capsulizes briefly and simply the roots of the present Salvadoran discontent. It does not, however, address the critical issue of the Salvadoran Government's role in the conflict and in the noted lack of democracy in El Salvador. It also does not address how military aid from the United States helps to solve the problems.

The government has been struggling with reform—land reform, banking reform. Violence threatens the foundation of reform and I am concerned that the economic evolution and progress will be short lived, indeed, reversed, unless they are accompanied by political evolution. Political evolution is impossible when violence is rampant throughout the land.

The definition of the problems of El Salvador is crucial to embarking on the proper path toward amelioration. The role of the government is an important aspect in defining the mechanism to start the healing process.

I would like to augment my statement by including a statement received by my office on March 3, 1981 from the Network organization:

> Network calls for a redefinition of the U.S. role in El Salvador; for the promotion of a political, negotiated settlement of the conflict there; and for an end to violence by the U.S.-supported Duarte government.
>
> In projecting an East/West interpretation of the Salvadoran situation and making El Salvador a test of United States-Soviet power, the United States creates a conflict that is not inherent in the situation itself. The revolution in El Salvador has its causes in long-standing injustices.
>
> As El Salvador moved into the industrial age, the production of export crops led to

the displacement and impoverishment of many people. In contrast to the poor majority, a few Salvadorans became wealthy and powerful. U.S. corporations and their Salvadoran partners benefitted from tax breaks, such as tax-free zones. Discontent was countered by an increasingly strong and brutal security force, and both "left" and "right" wing groups resorted to violence in promoting their agendas.

Today most popular and church groups find themselves aligned against a government that does not protect their lives and freedoms. Given this history, it is clear that no outside factors were needed to spur rebellion. Sustaining a government that has virtually no popular support and that does not control the killing of its own people is a reversal of the traditional role of the United States as a protector of personal freedoms. Nor does overlooking the murder of U.S. citizens enhance our status as a world power.

U.S. military intervention can force the opposition to defend themselves by seeking assistance wherever possible, even from governments which they might rather avoid were the situation not so desperate.

In international relations, governments which intervene in the affairs of others tend to lose status and become isolated by the world community. The Soviets experienced this when, on February 13, 92 members of the nonaligned nations called for the removal of foreign troops from Afghanistan and Cambodia, and for an observance of the norm of noninterference and nonintervention. A U.N. resolution (December 15, 1980) for cessation of military assistance to El Salvador was approved with only such governments as Argentina, Guatamala and the Philippines—themselves vulnerable to revolution because of human rights violations and economic injustices—voting against condemnation of intervention. Mexico and Canada both voted for the resolution.

U.S. intervention without regard for human rights runs counter to the religious and moral traditions of our nation and of the Catholic Church. Pope John Paul II warned in Manila (February 17): "* * * one can never justify any violation of the fundamental dignity of the human person or of the basic rights that safeguard this dignity." He went on to say: "Any apparent conflict between the exigencies of security and the citizens' basic rights must be resolved according to the fundamental principle—upheld always by the church—that social organization exists only for the service of man (sic) and for the protection of his (sic) dignity, and that it cannot claim to serve the common good when human rights are not safeguarded." (The New York Times, February 18).

A political solution seems the best hope for El Salvador. A prolongation of the indecisive and already extremely bloody conflict can only lead to virtual genocide. With sufficient U.S. aid, a military victory may be possible for the Duarte government, but its inability or unwillingness to curb the atrocities of its own forces makes that prospect repugnant. Such a victory would also be accompanied by all the other negative effects of intervention already outlined.

Network supports a less violent, negotiated solution, realizing that to be successful such a solution must include participation by all the factions in the revolution. Network believes this is more possible if the conflict is not escalated by the infusion of further U.S. military aid, and if the negotiations can be facilitated by a relatively neutral government or governments. Network calls upon the Reagan Administration to take immediate action toward de-escalation of the conflict and toward a political settlement. In the meantime, Network insists that the Administration hold the Duarte government responsible for protecting the lives and rights of Salvadoran citizens and of noncitizens living in El Salvador.●

WILLIAM ALLEN HIGH SCHOOL GIRLS' STATE BASKETBALL CHAMPIONS

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. RITTER. Mr. Speaker, today I would like to recognize a group of outstanding young athletes whose accomplishments have recently brought a great deal of pride and distinction to themselves, their school, and the entire Lehigh Valley of Pennsylvania. Capping a brilliant season with a thrilling come-from-behind win in the title game, the members of the William Allen High girls' basketball team have become the new class AAA champions of the Pennsylvania Interscholastic Athletic Association.

There is more to Allen's win than just athletic accomplishment. When the 1980-81 season began, even the most loyal fan would have found it difficult to predict a State championship for this team. Often facing teams believed by many to be more skilled or more experienced, Allen was able to win games through hard work and a spirit that never quit. They developed what sportswriters call "That Something Extra." They developed character.

After the final game, head coach Lou Sabler remarked, "it's not necessarily winning the State championship that makes coaching worthwhile, it's watching the way these girls grew."

It is that kind of growth, that kind of character that will stay with the team members long after their last basketball game had ended. And it is that character, along with their championship season, that gives the team so much of which to be proud.

I join classmates, teachers, parents, and fans throughout the Lehigh Valley in extending my sincere congratulations to the State champions—the William Allen High girls' basketball team; a championship team composed of champion individuals.●

STUDENTS CONCERNED ABOUT EL SALVADOR

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. FOGLIETTA. Mr. Speaker, I have received about 50 letters from eighth grade students at the Stella Maris School in my congressional district, on the subject of military aid to El Salvador. The teacher, Sister Jeanne Barnard, is to be commended for sensitizing her students to current events, for ably conveying information on a troubling situation, and for teaching the youngsters to effectively communicate with their elected Representatives.

I think my colleagues may be interested in what the students are saying, and I therefore submit the attached letters as good examples of their message:

DEAR REP. THOMAS FOGLIETTA: I am in eight (sic) grade and I am writing to you about El Salvador.

There are many problems going on in El Salvador, but not to (sic) much is being done. The United States is still sending economic and military aid to the Salvadoran government. This is causing many different problems. The military advisors will not buy nor promote peace but will only increase the bloodshed which has already taken over 12,000 victims.

My opinion to this is that Bill H.R. 1509 be signed. I disagree with the taking of so many lives.

If the United States decides to stop sending military aid to El Salvador there might be more peace in the world.

To save lives please stop sending military aid to El Salvador.

Sincerely yours,

AUDREY GENTILE.

P.S. Please support H.R. 1509.

PHILADELPHIA, PA.,
March 9, 1981.

DEAR MR. FOGLIETTA: I am writing in regard to the situation in El Salvador. It is very sad to learn that the U.S. is giving military aid to the Junta. The guerrilla's are killing many innocent people, some of whom are from our own country. The government must be aware of this, but still will not do anything to help the people.

If we did not fight against the government of England, we would still be under Her rule. The point I am trying to make is that the El Salvadoran citizens are trying to break away from a repressive government in which the people have no say. The U.S. should respect this and help the people by signing H.R. bill 1509.

Thank you,

DAWN MARIA DENT.

PHILADELPHIA, PA.,
March 10, 1981.

DEAR REP. THOMAS FOGLIETTA: My name is Joseph Messina and I am a student of Stella Maris. I am very concerned with the situation in El Salvador. However, I do not feel that military assistance should be supplied to that country. The American people do not want another Vietnam.

United States intervention is a serious mistake. We should be trying to promote peace not increase bloodshed, which has already taken 12,000 victims.

As our representative, I beg you to be our voice in the House of Representatives. In the name of justice and humanity, please take action to stop all military aid to El Salvador.

Sincerely,

JOSEPH MESSINA.

BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. McGRATH. Mr. Speaker, this past Sunday, March 29, Byelorussian-American communities of the United States commemorated the 63d anniversary of the proclamation of the Byelorussian Democratic Republic. It is appropriate that all Americans pause to reflect on the rights and freedoms which we enjoy. We must also remember that the Byelorussians and more than 1 billion others do not share these liberties.

Since the forceful establishment of the Byelorussian Soviet Socialist Republic in 1917, this captive nation has been subject to brutal oppression, suffering, and violations of basic human rights. The repressive Soviet regime is actively working to destroy the Byelorussian cultural heritage and spirit of nationality.

Byelorussia represents a geopolitically significant location as the western gate of the U.S.S.R. It is an important stronghold of Soviet expansionism. On this occasion, I entreat every Member of this body to protest the inhuman policies of the Soviet Government in Byelorussia and to support all attempts to achieve the release of Byelorussian prisoners of conscience from Soviet institutions. I encourage every possible means of diplomatic pressure in this effort. We must support the Byelorussians desire for freedom and independence in their continued struggle to escape Soviet domination.

VIOLENCE IN EL SALVADOR

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. MOFFETT. Mr. Speaker, I would like to bring to the attention of my colleagues an article by Alma Guillermoprieto on the source of violence in El Salvador as printed in the January 7, 1981 Washington Post. Contrary to the Reagan administration's contention that the guerrillas have conducted most of the killings in El Salvador, this article clearly shows that much of the violence is, in fact, being conducted by the government security forces.

The article follows:

[From the Washington Post, Jan. 7, 1981]

SALVADOR RAIDS INTO HONDURAS, REFUGEES CHARGE

(By Alma Guillermoprieto)

LA VIRTUD, HONDURAS.—Salvadoran Air Force planes, apparently seeking guerrilla enclaves, have conducted raids over the Honduran border, shooting into the hills surrounding this small frontier village where thousands of peasants have fled from fighting in El Salvador, according to the refugees.

A spokesman for the office of the United Nations High Commissioner for Refugees, which is aiding the Salvadoran peasants, confirmed the air raid reports, as well as stories of house-to-house village searches by armed men, some in civilian dress and others in Salvadoran military uniforms.

[The Honduran government, through its embassy in Washington, yesterday said that it "denies emphatically that these alleged attacks ever happened."]

Asked about the reports, a Salvadoran government spokesman said only that his government had received no official complaint from Honduras that its border had been violated.

Under terms of a cease-fire after a brief war 10 years ago between the two countries, a six-mile swath along the entire length of the approximately 250-mile border is a neutral zone under the supervision of the Organization of American States. An OAS spokesman for the peacekeeping mission said yesterday in Washington that the mission had received no recent charges of border violations from either country, nor observed any incursion.

The spokesman noted, however, that the eight-man peacekeeping force patrols the zone only by helicopter and is likely to pass over a particular zone only occasionally.

El Salvador and Honduras last month signed a treaty ending the long-dormant conflict but have requested that the OAS mission remain in place for the next six months until outstanding disagreements about several areas along the frontier are settled. After Jan. 15, however, the OAS-supervised neutral zone will shrink to only those areas still disputed by the two governments.

After the treaty was announced, spokesman for El Salvador's political and guerrilla opposition, as well as international sympathizers, have charged that it was hurriedly promulgated—with the prodding of the United States—to facilitate cooperation between the Salvadoran junta and Honduras' military government in combating leftist guerrillas operating in the border zone.

This part of Honduras lies across from a part of El Salvador—the area around the Salvadoran town of Chalatenango—where guerrilla activity and government counterinsurgency operations have been heaviest in recent weeks.

Last May, a group of church workers aiding refugees near the Salvadoran village of Las Vueltas charged that a large group of Salvadoran refugees trying to cross a river into Honduras were fired on and many killed by Salvadoran soldiers while Honduran troops on the other side watched the massacre and tried to force back refugees reaching the other side.

Although both governments denied the report, it caused a furor throughout the region, with charges of secret collaboration among the governments and the OAS.

A spokesman here with the U.N. High Commissioner, which, along with the Honduran Aid and Emergency Committee and other agencies, is caring for what they say are approximately 19,000 Salvadoran refugees in this remote corner of southwestern Honduras, declined to be quoted by name, saying that the relief workers feared added publicity about the conflict would hamper already difficult relief efforts. But the workers confirmed the air attacks and said that the most recent one had taken place Dec. 31.

On Nov. 13, the refugees said, a hundred Salvadoran armed men, some in civilian dress and others in uniform, conducted a house-to-house search at La Virtud, where 2,000 refugees live. There have been at least three such searches for "subversives," they said.

Many of the refugees have found shelter in the mud shacks of impoverished Honduran peasants. Others make do in improvised housing.

Others hide in the high Honduran mountains. One woman, found hiding in a cave, was asked, "Why are you here?"

"Because the [Salvadoran National] Guard is there," she said, pointing at the mountains of El Salvador, barely five miles away.

Like many, she said she feels safer there than in the village, at least until the air raids started.

From La Virtud, it takes at least three hours by jeep to cover the 40 miles to the nearest sizable town, San Marcos, which unlike the smaller village has electricity—for 12 hours a day.

In La Virtud a small brigade from the French volunteer agency Medicine Without Frontiers has been offering medical care to both the Honduran peasants and Salvadoran refugees.

On a recent morning in a tiny hamlet high above La Virtud, a cluster of women holding babies waited for two women doctors to dispense advice and medicine. The doctors brought two of the women, one Salvadoran, the other Honduran, back with them to the field hospital in La Virtud to treat their critically ill babies.

The refugee woman's 1-year old child, hollow eyes and bony limbs bespeaking severe malnutrition, seemed near death. All afternoon the four women, doctors and mothers, waited by the children, hoping that transfusions and shots would work a miracle.

The Salvadoran mother crouched in a corner of the improvised hospital room, speaking quietly and without apparent bitterness. "I would like to go back home, to my plot of land," she said. "But we have seen too much, too many dead. When a neighbor gave the warning that the guard was on its way, our entire village left. We brought nothing with us. The doors of our houses were left open. We stopped running when we knew we were in Honduras."

In a recent census taken by the Honduran refugee aid committee in La Virtud, 80 percent of the refugees said they are fleeing from the National Guard, and the remainder said they are running from the general violence in a country on the brink of civil war.

"And this is just the beginning," a relief worker sighed. "There are 19,000 refugees here now, and the war hasn't even begun."●

HAIG'S DOMINOES

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. LaFALCE. Mr. Speaker, one of the more debatable theories in the field of international diplomacy is the so-called domino theory. It claims that all Third World nations in a region are set up like dominoes and that the Communists have a master plan which will lead to each country falling into the Communist camp like falling dominoes.

Although proponents of this theory went into hiding as a result of the Vietnamese conflict, the theory has surfaced in a rather unusual place—the U.S. Department of State. Secretary Alexander Haig evidently believes, as demonstrated by his testimony before the Senate Foreign Relations Committee, that the countries in Central America are set up like dominoes and that the Soviet Union and Cuba have a master plan for sweeping those countries into the Communist camp. First Nicaragua, then El Salvador, then Honduras, and then Guatemala. Presumably, they would not stop there and would sweep through Mexico right to the Rio Grande.

While it is true that there are serious problems and insurgencies in many Central American nations, the major cause for the endemic unrest is lack of both economic development and political freedoms. To view that unrest and those insurgencies in purely military terms would be very myopic and counterproductive.

Secretary Haig's tendency to see diplomatic uncertainties in military terms is evidenced in other regions in addition to Central America.

In a thoughtful editorial from its March 20 edition, the Buffalo Courier Express deftly deflates the rhetorical balloon which Secretary Haig has launched; and I hope that all of my colleagues will carefully consider all of its arguments.

HAIG'S DOMINOES

Constant zigs and zags in foreign policy contributed to President Carter's undoing. Now Secretary of State Haig's gyrations over El Salvador are giving the Reagan administration's chief foreign policy spokesman credibility problems both at home and abroad.

After designating tiny El Salvador as the battleground for halting what he saw as Soviet expansionism, then downplaying the importance of any American military involvement there and blaming the press at the same time for the initial furor, Haig is now resurrecting the Vietnam domino theory and applying it to Central America. His accusation before the Senate Foreign Relations Committee that the Soviet Union has an "international hit list" for domination containing Nicaragua, El Salvador, Honduras and Guatemala once again indicates that the Reagan administration seems obsessed with the "Russians are coming" syndrome.

The Reagan administration was given the go-ahead signal by the voters to beef up the nation's military strength and adopt a get-tough stance with the Russians. But it is doubtful that Western leaders or most peace-loving Americans find very reassuring what has been an overzealous reaction on the part of Secretary Haig about Moscow's ability to affect the outcome in such places as El Salvador at a time when the Russians have all the trouble they might want closer to home, in Poland and Afghanistan. His overall thrust for stopping Soviet bloc adventurism appears to be to get Americans involved in as many places as possible—from the mountains and jungles of El Salvador to the shores of Angola, as well as a peacekeeping detachment of U.S. troops proposed for the Sinai, for good measure.

Haig may be right in saying that the Soviet Union is the "most serious threat to world peace that we're facing." But his apparent solution to Soviet brinksmanship is alarming. And Haig's on-again, off-again, on-again preoccupation with alleged Cuban involvement in El Salvador, it should be noted, coincides with Reagan administration statements "not ruling out force against Cuba as an option." For those persons itching for a replay of the 1962 Cuban missile crisis, should Haig have his way, we caution that the outcome may not be the same.●

NAIROBI CONFERENCE ON ALTERNATIVE ENERGY (PART II)

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. BEDELL. Mr. Speaker, I offer today the second in a series of reports on the upcoming U.N. Conference on New and Renewable Sources of Energy—UNCNRSE—scheduled for August 10 to 21, 1981, in Nairobi.

The importance of this conference lies in reminding us of the tremendous stake that Western nations have in promoting energy development for less developed countries—LDC's. For this reason, I wish to draw my colleagues' attention to a recent article by Peter Grier, the business and financial correspondent for the Christian Science Monitor. The article focuses on an important new study by Thomas Hoffman and Brian Johnson of the well-respected International Institute for Environment and Development.

The study concludes, rightly in my view, that it is in the West's best interests to continue energy aid to LDC's. Messrs. Hoffman and Johnson remind us that while poor, underdeveloped countries suffer as much or more from OPEC price hikes as we do, many LDC's blame Western nations for consuming so much of the world's energy. The scramble for oil supplies will inevitably increase political tensions throughout the world, disrupting international commerce at best and spilling over into violence at worst. The study goes further, however, in pointing out areas in which weakened LDC economies directly undermine the prospects for economic recovery in the West.

First, the inability of developing countries to pay their oil debts forces them to borrow from Western banks; which in turn destabilizes the international finance system. The January 28, 1981, issue of the Wall Street Journal headlined the following item: "Nations in Hock: Third World's Debts Totaling $500 Billion May Pose Big Dangers." I myself recently returned from Brazil, which is emerging as the world's prime example of an economy endangered by persistent hikes in oil prices and corresponding attempts to borrow on foreign currencies. The fact is that many developing nations are saddled with oppressive foreign debts. If further oil price increases cause them to cancel, many Western banks will be caught holding billions of dollars in worthless loans.

Second, stable LDC economies would solidify markets for Western exports. This concern has become very important in the last decade because developing countries now buy 37 percent of U.S. manufactured goods; more than we sell to all of industrialized Europe. Moreover, without these markets, it has been estimated that gross farm income in the United States would be cut 20 to 25 percent. Clearly it is to our advantage that LDC's expand their markets for Western goods, rather than expending capital on their oil bills.

Third, energy aid to developing countries would alleviate what many observers feel is an epidemic destruction of the world's forests. Nearly half the world's woodlands may have vanished since 1950. Annual losses currently run at 25 to 50 million acres. Although the long-term effects of a balding Earth are unclear, the trend may be irreversible if alternatives are not found for firewood, the principal fuel for three-fourths of humanity.

I am pleased to bring this thoughtful study to the attention of my colleagues:

[From the Christian Science Monitor, Feb. 10, 1981]

WEST URGED TO AID ENERGY SELF-SUFFICIENCY IN THIRD WORLD

(By Peter Grier)

The project had such promise. Western experts were sure solar cookers would be a big hit in West Africa. After all, the stoves were cheap, easy to operate, and didn't require any scarce, expensive firewood.

Unfortunately, the average West African didn't agree. The stoves seemed strange. What's more, they cooked too slowly and could only be used at an unpopular time of day. Despite repeated efforts, solar cooking in West Africa has yet to become a trend.

Then there's the story of the solar water pumps. An American solar firm has been negotiating with the government of India, eyeing mass sales of a portable water pump powered by photovotaic cells. Perhaps

mindful of the fate of solar cookers, the company strove to tailor the pump to the needs of Indian farmers. But the project stalled, as the fledgling Indian solar industry successfully lobbied to restrict foreign competition.

These examples, culled from a book just published by the International Institute for Environment and Development, show how misunderstanding has often clouded the West's energy aid to underdeveloped nations.

On one hand, well-intentioned Western programs often barge into a country, with little regard for local customs and needs. On the other, suspicious third-world nations block proffered help because they fear economic colonialism with no long-term gain for themselves.

Yet it is in the West's best interests to continue energy aid efforts, says the report. And it claims such efforts could even attract the support of the Organization of Petroleum Exporting Countries.

"Two and a half years ago we decided there was a gap in discussion about the world energy problem," said report coauthor Thomas Hoffmann at a recent meeting with reporters. "There was no thought being given to the third world."

Mr. Hoffmann added that poor, underdeveloped countries suffer more from OPEC price hikes than industrialized nations do—since their budgets are tighter to begin with and they depend on oil for their development projects.

Gas in America may have gone past the $1.30 mark, but the Tanzanian government recently announced emergency measures to cut national oil consumption 50 percent. And Turkey's oil bill exceeds its entire foreign exchange earnings.

"Americans tend to forget that the third world doesn't tend to blame the oil crisis on OPEC," Mr. Hoffmann said, "but on the U.S. and Europe because they consume such a large percentage of the world's energy."

The West should aid third-world energy development for four reasons, according to the report:

1. It will help stabilize international finance.

Before the first oil price shock, in 1973, the foreign debt of the third world was $93 billion. By 1978 it was $210 billion. Many underdeveloped nations are loaded with a burden of debt that they can barely support. If further price hikes cause them to drop the load, Western banks will be left holding billions of dollars in suddenly worthless loans.

2. It would solidify markets for Western exports.

Sales in the third world are already big business: The US now earns more from its exports to developing nations that it does from those to the Common Market, Japan, and the Communist countries combined. (Though in this case the report's figure for "developing nations" includes OPEC countries.)

3. It would ease political tensions.

The need to elbow for scarce oil raises international tempers and disrupts the daily, interdependent business of the world.

"You can literally go to a country and not be able to leave for two or three days because the airport is out of fuel oil," said Mr. Hoffman, describing how co-author Brian Johnson was stranded in the Sudan while researching the report.

4. Energy aid to many underdeveloped nations would defuse the growing threat of a firewood shortage.

The Asian Development Bank, for example, estimates that Asian developing countries need to plant 24.8 million acres of forest each year, if they are to avoid a crucial "wood deficit" by 1990.

Mr. Hoffman admits a foreign wood shortage seems remote from Western national security interests. But it is the basic fuel of much of the world, he says, and an extreme shortage could crack the political stability of many underveloped countries.

It is this risk of instability that threatens OPEC itself. One cracking country could set off the tinderbox of the Mideast—disrupting production and dragging down many OPEC economies. Thus they too have a vested interest in easing the problem, says the report.

The report says the first step toward breaking the "energy triangle" of hostility between the West, underdeveloped nations, and OPEC is to encourage more exploration for oil in third-world nations.

"The major oil companies are not that interested in small projects," says Erik Eckholm, a fellow at the institute.

In 1975 over 40,000 wells were drilled in the US and Canada, while less than 4,500 were drilled in the non-OPEC third world.

"Twenty thousand barrels a day would make a vast difference to any African country," said Mr. Hoffmann.

The report also recommends throwing US political weight behind a World Bank effort to form an affiliate that would oversee a $25 billion third world energy program.

This year in Kenya the United Nations will sponsor a conference on new and renewable sources of energy. It would be an ideal forum, said Mr. Hoffmann, for the US to announce support for a cooperative approach to underdeveloped-nation energy problems.●

ANNIVERSARY TRIBUTE TO ST. LAWRENCE UNIVERSITY

HON. DAVID O'B. MARTIN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. MARTIN. Mr. Speaker, I would like to pay tribute to the entire family of St. Lawrence University, in Canton, N.Y., as they prepare to celebrate the 125th anniversary of their outstanding institution.

St. Lawrence University received its charter from the New York State Legislature on April 3, 1856. At that time, the university consisted of a theological school, which continued its service for more than a century, and a college of letters and science, which has grown steadily in reputation and today stands proudly as one of our Nation's leading liberal arts institutions.

From its beginning, the college of letters and science has been nondenominational and coeducational. It is recognized as the oldest continuously coeducational private 4-year college in New York State.

When the people of Canton and members of the Universalist Church founded St. Lawrence, they sought to create an institution that would meet the needs of New York's North Country and its citizens. Historically, St. Lawrence's service to its community and region has been a valuable complement to its firm commitment to liberal arts education.

I salute that tradition of responsibility, and I know the people of the North Country gladly join in that salute.

St. Lawrence University's commitment to the North Country is forceful, indeed, but it is far from parochial. Over the years, the university has become truly global in scope. Its programs in Austria, France, England, Spain, and Kenya bring the entire world closer to our region. Through its new Canadian studies program, semester in Montreal and Canada Week events, the university contributes significantly to our relationship with our good neighbor across the St. Lawrence River.

In recognizing this anniversary, Mr. Speaker, we salute an institution which proudly maintains a tradition of service to the person, the community, and the Nation.●

MISGUIDED BUDGETARY CUTS: ADOLESCENT PREGNANCY PROGRAMS

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. RANGEL. Mr. Speaker, the President's budget is awash in proposals that are incorrect from policy perspective, and indeed will lead to further costs in the future. One of the areas in which this unfortunate state of affairs is evident is the area of adolescent pregnancy programs. Ignoring the importance of preventing teenage pregnancies, Secretary of Health and Human Services, Richard Schweiker, called for the elimination of Federal funding for teenage sex education and contraception. Hon. Carol Bellamy, president of the New York City Council, has written an excellent article on this subject that I would like to share with my colleagues.

THE PERFECT PROGRAM NOT TO CUT

(By Carol Bellamy)

The budget thunder out of Washington these days finds many people running for cover, carrying their favorite programs, like valued possessions, to higher ground in the hope that the coming flood won't wash them away. Most are running scared and confused with no coherent resistence, no principled opposition. The New Deal's out, austerity's in, and woe to those who dally while the budget-cutters sharpen the ax.

For once, New York City may be in a position to offer some advice on budgets; we certainly know a thing or two about how to cut them. And we have learned a lesson: When it comes to cutting the budget, you need the skill of a neurosurgeon, not the sweep of the butcher. Unless cuts are carefully crafted,

they may result in greater costs down the road. Simply stated, we have found that an ounce of prevention is worth a pound of cure.

So far, the Reagan administration has not heeded this valuable lesson. One of the most flagrant examples of misguided budget-slashing came recently from Human Services Secretary Richard Schweiker, who called for the elimination of federal funding of sex education and contraception for teen-agers, thus ignoring social reality. Teen-age pregnancy is epidemic throughout America; last year in New York City alone, 14,259 teen-agers gave birth. What happens to these mothers? If they survive childbirth, when their chances of dying are 60 percent greater than for women in their 20s, almost three out of every four (72 percent) will end up on welfare. In New York City alone, the yearly welfare costs for these new teen-age mothers is $39 million.

The tragedy is even more dramatic in human terms. Many of these children are inadequately cared for or are abused and end up in foster care, where they languish for years. When child abuse occurs, not only the direct perpetrator will be responsible. So will all of those who remove the thin preventive safety net that now exists for at least some of these teen-agers. Does it make any sense to eliminate the marginal expense of current sex education and contraception programs? Does anyone really believe that prevention isn't the wisest course here?

One wants to give the Reagan administration the benefit of the doubt. But one fears there may be a method in its madness—perhaps this budget-cutting isn't so blind after all. Remember the campaign, and all the Moral Majority-inspired talk about the "decline of the family"? Sex education and contraception, it seems, threaten the family's hegemony and must be stamped out.

If necessary, we can remind the Reagan administration that the challenge for government policymakers today is to mount a concerted response to the tremendous behavioral changes that are redefining the American family. Today, 58 percent of all husband-wife families have two or more wage earners, 32 percent of married couples have no children living at home and one out of seven families is headed by a single parent. It is estimated that more than one-half of the country's 21 million teen-agers over 15, and approximately one-fifth of those under 15, are sexually active.

Withholding information about birth control will not preserve the family. President Reagan would better serve us all by recognizing the changes now taking place in the nature of the family unit and confronting the challenges of the future, rather than looking back to a past that no longer exists.●

CRIMINAL JUSTICE

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. SOLARZ. Mr. Speaker, the President and three other persons were victims of a shameless attack on the streets of our Nation's capital this week. While the attempted assassination of our President was a particularly heinous attack, crime, particularly violent street crime such as this attack, and a fear of crime are major problems citizens of our country face daily.

Yet, while crime is increasing, the Federal response to it has been decreasing. The common opinion is that most crimes are strictly State and local matters. In reality, there is as much justification for a Federal involvement in our criminal justice system as there is for an involvement in most human services.

While crime and a fear of crime are mainly problems of the poor and the elderly, it affects all of us. Criminals are not always from deprived backgrounds. As far as I know, the man accused of attacking the President, John Hinckley, Jr., was not deprived. He grew up in an upper middle-class family and went on to assault our President.

I feel that the extent of violent crime in our society mandates that there be some Federal effort in support of State and local criminal justice programs. A bill I am introducing, the Criminal Justice Assistance Amendments of 1981, will give meaningful help to law enforcement agencies across the country. The bill funds a targeted State administered block grant program which would provide local criminal justice agencies with support for activities like community anticrime projects.

To insure that funds are used in an appropriate manner, the bill establishes procedures to be followed in determining the types of anticrime programs which shall be funded. Initially, the emphasis will be on the following areas:

First, improving approaches to reduce crime, especially street and violent crime;

Second, improving approaches to crime prevention, especially those based on police-citizen partnership;

Third, sting operations to disrupt illicit commerce in stolen goods and property;

Fourth, improving workload management systems for prosecutors;

Fifth, improving systems dealing with career criminals;

Sixth, developing and implementing programs of assistance to victims, witnesses, and jurors; and

Seventh, improving arson prevention and detection efforts.

Most of these programs will operate at the local level. State involvement will be largely limited to the allocation of funds.

The bill requires that Federal funds be matched by an equal amount of non-Federal dollars and that the State matching dollars be clearly identified as such in appropriation bills. Further, the bill mandates that no Federal funds can be used for State or local administrative purposes. In addition, recipients of funds must agree to assume the cost of a project if the project has been proven to be successful after a reasonable period of Federal support.

The bill also creates a National Justice Commission which will coordinate criminal justice policy, particularly with regard to crime and delinquency and will designate those programs which would be eligible for Federal assistance under the legislation.

If you believe, as I do, that there is a need for a carefully targeted commitment to helping solve our Nation's crime problem and that community anticrime programs work, I welcome your support of this bill. It is, to me, the most meaningful way in which we can provide help to State and local criminal justice efforts.●

WE SHOULD SEND CASTRO THE BILL

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. McCLORY. Mr. Speaker, the illegal invasion of our shores by Cuban entrants last year is continuing to cost the American taxpayers millions of dollars.

While charging the Carter administration with responsibility for this unauthorized and unprecedented entry into our country by foreign nationals, many of whom were deemed by Castro as undesirables and a large number of whom were indeed criminals, this is above all a tragic experience for which we are continuing to pay.

Mr. Speaker, a most perceptive analysis of this illegal invasion of our shores was composed recently by the highly respected Chicago Tribune Columnist Bob Wiedrich entitled "We Should Send Castro the Bill."

I agree with that description and with virtually all that Bob Wiedrich has reported in his well-researched and illuminating article which appeared in the March 26 Chicago Tribune and which follows:

WE SHOULD SEND CASTRO THE BILL

It is becoming increasingly apparent that Fidel Castro successfully suckered the United States last year by permitting 125,000 Cuban refugees to clear his shores.

So far, the cost to Uncle Sam has been in excess of $532 million. The daily expense of operating the last of the refugee relocation centers at Fort Chaffee, Ark., is running about $400,000 a day.

And the economic and political respite provided the Cuban communist dictator by getting rid of malcontents and convicts undoubtedly is providng Castro with greater resources with which to export revolution to Latin America.

In retrospect, the American government and the American people got taken. They led with their hearts instead of their brains. They permitted Castro to unload a large percentage of his domestic problems on a democratic system he holds in contempt.

By doing so, they merely staved off the day of reckoning for Castro when he will have to come to grips with widespread dissatisfaction among his own people with his tyrannical regime.

In short, he made fools of us. And the event seems Machiavellian enough to have been planned rather than to have resulted from a spontaneous outburst of freedom among dissident Cubans.

Amazingly, some Americans still haven't figured it out. Those with a parochial interest view the flood of Cuban refugees last year as a bonanza for their communities.

Local officials and some businessmen in the Fort Chaffee area declared that the $100 million the federal government pumped into their economy in the last 10 months was terrific.

For it still required 2,000 local civilian employes to care for 3,500 Cuban refugees at the military post at a monthly payroll of $2.5 million.

And the expense doesn't stop there. There are added costs, like paying motel bills of up to 30 percent of the civilians working at Fort Chaffee who come from the surrounding area. There is even a $12,000-a-month soft drink tab.

Naturally, that cash comes from the pockets of taxpayers at a time when the federal government is trying to cut costs to avert national bankruptcy.

Worse, it is resulting in the expenditure of millions of dollars more as the Reagan administration extends increased economic and military aid to El Salvador to fight off Cuban-armed guerrillas.

In the final analysis, all our humanitarian gesture did was to provide Castro with a safety valve for internal problems that were making his relationship with his Kremlin masters even more tenuous.

They buy his sugar when nobody else wants it. They provide him with oil and millions of dollars a day in economic support. The last thing the Soviets need is for Castro's Caribbean communist showplace to become more visibly weakened from within.

So the Soviets must have also applauded when Castro staged his master sucker play by saddling the United States with a refugee problem of almost unmanageable proportions last year.

To him, Uncle Sam must have looked like a giant Santa Claus who had arrived early with a bagful of goodies.

Castro got rid of the people who threatened the stability of his oppressive government. He cleaned out his jails of riff-raff. He may also have slipped a few Moscow-trained intelligence agents or terrorists in among the flood of refugees.

He cost the U.S. government a bundle of cash it could ill afford to spend. Castro loaded more bodies into a country that already was struggling with record unemployment.

He created political discord among Americans that very probably will leave unhealed wounds.

About the only fringe benefits from the experience that can be discerned are the economic benefits to those few communities that shared in the federal windfall and those corrupt seaboat captains who made a mint charging Cuban refugees exorbitant prices to cross the 90 miles of sea between Florida and Cuba.

Granted, the alternative to accepting the refugees would have been distasteful to many Americans who viewed receiving the Freedom Flotilla as a humanitarian gesture in keeping with U.S. tradition.

However, by permitting the exodus to gain momentum, the United States did Castro a favor. In the long run, the cost of that adventure may prove incalculable.

For in easing the plight of the refugees, we postponed the day the Cuban people will rise up against their communist masters and return their island nation to some modicum of freedom.

Surely that day will come. But had the genuine refugees among those who came here remained on Cuban soil to work toward freedom, that day might have come sooner.

Instead, we probably gave Castro renewed vigor with which to subvert countries in a Latin American sphere of influence that is vital to American security.

We lanced Castro's festering sore. And we didn't even send him the bill.●

THE REAGAN ASSASSINATION ATTEMPT: A TIME TO PAUSE AND REFLECT

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, this is a time for all Americans to pause and reflect on the incredible events of March 30, 1981. Immediately, we are thankful, that through the grace of God, our President, Hon. Ronald Wilson Reagan, was spared from grievous injury. As it appears the President's recovery will be successful, we do ourselves well to be mindful of those forces in our lives over which we have very little control.

During these days of shock, anger, and dismay, a cloud of sorrow and uncertainly shrouds our Nation. In the final analysis, there is little of consequence that can be said concerning events that are already a part of history.

Too fresh are the images and emotions that penetrate the deepest corridors of the soul. Too frightening are the reminders of past similarities. The experience is personal; as unique as each person who hears the words, "The President had been shot."

To the relief of all America and the free world, in answer to their prayers, the President will survive the attempt on his life. A man of great spiritual strength, personal fortitude, and physical stamina, Ronald Reagan will soon resume the duties of the office which he was so recently entrusted to fulfill.

Other realities surrounding this occurrence are much more difficult to digest. James Brady, the President's press secretary, was seriously injured in the assassination attempt. In fulfillment of his responsibilities as a representative and spokeman, James Brady was there, up front, leading the way for his boss. In many ways, the serious injuries suffered by Mr. Brady—a distinctive personality in the Reagan team—were particularly painful. Why him?

The others who were wounded, Secret Service Agent Timothy McCarthy and Officer Thomas Delahanty, acted most admirably in defending the President from the onslaught of gunfire. The Nation is grateful for their courage.

Confronted with the horrifying specter of assassination once again, we are prone to hold our heads in our hands and meekly ask, "Why?"

Fortunately, at this point in time, our considerations do not dwell on fatalities. Indeed there is ample cause for relief, and thanks, as we recall the events of March 30, 1981.

Mr. Speaker, perhaps my sentiments can be best expressed by a suggestion put forth by a constituent of New York's Sixth District which I represent. Mr. Leo Boller of Little Neck, N.Y., has proposed that April 3, 1981, be designated as a special day on which all American flags be prominently displayed out of respect and hope for our recently wounded President, Presidential press secretary, Secret Service agent, and District of Columbia police officer.

Mr. Speaker, President Reagan is a remarkable individual. His sense of humor and continuous concern for the well-being of others, are exemplary to the point of inspiration. Prehaps that is the thought that will prevail when normalcy once again returns.

In the face of deadly assault, President Reagan knew instinctively of his ongoing obligation to the American people and the world. He never faltered in his good nature or realization of what the Office of the President of the United States represents to the American people and the rest of the world.

We are all grateful that the President's recovery will be swift. We are equally grateful that this man of presence has demonstrated to all that true leadership is inspiring, yet humble. We commend the President for his courage. His actions continue to be an inspiration to all Americans and all the world.●

QUANTIFICATION OF THE PUBLIC TRUST RESPONSIBILITY

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. SWIFT. Mr. Speaker, for 45 years the FCC has been trying to regulate broadcasters to serve the public interest. While the regulations are voluminous, costly to both Government and industry, they have done little or nothing to make bad broadcasters better while draining resources of the good broadcasters away from more productive pursuits.

Many have virtually thrown up their hands and given up on requiring the broadcaster to serve the public interest. Yet that public trust responsibility is too precious, in my judgment, to throw away. For that reason, I have developed a system which I think will for the first time quantify that public trust. Once we do that—establish an objective standard—the majority of the regulations that have grown up over the years can be abandoned.

However, the idea is new. That suggests a couple of things. First, it is unlikely the idea has come full-blown from my brow without substantial areas for improvement. Second, because it is new, it will seem strange and, I suspect, a little frightening. The irony is that I think it will scare both broadcasters and public interest groups alike—each wary for different reasons.

The following material is designed to help explain what the bill is intended to do. I would be interested in the comments of my colleagues. This process will be very helpful to me and, hopefully, to the entire debate on broadcast deregulation.

HOW THE BILL WORKS—PART 1

I. QUANTIFICATION OF THE PUBLIC TRUST RESPONSIBILITY

To establish an objective point system quantifying the public trust responsibility, the bill would:

Require the FCC to establish through a point system a quantified public interest standard that broadcasters would be expected to meet. The FCC could not require any specific types of programming. To meet the standard, the broadcaster would choose any mix of qualifying programming that fit the station's format, including:

Non-entertainment programming (news, sports, public affairs, religion, etc.).

Public service announcements.

Locally produced, live entertainment programming.

Other programming which the FCC determines would be in the public interest to encourage.

"Bonus" points are added for:

Local, live or produced-live programming.

Programs run during prime time.

Programming that's especially expensive to produce.

Require the FCC to establish within six months a tentative point system and begin evaluating it.

Require the FCC to report to Congress within one year on progress developing and evaluating the point system.

Require the FCC to finish the evaluation within 1½ years and begin a rule-making to put it into effect. The evaluation would:

Use "composite week" logs already on file with the Commission.

Show that the system would be both simple for broadcasters to use and easy for the Commission to administer.

Set minimum performance standards, using as a guide the current performance of the best broadcasters.

And, if it were found to be in the public interest, set different standards for different classes of licenses. This should be kept to a minimum. Classes which the FCC might consider for differing standards include:

Major market stations versus small markets.

Network affiliates versus independents.

The frequency (UHF, VHF, AM, FM, etc.) on which the station broadcasts.

Require the FCC to implement rules putting the point system into effect within 2½ years of enactment.

II. BROADCAST DEREGULATION

With quantified public trust responsibilities comes meaningful deregulation of broadcasters. The bill would:

Allow a broader exemption for news coverage under the Equal Time requirements of Section 315.

Allow five-year license terms for all broadcasters.

Eliminate all ascertainment.

Remove all limits or restrictions on station formats.

Eliminate specific log requirements for radio and TV.

Eliminate required programming logs.

Eliminate annual programming reports.

Eliminate the requirement that stations break down non-entertainment programming into categories (news, sports, religion, etc.).

Eliminate petitions to deny.

Eliminate comparative renewal hearings.

Shorten the waiting period for all applications.

Allow random selection between qualified initial applicants.

Simplify the initial application to a one-step process.

HOW THE POINT SYSTEM WOULD WORK

In spite of complaints by broadcasters about the uncertainty they face during license renewal as the result of the vague public trust standards, many broadcasters would not trade the "devil" they know for the one they don't. While that's understandable, I would like to suggest one way in which an objective point system might work using the natural "marketplace" that already exists within every broadcast station—the interplay between managers who raise money and programming people who spend it.

A POINT SYSTEM APPROACH

Much of the regulatory thicket that has developed has been borne of the desire by broadcasters to have a clear, objective standard they can meet so that, during license renewal, they will have certainty their license will be renewed. Yet, one does not want the FCC making subjective decisions on program quality. Instead, the system should give extra credit for some activities more than others. Three come to mind readily:

First, the size of the audience as determined by the time of day the program is broadcast should be recognized by weighted points.

Second, any "above the line" costs to produce a program should be reflected by more points—probably several categories of them.

Third, local, live production should get more points than something that comes from a network or other outside source.

The bill would also allow the Commission to establish by rule other program types which are in the public interest to encourage. They could, for example, as a means to encourage public broadcasting, allow points to be given for broadcast of programs produced by and purchased from public broadcast stations. Or, if it is in the public interest, they could give bonus points for children's or other programs. The point system could be adjusted by the Commission whenever the public interest dictates; however, no change could be made with less than one year's notice. Such a system would be simple, easy to use and involve a minimum of paperwork.

The Commission would establish minimum thresholds that each broadcaster would have to meet annually. The station would only need to file a simple affidavit that it had met the standard. The threshold would be set after the Commission studies a variety of stations and determines what level is currently being met by those stations that have shown an aggressive and concerned approach to meeting their public service responsibility. However, once the threshold is set:

Broadcasters would have maximum freedom to determine how to meet it; the FCC would know, with certainty, when it had been met; the public would be better served than it is now; and, Congress could undertake meaningful de-regulation.

The following is a sample system as it might be developed for radio and TV.

A POSSIBLE POINT SYSTEM

I. FOR RADIO

1. Basic Points: Each minute, or fraction of a minute, of program devoted to any type of non-entertainment program could get one point. That would include news, sports, weather, public service announcements, religion and other qualifying programs.

2. Bonus Points: In addition to the basic points, a program might also qualify for additional points by one or more specific factors, including better time periods, a "local" effort and more costly production.

A. Time Period Bonus:

Hours	Weekdays	Saturday/Sunday
9 p.m. to 6 a.m.	No extra	No extra
6 a.m. to 9 a.m.	3 points per minute	1 point per minute.
9 a.m. to 3 p.m.	2 points per minute	2 points per minute.
3 p.m. to 6 p.m.	3 points per minute	2 points per minute.
6 p.m. to 9 p.m.	2 points per minute	1 point per minute.

B. PSA Local Bonus: A bonus of 1 point per minute might be given for public service announcements that relate to local issues and activities.

C. Locally-produced Program Bonus: Programs that are locally produced, including locally produced entertainment programming, might get an extra one point per minute.

D. Production Cost Bonus: A bonus might be added according to the scale below for programs that incur substantial "above the line" costs (those directly related to the program other than normal salaries and overhead). The exact brackets should probably vary between markets. However, for this sample, they are: $25 to $100 per broadcast cost=1 point/minute; $100 to $500 per broadcast cost=2 points/minute; $500 and up per broadcast cost=3 points/minute.

3. Here's an example, using the above point system.

A station airs a program that qualified as public service. It is locally produced and broadcast Tuesday afternoon at 2 p.m. It cost the station between $100 and $200 extra to produce and runs 5 minutes. It earns 30 points.

POINTS PER MINUTE

Basic public service points	1
Local production bonus	1
Time period bonus	2
Production cost bonus	2
Total value	6

Note.—Multiplied by 5 minutes the program receives 30 total points.

This would compare, for example, with a network produced, half-hour public affairs program which is aired locally at 10 p.m. Sunday. It would qualify for only the basic points (1 per minute) × 30 minutes = 30 points.

II. FOR TELEVISION

This suggested system for radio could be easily adapted to fit television by adjusting the time segments and revising the production costs schedule. The rest could be much the same.●

SMALL BUSINESS PROCUREMENT REFORM ACT OF 1981

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. MAVROULES. Mr. Speaker, it is impossible to imagine an America without small business. And yet, too many of us take this vital segment of our economy for granted. We cannot afford to do so any longer.

Small businesses employ 58 percent of our Nation's work force, and account for 43 percent of our gross national product. They have been rightly described as the backbone of our economy, perhaps even our way of life. According to the report of the White House Commission on Small Business, small businesses "can give our communities an even keel of economic stability. They can supply the bulk of the Nation's new jobs. And they can incubate new formulas for the Nation's growth."

In the current economic recession, small businesses have suffered along with their larger counterparts. Indeed, their problems have been greater in magnitude, because they do not have the ready access to large infusions of capital that major corporations enjoy. And their situation has hardly been helped by the fact that less than 25 percent of every Federal procurement dollar goes to small business.

This last fact is particularly ironic. According to a National Science Foundation study, small businesses produce 24 times more major innovations per research and development dollar than larger firms. Clearly, Government agencies could save money if they would make more Federal contracts available to small businesses, many of which are in dire financial straits.

In the 96th Congress, Representatives REUSS, BEDELL, and Drinan introduced legislation to remedy the bias against small businesses in the awarding of Federal contracts. Although the bill had more than 50 cosponsors, it was never reported out of committee.

This issue remains as pressing now as it was in 1979. If anything, as economic conditions worsen, it becomes even more imperative that steps be taken to correct this imbalance. To this end, I have introduced the Small Business Procurement Reform Act of 1981.

The bill would do the following:

It would guarantee that firms have at least 30 days to bid on each contract, thus protecting small companies, which are often the last to hear of new contract opportunities.

It would direct each agency to work toward a goal of at least 20-percent small business participation in procurement activities.

It would require that each Federal agency break its large systems procurements, whenever practical, into smaller components in order to give small businesses a greater opportunity to submit bids.

It would mandate that, for a contract under $100,000, each agency provide to interested firms a copy and a summary of each Federal law and regulation with which they must comply in the performance of the contract.

It would require that each Federal agency justify every instance in which goods or services are procured without competitive bids.

It would make available in as many locations as possible information and materials needed to prepare bids on Federal contracts.

It would authorize the Small Business Administration to establish arbitration panels to resolve minor contractual disputes, thus avoiding lengthy and costly litigation.

The need for this legislation is growing. In fiscal year 1978, small firms received only 21.7 percent of Federal procurement funds. In fiscal year 1980, that figure dropped to 20.1 percent. If we fail to act, the situation may well worsen in coming years.

The Small Business Procurement Reform Act can reduce Government spending through lower cost Federal procurement. It can create new jobs for thousands of unemployed men and women. Most importantly, it can strengthen beleaguered small business, potentially the vanguard of our economic revival. I invite my colleagues to join me in this vital cause.●

EL SALVADOR

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. GEJDENSON. Mr. Speaker, the issue of U.S. military assistance to El Salvador continues to concern both my colleagues in the House of Representatives and the people of the United States. I would, therefore, like to insert into the CONGRESSIONAL RECORD the following editorial written by Mr. Richard H. Ullman, a professor of international affairs at Princeton University and printed in the February 25, 1981, edition of the New York Times:

SAVING SALVADOR

(By Richard H. Ullman)

PRINCETON, N.J.—The Administration seems headed toward disaster in El Salvador. Its obsessive concern to demonstrate that the United States can no longer be pushed around by the Soviet Union and Cuba has tied our prestige to the survival of a brutal military regime. In so doing, it is inviting a confrontation from which, no matter what the outcome, Moscow will emerge a winner.

Our standing—in the eyes of much of the rest of the world, and perhaps even in those of our own people—will surely diminish. The ultimate losers will be those whom the Administration in its simplistic *Realpolitik* has overlooked: El Salvador's four million people.

The Soviet Union will emerge enhanced because governments and publics in many countries, including Mexico and Western Europe, seem to believe that the Salvadoran rebels, who now enjoy Moscow's and Havana's support, are much more worthy of support than the regime they oppose. Thus, if large-scale United States assistance saves the junta. Washington will be accused of again stifling a "progressive third-world revolution." On the other hand, now that Washington's prestige is engaged, an insurgent victory will seem yet another sign of declining United States power. For Moscow, no matter what the outcome, the applause of much of the third world will come as a welcome diversion from the opprobrium that has rightly attached to its brutal intervention in Afghanistan.

Like the Carter White House, the Reagan Administration purports to regard the junta as courageous centrists battling repression from left and right. But the overwhelming evidence is that whatever democratic center there may have been exists no longer. Its fragile chances were snuffed out with the lives of six civilian opposition leaders rounded up by army units in November and executed, just as nearly every other voice for moderation—including many priests and an archbishop—have similarly been silenced. And the land reform on which Washington has placed its bets for weaning the rural poor from the insurgents has proved largely a sham, as much undermined in the countryside by the army as ballyhooed by the junta.

Yet the Administration has firmly nailed its flag to the junta's mast. No longer can there be a graceful exit. Our military mission in El Salvador has doubled; the flow of arms will surely double, too. But the Pentagon's own analysis is said to conclude that the junta is not capable by itself of putting down the insurgency even with vastly enhanced resources. So the next steps will surely include a gradual assumption of more active roles by our own forces. They will fly the helicopters that ferry Salvadorans into battle. They will operate electronic sensors to detect the influx of arms. And when they begin to die in combat, the Administration will find its prestige even more irrevocably on the line.

El Salvador is not Vietnam, however. "Our side" will almost surely win. But the costs, in Salvadoran lives and perhaps our own, too, and to the United States' reputation

will be gigantic. And the sparks of revolution will have ample tinder for reignition.

The tragedy is that these costs are so unnecessary. Our prestige is on the line only because the Administration insists it be there. The fact of Soviet and Cuban support for insurgents need not trigger automatic United States opposition. There are conflicts for which no satisfactory resolution is possible. The civil war became such a conflict when the army and right-wing death squads liquidated the moderate center.

The insurgents undoubtedly include many Communists among their number. Their blueprint for a reconstructed society will not accord with the preferences of most people in this country. But they nevertheless seem the favorites of a terrorized population that evidently feels that an insurgent victory will bring the more equitable distribution of wealth so long denied it by El Salvador's rules.

That fact alone should give us pause. But if it does not, then Washington's policy should at least be shaped by the likelihood—indeed, certainty—that a victorious left in El Salvador, as in Nicaragua, would scarcely be anyone's willing client. The Soviet Union and Cuba are useful arms suppliers during civil war. But it is to the United States that victorious insurgents look for aid in rebuilding their countries. Then our resources and influence can decisively shape events.

Alas for the Salvadorans, and also for ourselves, the Administration has all but foreclosed such an outcome. Any hope for preventing a disastrous escalation of our involvement in the war must rest with the Administration's critics at home—with Democrats, liberal Republicans, and the churches, especially the Roman Catholic Church. They may yet save the honor the Administration is so recklessly squandering.●

THE BYELORUSSIAN REPUBLIC: THE FREEDOM FIGHT GOES ON

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, while events in Poland continue to hold the attention of the international media, and freedom loving people throughout the world, it is fitting that recognition be paid to others who seek to rid themselves of the yoke of tyranny and be free.

A short while ago, I received a communication from the Byelorussian Congress Committee of America. That letter is a incisive account of the struggles and travails of the Independent Byelorussian Republic that came into existence on March 25, 1918.

Seventy-three years later, the proud people of the Byelorussian Republic, though forcefully subjugated by Soviet communism, have not forgotten the brief autonomy they enjoyed. Nor have they forgotten the atrocities they have been subjected to under the crushing hand of Soviet Russia.

In tribute then, to these courageous people whose unending desire is to live as free men and women, I submit the following statement. During those moments when we are tempted to soften our just opposition to Soviet communism, it would be beneficial to recall this account:

BYELORUSSIAN CONGRESS
COMMITTEE OF AMERICA,
Queens, N.Y., March 15, 1981.

Hon. JOHN LeBOUTILLIER,
House of Representatives,
Washington, D.C.

DEAR MR. LeBOUTILLIER: Sixty three years ago, the Council of the Byelorussian Democratic Republic solemnly proclaimed the National Independence of Byelorussia on March 25, 1918 in the city of Minsk (Miensk in Byelorussian), which became the capital of the new Byelorussian Republic.

Thus, the long subordination to the Tsarist Russian Empire was ended. The government of the new Independent Byelorussian Republic immediately began to organize the national and local administration, the educational system, the cultural activities, the restoration of the war torn economy, and the formation of the national military forces. It also began intensive diplomatic activities abroad.

Unfortunately, the joyous spring of the National Independent Byelorussian Republic was threatened by the emergence of the new imperialist Bolshevik government of Soviet Russia, under the leadership of Lenin.

Perfidiously he proclaimed the right for self-determination for all former non-Russian nations, conquered by the Tsars and incorporated into the Russian Empire. He was using this promise only as an attractive propaganda ploy. While in reality, he was practicing the sinister policy of military reconquest, by the Russian Red Army, of the newly independent national non-Russian republics, including reconquest of the new independent Byelorussian Democratic Republic.

To camouflage this aggression by a "progressive" shield, Moscow Government arranged the proclamation of its own colonial state, the Byelorussian Soviet Socialist Republic, on January 1, 1919 in the city of Smolensk.

Byelorussian military forces were fighting the Soviet Russian aggressors on several fronts:

In Northern Byelorussia, the special troops under the command of general Bulak-Balakhovich.

In Central Byelorussia, the military formations under the command of K. Yezavitav, and the Grodno Regiment under the command of Haydukievich.

In Southern Byelorussia, the Slutsk Division under the command of Col. Sokal-Kutylouski.

Unfortunately, without any help from abroad, the heroic, but completely outnumbered and poorly equipped, Byelorussian national forces were defeated by the Russian hordes.

The diplomatic activities of the Byelorussian Representatives, at the peace conferences in Byelorussian Brest, in 1917 and in French Versailles, in 1919, have not received the necessary understanding from the Western Powers.

The Consulates of the Byelorussian Democratic Republic were established in the following countries: Germany, Denmark, Finland, Turkey, Yugoslavia, Czechoslovakia, Lithuania, Latvia and Estonia. But the Western Countries were deaf to the urgings and pleadings of the Byelorussian Representatives.

Finally, Byelorussian Democratic Republic was liquidated by the Treaty of Riga in 1921, by which Byelorussia was partitioned between Soviet Russia and Poland.

Moscow Government created the Byelorussian Soviet Socialist Republic (B.S.S.R.) only on the small part of the Byelorussian ethnographic territory. Most of the Byelorussian ethnographic territory was annexed to the Russian S.F.S.R. Russian Government imposed on Byelorussia its own policy of Sovietization and Russianization.

In the Eastern part of Byelorussia, which was annexed to the Russian S.F.S.R., with the cities of Smolensk, Bransk, Vialikiya Luki and others, nothing Byelorussian was allowed at all. This part of Byelorussia was treated and considered as a genuine Russian territory.

Russian Government persistently and systematically conducted the policy of Russianization of the Byelorussian Soviet Socialist Republic. With this goal in mind, Russians eliminated the leading segments of the Byelorussian population: statesmen, creative cultural people, scientists, professionals, and also the patriotic Byelorussian farmers and workers.

During 63 years of Soviet Russian oppression, over six million of Byelorussian population were murdered or deported to the concentration camps of Siberia.

All administrative positions in Byelorussia, from the managers of the collective farms and factories, all the way to the members of government of the republic, were filled by the imported Russians or other Russianized non-Byelorussians. Because Russians did not even trust nationally conscious Byelorussian Communists.

Byelorussian language was forcefully replaced by the hated Russian in all aspects of life of an oranized society. Newspapers, magazines, scientific and literary books, movies, theaters, compulsory mass meetings, schools, professional organizations, all are used for the sole purpose of Sovietization and Russianization of the Byelorussian people.

The national Byelorussian Orthodox Church was liquidated and replaced by the Russian Orthodox Church, the few remaining Byelorussian churches were subordinated to the Moscow Patriarch.

The atheistic government of Soviet Russia is sinisterly using the Orthodox Faith of the Byelorussian people to separate the Roman Catholic Poland from Western Europe, with the aim of Russianization of Poland at not too distant future time. The Orthodox Church never before existed in the Western regions of Poland. Yet, after World War II, the atheistic Soviet Russian Government created the Orthodox Archdioceses in the cities of Wroclaw-Szczecin and Poznan-Lodz. The parishioners of these Orthodox churches are predominantly Byelorussians, transplanted from Byelorussia after World War II.

Ironically, Russian language is used in the religious schools, sermons and in the administration of the Polish Orthodox Church. To reduce the Byelorussian national strength, young Byelorussians, as a rule, immediately after graduation from the universities, are sent out from Byelorussia to other ethnic republics such as: Baltic and Asian Republics of the Soviet Union. Where, separated from their national Byelorussian roots, they are first Russianized, and then used to Russianize those non-Russian Republics. Secondly, the educated young Byelorussians, instead of giving their talents to their native Byelorussia, are ex-

ploited outside of Byelorussia, in building the imperialist expansionism of Soviet Russia.

Byelorussian people desire to be free from all the colonial burdens and dangers, imposed on them by the brutal Soviet Russian occupation. Byelorussian people desire to have liberty and national independence.

Soviet Russia is a real threat to the entire Free World, now and always. The only way to diffuse this real global, present and future, threat, is to break-up the Soviet Russian Empire, and to liberate all the subjugated nations, including Byelorussia.

Very respectfully yours,

JOHN KOSIAK, *President.*
MICHAEL SIENKO, *Secretary.*●

SAVE THE URBAN PARKS

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. SCHEUER. Mr. Speaker, the administration is reportedly planning to propose that metropolitan New York's Gateway National Recreation Area be dropped from the National Parks system, along with a number of other urban parks and recreation areas.

In defense of that plan, the Director of the National Park Service refers to the Yellowstones and Yosemites of the far West as the crown jewels of the system—those that deserve priority attention at a time of budget stringency.

Mr. Speaker, those crown jewels are national treasures; but I am certain that Congress will not allow our urban parks to be shunted aside like so many dime store rhinestones. Ten million people enjoyed the Gateway Park last year—more than three times as many as those who visited Yellowstone and Yosemite combined.

The great western parks are a source of pride for every American who has visited them, as well as for those who have only seen them in pictures; but for tens of millions of greater New Yorkers, Gateway Park is more than just a stunning photograph. It is a short bus ride away.

In our appreciation of the natural wonders of the West, let us not forget to put our money where our people are.

I have submitted a letter to the Secretary of the Interior urging careful reconsideration of the Park Service plan. I know that many of our colleagues will be working actively to save Gateway and other urban parks.

Congress has the power to pass judgment on this shortsighted idea. I am confident that we will not decide to confine the enjoyment of Federal parklands solely to those who live in Wyoming or the Dakotas or to those who can afford to travel there.●

THE PEOPLE RESPOND

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. GARCIA. Mr. Speaker, I am inserting into the CONGRESSIONAL RECORD a statement which exemplifies the concern people are feeling over the proposed budget cuts. President Reagan's economic plan would not affect every segment of this society equally; minorities and the poor would have to shoulder the greatest suffering while businesses and the rich would be favored disproportionately. As part of my continuing crusade against the inequities in the proposed economic plan, I am inserting today's statement to show that there are still citizens who are concerned over the impact of this plan.

STATEMENT OF THE NATIONAL COALITION FOR ECONOMIC JUSTICE: A CALL FOR A NATIONAL LEGISLATIVE LOBBY FOR JOBS

A JOB FOR EVERYONE, WILLING AND ABLE, WHO WANTS TO WORK

Our nation's severest problem is jobless men and women. Surely, inflation is causing a tremendous crisis, but for those who have work or can find work, there is still a sense of hope. For the unemployed and the underemployed, their dignity and human potential is under attack. Unemployment destroys hope and the self-esteem of a productive human being. The consequence of joblessness is serious human, economic, social and moral destruction. Unemployment helps to generate high rates of crime, larger welfare rolls, destruction of family life; inadequate housing, poor nutrition and health services, it fosters emotional instability, and it adds to the destruction of the educational system.

We have entered a new decade with unemployment totaling close to 8 million by official count; the actual figure is well over 10 million. A large portion of the unemployed (over 3 million) are youth, especially Black and minority youth between the ages of 16 and 25. The government's policies of the past decade, and even more so now, foster and maintain the development of a vast permanent underclass of Americans who will never, ever be able to feel themselves productive human beings. For this reason, we must speak directly to our national legislators about programs to change this situation.

It is out of this need that the National Coalition for Economic Justice calls upon you to support and endorse a National Legislative Lobby for Jobs, April 14th, 1981. This date, 10 days after the anniversary of the assassination of Rev. Martin Luther King, Jr., has been selected to honor his memory and his life which was dedicated to economic and social justice.

The overall objective of this Legislative Lobby is to speak personally to as many representatives and senators from as many states as possible. It is our plan to convene people from each state to visit with their own representatives and senators with the following demands:

1. A job for every person willing and able to work with decent working conditions and no sub-minimum wage.

2. Enactment of legislation for a shorter work week with no reduction in pay (Conyer's Bill). Provide legislation to prevent plant closings and runaway shops.

3. Massive job and job training programs for unemployed adults and youth. Preserve and strengthen CETA. Pass the Youth Act of 1980 and the Weiss Full Employment Youth Act. Enforce H.R. 50. (Humphrey-Hawkins)

4. Adequate funding for quality, integrated education. Maintain the Department of Education.

5. Support for expansion and enforcement of affirmative action requirements for all jobs.

6. Funds for the above programs to be acquired from closing corporate tax loopholes and unnecessary exorbitant expenditures of the military budget.

Our nation cannot afford to endorse and support the existing economic policies that allow millions of Americans to be cast out of work to be left on unemployment lines with totally inadequate economic benefits or no benefits at all. This suffering is so unnecessary when there is so much work that needs to be done, such as:

Helping to rebuild our cities; constructing housing for that vast number of Americans without adequate shelter.

Developing more efficient mass transit systems.

Weatherizing housing structures so that they may be more energy efficient.

Making more available health, education and nutritional services to the elderly and children of our nation.

All these jobs and many others will provide a direct benefit to our society and add to the productivity of our human resource.

Will you join us today by endorsing our Call and beginning now to organize a delegation from your organization or community to join the National Legislative Lobby for Jobs in Washington, D.C. on April 14, 1981?

YOUNG PEOPLE'S LOBBY FOR JOBS

ENDORSERS (PARTIAL, LIST IN FORMATION)

Joseph P. Addabbo, Member of Congress, New York; Americans for Democratic Action-Youth Caucus; Aspira Inc. of New Jersey; Rev. Charles E. Cobb, Exec. Dir., Commission for Racial Justice-United Church of Christ; Commonwealth Assoc. of Students, Christopher Leavey, Exec. Dir., Pa.; John Conyers, Member of Congress, Michigan; District of Columbia Board of Education.

Bernard Firestone, Sec.-Treas., Chicago & Central States Joint Brd., ACTWU, AFL-CIO*; Mel King, State Representative, Massachusetts; Mike Lowry, Member of Congress, Washington State; Joseph Madison, Director, NAACP Voter Registration Project*; National Black Youth Network, Charles J. Moreland, Chairman; National Council of La Raza, Juan Turnure, Youth Specialist; Laurence E. Connolly, Jr., State Representative, Maine.

Cleveland Robinson, Sec-Treas., District 65 UAW*; Southern Christian Leadership Conference, (SCLC), Joseph E. Lowery, President; Carl Scarbrough, International President, United Furniture Wrkrs. of America, AFL-CIO*; National Coalition for Economic Justice, Rev. Robert Jones, President; Ruth Messinger, Member, City Council of New York; Carmel Sandoval, Program Specialist, National Education Association

* Organizations listed for identification only.

(NEA)*; United States Student Association, Doug Tuthill, President.

Ted Weiss, Member of Congress, New York; United Neighborhood Centers of America, Inc., Walter L. Smart, Exec. Dir.; John F. White, Jr., State Representative, Pennsylvania; Women for Racial and Economic Equality; Women's Intl. League for Peace and Freedom, U.S. Section; Young Workers Liberation League, James Steele, Chairman; Youth Council/NCEJ, Judith Mercadel, Natl. Coordinator; David P. Richardson, State Representative, Pennsylvania & Black United Front, Philadelphia;

SMALL BUSINESSMEN ARE BEING CAST ASIDE IN RETAIL GASOLINE MARKET

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. VENTO. Mr. Speaker, I would like to take this opportunity to commend a constituent of mine, Art Meyer, on his retirement after 35 years of service to his community.

The reasons behind Art's retirement, I believe, point up to a larger problem we face in America; that is, the decline of small businessmen in the gasoline service station industry. In the past decade, we have seen a significant decline in the number of gasoline outlets. Those stations remaining are gearing toward high-volume, no-frills operations. In this changing market, it is the small businessman service station owner who is being squeezed out. These new operations are gas stations only, no longer are they the familiar service stations we grew up with because customer service is being cast aside. Less and less do we encounter the service station where you can fill-up on gas and get your oil and tires checked at the same time. The operators of these service stations are often neighbors of their customers, people who can be counted on to provide for the customer's complete motoring needs. Art Meyer's service station was one such business. Now like many small businessmen before him, Art finds himself hamstringed by marketing forces over which he has no control. High volume sales are the name of the game and those who cannot compete on that basis are dropped.

I believe the time has come for Congress to reaffirm its support for these small businessmen. I have cosponsored Representative BEDELL'S bill, H.R. 1362, the Small Business Motor Fuel Marketer Preservation Act, and will support other efforts designed to protect the viability of small businessmen such as Art Meyer.

I bring to the attention of my colleagues the following article which appeared in the March 24, St. Paul Dispatch. I believe it serves well to illustrate the plight of the small businessman/service station owner and the need to protect businessmen such as Art Meyer.

SMALL GAS STATIONS ARE LOSING BATTLE AT PUMPS

(By Scott Carlson)

When the Standard Oil Company sent its registered letter to gas station owner Art Meyer shortly before last Christmas it was no season's greeting: the company informed Meyer it was dropping its franchise with him.

"Not even a thank you for being in business 52 years," Meyer said. "Just a terse legally composed letter."

That wasn't the way Meyer ever did business with anyone. Meyer's patrons, his customers will tell you, were his "friends."

You could chat with Meyer over a free cup of coffee and pet a stray calico cat named "Momma Kitty" when doing business at the Maplewood station.

"I kept it as a neighborhood station," said Meyer, as he reflected on 35 years as an independent businessman with the help of his wife Joyce, who handled bookkeeping. Prior to his time, Meyer's father-in-law Norman Mogren owned the station for 17 years.

Now, Meyer has leased his station to a different oil company and will be retiring March 31. "The people (customers) have been awfully good to me," Meyer said. "I think my 14-hour days went faster than most people's eight-hour days.

"I think the good Lord was smiling on me," he added.

But Meyer has seen tremendous change in his industry since 1946 when he was just a 22-year-old man working out of a wood frame station and pumping gasoline for 20 cents a gallon. For example, cars, once simple to repair, are now "electronic monsters," he said.

In recent years, Meyer has found it increasingly difficult to survive as a small businessman in a market of big oil companies and gas stations emphasizing high volume sales.

"They (cars) have changed the business in quite a way," Meyer said. "Before they were

kind of a simple machine that an intelligent person could repair without a great deal of time or expense. You could use the same help (at a station) to do all jobs.

"That created a good balance for the industry," Meyer continued. "People (customers) could depend on good service at reasonable prices more so than now."

Today there are fewer and bigger stations but they aren't necessarily better, Meyer contended.

"The country has become so 'volume' conscious," he said. "The volume approach has taken out the extra things (service) people were getting. The volume approach means you don't do anything unless it makes money."

Meyer explained, as an example, that small gas station owners buy sparkplugs at higher prices than owners of bigger stations because of differences in discount purchase rates.

Despite these difficulties, Meyer said he never wanted to alter the service or personal relationship he had with customers.

"The owner contact with customers generally is less and less," Meyer said. "I think they (the customers) are missing something. That's why I think my customers kept coming back."

He concluded: "There are still a lot of people who want that (personal business) relationship."●

WORKERS RIGHT TO KNOW OR THE SUPPLY-SIDE AFFECTS OF OCCUPATIONAL CANCER, PART II

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. OBEY. Mr. Speaker, in one of its first public actions concerning worker safety, this administration decided to stop distributing a current intelligence bulletin on formaldehyde by the Occupational Safety and Health Administration and the National Institute for Occupational Safety and Health. The bulletin is not a standard. It simply is a means of informing workers, employers, and the general public of the scientific evidence indicating that formaldehyde may be a carcinogen in humans and recommending ways to protect workers from exposure. There are many workers exposed, an estimated 1.6 million in a NIOSH survey. The United States produced about 6.4 billion pounds of it in 1978, with U.S. consumption estimated to exceed 7.5 billion pounds by 1983. Some of the product uses are: Cosmetics, deodorants, dyes, embalming fluids, insulation, paper, plastics, and textiles.

Because of the importance of information like this to workers and the general public, I am placing in the RECORD the entire intelligence bulletin on formaldehyde which the administration has decided to suppress.

NIOSH CURRENT INTELLIGENCE BULLETIN NO. 34

FORMALDEHYDE: EVIDENCE OF CARCINOGENICITY

The National Institute for Occupational Safety and Health (NIOSH) and the Occupational Safety and Health Administration (OSHA) recommend that formaldehyde be handled as a potential occupational carcinogen and that appropriate controls be used to reduce worker exposure. These recommendations are based primarily on a Chemical Industry Institute of Toxicology (CIIT) study in which laboratory rats and mice exposed to formaldehyde vapor developed nasal cancer, and are supported by a New York University study where rats exposed to a mixture of formaldehyde and hydrochloric acid vapors developed nasal cancer. Formaldehyde has also been shown to be a mutagen in several short-term laboratory studies. In addition to the carcinogenic potential, other adverse health effects caused by formaldehyde are described. NIOSH and OSHA request that producers and distributors of formaldehyde, and of substances and materials containing formaldehyde, give this information to their employees and customers, and that professional and trade associations and unions inform their members.

BACKGROUND

Formaldehyde is a colorless, flammable gas with a strong, pungent odor. It can form explosive mixtures with air and oxygen. As an important industrial chemical of major commercial use, formaldehyde is found throughout the environment. In outdoor air it can originate from many sources such as incinerators, photochemical smog, and engine exhaust. Atmospheric levels of formaldehyde have been reported to range from less than 0.005 ppm to 0.06 ppm near industrial outlets or in areas of heavy smog. Workers who smoke are exposed to additional levels of formaldehyde, since cigarette smoke contains as much as 40 ppm of formaldehyde by volume. Thus, an individual who smokes a pack of cigarettes a day would inhale 0.38 mg, whereas occupational exposure to formaldehyde at 3 ppm could result in a daily intake of 29.0 mg.

Production and Uses.—Formaldehyde is usually manufactured by reacting methanol vapor and air over a catalyst (chemical initiator). This results in formaldehyde containing trace amounts of methanol and formic acid. Formaldehyde is sold mainly as an aqueous (water-based) solution called formalin, which is 37% to 50% formaldehyde by weight. It is also used in its solid form as paraformaldehyde and s-trioxane. The U.S. produced about 6.4 billion pounds of aqueous formaldehyde in 1978. Most of this quantity was used domestically. The U.S. consumption of formaldehyde by the year 1983 will likely exceed 7.5 billion pounds. (See appendix for list of major producers of formaldehyde.)

Half of the formaldehyde produced is used to produce synthetic resins such as urea- and phenol-formaldehyde resins. These resins are used primarily as adhesives when making particleboard, fiberboard, and plywood. Urea-formaldehyde concentrates are used in various coating processes, in paper products, and in making foams for thermal insulation. The textile industry uses formaldehyde for producing crease-proof, crushproof, flame resistant, and shrinkproof fabrics. Acetal resins, made from formaldehyde, are used to mold plastic parts for automobiles, home appliances, hardware, and garden and sporting equipment. Formaldehyde is used in some medicines because it modifies and reduces the toxicity of viruses, venoms, and irritating pollens. The use of formaldehyde in embalming fluids is now required by all state laws.

The widespread use of formaldehyde is due to its high reactivity, colorless nature, purity in commercial form, and low cost. In making other chemcials, it can link similar and dissimilar molecules together. In the paper industry, formaldehyde and its derivatives impart wet strength, as well as shrink and grease resistance. Leather and fur can be tanned by formaldehyde. Formaldehyde is used in the photographic industry because it hardens and insolubilizes the gelatin surfaces of film and papers. The table below lists, in alphabetical order, various products made with or containing formaldehyde.

PRODUCT USES OF FORMALDEHYDE

Adhesives.
Cosmetics.
Deodorants.
Detergents.
Dyes.
Embalming fluids.
Explosives.
Fertilizers.
Fiberboard, plywood (indoor-outdoor), particle board.
Hardware, garden.
Filters.
Food.
Friction materials.
Fuels
Fungicides.
Insulation, foam and some others.
Intermediate chemicals.
Laminates.
Leathers, fur and hair.
Lubricants, synthetic.
Paints.
Paper.
Pharmaceuticals.
Plastic/moldings (automobile appliances, and sporting equipment)
Rubber.
Surface coatings.
Textiles.
Urethane resins.
Watersoftening Chemicals.

Occupational Exposures—During a 1972-74 survey, NIOSH estimated that 1.6 million workers were exposed to formaldehyde in more than 60 industrial categories. Of these workers, about 57,000 were exposed to formaldehyde 4 hours or more per day. Nearly one-third of the 1.6 million workers (507,200) were engaged in medical and other health services. Another one-third of them (457,200) were in the following industrial categories: chemicals and allied products, printing and publishing, paper and allied products, machinery (except electrical), retail general merchandise, automotive dealers and service stations, eating and drinking places (i.e., busboys, cooks, dishwashers, etc.), and personal services (such as funeral services and crematories, photographic studios, and dry-cleaning plants). Appendix I lists many of the occupational groups exposed to formaldehyde. However, not all workers in each occupational group are exposed to formaldehyde. Therefore it would be prudent for workers in these groups to check their work environment for formaldehyde or products which contain formaldehyde. Appendix II gives ranges of formaldehyde concentrations, by industry, that were found by NIOSH investigators during the past 10 years.

Exposure Standards—The U.S. Department of Labor, Occupational Safety and Health Administration (OSHA) standard for formaldehyde requires an 8-hour time-weighted average (TWA) concentration limit of 3 ppm, a ceiling concentration of 5 ppm, and an acceptable maximum peak above the ceiling concentration of 10 ppm for no more than a total of 30 minutes during an 8-hour shift.

In 1976, NIOSH recommended, based upon the irritant effects of formaldehyde, that employee exposure to formaldehyde in the occupational environment be controlled to a concentration no greater than 1.2 milligrams per cubic meter of air (1 ppm) for any 30-minute sampling period. The carcinogenic potential of formaldehyde was not known at that time, and therefore was not considered in developing the standard.

TOXICITY

Carcinogenicity/Mutagenicity — Evidence for the carcinogenicity of formaldehyde was first reported in October 8, 1979. Preliminary data from an ongoing inhalation study of rats and mice, sponsored by the Chemical Industry Institute of Toxicology (CIIT), indicated that for exposures of 15 ppm for 6 hours/day, 5 days/week for 16 months formaldehyde is carcinogenic in rats. Some rats had developed cancer by the 12th month. The study, conducted by Battelle Columbus Laboratories, follows a CIIT protocol using Fischer 344 rats and B6C3F1 mice, exposed in groups of 120 animals of each sex, at each of three exposure levels, plus controls, for 6 hours per day, 5 days per week. The study design calls for groups of animals of both species to be exposed concurrently to either 15, 6, or 2 ppm of formaldehyde vapor.

After 16 months of exposure at 15 ppm, three rats developed squamous cell carcinomas originating in the epithelium of the nasal turbinates. A fourth case of nasal squamous cell carcinoma developed in the group exposed to 6 ppm; however, this cancer appeared to have originated from a different site (i.e., from a layer of the skin on the nose rather than the nasal turbinates). In a second progress report (January 16, 1980), the CIIT stated that between the 16th and 18th month of exposure, a sharp increase in the number of cases of nasal cancer had been observed in rats exposed to 15 ppm formaldehyde. A total of 36 rats developed squamous cell carcinomas of the nasal turbinates after 18 months of exposure. Up to the 18th month sacrifice, no similar tumor had been observed in rats exposed to 2 or 6 ppm or in mice exposed to 2, 6 or 15 ppm formaldehyde.

The CIIT presented its latest interim report at the Third CIIT Conference on Toxicology (November 20 and 21, 1980). It has shown that after 24 months of exposure to 15 ppm formaldehyde, a total of 93 rats have developed squamous cell carcinomas of the nasal turbinates. Two rats have developed respiratory epithelial carcinomas. Furthermore, two rats exposed to 6 ppm and two mice exposed to 15 ppm formaldehyde have also developed squamous cell carcinomas of the nasal turbinates.

Lesions typical of an enzotic viral infection of the salivary gland, sialodacryoadenitis, were found in rats of all exposure groups at the 12th month necropsy. However, mice did not contract the disease. The possibility that the viral infection contributed to the carcinoma response in the CIIT study cannot be discounted, but it is considered unlikely for the following reasons: (1) mice which were not affected by the viral infection developed the nasal cancer; (2) the signs of infection occurred only for a short period of time during the 11th and 12th month of exposure and the first nasal cancers were detected at the 12th month. Therefore, the nasal cancer had probably already formed by the time of the infection.

Squamous cell carcinoma of the nasal turbinates rarely occurs spontaneously. In two recently completed inhalation studies sponsored by CIIT, involving a total of 1,920 Fischer 344 rates, and in two feeding studies involving 1,680 rats, no similar cancer was observed. At the National Cancer Institute, only two cases of nasal squamous cell carcinoma have been observed in 5,884 unexposed Fischer 344 rats.

The interim data from the CIIT in this study indicate that formaldehyde causes nasal cancer in rats. No factors now apparent would significantly alter the interpretation of the existing results.

Epidemiologic studies conducted to date do not permit a definitive evaluation of the carcinogenic risk of formaldehyde to humans.

Because of the concern of the federal regulatory and research agencies about the exposure of humans to formaldehyde, in January 1980, the Interagency Regulatory Liaison Group (IRLG) reviewed the formaldehyde carcinogenicity data in detail. As a result, the Consumer Product Safety Commission (CPSC) in cooperation with the IRLG agencies, convened a panel of scientists from eight federal agencies under the auspices of the National Toxicology Program to review health data related to formaldehyde. This panel has stated, "It is the conclusion of the Panel that it is prudent to regard formaldehyde as posing a carcinogenic risk to humans.

Most chemicals known to cause cancer are also capable of causing a change in the genetic material within a cell (mutation). Therefore, mutagenicity tests support the results of animal tests to determine carcinogenic potential. Formaldehyde has long been known to be mutagenic. Positive findings of the mutagenicity of formaldehyde have been reported in the following laboratory experimental systems: fruit flies (drosophila), grasshoppers, flowering plants, fungi, and bacteria.

A recent report (October 19, 1979) of the New York University (NYU), Institute of Environmental Medicine supports the CIIT evidence of formaldehyde being a carcinogen in experimental animals. One hundred male Sprague-Dawley rats were exposed to a mixture of formaldehyde and hydrogen chloride (HCl) at concentrations of 14.6 ppm and 10.6 ppm, respectively, for a total of 544 days, 6 hours/day over a period of 814 days. The most important finding was that 25 rats developed squamous cell carcinomas of the nasal cavity, and 2 developed benign papillomas (nonmalignant circumscribed tumor of skin cells) of the nasal cavity. The time from first exposure to death from these cancers ranged from 305 to 705 days (means: 549 days).

Formaldehyde and HCl can combine in the environment to form the chemical bis (chloromethyl) ether (BCME). BCME was first reported to cause cancer in rats by subcutaneous administration in 1969. Since then inhalation studies have shown that BCME causes lung and nasal cancer in rats. The most common type of nasal cancer was esthesioneuroepithelioma (tumor of the nerve tissue) and not squamous cell carcinoma.

It is not known if the nasal cancer observed in the NYU mixed exposure study was caused by formaldehyde, HCl, BCME, or a combination of these substances. However, formaldehyde seems the most probable etiologic agent for the following reasons. In the NYU study 27 rats developed nasal tumors, 25 of which were squamous cell carcinomas of the nasal cavity. This type of nasal cancer has been seen infrequently in the BCME inhalation studies and has never been observed to occur spontaneously in the more than 2,000 control animals at NYU over a period of many years. This is the same type of tumor as that produced by formaldehyde in the CIIT study at similar levels of exposure. Second, in the NYU study no rat developed lung cancer as was observed in the BCME inhalation studies. For example, of 40 cancers of the respiratory tract reported in one BCME inhalation study, 14 cancers (13 squamous cell, 1 adenocarcinoma) were from the lung and 26 cancers (17 esthesioneuroepithelioma, 1 squamous cell, and 8 others) were from the nasal cavity.

Other Health Effects—The first signs or symptoms noticed on exposure to formaldehyde at concentrations ranging from 0.1 to 5 ppm are burning of the eyes, tearing (lacrimation), and general irritation to the upper respiratory passages. Higher exposures (10 to 20 ppm) may produce coughing, tightening in the chest, a sense of pressure in the head, and palpitation of the heart. Exposures at 50–100 ppm and above can cause serious injury such as collection of fluid in the lungs (pulmonary edema), inflammation of the lungs (pneumonitis), or death.

In one report, five nurses working near an artificial kidney (hemodialysis) machine developed wheezing and recurrent episodes of productive cough. Attacks generally occurred in winter and often followed colds. The formaldehyde used to sterilize the machine was found to have caused this respiratory distress.

Dermatitis due to formaldehyde solutions or formaldehyde-containing resins is a well-recognized problem. After a few days of exposure, a worker may develop a sudden inflammatory (eczematous) reaction of the skin of the eyelids, face, neck, scrotum, and flexor surfaces of the arms. An eczematous reaction may also appear on the fingers, back of the hands, wrists, forearms, and parts of the body that are exposed to the rubbing of clothing. This sometimes occurs after years of repeated exposure.

RECOMMENDATION

Formaldehyde has induced a rare form of nasal cancer in both Fischer 344 rats and in B6C3F1 mice as reported in an ongoing study by the CIIT. In a second study by NYU, formaldehyde appears to have induced the same type of cancer in Sprgue-Dawley rats. Although humans and animals may differ in their susceptibility to specific chemical compounds, any substance that produces cancer in experimental animals should be considered a cancer risk to humans. Formaldehyde has also demonstrated mutagenic activity in several test systems. Although a substance cannot as yet be designated a potential occupational carcinogen based solely on results of mutagenicity tests, positive results in mutagenicity tests should be used as supporting evidence for identifying a potential occupational carcinogen.

Based on these results, NIOSH and OSHA recommended that formaldehyde be handled in the workplace as a potential occupational carcinogen. Safe levels of exposure to carcinogens have not been demonstrated,

but the probability of developing cancer should be reduced by decreasing exposure. An estimate of the extent of the cancer risk to workers exposed to various levels of formaldehyde at or below the current 3 ppm standard has not yet been determined. In the interim NIOSH and OSHA recommend that, as a prudent public health measure, engineering controls and stringent work practices be employed to reduce occupational exposure to the lowest feasible limit. The "Guidelines for Minimizing Employee Exposure to Formaldehyde" should be adapted to specific work situations.●

ALTERNATIVE TAX CUTS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, April 1, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, April 1, 1981, into the CONGRESSIONAL RECORD:

ALTERNATIVE TAX CUTS

In 1981, the tax cut looks like a sure bet. Both the President and Congress strongly support tax relief. Most legislators say that a tax cut will be on Mr. Reagan's desk by August. It is easy to predict that taxes will be cut, but hard to predict how.

The proposal that has received the most attention comes from the President himself. He proposes to cut individual income taxes by 10% a year for three years, starting July 1, 1981. While his would be a large tax cut by historical standards, it would only offset higher taxes resulting from inflation and from increases in the social security tax. Mr. Reagan also proposes to reduce business taxes by giving firms a faster write-off of capital expenditures. The new schedule would permit the depreciation of light vehicles and research equipment in three years, other equipment in five years, and buildings in ten years.

The President's plan of tax reduction has advantages. It would increase incentives to save and work and would correct distortions that occur in investment when taxes are very high. The problem facing Congress is that Mr. Reagan's five-year budgetary projection leaves no room for many other appealing tax cuts. Congress agrees with the President that a tax cut is necessary and it agrees more or less on the size, but it must decide whether the country would be better served by Mr. Reagan's tax cut or by some alternative.

Several of the alternatives would encourage thrift. One proposal is to raise the current exclusion of dividends and interest from $200 a year ($400 for couples) to a much higher level. Bills now pending in Congress would set that level as high as $10,000. Another proposal is to tax the income from savings and investment separately instead of adding it to earned income. In effect, dividends and interest would be displaced into lower tax brackets. There are still other proposals that would use the same principle to help certain groups of hard-pressed taxpayers. Some legislators want a tax exemption for interest on deposits that are lent out for the purchase of homes. Others favor a tax exemption for interest paid to the elderly.

Another way to boost today's low rate of personal saving is to increase both the attractiveness and the use of the "individual retirement account" (IRA), a long-term investment on which all taxes are deferred until the individual begins to make withdrawals in retirement. One idea is to hike the maximum annual tax-deductible contribution to an IRA from $1,500 to $2,000 or more. Another idea is to permit all workers to have IRA's even if their employers already offer them retirement benefits. Some members of Congress are carrying the concept of the IRA further. They are suggesting the creation of special accounts for specific purposes. One type of account would be used to pay for the education of the saver's child. Tax-deductible contributions of $1,000 per year would be permitted. Another type of account would be used for the purchase of a home. Annual tax-deductible contributions of $1,500 ($3,000 for couples) would be allowed for ten years.

Many popular tax cuts omitted by the President would address the very real needs of families. To ease the burden on married people, the tax "penalty" they pay might be abolished. To help families who own small farms or businesses, estate and gift taxes on inheritances valued at less than $500,000 might be eliminated. To assist families whose children are in school, a tax credit for tuition might be enacted. Other popular tax cuts would aid taxpayers in general. Tax rates might be partly or fully indexed to slow or stop the so-called "bracket creep" caused by inflation. The top tax rate on unearned income might be dropped from 70 percent to 50 percent. Taxpayers might be allowed an income tax credit for the social security taxes they pay or a deduction for charitable contributions whether or not they itemize. Tax rates might be lowered across the board, but in a way that would channel more benefits to middle- and lower-income taxpayers.

Some members of Congress believe that additional tax cuts are needed to get business moving again. One alternative is to cut taxes on capital gains. Another alternative is to do away with such taxes altogether if the capital gains are promptly reinvested in new businesses or if they result from the sale of a special class of stock issued to finance new plants or new equipment. Business could benefit from changes in the corporate tax. Each reduction of corporate tax rates by one percentage point would save business about $2 billion. A steeper graduation in the rates would strengthen small business, the sector which provides the bulk of innovation and employment in our economy. Still another suggestion is a tax credit, even a refundable one, to industries that are willing to invest in economically depressed areas. Such a credit might be appropriate as well to offset cost of equipment purchased to control pollution. Also, tax credits might be used to spur investment in industrial research.

Strong arguments can be made in support of each one of these tax cuts. If all (or even most) of them were enacted, government revenues would fall precipitously, the deficit would balloon, and inflation would accelerate. Congress must choose among the proposals. It should be guided in its choice not only by the intrinsic merits of each alternative, but also by the overall effect of the tax package on the nation's economy.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, April 2, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

APRIL 3

9:30 a.m.
Judiciary
Courts Subcommittee
To hold oversight hearings on the implementation of the Bankruptcy Reform Act.
2228 Dirksen Building

10:00 a.m.

HOUSE OF REPRESENTATIVES—*Thursday, April 2, 1981*

The House met at 11 a.m. and was called to order by the Speaker pro tempore, Mr. WRIGHT.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
April 1, 1981.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Thursday, April 2.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Reverend John R. Pearson, pastor, Emanuel Lutheran Church, Pleasantville, N.Y., offered the following prayer:

Let us rise up and build.—Nehemiah 2: 18.

God, we thank You that each morning is a new day of creation for each of us. We pray that Your Spirit will guide us in the dimensions of what we are continually building—a nation of varied individuals seeking unity of purpose, plans, and ideals.

Give us a sense of striving for the highest while being concerned for the lowly in spirit. Widen our spheres of concern and compassion. Bless our families, those who teach our children and grandchildren. Be with us in our individual needs for this day—physically if we are tired or ill, mentally for decisions that must be made that test the minds, and in our hearts and souls give us the awareness of Your presence, power, and peace.

We pray for the continuing recovery of our President, James Brady, Timothy McCarthy, Thomas Delahanty, and for all within the healing ministry of medicine for mankind. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

INTRODUCTION OF BILL ESTABLISHING ADVERSE WAGE RATE FOR NONIMMIGRANT ALIENS

(Mr. DAN DANIEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DAN DANIEL. Mr. Speaker, I have today introduced a bill to amend the Immigration and Nationality Act to repeal the authority under section 212 of that act to establish an adverse wage rate for nonimmigrant aliens brought into the United States for agricultural labor.

Under this authority, the Department of Labor has developed a procedure for determining each year the adverse effect wage rate for each of the States where large numbers of foreign workers are employed. On March 27 the Department announced the rates for 1981, while simultaneously proposing to withdraw the recommendation by the previous administration to establish a national rate.

Under the proposal made by the previous administration in the January 16 Federal Register, a new criteria would have been established which would have substantially raised the rates in Virginia and other parts of the country. The March 27 announcement would provide for a 30-day comment period on the proposal to withdraw the new criteria.

While the old criteria is preferable, it has been used to constantly increase the adverse effect rate to a point where it is in most States substantially above the minimum wage for American workers. In Virginia, for instance, this rate would be $3.81 for 1981, compared to $3.51 last year. This is 46 cents above the minimum wage and would work a hardship on many growers in our area.

The rate itself is secondary to the principle involved, since under this criteria the adverse effect wage rate obviously will increase at a faster pace than the minimum wage.

It is certainly not in the best interest of American workers to have a mechanism which would guarantee a continuing higher rate for foreign workers, to the degree which this mechanism now provides.

My bill would repeal the provisions under which the adverse effect wage rate is established. This adverse effect rate is not directly provided for by law but was developed through regulations over which this Congress has very little control.

If the adverse effect wage rate is abolished, there undoubtedly would arise some other means of assuring the protection of American workers, but in my opinion a much better method could be developed. It is inconsistent with fair play to have the minimum wage established by regulation rather than legislation.

By whatever means this differential in pay may later be determined, I feel that that determination should be made by Congress, rather than the Federal regulators within the Department of Labor.

The Richmond Times Dispatch, in its March 29 edition, had a very fine editorial which sets forth the difficulties with the present situation and I would like to include this with my remarks.

The editorial follows:

DONOVAN DISAPPOINTS

President Reagan's Department of Labor has taken a disappointing half-measure in response to a glaring economic injustice against many farmers, including quite a few tobacco and apple growers in Virginia. The new administration has ignored an opportunity to strike at the heart of a wholly unreasonable, inflationary policy.

Here is what has happened: Just before President Reagan took office, President Carter's labor secretary, Ray Marshall, promulgated the first nationwide "adverse effect wage rate," which would have required farmers to pay alien workers a minimum of $4.23 an hour—nearly a dollar an hour more than the federal minimum wage of $3.35. Before this order was issued, "adverse effect wage rates" were set state by state, and Virginia's last year was 41 cents above the minimum wage.

Soon after taking office, President Reagan ordered all new regulations, including Secretary Marshall's nationwide adverse effect rate, put on hold so that they could be reviewed. Now Mr. Reagan's labor secretary, Raymond Donovan, has rescinded Mr. Marshall's order and reaffirmed the status quo—the state-by-state wage adjustment scheme. He will require Virginia farmers to pay alien workers $3.81 an hour—46 cents more than the minimum wage.

If Mr. Donovan has been listening carefully to President Reagan, he should know his boss is fond of making the quip that "'status quo' is Latin for 'the mess we're in.'" Certainly this is so concerning the Labor Department's interference in the farm labor market. Even before Mr. Marshall issued his edict, the adverse effect wage scheme was discriminatory, inflationary and wholly out of touch with economic reality.

The adverse effect wage scheme is based on the premise that because visiting laborers from such places as Mexico and Jamaica are working on American farms, somehow they must be taking away jobs from American citizens. There is no basis in fact for this premise, since farmers are required to hire alien workers through state employment agencies such as the Virginia Employment Commission, and the state agencies in turn are required to offer the jobs to American citizens—even to seek them from other states—before contracting for any foreign

labor. Moreover, the farmers would be subject to severe penalties if they sought to pay anyone, American citizen or not, less than the legal minimum wage.

The adverse effect wage rate is one of those "cures for which there is no known illness," about which conservative politicians like to joke. It is no laughing matter, though, that its only significant effect in Virginia would be to require some tobacco and apple growers to spend hundreds of thousands of dollars more for labor without gaining anything in productivity.

As Mr. Reagan has been demonstrating in general through his commendable program of eliminating counterproductive economic regulations, no bureaucratic rule is sacrosanct, none is inscribed for the ages. Mr. Donovan should recognize his failure to be sufficiently thorough in reforming the noxious "adverse effect" rule, and he should act accordingly. Moreover, this issue is a proper concern for Congress. Congress would do well to take away labor secretaries' authority to hike minimum wages—an authority that they had arrogated to themselves in the first place without any express authorization by Congress. A minimum wage, if there should be any at all, should be established by legislators, not by administrators.

SHORT-TIME COMPENSATION: ALTERNATIVE TO LAYOFF AND TOOL FOR RECOVERY

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SCHROEDER. Mr. Speaker, today I introduce legislation with vision. We find our economy still mired in last year's jobless rate of 7.6 percent. We also find most forecasters predicting a sluggish economic recovery for the remainder of 1981 and early 1982. Chase Econometrics even sees us slumping to an 8.2-percent unemployment rate by the end of 1981 before recovering to only 7.5 percent by the end of 1982.

Even though the jobless rate remains high, the administration still wants to rely totally on the private sector to create and maintain jobs. To succeed in this monumental task, the private sector must quickly find tools to promote productivity and to foster better management-labor relations. At the same time it must find alternatives to layoffs now and during any future recessions.

Prolonged recessions, I remind you, do not inflict society equally. As taxpayers, we all share some burden through lost tax revenues and increased unemployment entitlement benefits. But clearly, the ones who suffer the most are the semi- and low-skilled worker, which usually translates to mean—minorities, women, and the young blue-collar worker.

One tool is readily available to foster present and future employment security but it has been used little in the United States. Today I introduce the Short Time Compensation Act of 1981, which encourages States to permit partial payment of unemployment compensation benefits to employees whose weekly hours are reduced by an employer-designed, union-approved work-sharing plan.

Under short time compensation (STC), workers would be paid their regular wages for the time they work and paid a prorated unemployment insurance benefit for the time they do not. To clarify, an employer faces a temporary slump in the market and must lay off 20 employees out of 100. Rather than completely lay off those 20, the employer could, by using a valid work-sharing plan, reduce the workweek for all 100 employees by 20 percent. They would then be eligible to collect unemployment insurance benefits for the hours per week they did not work. The total weekly earnings would approximate 90 percent of their regular weekly take home pay. In addition, health and most other benefits would remain intact.

The bill establishes a 3-year experimental program to encourage the use of STC by the States, which actually run the unemployment compensation program. The bill provides voluntary guidelines for implementation of the program and authorizes the Secretary of Labor to provide grants for States for start-up costs and program evaluation. It also directs the Department of Labor to undertake an STC demonstration project, to evaluate its effect on employment trends within the State, and to report to Congress. The program would sunset after 3 years.

This legislation has a low price tag, $10 million. Its benefits are many. The advantage to workers is obvious. It preserves their jobs and benefits. It prevents the traumatic experience of being laid off and faced with domestic financial obligations. The proposal also helps alleviate the last-hired, first-fired employment problem. This is good not only for the worker but for the local economy as well.

Employers, using STC, find a better way to survive slack periods in the market. STC means they can avoid the revised production schedules and bumping procedures that often mean significant reductions in productivity. STC also means they can avoid the high rehiring and retraining costs when business picks up again, especially in high technology industries. Although the employer still pays fringe benefit costs for the entire work force, STC in the long run is less expensive and promotes higher productivity.

The legislation also benefits unions. A number of unions already have worksharing provisions in their contracts but because of State law, the employees cannot receive unemployment compensation. STC also has potential for improving employer-employee relations. For example, a current California-run STC program significantly improved employer-employee relations, according to their recently published interim evaluation. Under my legislation, no STC plan may be used by the employer unless the appropriate union agrees to the conditions. Such an agreement promotes cooperation, not confrontation, when layoffs threaten.

My bill is also designed to protect the solvency of the unemployment insurance trust fund that each State keeps. To prevent fraud, employers will be required to certify that the use of STC is in lieu of an equivalent number of hours of full-time layoffs. Moreover, employers who use STC will be required to finance the STC benefits. Those who maintain a negative balance unemployment insurance account with the State employment office can be charged a surtax or be required to reimburse the trust fund for their utilization of STC.

STC is not an untested, fly-by-night scheme invented by mad scientists. It has been used for decades in Western Europe as an important tool to combat layoffs. In the last recession, more than 770,000 German workers received partial compensation, which reduced the German unemployment rate 1 percent.

Since 1978, when California began their version of short-time compensation, several other States have become interested in the idea. The California bill was originally introduced by California Senator William Greene, chairman of the Industrial Relations Committee, in the aftermath of proposition 13's passage. Last year the program was extended by the State legislature. Next month, California will host a conference in San Francisco for people interested in the short-time compensation idea. The other States interested include Arizona, which recently passed their own version, Oregon, New York, New Jersey, Rhode Island, Pennsylvania, and Maine.

Since some States are interested in the idea independently, people may ask why Federal legislation is needed at all. Congress should be concerned about unemployment, which is a problem national in scope. It must not expect the States to solve weighty national economic problems. Ideally, the Federal Government should work with the States, to help them experiment with different ways to solve problems, and to evaluate these experiments for future national economic policy. The Short Time Compensation Act of 1981 seeks to promote cooperative federalism in finding solutions to the problems of cyclical unemployment.

Mr. Speaker, in the days to come, I will submit for the RECORD material about my bill that you may find informative.

EXPEDITING PRODUCTION LOANS TO AMERICAN FARMERS

(Mr. WHITTEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WHITTEN. Mr. Speaker, I have today called on the Department of Agriculture to expedite Farmers Home Administration production loans to eligible American farmers.

After approval, it is now taking from 7 to 8 weeks for the checks to be issued by the central finance office in St. Louis, Mo.

What I have asked the Secretary to do is permit the local office or State office to issue a letter stating that, except for the administrative procedure of issuing the check, the application is approved so as to enable the farmer to obtain funds from local sources to get started farming now, for 7 or 8 weeks from now is too late.

The Under Secretary of Agriculture assured me that he recognized the problem and would see what could be done.

STATUS REPORT ON COST-SAVING LEGISLATION

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PANETTA. Mr. Speaker, as chairman of the Reconciliation Task Force of the Budget Committee, I am putting in the RECORD for the convenience of the chairmen and members of the various committees a status report on the submission of the administration's cost-saving legislation. In summary, of the 77 bills the administration plans to submit to the House, 38 have been received. While the committees are proceeding to consider the general recommendations of the administration, it is essential that the specific proposals be provided as soon as possible in order for the committees to respond in a careful and thoughful manner.

The following is a list by committee of legislation received, proposals that have not been transmitted, and that target date provided by the administration for delivery of those remaining 39 bills:

ADMINISTRATION COST-SAVING LEGISLATION—HOUSE STATUS REPORT

House committee/Number of bills	Target date for transmittal	Referred to committee
Agriculture Committee/10 bills:		
1. FmHA water and sewer and community facility loans	Sent Mar. 10	Mar. 17.
2. User charges for grading and classifying cotton, tobacco, and naval store and for warehouse inspection	Sent Mar. 10	Mar. 17.
3. User charges for supervision of grain inspection	Sent Mar. 10	Mar. 17.
4. REA electrical distribution facilities loans	Sent Mar. 10	Mar. 17.
5. Food stamp program	Apr. 3	
6. Dairy support price indexing	Sent Feb. 13	Feb. 19.
7. Interest rates on FmHA farmownership loans and emergency loss loans, and SBA disaster loans (Small Business Committee)	Sent Mar. 25	Mar. 26.
8. Interest rates on CCC farmer-held reserve loans	Sent Mar. 20	Mar. 24.
9. Nutrition block grant for Puerto Rico (Education and Labor)	Apr. 6	
10. Aid to land grant colleges	Mar. 30	
Armed Services/2 bills:		
1. Elimination of dual compensation	Mar. 26	
2. National stockpile sales	Sent Mar. 19	Mar. 23.
Banking, Finance, and Urban Affairs/4 bills:		
1. Termination of National Consumer Cooperative Bank	Sent Mar. 20	Mar. 23.
2. HUD-community development support assistance	Apr. 6	
3. HUD-subsidized housing rent contribution	Apr. 6	Mar. 24.
4. Interest rate on FmHA housing loans	Sent Mar. 23	Mar. 24.
District of Columbia Committee/1 bill:		
1. D.C. court support (H.R. 1253, introduced Jan. 23 by Fauntroy—administration will propose amendments)		
Educaton and Labor/9 bills:		
1. Higher education amendments	Signed Mar. 11, sent Mar. 20	Mar. 23.
2. PHS Commissioned Corps bonuses	Mar. 20	
3. Education block grant	Apr. 6	
4. Social services block grant (Ways and Means Committee)	Apr. 3	
5. Federal employees injury compensation program	Apr. 17	
6. Black lung program	Schedule uncertain	
7. Impact aid	Signed Mar. 11, sent Mar. 20	Mar. 23.
8. School lunch and child nutrition	Mar. 30	
9. Nutrition block grant for Puerto Rico	Apr. 6	
Energy and Commerce Committee/12 bills:		
1. Medicaid cap and medicaid/medicare amendments and PSRO's	Apr. 10	
2. Medical services for merchant seamen	Mar. 27	
3. PHS Commissioned Corps bonuses and National Research Services Awards	Apr. 10	
4. Repeal of 1981 benefit increase	Sent Mar. 10	Mar. 11.
5. Rail pension assurance amendments (Ways and Means Committee)	Sent Mar. 10	Mar. 11.
6. Health services block grants (2 bills)	Apr. 2	
7. Health professions education	Apr. 16	
8. Health Maintenance Organizations	Apr. 10	
9. Solid Waste Act amendments	Signed Mar. 11, sent Mar. 19	Mar. 23.
10. Amtrak subsidies	Sent Mar. 17	Mar. 18.
11. Conrail subsidies	May 1	
12. Bankruptcy trustees, and U.S. Marshals service of process (Judiciary, Foreign Affairs, and Intelligence)	Sent Mar. 19	Mar. 23.
Foreign Affairs/3 bills:		
1. Foreign service pay for domestic workers (Post Office Committee)	Mar. 31	
2. Passport duration and fees (included in State Department authorization bill for fiscal year 1982 and 1983)	Sent Mar. 11	Mar. 12.
3. Bankruptcy trustees, and U.S. Marshals service of process (Energy and Commerce, Judiciary, and Intelligence)	Sent Mar. 19	Mar. 23.
Permanent Select Committee on Intelligence/1 bill:		
1. Bankruptcy trustees, and U.S. Marshals service of process (Energy and Commerce, Judiciary, and Foreign Affairs Committees)	Sent Mar. 19	Mar. 23.
Judiciary Committee/2 bills:		
1. Bankruptcy trustees, and U.S. Marshals service of process (Energy and Commerce, Foreign Affairs, and Intelligence Committees)	Sent Mar. 19	Mar. 23.
2. INS overtime pay	Apr. 6	
Merchant Marine and Fisheries/2 bills:		
1. Coast Guard user fees	Sent Mar. 13	Mar. 18.
2. Deepwater port user charges (request pending for joint referral Public Works and Transportation Committee)	Sent Mar. 25	
Post Office and Civil Service Committee/4 bills:		
1. OPM compensation reform	Mar. 25	Mar. 26.
2. Annual indexation of civil service retirement annuities	Sent Mar. 17	Mar. 17.
3. Foreign Service pay for domestic workers (Foreign Affairs Committee)	Mar. 31	
4. Intergovernmental Personnel Act	Apr. 2	
Public Works and Transportation/8 bills:		
1. Airline subsidy program reduction	Apr. 2	
2. Airport construction grants, aviation taxes and trust (Ways and Means Committee and Science and Technology Committee)	Sent Mar. 19	Mar. 25.
3. Inland waterway user charge (Ways and Means Committee)	Sent Mar. 25	Mar. 25.
4. Municipal waste water construction grants reform	Sent Mar. 27	
5. FEMA–Disaster relief	Sent Mar. 19	Mar. 23.
6. Highway Construction and safety grant (Ways and Means Committee)	Sent Mar. 17	Mar. 18.
7. Mass transit programs	Sent Mar. 17	Mar. 18.
8. Deepwater port user charges (Merchant Marine requesting joint referral)	Sent Mar. 25	
Science and Technology Committee/1 bill:		
1. Airport construction grants, aviation taxes, and trust (Public Works and Transportation, and Ways and Means Committee)	Sent Mar. 19	Mar. 25.

ADMINISTRATION COST-SAVING LEGISLATION—HOUSE STATUS REPORT—Continued

House committee/Number of bills	Target date for transmittal	Referred to committee
Small Business Committee/2 bills:		
1. Business loans	Sent Mar. 23	Mar. 24.
2. Disaster loan programs (part of bill covering FmHA farm ownership and emergency loss loans) (Agriculture Committee)	Mar. 26	
Veterans' Affairs Committee/4 bills:		
1. GI bill: end payments for general flight training and correspondence courses	Sent Mar. 16	
2. Termination of class II dental treatment	Sent Mar. 16	
3. Reduction in beneficiary travel reimbursement	Sent Mar. 23	Mar. 24.
4. Physician and dentist bonuses	Sent Mar. 23	Mar. 24.
Ways and Means Committee/12 bills:		
1. Medicaid cap and Medicaid/Medicare amendments	Apr. 10	
2. Social Security; major reforms and other proposals	Apr. 3	
3. AFDC and child support enforcement, Supplemental Security Income, and assistance to immigrants	Apr. 3	
4. Trade adjustment assistance	Mar. 30	
5. Unemployment insurance extended benefits and work test and unemployment	Sent Mar. 10	Mar. 12.
6. Inland waterway user charges (Pubic Works Committee)	Sent Mar. 25	Mar. 25.
7. Hardship assistance block grant	Apr. 3	
8. Airport construction grants, avaition taxes and trust (Public Works Committee)	Mar. 18	
9. Highway construction and safety grants (Public Works Committee)	Sent Mar. 17	Mar. 18.
10 Customs Service overtime pay	Apr. 6	
11. Social services block grant (Education and Labor Resources)	Apr. 3	
12. Rail Pension assurance amendments (Energy and Commerce Committee)	Sent Mar. 10	Mar. 11.

FISCAL YEAR 1982 DEPARTMENT OF DEFENSE AUTHORIZATION LEGISLATION

(Mr. PRICE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRICE. Mr. Speaker, along with the ranking member of the Armed Services Committee, Mr. DICKINSON, I have introduced the annual Department of Defense legislative proposal to authorize appropriations for fiscal year 1982 for the procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, for research, development, test, and evaluation, and for operation and maintenance, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, and for other purposes.

Each year, as representatives of the committee, I, as chairman, join with the ranking member in introducing authorization legislation, by request, as has been the custom for many years. In so doing, we are able to place before the Armed Services Committee and the Congress, the authorization proposal of the administration which is used as a vehicle for consideration and final reporting to the House. As my colleagues are well aware, it is vitally important that this year particularly, the committee devote its undivided attention to the extremely important question of how to best allocate additional resources to enhance our national defense posture.

In pursuing that effort during this critical year, and in the interest of expediency due to the understandable legislative delays caused by the Presidential transition process, we have amended section 805 with regard to the Vinson-Trammell Act to provide for an extension of the moratorium on applicable provisions rather than outright repeal of the act, as was proposed by the Secretary of Defense in the original legislative submission. By so doing, we hope to report the fiscal year 1982 authorization legislation in a timely fashion and also provide an opportunity to consider carefully and separately all of the important factors associated with the existing Vinson-Trammell provisions which set limitations on excess profits in the defense industry.

INTRODUCTION OF BAIL REFORM ACT AMENDMENTS

(Mr. SENSENBRENNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SENSENBRENNER. Mr. Speaker, today I am introducing legislation to modify the Bail Reform Act of 1966. This legislation would allow a Federal magistrate, in a noncapital offense to consider factors other than a defendant's ties to the community when making a determination as to whether a defendant should be released on bail.

The need for this legislation was again demonstrated in the case of John W. Hinckley, Jr., the accused assailant of President Reagan who is currently being held without bail.

Under present law, a Federal magistrate may consider the safety of the community and of witnesses involved in the crime only when the defendant is accused of a capital offense. In noncapital cases, the law limits the magistrate's consideration to the defendant's ties to the community. No opportunity is given for him to consider the defendant's criminal record, the potential for recidivism, the likelihood of reprisal against witnesses who might testify against him, or the continued safety of the community. Judges and magistrates get around this provision be setting high bail.

In 1975, the sixth circuit, in *United States* v. *Wind*, 527 F.2d. 672, held that any judicial officer has the inherent right to "consider evidence that the defendant has threatened witnesses and is a danger to the community in determining whether the defendant should be released" on bail. Unfortunately, the Wind decision is not yet universal law in the Federal system.

On February 8, 1981, Chief Justice Warren E. Burger criticized the current bail laws, saying that "the crucial element of future dangerousness, based on a combination of particular crime, the past record, and the evidence before the court" should be considered in setting bail.

Legislation similar to mine has been introduced in past Congresses. Each time it has been referred to the Judiciary Subcommittee on Courts, Civil Liberties, and the Administration of Justice, chaired by my colleague from Wisconsin (Mr. KASTENMEIER). Despite the fact that it has at times been cosponsored by as many as six or seven members of the Judiciary Committee, no substantive progress has ever been made.

Even the Washington Post, in editorials published on August 5, 1977, and earlier on March 15, 1977, favored review of the 1966 act. Yet nothing is done.

Fortunately Mr. Hinckley was not a resident of this community and could be detained under the Bail Reform Act. Otherwise since no one died, and therefore no capital offense presently exists, provisions of that act could mandate the release of John W. Hinckley, Jr.

FAMILY ENTERPRISE PRESERVATION ACT

(Mr. ROBERTS of Kansas asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ROBERTS of Kansas. Mr. Speaker, families in the First District of Kansas and across our Nation work hard to build their farms and small businesses. Small businesses are often total family efforts, and this is especially true of family farm businesses.

Current estate tax provisions do not accept family investments in a busi-

ness unless monetary contributions are made or the decedent's family can show "material participation" in the operation of the farm or business. Thus, estate taxes are levied against the decedent's spouse on one change of management, and heirs on the next.

Often too late in life, the decedent's spouse and family learn that the property in which they have invested much of their lives will be lost upon the death of a husband or father because the farm or business has to be sold to pay Federal estate taxes. Farmers face a unique problem in that approximately 95 percent of farm assets are tied up in production. This lack of liquidity, coupled with rapid increases in farmland values due to inflation, has often forced the sale of all or part of farm real estate to pay estate taxes.

America's family businesses are the backbone of our capitalist system. The Nation's family farms represent the greatest food and fiber producing system in the world. We will all share in the benefits of eliminating this form of double taxation as family businesses are able to serve us in this generation and serve our children in the next.

To end this flow of money from productive assets into the U.S. Treasury, I join my esteemed colleague from Missouri in introducing the Family Enterprise Preservation Act. I wish to point out this legislation is identical to that introduced in the other body by my distinguished colleague from Kansas, Senator NANCY LANDON KASSEBAUM.

LEGISLATION TO EXTEND CAPITAL PUNISHMENT TO ASSASSINATION ATTEMPTS

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, today I am introducing a bill to provide the same penalties for attempting to murder the President as are now provided for actually taking the President's life in certain circumstances.

The only change in present law would be to allow the possibility of capital punishment for an attempt on the President's life. Under this legislation, capital punishment could be imposed if such an attempted killing, had it been successful, would have been murder in the first degree.

In any criminal trial under this legislation, the accused would, of course, retain his full rights to a fair and just proceeding. Any defenses available to him, including insanity, would still remain.

However, if a person was convicted for attempted assassination, a jury would be allowed to render a death sentence.

I believe this legislation is fully warranted given the unique and pivotal role of the President in our Government.

Moreover, I do not believe this country feels much sympathy for the would-be assassin. And I believe that the unsuccessful assassin can lay little claim to mercy because his aim was not true.

I invite my colleagues in the Congress to cosponsor this important alteration of the law.

FEDERAL ESTATE TAX REVISIONS WOULD LESSEN INHERITANCE TAXES

(Mr. ROBERTS of South Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROBERTS of South Dakota. Mr. Speaker, today I am introducing legislation to revise the exemptions and rates of the Federal estate tax to reduce the impact that skyrocketing inflation has had on this tax.

We have come to the point that—because of the sharp bite of inheritance taxes on the modest-income family enterprise—only the rich can afford to die, and only the rich can afford to buy.

Inflation has driven up the value of the small family farm or business drastically in recent years, yet inheritance tax rates are based essentially on 1939 land and property values.

Across the country, small businesses and small farms are being sold by families to larger enterprises, because a wife or children who have inherited a farm or business simply cannot afford to pay the Federal estate taxes which result from a loved-one's death.

Mr. Speaker, the average American works all his life to build a dream and an enterprise that he can pass on to his children. That dream is a way of life in America—it is the family-owned and operated enterprise.

Unless we change the inheritance taxes, however, it will soon become a pipe dream.

THE FATE OF JURI KUKK, ESTONIAN DISSIDENT

(Mrs. FENWICK asked and was given permission to address the House for 1 minute.)

Mrs. FENWICK. Mr. Speaker, I hardly know how to address the House today, because I have brought this matter before to the attention of the House and, I hope, to an even wider audience. I think we were all struck by the headline in Sunday's paper: "Estonian Dissident, Age 40, Said To Die in Soviet Camp."

This is a man named Juri Kukk. I have brought his name to the attention of the House on February 24. He was an Estonian who was arrested and sent to a psychiatric hospital for the "terrible crime" of leaving the Communist Party. He was a teacher, and that is what he did. Then he was moved from that psychiatric prison or psychiatric hospital—it was really a prison—to a very severe labor camp near Murmansk, where he died. His wife was notified, and the story appeared in the New York Times on Sunday.

What do we say about these people? One after another is taken up for no crime. This would certainly not be a crime in any other civilized country in the world. This is an Estonian, a man whose country was severed by a pact between Nazi Germany and the Soviet Union, a country overrun by the imperial armies of the Soviet Union.

Mr. Speaker, I do not know what we can say about these people, but one thing is sure: We should not let their troubles and their sufferings go in silence, and neither should we fail to record their deaths.

□ 1115

AMENDING MINERAL LEASING ACT OF 1976

(Mr. HAMMERSCHMIDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAMMERSCHMIDT. Mr. Speaker, today, I have joined with my distinguished colleagues from Arkansas, Senator BUMPERS and Senator PRYOR, in introducing legislation which would amend the Mineral Leasing Act—acquired lands—of 1976.

The constituents of those Members who have in their districts military installations on acquired lands have a critical interest in the outcome of this legislation which corrects an oversight and an inequity created by the Mineral Leasing Act of 1976. It appears that when the law was changed in 1976 to permit mineral leasing on military reservations a change should have also been made in the Mineral Leasing Act to permit a sharing of proceeds from leasing for oil and gas exploration on military reservations on acquired lands with the States and local governments where the leasing occurs.

We are all aware that having a military installation in a community—with its tax immunity—places a burden on those local governments where the military reservation is located. Over the years, I have supported programs aimed at compensating States and local jurisdictions for the tax moneys lost due to their having a military installation in their jurisdiction. However, as you know, in the majority of instances the revenues received under these programs do not begin to match the taxes which would be received if the property were held in private ownership.

As we all can recognize, local people will often bear relatively severe bur-

dens as a result of development of minerals which will be of national benefit in meeting our energy needs. These impacts can include such things as a massive infusion of new workers with the attendant demand for increased services, which can strain the abilities of the local community to support them. In the past, Congress has recognized this problem by allowing States to receive 50 percent of the proceeds from mineral leasing on public domain lands within their borders. That same rationale should obviously pertain to allow States with acquired land for military reservations to receive similar benefits.

In my own district, the Bureau of Land Management recently announced a recordbreaking oil and gas lease sale totaling over $43 million on lands within the Fort Chaffee military reservation in Arkansas. There is little question but that this is just a first of many such actions which may well eventually affect many communities across our Nation.

At a time when local governments are being asked to pick up a larger share of ongoing programs, they should not concurrently be denied the opportunity of benefiting from those proceeds which are derived from mineral leasing on military reservations located in their jurisdiction.

Briefly, let me summarize that the legislation introduced today will allow States to receive 50 percent of all rents, bonuses, and royalties received from mineral leasing on military reservations. The remaining portion will be divided as follows: 40 percent into the reclamation fund and 10 percent to the general fund of the Treasury. Please note that this is the exact same distribution formula provided for mineral leasing on public domain lands (30 U.S.C. 191).

Furthermore, I commend for the review of my colleagues the comprehensive statement of Senator BUMPERS which will appear in today's RECORD detailing the legislative history of the Mineral Leasing Act and its direct relationship to the bills we have just introduced.

A copy of the bill follows:

H.R. 2990

A bill to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 of the Act of August 7, 1947 (61 Stat. 915; 30 U.S.C. 355) is amended by adding the following at the end thereof: "Notwithstanding the preceding provisions of this section, all receipts derived from leases on lands acquired for military or naval purposes, except the Naval Petroleum Reserves and National Oil Shale Reserves, shall be paid into the Treasury of the United States and disposed of in the same manner as provided under section 35 of the Act of February 25, 1920 (41 Stat. 450; 30 U.S.C. 191), in the case of receipts from sales, bonuses, royalties, and rentals of the public lands under that Act."

SEC. 2. The amendment made by this first section of this Act shall take effect with respect to leases entered into after January 1, 1981.●

JOINT RESOLUTION TO COMMEND AGENT TIMOTHY J. McCARTHY AND OFFICER THOMAS DELAHANTY

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, in his inaugural address on January 20, President Ronald Reagan reassured us that there are still plenty of heroes in America.

Well, who could argue with that after witnessing the actions of all those involved in saving the President's life on Monday.

Today I am introducing a joint resolution which commends the courageous actions of Secret Service Agent Timothy J. McCarthy and Washington Police Officer Thomas Delahanty. They placed their lives on the line to save the President.

My resolution also commends President Reagan for facing such a grave personal crisis with such bravery and good humor. His grace under pressure has been the true mark of a great leader. And it also commends White House Press Secretary James Brady for his tenacious will to live against all odds.

Mr. Speaker, these are four brave Americans and I urge all my colleagues to join me in cosponsoring this resolution.

LEGISLATIVE PROGRAM

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUNDERSON. Mr. Speaker, I take this time for the purpose of asking the distinguished majority whip the schedule for next week.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Washington.

Mr. FOLEY. I thank the gentleman for yielding.

The program for next week is as follows:

We will when adjourning today propose to adjourn until Monday noon. We have a Consent Calendar with, I believe, two bills eligible on Monday, but no other suspensions or other legislation will be taken up on Monday.

On Tuesday the House will meet at noon to consider House Joint Resolution 202, the African Refugee Relief Day and three bills under suspension of the rules:

H.R. 2884, release of ICA film "In Their Own Words";

House Concurrent Resolution 50, treatment by the Soviet Union of Dr. Viktor Brailovsky and his family; and

House Concurrent Resolution 55, International Year of Disabled Persons.

The House will meet at 3 p.m. on Wednesday, April 8, in pro forma session; at 11:00 a.m. on Thursday, April 9, in pro forma session; and at 11 a.m. on Friday, in pro forma session.

When the House adjourns on Friday, April 10, it will adjourn until noon on Monday, April 27, for the Easter work period. Any further program will be announced later.

Mr. SENSENBRENNER. Mr. Speaker, will the gentlemen yield?

Mr. GUNDERSON. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. I thank the gentleman for yielding. It is my understanding that the minority leadership was not informed of the proposed recess of the House of Representatives the week after next. Could the gentleman from Washington (Mr. FOLEY) kindly enlighten us on why the schedule has been changed without consultation of the minority leader?

Mr. FOLEY. If the gentleman will yield, I assumed that the minority leader was consulted, and I would be glad to consult with him at this moment. He has just arrived on the floor. We had received an indication that the Senate was intending to adjourn for a 2-week period and that the Senate Easter work period would begin on Friday, the 10th. The budget committee will be meeting next week, but we assume that such a schedule would not meet with the opposition of the minority.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. GUNDERSON. I yield to the minority leader.

Mr. MICHEL. I thank the gentleman for yielding.

I just simply want to respond to the majority whip that the gentlemen from Illinois was not apprised that this was what we were intending to do. There were rumors but no official word. My particular view would be that I would want to make absolutely sure that the Budget Committee was meeting and the Appropriations Committee and whatever committees were meeting, and that we not run into the kind of situation here where we set for ourselves a time schedule for movement on the program, and then have a significant lapse here that would be used to justify delaying that program. I hope that is not the case. If the committees are well enough along that is well and good. The gentleman well knows that I have not been critical of our not having anything here on the floor because it is meaningless unless

the committees are doing what they have to do beforehand.

The SPEAKER pro tempore (Mr. WRIGHT). May the Chair make a declaration which might elucidate. The Chair has been advised by the chairman of the House Committee on the Budget that it is the full expectation of the Committee on the Budget to complete the markup on the budget for fiscal 1982 as well as the revised budget for fiscal 1981 and the reconciliation portion of that budget resolution by Friday, April 10. On that assumption it was believed that it would be useful for the House to follow the request of the majority leader of the Senate and to have a home district work period that would be in concurrence with that of the other body.

Let the Chair advise the gentleman, the distinguished minority leader, that if there should occur slippage which makes it desirable or necessary for the House Committee on the Budget to be in session the following week, then these plans would perforce be changed. But it is the full anticipation, the Chair is advised, that the Committee on the Budget will complete its labors and, thus, bring the House to a point some 5 days ahead of its announced schedule on the President's budget.

Mr. MICHEL. If the gentleman will yield, if I might be permitted to respond to the Chair, I know there have been Members who from time to time have been rather critical of the slowness of some of the legislative pieces to come up here to the Congress from the administration, and if those come within the period that we are discussing here and action is delayed rather than our proceeding as we normally would, then the gentleman from Illinois would have to be critical of taking that much time. But, as I indicated earlier, if we are going to continue to meet our target dates, then the gentleman from Illinois has no objection.

But I want to make absolutely sure that there is no slippage.

Mr. FOLEY. Will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Washington.

Mr. FOLEY. I think the record should show that the agreed time for the Easter work period was the week following Easter week, the traditional Easter week. By agreeing with the Senate schedule, we would be moving that up to the close of business on Friday, April 10. Certainly traditionally the House does not meet during the holy days of Holy Thursday and Good Friday and the following week. In any case, the plan was to adjourn by midweek, and we are technically dealing with about 2, or at the most 3, legislative days. With the assurances of the Speaker pro tempore that if there should be a need to provide those legislative days for the purpose of committees meeting to consider the program, it could be reconsidered.

We are moving expeditiously with the consideration of the budget, and the committees are meeting to consider various legislative items.

As the gentleman did say, there is the problem that we have of inadequate response in some cases—I think it is fair to call it that—from the administration with respect to specific recommendations.

I have just left a subcommittee meeting of the Committee on Agriculture in which we do not yet have the draft farm bill. It is promised for tomorrow, but we are also told that it will probably not come with any clearance from the Office of Management and Budget. So in this and many other committees, postponement of testimony by Cabinet officers and failure to provide legislative vehicles for the consideration of the committees is the one area where committees are being frustrated on prompt legislative action. I think, as the gentleman says and explains, he would agree why we do not have a heavier schedule.

I might add that there is placed in the RECORD today a statement by the gentleman from California (Mr. PANETTA) which outlines those reports and legislative proposals that have not reached the Congress, including those which are beyond the administration's own target date.

Mr. SENSENBRENNER. Will my colleague from Wisconsin yield again?

Mr. GUNDERSON. I yield to the gentleman.

Mr. SENSENBRENNER. I thank the gentleman for yielding. I am wondering if the majority leadership has any plans to schedule Senate bill 840 or similar legislation which would extend the authority of the Department of Justice to perform certain functions, including those that involve the investigation into the murder of the black children in Atlanta. The distinguished majority whip may recall that yesterday the gentleman from Illinois (Mr. MCCLORY) pointed out that the other body had passed this legislation, and unless we act on this legislation prior to April 5, the authority of the Department of Justice in certain areas would expire.

Mr. FOLEY. If the gentleman would yield, I am advised that the Committee on the Judiciary intends to take up that legislation early next week and expects a very substantial consensus in the committee from both sides of the aisle with respect to it and believes that it will be moved promptly. As a matter of fact, pending its movement in the committee, it could be considered for some form of consideration by the House, but we do not yet have any action by the committee. I understand it is being slated for early next week.

Mr. SENSENBRENNER. Will the gentleman from Wisconsin yield again?

Mr. GUNDERSON. I yield to the gentleman.

Mr. SENSENBRENNER. Would it be the intention of the majority leadership to amend the program for next week should the Committee on the Judiciary act promptly on this legislation so that there would not be an additional 2-week hiatus in the Justice Department's performance of its functions?

Mr. FOLEY. If the gentleman will yield, I certainly think that that is a matter that should be discussed next week, at the conclusion of the committee's action, with the committee leadership on both sides of the aisle. It certainly would be a matter of consideration.

Mr. SENSENBRENNER. I thank the gentleman.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from New York.

Mr. SOLOMON. I thank the gentleman for yielding.

There seems to be some conflicting views with the honorable majority leader and the gentleman from Washington (Mr. FOLEY). The majority leader, Mr. WRIGHT, has just said that perhaps we will be 5 days ahead of schedule. According to the press conference called by the Speaker and the majority leader, we were scheduled to take up final consideration on the budget on the floor on the 28th, 29th, and 30th of April. Now the gentleman from Washington (Mr. FOLEY) is saying that there has been some delay by the administration, and that may very well be true, but if there is, then it seems to be that it is rather ridiculous for us to walk out of here on April 10. It seems Mr. FOLEY is arguing to stay here because they are not going to have the information that is going to be necessary to meet and be back here for final consideration on this budget on April 28. I will ask which one of the gentlemen is right.

Mr. FOLEY. If the gentleman from Wisconsin will yield, the gentleman from New York (Mr. SOLOMON) has confused my remarks. I was not speaking with respect to Budget Committee action that is being undertaken by the Committee on the Budget. Next week we expect the Committee on the Budget will report that resolution by the end of next week. I was speaking about the matter of authorization committees' business which has been, I must say, in many cases, delayed by the inability of the committees to have the administration's recommendations in a number of areas. I think this is a fact that is well recognized. I know we all appreciate that a new administration coming into office, with

new appointments, has to be given reasonable time to consider the proposals it wishes to make to the Congress. I would be the last one to suggest that an administration ought to rush hurly-burly with ill-considered recommendations to the Hill, but I also think it is unreasonable to expect the Congress when it is acting out of comity to this administration and not undertaking legislation without giving it the opportunity to present its views to also be criticized for not acting.

We can act before the committees receive the recommendations of the administration, but I think that would be unwise legislation, and personally I would be opposed to doing it.

I just want to say on the record that we have had a light legislative schedule. That is not because the committees are not willing to act; it is because they have been waiting to receive the administration's recommendations in key areas. We are going to have, all Members should be advised and the public advised, very heavy legislative schedules at the first opportunity we have to report those bills to the floor.

□ 1130

Mr. SOLOMON. Mr. Speaker, would the gentleman from Wisconsin yield further?

Mr. GUNDERSON. I yield to the gentleman from New York.

Mr. SOLOMON. Then I assume both gentlemen are in agreement and we can assume that we will be taking up floor consideration on the budget on the week that we return on the 28th, 29th, or 30th; is that what the majority leader understands?

Mr. FOLEY. We expect to take up the budget resolution very promptly as it is concluded by the Committee on the Budget and that is the hope and expectation by the leadership.

Mr. GUNDERSON. Mr. Speaker, I thank the distinguished majority leader.

ADJOURNMENT FROM THURSDAY, APRIL 2, 1981, TO MONDAY, APRIL 6, 1981

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

DOE AUTHORIZATION FOR FISCAL YEAR 1982

(Mr. OTTINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OTTINGER. Mr. Speaker, today, along with the gentleman from Michigan, JOHN DINGELL, chairman of the Energy and Commerce Committee, and the gentleman from Indiana, PHILIP SHARP, chairman of the Fossil and Synthetic Fuels Subcommittee, I am introducing Department of Energy Authorization legislation for fiscal year 1982. The legislation is based upon an alternative energy budget, which I have developed along with Mr. SHARP. This alternative budget does not truly reflect my priorities, nor do I expect it to totally please anyone. Under the pain of current budget strictures, the energy programs each of us feels would be most advantageous for the country are going to have to be cut. We have suggested, but not specified, where the cuts might be made.

We have endeavored to develop a budget which is below the Administration's request, but better reflects the balance in energy programs developed with care by Congress, largely on a bipartisan basis, over the years. We took as the basis for our calculation last year's fiscal year 1981 appropriation and reduced each major category by 40 percent. Although I might have preferred to decrease some programs more, and increase others, we have taken this approach as the most equitable under the circumstances, and to retain broad-based support, since an across-the-board reduction retains the balance developed by previous Congresses. By making a 40-percent reduction we have spread the burden of cutting the budget in an even-handed manner. We favor no particular energy technology or resource because we treat each category the same. The result of our effort is a substantial restoration of funding to coal, conservation, and renewable energy efforts, though still 40 percent below last year's appropriation and even further below the Carter administration requests, and identical treatment of the other energy programs, including nuclear fission and fusion.

I note that this alternative is more than $300 million below the Reagan budget, and includes full funding for the Strategic Petroleum Reserve, Federal power market activities, and the general science program. FERC will receive the same amount as it did last year. In addition to this budget, we have also noted $7 billion in tax expenditures in the energy field, which should be reexamined. In light of the recent decontrol of oil it seems to me that many of these tax subsidies are not only unnecessary, but unwise. Tax expenditures are as much Federal subsidies as expenditures from appropriated funds, and they should be reduced at least commensurate with budgeted expenditure reductions. I fail to see how we can tell the American people that we are cutting back on government benefits and services when we appear unwilling to do the same for energy companies at a time when they are reaping unprecedented profits derived largely from decontrol.

Finally, I want to emphasize that the point of this alternative is balance in energy programs. I can accept reductions in many programs I consider worthwhile, such as those in the conservation area, but only if similar reductions are applied in other programs. While this action does not reflect the priorities I think the country needs to proceed at greatest speed and least cost to achieve independence from imported oil, I think the balance proposed in this bill is the best result we can practicably achieve under the current budgetary restrictions.

WELLESLEY, MASS.: A CENTENNIAL OF LOCAL PROSPERITY AND CIVIC PROGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Massachusetts (Mrs. HECKLER) is recognized for 10 minutes.

● Mrs. HECKLER. Mr. Speaker, I rise for the pleasant task of acknowledging the 100th anniversary of the town of Wellesley, Mass., one of the communities in my congressional district, and my place of personal residence.

The centennial celebration for my hometown affords me the happy opportunity not only to share the commemorative spirit with so many neighbors and friends, but also to participate in a communal educational experience, benefiting us all by helping us to remember our heritage and learn from it.

The present age makes it all too easy to ignore the past or to forget it, preoccupied as we are with the grave problems of the present moment and confronted by great challenges for our future.

We too often relegate what has gone before to the shelves of libraries or to campus classrooms; dismissing yesterday as a nostalgic distraction, as we cope with today and prepare for tomorrow.

But the past—our history, our heritage—is the foundation upon which we must build our present and plan our future. The past is there to be celebrated and studied, learned from and debated. The past is not merely a most

valuable resource, it is indispensable and unavoidable.

Massachusetts, the scene of so many of the crucial events in our Nation's early history, has always taken special care in marking the past. It is therefore with that particular Bay State sense of history that I rise today to share with my colleagues in this House word of the upcoming centennial of my hometown.

As a resident of Wellesley, this centennial celebration of course, has a great significance for me personally, but the development of this classic New England town is a vignette in American history that I believe will also be of interest to all the Members of this House.

Wellesley was created by an act of the Massachusetts State Legislature on April 6, 1881. In the 100 years since, it has evolved as a center of culture and scholarship: A home of creative and active minds, and the seat of one of the most prestigious women colleges in America.

Several Wellesley residents have had a profound impact on American life and culture. For example, Alexander Graham Bell conducted his historic experiments with the telephone while living in the Wellesley area; Katherine Lee Bates, while professor of English at Wellesley College, wrote the stirring anthem "America the Beautiful," and William Denton, who in addition to being one of the 19th century's most illustrious scientists, was also a leading abolitionist and advocate of women's rights, was a long-time Wellesley resident.

These three notables merely serve to illustrate the town's historic traditions of creativity innovation and activism.

Those traditions remain. The town continues today as an important center of progress in the arts and sciences, commerce, and culture. The renowned classic beauty of its home and public buildings complements a citizenry that is successful, forward looking, and involved in the issued of the day.

The town's legendary reputation for enlightened participation and civic concern is understandable when we review its past. The founding of the town of Wellesley, which I am helping my fellow citizens commemorate this month, is an example of determination which holds clear lessons for us today.

For 170 years the area now known as Wellesley was a part of the town of Needham—but different interests and attitude developed which led Wellesley residents to work for their own town.

In August 1880, Capt. Joseph Fiske, a noted veteran of the Civil War and respected leader in the area, began in earnest the work of lobbying the Massachusetts Legislature for township. He organized a massive campaign, managed the election of a protownship State representative and engaged the services of an attorney named Patrick Collins, later a mayor of Boston and a distinguished Member of this House, to plead the cause of township before the legislators, and by the following April, Wellesley was a town.

That successful effort to achieve a desired community goal through concerned, responsible, and well-managed political action follows in the new England tradition, of which Wellesley is a vital part, and which remains a model for the participation, politics of today. It shows that the will of an active and informed people can accomplish difficult goals, once motivated and organized.

I am pleased to honor the town of Wellesley on its centennial celebration and to pay tribute to the members of the board of selectmen, Frank H. Conway, Jean W. Kelley, and Felix Juliani, and to the members of the centennial committee, cochairs John Hughes and Elanor Stiments, and Salvatore Defazio III, Mary Duffy, Jean Glasscock, Charles Thomas, and Maxine Weintraub. Norma O'Reilly, coordinator of the centennial deserves special recognition, as does Bernard Torri who has done such an outstanding job in assembling the time capsule which will be treasured by future generations.

Mr. Speaker, the history of the town of Wellesley is filled with other similar examples of vigorous and determined work for the public good over 100 years of proud history. I commend to the house this heritage of action and progress, and salute the town whose reputation for civility and concern is a direct product of that heritage.●

MRS. KAY HEARN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. HUBBARD) is recognized for 5 minutes.

Mr. HUBBARD. Mr. Speaker, if I had been asked early last month to select from my congressional district nominees for a national Mrs. America contest, I would have submitted a list which indeed would have included Mrs. Reid Hearn, Sr., of Mayfield, Ky.

Kay Hearn, age 41, of my hometown, a teacher at Lowes High School, an active, dedicated Christian, and a leader of my hometown's First United Methodist Church; a very attractive and hard-working civic leader. Kay was the devoted wife to Reid Hearn, Sr., the youthful president of the Mayfield, Ky., Security Federal Savings & Loan Association, mother to Son F. Reid "Bubba" Hearn, Jr., and daughter, Traci Hearn.

Mr. Speaker, I mention the aforesaid because my neighbor and friend, Kay Hearn, died last Friday night of a short illness, a tragic loss to my hometown, to those who knew and liked this family.

To her husband, children, her parents, Mr. and Mrs. Joe Y. Wright of Morris Chapel, Tenn., and the other relatives and friends of Kay Hearn, I join in expressing a tribute to her and sympathy to those who knew her.

HALTING OF ECONOMIC AID TO NICARAGUA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. BONIOR) is recognized for 30 minutes.

Mr. BONIOR of Michigan. Mr. Speaker, I will not take the full 30 minutes, but I do want to take the opportunity to discuss, on the floor of the House with the Members of this body and with the American public, the unfortunate news that came from the State Department yesterday.

That news is that the United States will halt economic aid to Nicaragua. Members may or may not know that I have just returned from a 6-day trip to Central America in which I visited, with my dear friend and colleague, the gentleman from Michigan (Mr. DAVIS), Panama, Costa Rica, Nicaragua, and Mexico. I spent some time in Nicaragua, previously, discussing their political and economic problems with their leadership. I was quite saddened to hear yesterday that the administration has decided to halt aid, despite the fact that the administration has admitted that the arms flow from whatever sources, Cuba or the Soviet Union, through Nicaragua has been halted.

I would like to quote from a statement that Mr. Dyess, of the State Department, made in the New York Times this morning. He said, "Important United States security interests are at stake in this region. We want to encourage a continuation of recent favorable trends with regard to Nicaraguan support for the Salvadoran guerrillas," he declared, alluding to the fact that the arms shipments have been substantially shut down, if not totally. He said also that, "We also want to continue to assist moderate forces in Nicaragua which are resisting Marxist domination," he said, "working toward a democratic alternative, and keeping alive the private sector."

Well, that is my agenda, also, and I believe that is the agenda of the Members of this body and of the other body.

But I would suggest to Mr. Dyess and Secretary Haig that the way to go about achieving those alternatives is not by cutting off aid to a country that is in desperate need of aid. During my recent trip I had the opportunity to talk to a number of governmental and junta leaders and press people in Nicaragua. To a person, they

indicated to me, "Please go back and encourage your country to continue its aid." You know, we halted about $9.6 million in Public Law 480 food and assistance for grain recently to Nicaragua.

What we are doing by halting grain shipments and by stopping economic development aid to Nicaragua, is to give the leftists, the extreme Marxists in that country, the opportunity to portray us as the imperialistic nation which we unfortunately have the reputation of being in that part of the country.

I think it is important for Members of this body to understand that the Sandinistas are not a homogeneous organization. They have a coloration and a spectrum of political views that match most political parties in Western and non-Western nations. There are extreme rightwing, extreme leftwing Sandinistas and moderate Sandinistas.

In my discussions with Pedro Chamorro, who is the editor of the free press, La Prensa, and in my discussions with Archbishop Obando y Bravo in Nicaragua and in my discussions with the business leaders, they all gave me one important message to bring back to this body and to this administration. That message is to continue the aid; that it is needed; and to keep our foot in the door, so we can have some impact on the political and economic future of that most important country within Latin America.

There is some hope in the statement that was issued by the State Department yesterday. Mr. Dyess indicated that the United States was not going to recall the $40 million in loans which we have given the Nicaraguans and which are outstanding. He also indicated that there may be some resumption of the Public Law 480 food for peace funds within the next 2 or 3 weeks.

So not all is lost. In fact, it seems obvious that the statement made by Secretary Haig about 3 weeks ago that Nicaragua was lost has indeed been turned around, that they are still giving it a good look and there is still hope we can develop some good close relations with that country.

But I suggest going about it in the manner in which we have done yesterday is not helpful. It does not help the business community which has to make decisions on whether to stay or reinvest down there. It does not help them. It does not help the politcal situation down there in terms of the moderate factions in Nicaragua that want to get on with making that country pluralistic and giving freedom of expression in the political sphere a new shot of life.

I further want to go into an issue that is really troubling to me. Alan Riding, who many of my colleagues know, is probably as astute on this issue as anybody in the journalistic field, and has written well on the problems of Central America, has a piece in the New York Times today in which he talks about the rightist exiles who plan to invade Nicaragua.

Recently I appeared before Congressman BARNES' subcommittee to talk about the problem of terrorism in the world and particularly wanted to address the policies of this administration. In that testimony I said that I applauded Secretary Haig's statement and the Reagan administration's commitment to combat international terrorism. I said, though, that if we are going to have a litmus test, if we are going to, by example, show that this policy is one in which we can stand up and be counted for, then I would suggest that the first international terrorists whom the Secretary and the proper law enforcement officials should bring to justice are those who are at this very moment operating unlawfully right here in the United States. I referred to the Cuban and, more recently and prominently, Nicaragua's Somozistas, ex-national guard people who fled from Nicaragua, and were under the direction of the former dictator Anastasio Somoza. These Somozistas are preparing, in this country, in camps in Florida, to invade Nicaragua, a country with who we are at peace, with whom we have full diplomatic relations. That issue should be the test of whether this country is really committed to combatting international terrorism.

When I was talking with Sergio Ramirez, who is one of the three junta members in Nicaragua, I was imploring him to do what he could to stop the arms flow to El Salvador through the Honduras borders and through Nicaragua. He indicated to me that attempts were being made to do this, that the Government was not participating in the arms flow.

□ 1145

I do not want to argue that point, whether the Government was or was not participating in the arms flow. The fact of the matter is that it has been stopped, and stopped substantially. Our own State Department admits to it.

In that meeting with Mr. Ramirez, he pointed out to me:

What are we doing about the fact that there are armed camps in this country who are arming Somozistas for an invasion of Nicaragua.

I admitted to not knowing very much about what he was discussing, and said I would go back and check and see if there was any truth to it. As it turns out, at the very moment I was talking to Mr. Ramirez, "Good Morning America" was running a 5-minute film clip on their show, showing the intense military training that was going on in the camp in Florida. Joe Thomas of the New York Times has written extensively on it. Eddie Adams in Parade Magazine, a photographer, had pictures and wrote a good piece on exactly what was happening in the Florida camps, as well as perhaps in California and New Jersey.

So, it was quite an embarrassment for me to be speaking with the leader of a country and having him raise this issue with me. I immediately called the Embassy in Nicaragua when I came back and saw this report, and discussed this issue with the Ambassador, Ms. Oelia Casco.

She admitted to me that over a month and a half ago she had asked the State Department to check into the camps. She has not had the courtesy of a reply, and she hand-delivered her request to Assistant Secretary Bushnell.

So, what we have here, it seems to me, is a double standard in terms of terrorism. Not only do I believe that these camps are illegal, that they violate the statutes developed in the 1840's—by the way, the history of those statutes are very interesting, and my colleagues might be interested. They were developed in the 1840's because of a gentleman by the name of William Walker, who was a buccaneer and pioneer imperialist in this country who wanted to set up colonial slave empires in Nicaragua, and to prevent him from doing that we passed these statutes. It is ironic that over 140 years later these same statutes are being violated in the country they were intended to protect.

So, I would suggest to my colleagues that we put an end, first of all, to these camps; second, if we are interested in peace and stability in Central America, we have to demilitarize the situation. I referred the Members earlier to Allen Riding's recent article in today's New York Times.

Now, Honduras is an interesting situation. They border the Nicaraguan border, and the Honduran people have struggled for a civilian government for a long time, and some Honduran politicians are concerned about the hostilities in Nicaragua because their army, which is in control, has agreed recently to civilian elections. The Honduran politicians are concerned that because of this increasing military activity in Nicaragua the Honduran Army, the military, will forgo the civilian elections in Honduras. So, what is really happening here is this militarization of the whole region being exacerbated by the fact that we are allowing these types of activities in our country.

I would respectfully request of the administration and Secretary Haig that we go about the business of following the laws of this country, following the charter of the Organization of American States, which prohibits this type of activity in our country

and this type of international terrorism, and get our own house in order so that we can pursue the policy of terrorism across the country and in Latin America, and we can get on with the stabilization of that most important region to our Nation's interests.

I thank the Members of this body for allowing me to express myself on this issue. It is an important issue, one that is not going away.

I am concerned about it from the standpoint not only of Honduras, Guatemala, and El Salvador, but I am concerned that the Switzerland of Central America, the hallmark of democracy and free enterprise, Costa Rica, is in serious, serious economic trouble. They are in trouble because they import 100 percent of their oil, and because the price of coffee has reached bottom. They have serious problems in that country, and by militarizing the region, by getting the Nicaraguans concerned about the fact that we may be involved in an overthrow of their Government through complicity with the Somozistas, by getting the Nicaraguans to increase their military strength on their borders of Costa Rica and Honduras, we encourage militarization of the region and encourage instability.

I would hope that before long we in this Congress and the Foreign Affairs Committee would address this situation before it reaches the point where it is out of control, or when we all have to come back here and discuss ways of trying to solve a problem that could have been prevented.

Mr. HARKIN. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to the gentleman from Iowa.

Mr. HARKIN. Mr. Speaker, I thank the gentleman for yielding. I had asked for some time myself this afternoon to discuss a development the gentleman spoke about, the cutting off of aid to Nicaragua. I want to commend my colleague from Michigan for his analysis of the situation, for his perceptive insights into what has brought this about; and moreover, for his concern for the people of Nicaragua who are being caught up in this cutoff of economic aid and food aid, and who have no other recourse but to go hungry and go to bed at night on an empty stomach.

The gentleman was talking about the problem along the Honduran border. I am sure the gentleman is aware that since the first of this year, since January, there have been, according to reliable sources, over 100 attacks from across the Honduran border launched into Nicaragua by elements of the former National Guard of Somoza. I do not have any figures on how many people have been killed, but numerous people have been killed in Nicaragua, and, of course, these terrorists then flee back across the border to a sanctuary in Honduras.

The gentleman is absolutely right, if our Secretary of State means what he says about combating terrorism, it would seem to me that this is one place where he could really combat terrorism, right in, as they say, our own front yard.

I am as concerned as the gentleman is about cutting Nicaraguan aid. If the gentleman will indulge me, I have 10 minutes time of my own and will be glad to yield back some time to him. I want to engage in a colloquy after I talk for a little bit about the issue.

I met this morning with Fernando Cardinale, a Jesuit priest, whose brother, Ernesto, is also a Jesuit. Fernando is the architect of Nicaragua's very successful literacy campaign. Because of this, Mr. Cardinale has been nominated to receive the Nobel Peace Prize for his contribution in improving the quality of life in his country, so I was interested this morning in finding out how Nicaraguans had developed and implemented this program, which is most comprehensive and to date has been one of the most successful efforts to eradicate illiteracy, undertaken in a peaceful manner by a Third World government.

However, in our discussion the conversation turned to what the gentleman from Michigan talked about in his opening remarks, the action taken by our Government yesterday in cutting off the remaining $15 million in economic aid that we had pledged as special reconstruction assistance to that country. Now, according to this morning's Washington Post Senator JESSE HELMS and other ultraconservatives in that body are pressuring the administration to withhold this money while it reviewed its policy and prodded Nicaragua to, "Halt the flow of arms into El Salvador."

Now, the State Department, as the gentleman says, claims that Nicaragua has met our conditions on halting the flow of arms. Secretary Haig himself, no friend of the Nicaraguan Government, has said that the flow of arms has been reduced to a trickle.

Nonetheless, the State Department stated that aid would be frozen in this country in spite of the fact that, "According to the State Department the United States has no hard evidence of the arms movements into Nicaragua during the past few weeks."

From my own view, and I have seen the photographs and aerial reconnaissance photographs, and I listened to the top secret briefing by the CIA on the so-called arms flow from Nicaragua, I remember when our Ambassador White held a press conference on January 17 of this year and said that there had been unconfirmed reports that 100 Nicaraguans had gone into El Salvador to assist the El Salvadoran rebels. Mr. White's comments on unconfirmed reports were sent to this country by reporters, and then they were reported in the newspapers as confirmed reports that a hundred Nicaraguans had gone into El Salvador. Mr. White held another press conference to state quite emphatically that what he was talking about were totally unconfirmed reports by the El Salvadoran Government, not confirmed reports; and yet this continued to circulate among the press in this country as hard evidence, hard facts, that a hundred Nicaraguans had somehow gone to El Salvador to assist the Salvadorans.

But in looking at that and looking at the photographs and listening to top secret testimony of the CIA, this Member became entirely convinced that the evidence they had, which they then took to Europe and parodied in front of all the governments of Europe to get their support, was nothing more than just their own assumptions of what was going on, and not based upon hard evidence. I say that as a former reconnaissance pilot myself, looking at those photographs. There was nothing there of any hard evidence, and I believe that is the reason why none of the European governments fell for it, because they saw through it. It was nothing more than an attempt by some individuals in this administration to try to overturn the Nicaraguan revolution and to create chaos in that country.

Now, that may sound like a pretty hard statement on my part, but let me read for this body a recent report, statements from a report put out by the Heritage Foundation, one of those rightwing think tanks, that recently published a report called, "A Mandate for Leadership."

This has been an influential source for the Reagan administration's policies and programs. The Heritage Foundation report proves that Nicaragua's fears are relevant indeed, the fears that we are going to be involved in creating chaos in that country and overturning the Government. The report states, and I quote:

> Discontented Nicaraguans could be aided in an armed struggle against the Sandinistas by former National Guardsmen now in exile.

There it is, from the Heritage Foundation report. The report closes with the chilling paragraph:

> The Nicaraguans did not want Somoza and they do not want the current Sandinista government. Despite its show of arms the government is still weak—

Listen to this—

> Still weak and could be dislodged through a determined, coordinated and targeted effort.

That is the report from the Heritage Foundation. Well, one might say, what is the Heritage Foundation? It is just one of those rightwing think tanks.

But, there is something deeper to it than that. The former head of this Heritage Foundation when they wrote up this report, is none other than Richard Allen, now the head of the National Security Council, and so if he puts his stamp of approval on that kind of report, and he is now head of the National Security Council, what else are the Nicaraguans to believe than what we are doing in cutting off their food, cutting off their economic aid, in not assisting in stopping the raids across the Honduran border? How else can they interpret that, as nothing more than an attempt by this administration to create economic and political chaos in that country?

Mr. BONIOR of Michigan. The gentleman makes a very good point, and I would like to point out the irony of the situation which we have here. We were active in passing the Nicaraguan and Central American aid bill in the last Congress. I would suggest to the gentleman and my colleagues that if we put the same standard on our Nation as we put on Nicaragua in that aid bill, which is—and I will quote from the law:

> Prior to releasing any assistance to the Government of Nicaragua under this chapter, the President shall transmit a certification to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate that the Government of Nicaragua has not cooperated with or harbored any international terrorist organization, or is not abiding, abetting, or supporting acts of violence or terrorism in other countries.

If we had to apply that to our country, we would not qualify.

Mr. HARKIN. That is true.

□ 1200

Mr. SOLOMON. Mr. Speaker, will the gentleman yield on that?

Mr. BONIOR of Michigan. That is just very, very obvious.

Mr. SOLOMON. Mr. Speaker, will the gentleman yield on that point?

Mr. BONIOR of Michigan. I yield to the gentleman from New York.

Mr. SOLOMON. Mr. Speaker, the gentleman has brought up a very good point, and I do not know how much validity there is to it, but he stated he was concerned about the cutting off of aid to Nicaragua. From the quotation the gentlman just read, we know that this is a fact: Never mind the Nicaraguans, the 100 Nicaraguans, going into El Salvador, but we do know for a fact that El Salvadoran Communist guerrillas are being trained in Nicaragua. Then he posed the question: What else are they to think?

But as the gentleman knows, we have got to compare apples with apples, and if there is a problem in training people in Florida camps, there is also a problem of being in violation of the intent of that quotation the gentleman just read, because it is a fact—and I think the gentleman will admit it—that there are Communist El Salvadorans being trained in Nicaragua for the purpose of overthrowing the El Salvadoran Government.

Mr. HARKIN. Mr. Speaker, will the gentleman yield on that?

Mr. SOLOMON. I do not have the time.

Mr. BONIOR of Michigan. I yield to the gentleman from Iowa.

Mr. HARKIN. Mr. Speaker, as a response, I will say that I do not admit to that. There is no hard evidence of that.

Would the gentleman please provide for me and for this body the hard evidence that El Salvadoran guerrillas are being trained in Nicaragua? The gentleman has no such evidence. It is nothing more than just a bunch of hot air put out by the Heritage Foundation and a lot of right wingers in this country who just want to make us believe that is true, and there is no evidence for it. I will not admit to that.

Mr. SOLOMON. Mr. Speaker, if the gentleman will yield for just one further comment, I will be glad to give the gentleman the reasonable evidence that we have. I would also like it just to be made known to everyone here that these two gentlemen are not speaking for the entire side of that aisle, because there are many Members on that side of the aisle who agree with the statement that I just made.

Mr. HARKIN. And I wish to point out that there are Members on that side of the aisle who agree with the statement that I just made also.

Mr. SOLOMON. I doubt that there are many.

Mr. HARKIN. Well, there are some reasonable Members on that side who would agree with that.

I would also make one further point. By the way, it just occurred to me that the gentleman said they would be glad to show me the reasonable evidence. So now it has come from hard evidence to reasonable evidence, and what is reasonable, of course, is always debatable.

Mr. Speaker, will the gentleman yield further?

Mr. BONIOR of Michigan. Mr. Speaker, I would like at this point to relinquish my time to the gentleman from Iowa (Mr. HARKIN) so the gentleman can discuss this issue on his own time.

Mr. HARKIN. Mr. Speaker, I thank the gentleman.

The SPEAKER pro tempore. The time of the gentleman from Michigan (Mr. BONIOR) has expired.

CUT OFF OF ECONOMIC AID TO NICARAGUA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. HARKIN) is recognized for 10 minutes.

Mr. HARKIN. Mr. Speaker, I wish to continue our discussion on Nicaragua and El Salvador. Now, even if the gentleman from New York (Mr. SOLOMON) was correct that there is this hard evidence of shipping arms or something like that and if the President could invoke then the law mandated by the Congress in cutting off economic aid, I would point out that the administration previously cut off 45,000 metric tons of wheat and food to that country and that is not covered by any congressional restrictions relating to an arms flow to El Salvador.

So they just cut off the food aid and the wheat that goes to make the bread. The aid that helps to feed the poor people in Nicaragua is cut off prior to any determination ever being made that there were arms flowing.

Again it points to one thing, that there are elements in this administration that are geared up to create economic chaos in Nicaragua. Nicaragua, we must understand, is one of the poorest nations in the Western Hemisphere. After the civil war their entire economy was wrecked. Over 80 percent of all the small businesses in that country were wrecked by bombing. Over 60 percent of their manufacturing process was completely destroyed in that civil war, and that war just ended not quite 2 years ago.

The Somoza government and the Somocistas who left took all the money with them and left the country with $3 million in their entire bank account and with a debt of over $1.5 billion.

In meeting with Father Cardinale this morning and in talking about this cutoff of food aid and this cutoff of economic aid to Nicaragua at this time, he said something which I think the Members ought to hear. It was an analogy that I think really strikes home. He said, "It's one thing to beat up on a healthy person, but," he said, "it is quite another thing to kick an invalid who is lying in a hospital bed."

And that is really what we are doing to Nicaragua now. They are an invalid lying in a hospital bed, and we are kicking them while they are down.

I would say again that in the view of many what we are doing is really carrying out what the Heritage Foundation report said, and again I would quote it for the Members. The report stated:

> Discontented Nicaraguans could be aided in an armed strugle against the Sandinistas by the former National Guardsmen now in exile.

Again I want to report to the Members that the head of that foundation that issued that report is now the head of our National Security Council, Richard Allen.

Well, I submit that this administration's recent cutoff of this economic aid and food aid, in an effort to, as they say, stem this flow of arms—

which has never been proven and which all of our European allies laughed at, when, as I understand it, this administration went over to show them this "hard evidence" they had—is no more than the first step in this destabilization process, the same destabilization process that our CIA engaged in the Dominican Republic, in Guatemala, and in Chile.

I feel that, as was quoted in the Post this morning, Senator HELMS and "Generalissimo" Haig would like nothing better than a failure of the Sandinista government's efforts to keep private industry going in their country. They would like nothing better than for this effort to fail. This administration right now is cutting assistance that we earmarked for the private sector of that country because it wants, I believe, the economy to worsen and ordinary Nicaraguan citizens to suffer, because if they suffer, then they will begin to turn against their own government. This, I believe, is the explanation that we can find for the ban on assistance, after Nicaragua complied with what the State Department said it had to comply with, and that is the cutting off of the supposed arms shipments to El Salvador.

Now, they have said that perhaps the food aid could be started in 2 or 3 weeks. How many people will starve? How many people will suffer? How many children will become malnourished in the meantime because we have cut off that food aid to Nicaragua?

And then they said they are leaving the door open for the resumption of economic aid later on. When? When the conditions become even worse? When more national guardsmen cross that border from Honduras to Nicaragua to create more economic and political instability in that country?

I submit that they want to reinstitute the economic aid and food aid to Nicaragua only after that government is overthrown, only after they can dictate to that country what kind of a government they ought to have, and only after we make sure that we put that government in power.

The United States, I am sorry to say, has a long and ugly history of destabilizing governments in our southern part of the Western Hemisphere. As I said earlier, our CIA helped to overthrow democratically elected governments in the Dominican Republic, in Guatemala, and in Chile, and in spite of much of the puff and roar in this administration about Cuba and the Soviet Union destabilizing existing governments in the Third World, it looks like our own State Department and the CIA are at it again themselves, as they were some years ago.

I just hope that the Members of this body will understand and look at this situation. I know that Nicaragua is a small country, just as El Salvador is. I know that in the global conflict between the East and the West they matter for little, but in terms of what we are about as a nation, in terms of our own revolutionary background, and in terms of what we believe in—social justice and economic justice for the underprivileged and for the impoverished of the world, those basic human qualities on which I think all of us can agree, whether we are conservatives, liberals, Republicans, or Democrats—on that basis, we ought to pay more attention to what is happening in Nicaragua and what is happening in El Salvador and what is happening throughout Central America.

They are indeed our cousins. They are indeed our brothers and sisters in this Western Hemisphere, and if we turn a deaf ear and a blind eye to what is happening to the poor and what is happening to the people who have suffered for centuries under oligarchical dictatorships in those countries, then I fear for what we will become ourselves as a nation in the future.

If we want to look at it just in those terms, we ought to be about helping those people in Nicaragua, if for no other reason than in helping them I believe we also help ourselves become better Americans.

Mr. Speaker, I yield back the balance of my time.

RAOUL WALLENBERG

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 15 minutes.

● Mr. LAFALCE. Mr. Speaker, I rise in strong support for House Joint Resolution 220 which would bestow honorary U.S. citizenship on Raoul Wallenberg and would request the President to ascertain from Soviet authorities his whereabouts and take immediate action to free him from the Soviet Gulag.

Raoul Wallenberg is quite simply an extraordinary person. At the age of 32, Wallenberg at the request of the U.S. Government went to Budapest, in order to save the last remnants of the Hungarian Jewish community. In Nazi-occupied Hungary, Wallenberg was only armed with Swedish diplomatic status, and yet he repeatedly confronted Nazi authorities on behalf of the Jewish community. Displaying personal courage of the highest order, he defied prominent SS leaders, including the dreaded architect of the Final Solution, Adolf Eichmann.

Wallenberg printed Swedish passports and distributed these passports to thousands of potential victims. He repeatedly risked his own life by following the death marches, as he distributed passports; and he went daily to the deportation trains where he literally pulled people out of the clutches of the SS. He purchased and rented scores of houses throughout Budapest, equipped them with Swedish flags and protected the Jewish residents from the brutal onslaught of the SS and the local Fascist movement, the Arrow Cross.

When the Red army occupied Budapest, they arrested Wallenberg on the mistaken assumption that he was an American spy, because he was indirectly working for the U.S. Government. Soviet authorities could not understand how one man could be motivated to personally save 100,000 innocent men, women and children. Although the Soviets later claimed that Wallenberg died in prison in 1947, their often contradictory stories about his fate do not stand close scrutiny. In addition, there have been frequent reports from former political prisoners in the Soviet Union that they have personally met Wallenberg during their incarceration in the Soviet Gulag. The most recent report dates from only 1 year ago.

For a man who saved so many by conferring citizenship upon them, granting honorary U.S. citizenship would be entirely appropriate, particularly in light of the fact that Raoul Wallenberg was working on behalf of the U.S. Government. If he is alive, as many accounts testify, this resolution would enable the Department of State to take extraordinary measures to return him to freedom. This country should be outraged that this diplomat and humanitarian should be imprisoned for 35 years on the basis of a patently false charge.

I hope that both the House and the Senate will take prompt action to pass this important resolution which would recognize the great humanitarian achievements of Raoul Wallenberg who must be considered one of the greatest heroes of the 20th century. I know that all of my colleagues would want to honor one of the few who was willing to place his life on the line to save potential victims of the holocaust.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New York (Ms. FERRARO) is recognized for 5 minutes.

● Ms. FERRARO. Mr. Speaker, on Wednesday and Thursday of last week, personal business caused me to be absent from the House during consideration of House Resolution 115, providing for the expenses of investigations and studies to be conducted by the standing and select committees of the House, and House Joint Resolution 182, to designate April 26, 1982, as "National Recognition Day for the Veterans of the Vietnam Era." There were four votes taken on these two

resolutions, and had I been present, I would have voted as follows:

Rollcall No. 16: Agreeing to an amendment to cut 10 percent, or about $4 million, from last year's committee funding levels. "Yea."

Rollcall No. 17: Agreeing to recommit the committee funding resolution back to the House Administration Committee. "Nay."

Rollcall No. 18: Adoption of House Resolution 115. "Yea."

Rollcall No. 20: Passage of House Joint Resolution 182. "Yea."●

PRIVATE CALENDAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BOLAND) is recognized for 5 minutes.

● Mr. BOLAND. Mr. Speaker, I would like to take this opportunity to set forth some of the history behind, as well as describe the workings of the Private Calendar. I hope this might be of some value to the Members of this House, especially our newer colleagues.

Of the five House Calendars, the Private Calendar is the one to which all private bills are referred. Private bills deal with specific individuals, corporations, institutions, and so forth, as distinguished from public bills which deal with classes only.

Of the 108 laws approved by the First Congress, only 5 were private laws. But their number quickly grew as the wars of the new Republic produced veterans and veterans' widows seeking pensions and as more citizens came to have private claims and demands against the Federal Government. The 49th Congress, 1885 to 1887, the first Congress for which complete workload and output date is available, passed 1,031 private laws, as compared with 434 public laws. At the turn of the century, the 56th Congress passed 1,498 private laws and 443 public laws—a better than 3-to-1 ratio.

Private bills were referred to the Committee of the Whole House as far back as 1820, and a calendar of private bills was established in 1839. These bills were initially brought before the House by special orders, but the 62d Congress changed this procedure by its rule XXIV, clause 6, which provided for the consideration of the Private Calendar in lieu of special orders. This rule was amended in 1932 and then adopted in its present form on March 22, 1935.

A determined effort to reduce the private bill workload of the Congress was made in the Legislative Reorganization Act of 1946. Section 131 of that act banned the introduction or the consideration of four types of private bills: First, those authorizing the payment of money for pensions; second, for personal or property damages for which suit may be brought under the Federal tort claims procedure; third, those authorizing the construction of a bridge across a navigable stream; or fourth, those authorizing the correction of a military or naval record.

This ban afforded some temporary relief but was soon offset by the rising postwar and cold war flood for private immigration bills. The 82d Congress passed 1,023 private laws, as compared with 594 public laws. The 88th Congress passed 360 private laws as compared with 666 public laws.

Under rule XXIV, clause 6, the Private Calendar is called the first and third Tuesday of each month. The consideration of the Private Calendar bills on the first Tuesday is mandatory unless dispensed with by a two-thirds vote. On the third Tuesday, however, recognition for consideration of the Private Calendar is within the discretion of the Speaker and does not take precedence over other privileged business in the House.

On the first Tuesday of each month, after disposition of business on the Speaker's table for reference only, the Speaker directs the call of the Private Calendar. If a bill called is objected to by two or more Members, it is automatically recommitted to the committee reporting it. No reservation of objection in entertained. Bills unobjected to are considered in the House as in Committee of the Whole.

On the third Tuesday of each month, the same procedure is followed with the exception that omnibus bills embodying bills previously rejected have preference and are in order regardless of objection.

Such omnibus bills are read by paragraph, and no amendments are entertained except to strike out or reduce amounts or provide limitations. Matter so striken out shall not be again included in an omnibus bill during that session. Debate is limited to motions allowable under the rule and does not admit motions to strike out the last word or reservation of objections. The rules prohibit the Speaker from recognizing Members for statements or for requests for unanimous consent for debate. Onmibus bills so passed are thereupon resolved in their component bills, which are engrossed separately and disposed of as if passed separately.

Private Calendar bills unfinished on one Tuesday go over to the next Tuesday on which such bills are in order and are considered before the call of bills subsequently on the calendar. Omnibus bills follow the same procedure and go over to the next Tuesday on which that class of business is again in order. When the previous question is ordered on a Private Calendar bill, the bill comes up for disposition on the next legislative day.

Mr. Speaker, I would also like to describe to the newer Members the official objectors' system the House has established to deal with the great volume of private bills.

The majority leader and the minority leader each appoint three Members to serve as Private Calendar objectors during a Congress. The objectors are on the floor ready to object to any private bill which they feel is objectionable for any reason. Seated near them to provide technical assistance are the majority and minority legislative clerks.

Should any Member have a doubt or a question about a particular private bill, he can get assistance from the objectors, their clerks, or from the Member who introduced the bill.

The great volume of private bills and the desire to have an opportunity to study them carefully before they are called on the Private Calendar has caused the six objectors to agree upon certain ground rules. The rules limit consideration of bills placed on the Private Calendar only shortly before the calendar is called. The agreement is as follows:

Reaffirming the policy initially adopted on June 3, 1958, the members of the majority Private Calendar Objectors Committee have today agreed that during the 97th Congress, they will consider only those bills which have been on the Private Calendar for a period of 7 calendar days, excluding the day the bill is reported and the day the calendar is called. Reports must be available to the objectors for 3 calendar days.

It is agreed that the majority and minority clerks will not submit to the objectors any bills which do not meet this requirement.

This policy will be strictly enforced except during the closing days of a session when House rules are suspended.

This agreement was entered into by: The gentleman from Massachusetts (Mr. BOLAND), the gentleman from Minnesota (Mr. OBERSTAR), and the gentleman from Pennsylvania (Mr. ERTEL); and the minority objectors, the gentleman from California (Mr. ROUSSELOT), the gentleman from Wisconsin (Mr. SENSENBRENNER), and the gentleman from Virginia (Mr. BLILEY).●

CONSENT CALENDAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. HANCE) is recognized for 5 minutes.

● Mr. HANCE. Mr. Speaker, I am today inserting in the RECORD the agreement between the majority and minority objectors on the Consent Calendar. This agreement outlines the conditions under which bills on the Consent Calendar will be considered.

Mr. Speaker, I invite all my colleagues to read this agreement and keep it in mind when requesting that

measures be considered on the Consent Calendar.

The members of the Consent Calendar Committee have agreed for the 97th Congress, upon the following policies and procedures: First, generally, no legislation should pass by unanimous consent which involves an aggregate expenditure of more than $1 million; second, no bill which changes national policy or international policy should be permitted to pass on the Consent Calendar but rather should be afforded the opportunity of open and extended debate; third, any bill which appears on the Consent Calendar, even though it does not change national or international policy, or does not call for an expenditure of more than $1 million, should not be approved without the membership being fully informed of its contents. If it is a measure that would apply to a majority of the Members of the House, in which case the minimum amount of consideration that should be given such a bill would be clearance by the leadership of both parties before being brought before the House on the Consent Calendar. Such a bill would be put over without prejudice one or more times to give an opportunity to the Members to become fully informed as to the contents of the bill.

It must be pointed out to the membership that it is not the objective of the objectors to obstruct legislation or to object to bills or pass them over without prejudice because of any personal objection to said bill or bills by any one Member or all of the members of the Consent Calendar Objectors Committee, but rather that their real purpose, in addition to expediting legislation, is to protect the membership from having bills passed by unanimous consent, which in the opinion of the objectors, and Members of the House might have objection to.

The members of the Consent Calendar Committee request that the chairmen of the standing committee of the House having responsibility for bringing legislation before the House take into account the contents of this statement before placing the bill on the Consent Calendar. While it is not absolutely necessary for the sponsors of the bill appearing on the Consent Calendar contact the objectors, to avoid the bill being put over unnecessarily, it is a good practice to do so. The committee members welcome the practice of getting in touch with them at least 24 hours in advance of the time the legislation is called up on the regular call of the Consent Calendar. In many instances, such courtesy on the part of the sponsors will clear away questions which the objectors may have and consequently make for expeditious handling of the legislation.

This agreement was entered into by the gentleman from Alabama (Mr. FLIPPO), the gentleman from Texas (Mr. HANCE), the gentleman from Maryland (Mr. DYSON), the gentleman from Pennsylvania (Mr. WALKER), the gentleman from California (Mr. LUNGREN), and the gentleman from South Carolina (Mr. NAPIER).●

BEGINNING FARMERS ASSISTANCE ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, today I am introducing legislation which is designed to help assure that owner-operated family farms continue as the central feature of the American agricultural production system.

According to the U.S. Department of Agriculture's recent report entitled, "A Time To Choose," today in the United States, 1 percent of all landowners own 30.3 percent of the farmland, and 5 percent of the landowners own 48.1 percent of all farmland. Moreover, 69.5 percent of all farmland is owned by farmers age 50 or older, farmers who will be retiring throughout the 1980's. Only 5.9 percent of total farmland acreage is owned by farmers age 35 and under. If present trends continue, as older farmers retire, their land will be sold primarily to existing farmland owners who will consolidate their holdings, thus increasing average farm size and limiting the number of total farms and farmers.

In addition, if existing trends continue, the larger farms will be increasingly owned by individuals who merely oversee their farms and are not involved in the day-to-day farming activities characteristic of an owner-operator. In a survey taken of 14 key agricultural counties in my northwest Iowa congressional district, farmers who own and operate their land were found to be a minority of landowners in every county surveyed. Anywhere from just 23 to up to 42 percent of the farmers were found to be actual owner-operators. Also, from 58 to 77 percent of the farmland in these counties was found to be owned by absentee landlords.

Clearly, if beginning young farmers do not have the resources to acquire a farm during the critical next several years when many older farmers will be leaving the land, our farming system will become a system dominated by giant farms controlled by absentee landlords who may have less and less regard for the welfare of our rural communities and our rural way of life.

We must take steps to assure that we seize upon this impending transition period in farmland ownership as an opportunity to reaffirm our support for family farms and family farmers. The measure I am proposing today is a modest, but needed attempt to insure this desirable transfer of farmland ownership.

Essentially, this bill is intended to encourage the States to establish their own programs to provide loans or other incentives to beginning farmers who wish to purchase their own farm. Iowa, Minnesota, North Dakota, and Texas have already established beginning farmer assistance programs, and the legislatures in several other States are currently debating such programs. My legislation, the Beginning Farmers Assistance Act of 1981, would simply authorize the Secretary of Agriculture, following certain guidelines, to provide Federal loan guarantees in support of direct loans made by the States under their programs to assist farmers seeking to purchase a family farm.

This bill is an attempt to augment, and not duplicate, the efforts of the Farmers Home Administration (FmHA) to provide loans to beginning farmers so that they can purchase their first farm under reasonable terms and conditions.

In fiscal year 1980, the Farmers Home Administration obligated $1.35 billion in direct farm ownership loans that benefited nearly 17,577 farms or other rural enterprises. Of this amount, approximately 70 percent was lent as direct loans with an interest rate reflecting the cost of money to the Government, and the balance was obligated as direct loans with a subsidized interest rate of as low as 5 percent. Funds for this direct loan program have rarely been sufficient to meet the demand of those aspiring to farm ownership.

In addition to the direct farm ownership loans made by FmHA, that the rural lending agency also, in fiscal year 1980, guaranteed approximately $27.8 million loans made by commercial lending sources. These guaranteed loans assisted just 253 farming operations nationwide. In my own State of Iowa not one farm ownership loan guarantee was approved by FmHA in fiscal year 1980.

A comparison of the types of farm ownership loan assistance available through FmHA reveals that of the $1.63 billion in total assistance that was approved in fiscal year 1980, just 17 percent was in the form of loan guarantees. The most common explanation I have received for the reluctance of private lenders to participate in the loan guarantee lending program is the paperwork and regulations involved. Also, the demand for this type of assistance is low because the terms of the loans secured in this manner are often not reasonable enough to enable that young farmer to make the first purchase of farmland.

Mr. Speaker, as we know, loan guarantees, unlike direct loans, are off-budget items, and their authorization

79-059 O - 84 - 39 (Pt. 5)

has little impact on our efforts to reduce Federal spending and trim the budget deficit. To the extent that we can reduce the need to increase the amount of direct loan funding needed for FmHA's farm ownership program by supplementing with loan guarantee assistance, we have the potential for easing the pressure to increase Federal outlays while at the same time addressing the high capital barriers which make entry into agriculture extremely difficult for most young farmers.

The State often can provide loans at interest rates below those found on loans made by commercial lenders. If these State-financed loans are supported by Federal guarantees, the interest on the loans can be made even more favorable. In designing programs to aid young farmers, the States often are better able than the Federal Government to determine the specific needs of the young farmers in the State and construct the program accordingly.

My bill would set up a pilot program that would provide Federal loan guarantees to the first 20 States that submitted program proposals to the Secretary of Agriculture for approval under the guidelines established in the legislation. As I indicated, the Federal loan guarantees would be used to support direct loans issued by the States under their programs.

I think it is important to emphasize that the program I am proposing offers loan guarantees as its essential feature, and as I pointed out above, loan guarantees are provided with little impact on the Federal budget. In addition, the amount appropriated under the $250 million per year authorization in the bill may be leveraged at the rate of 5 to 1, thus maximizing the number of loans that ultimately may be guaranteed with the initial Federal commitment. Finally, this pilot program has an explicit sunset provision which states that the Secretary's authority to guarantee loans expires on October 1, 1984.

I am confident that my colleagues will join me in recognizing the need for this proposal as a means of assuring the continued dominance of owner-operated farms throughout our rural sector, and I hope they will lend it their full support.

In closing, Mr. Speaker, and before highlighting the major provisions of the Beginning Farmers Assistance Act of 1981 and providing the language of the bill, I would like to thank the National Family Farm Coalition for the support that it has given to this concept and the commitment that it has demonstrated to preserving the family farm unit as the mainstay of agriculture.

An analysis of the major provisions of the bill and the bill itself follows:

SECTION-BY-SECTION ANALYSIS OF THE BEGINNING FARMERS ASSISTANCE ACT OF 1981—H.R. 2977

Section 1. *Title:* "Beginning Farmers Assistance Act of 1981."

Section 2. *Findings.* The Congress finds as follows:

(1) The average size of farms is increasing, and the number of farms and farmers is declining. The decline in the number of farms limits rural opportunities both on the farms and in the communities that depend on a strong farm economy.

(2) The cost of purchasing a family farm has grown substantially in recent years, making entry into farming almost impossible except for those individuals who inherit a farm or have considerable financial assets.

(3) Neither the private market nor the existing Federal programs are able to provide the necessary financial assistance to beginning or part-time farmers to enter full-time farming.

(4) If new entrants into full-time family farming are discouraged by the high capital requirements, farmland that might otherwise have gone to new farmers may be sold to existing farmers who are consolidating and expanding their holdings, to nonfarming investors for lease to farmers, or to investors who will remove the land from agricultural use.

(5) The degree of absentee ownership of farmland is increasing significantly.

(6) The maintenance of a farm system dominated by family-size units is and should be a basic goal of American Agricultural policy. The maintenance of such a system, however, is possible only if entry into full-time farming is attainable by those who lack substantial individual assets.

(7) The most appropriate manner for entry into full-time family farming and the barriers to such entry vary by state and by region. Any program to provide assistance to those seeking to enter into full-time family farming should be adapted to local conditions.

(8) Federal support for local efforts to aid those interested in and qualified for entry into full-time family farming will help to maintain the family farm system and prevent further consolidation of small farms.

Section 3. *Establishment of Program.* Authorizes the Secretary of Agriculture to provide loan guarantees to the states for up to 90% of the principle and interest on loans made by the states to individuals seeking to purchase a family farm.

Section 4. *Application for State Implementation of Program.* Within 180 days of enactment of this act, the Secretary must issue regulations providing for the states to participate in the program. The states may then submit applications under the regulations for participation in the program.

Section 5. *Approval of State Application.* Under the pilot program established by this act, the Secretary may approve up to 20 states of participation in the program. In their applications, the states must provide information describing the procedures which the states will follow to insure the effective and sound implementation of the state program.

An application submitted by a state must be approved or disapproved by the Secretary within 90 days of receipt.

A state may, with the approval of the Secretary, amend its program at any time.

The Secretary may terminate a state program's eligibility for federal loan guarantees if the Secretary finds that the state is not in compliance with the terms of the program.

Section 6. *Eligibility of Individuals.* An individual is eligible to receive a loan under the program if such individual:

(1) seeks to purchase and operate a family farm,

(2) has not purchased or owned a farm in the past 10 years,

(3) is unable to obtain credit from conventional lending sources, including the Farmers Home Administration,

(4) is qualified to operate a family farm and has at least one year of farming experience.

(5) has a net worth of less than $100,000 and assets of less than $300,000, and

(6) satisfies any other criteria that may be established by the state under its program.

Section 7. *Lapse of Loan Guarantee.* If an individual sells the land purchased with the aid of the loan guarantee, the guarantee shall be withdrawn.

Section 8. *Reports.* The Secretary shall submit to the Senate Committee on Agriculture and the House Committee on Agriculture an annual report on the operation of the "Beginning Farmers Assistance Program."

Section 9. *Limitation of Authority.* In each of the three fiscal years during which this program is authorized to operate, the Secretary may guarantee up to 5 times the amount appropriated for the program. Sunset provision. The authority of the Secretary to make loan guarantees under this program shall end on October 1, 1984.

Section 10. *Amendment to the Consolidated Farm and Rural Development Act.* Amends the Consolidated Farm and Rural Development Act to authorize the use of the loan guarantee for the financing of "points" on the sale of farm land.

Section 11. *Definitions.*

(1) The term "family farm" means a farm which is owned and operated by an individual with the assistance of the members of such individual's family and of not more than the equivalent of the labor of 1 person working full-time, is small enough to be operated by such individual with the assistance of the members of such individual's family or of not more than the equivalent of the labor of 1 person working full time, and provides sufficient income in years with average or better than average crop yields to enable such individual to meet not less than 30 percent of such individual's necessary family and operating expenses, including the maintenance of essential chattel and real property, and the payment of debts;

(2) The term "family farm" means an individual who operates a family farm, who derives not less than 30 percent of such individual's gross income from the operation of such farm, and whose employment off such farm does not prevent such individual from personally performing necessary tasks of operating such farm.

Section 12. *Authorization of Appropriations.* For each of the fiscal years 1982, 1983, and 1984, $250 million is authorized to carry out the "Beginning Farmers Assistance Program."

H.R. 2977

A bill to establish a pilot program to provide guarantees for loans made under State programs to assist individuals who are qualified, but lack financial resources, to acquire family farms, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this

Act may be cited as the "Beginning Farmers Assistance Act of 1981."

FINDINGS

SEC. 2. The Congress finds as follows:

(1) The average size of farms is increasing, and the number of farms and farmers is declining. The decline in the number of farms limits rural opportunities both on farms and in the communities that depend on a strong farm economy.

(2) The cost of purchasing a family farm has grown substantially in recent years, making entry into farming almost impossible, except for those individuals who inherit a farm or have considerable financial assets.

(3) Neither the private market nor the existing Federal programs are able to provide the necessary financial assistance to beginning or part-time farmers to enter full-time farming.

(4) If new entrants into full-time family farming are discouraged by the high capital requirements, farmland that might otherwise have gone to new farmers may be sold to existing farmers who are consolidating and expanding their holdings, to nonfarming investors for lease to farmers, or to investors who will remove the land from agricultural use.

(5) The degree of absentee ownership of farmland is increasing significantly.

(6) The maintenance of a farm system dominated by family-size units is and should be a basic goal of American agricultural policy. The maintenance of such a system, however, is possible only if entry into full-time family farming is attainable by those who lack substantial individual assets.

(7) The most appropriate manner for entry into full-time family farming and the barriers to such entry vary by State and region. Any program to provide assistance to those seeking to enter into full-time family farming should be adapted to local conditions.

(8) Federal support for local efforts to aid those interested in and qualified for entry into full-time family farming will help to maintain the family farm system and prevent further consolidation of small farms.

ESTABLISHMENT OF PROGRAM

SEC. 3. (a) The Secretary of Agriculture shall establish a program to provide loan guarantees to States for loans made by agencies of such States to individuals—

(1) who seek to purchase and operate family farms,

(2) who have been approved by State agencies for participation in such program, and

(3) who are eligible under section 6.

(b) Under the program described in subsection (a), the Secretary may guarantee the payment of not more than 90 percent of the principal and interest payable under a loan made by a State agency to an individual described in such subsection if there is in effect with respect to such State at the time such loan is made an application submitted and approved under section 4.

APPLICATION FOR STATE IMPLEMENTATION OF PROGRAM

SEC. 4. (a) Not more than 180 days after the date of the enactment of this Act, the Secretary shall issue rules for the implementation in States of the beginning farmers assistance program established under section 3(a).

(b) To participate in such program, an agency designated by the chief executive officer of a State shall submit an application to the Secretary, in accordance with the rules issued under subsection (a), setting forth such information as the Secretary may require with respect to the implementation of such program by such agency.

APPROVAL OF STATE APPLICATION

SEC. 5. (a) The Secretary shall approve not more than 20 applications submitted under section 4(b) by State agencies if each such application—

(1) includes a certification that the chief executive officer of the State involved has designated such State agency to implement the beginning farmers assistance program throughout such State,

(2) includes a description of a procedure to insure that such State agency selects for participation in the beginning farmers assistance program individuals who are likely to repay loans guaranteed by the Secretary under such program,

(3) includes a description of a procedure to insure that individuals who receive such loans purchase family farms which are not larger than the average size of the family farms located in the State involved,

(4) includes a description of procedures to insure that such program is effectively implemented and efficiently administered by such State agency throughout such State,

(5) provides assurances, and includes a procedure to insure, that loans under such program are made by such State agency only if such State agency determines, after an appraisal of the family farm involved, that the purchase price of such family farm is reasonable, and

(6) provides assurances that such State agency not include in any loan agreement terms and conditions which are detrimental to the successful operation of the family farm involved.

(b)(1) The Secretary shall approve or disapprove an application submitted under section 4(b) not later than 90 days after such application is received by the Secretary.

(2)(A) With the approval of the Secretary, a State may amend such application from time to time.

(B) The Secretary shall approve or disapprove an amendment to such application not later than 90 days after such amendment is received by the Secretary.

(c)(1) If, after the approval of an application submitted under section 4(b), the Secretary finds that a State agency is not complying with the terms of such application, the Secretary shall notify such State agency of such noncompliance.

(2) If such noncompliance continues for a period exceeding 180 days or if such State agency refuses to amend such application in such manner as the Secretary may require to insure compliance, then the Secretary shall revoke such application and shall terminate the participation of such State agency in the beginning farmers assistance program.

(3)(A) The termination under paragraph (2) of participation by a State agency in such program shall not affect the validity of any guarantee made by the Secretary with respect to any loan made by such State agency before the date of such termination.

(B) Such termination shall not affect the eligibility of such State agency, or of any other agency of the State involved, to submit a subsequent application under section 4(b) and to implement such program.

ELIGIBILITY OF INDIVIDUALS

SEC. 6. (a) An individual is eligible to receive a loan under the beginning farmers assistance program if such individual—

(1) seeks to purchase and operate a family farm,

(2) has not purchased or owned a family farm in the 10-year period ending on the date such individual applies for a loan guaranteed under such program,

(3) certifies to the State agency involved that if a loan guarantee is not made available under such program, then such individual will be unable to obtain the credit necessary to become a family farmer,

(4) provides to such State agency documentary evidence that an application of such individual for a loan on reasonable terms for the purchase of a family farm has been rejected by a commercial lender and by the Farmers Home Administration, in the 90-day period ending on the date such individual submits an application to such State agency for a loan guaranteed under such program,

(5) demonstrates to the satisfaction of such State agency that such individual is qualified to purchase and operate a family farm,

(6) has not less than 1 year of experience working full-time on a farm or operating a farm,

(7) has a net worth of less than $100,000 and assets having an aggregate value of less than $300,000 in fiscal year 1982, or less than such respective amounts adjusted annually for fiscal year 1983 and fiscal year 1984 by the Secretary to take into account changes in the value of such amounts caused by inflation, and

(8) satisfies any other criteria established by such State agency concerning the size of any family farm to be purchased by such individual with such loan.

(b) To participate in the beginning farmers assistance program, an eligible individual shall submit to a State agency a loan application containing the information described in subsection (a) and such other information as such State agency may require.

LAPSE OF LOAN GUARANTEE

SEC. 7. A loan guarantee made under the beginning farmers assistance program shall lapse if the individual who obtains the loan guaranteed under such program voluntarily transfers, by sale or otherwise, any interest in the family farm purchased with such loan.

REPORTS

SEC. 8. The Secretary shall submit to the Committee on Agriculture, Nutrition, and Forestry of the Senate and to the Committee on Agriculture of the House of Representatives, not later than December 31 of each year, a report on the operation of the beginning farmers assistance program during the fiscal year ending in the year in which such report is required. The first such report shall be made after the first full fiscal year of operation of such program.

LIMITATION OF AUTHORITY

SEC. 9. (a) In any fiscal year the aggregate amount of outstanding loans with respect to which the Secretary may make guarantees under section 3 may not exceed an amount equal to 5 times the difference between—

(1) the aggregate amount appropriated, and available for, loan guarantees under this Act, and

(2) the aggregate amount paid by the Secretary as a result of defaults in the repayment of loans guaranteed under such section.

(b) The authority of the Secretary under section 3 to make loan guarantees shall lapse on October 1, 1984. The preceding sentence shall not be construed to affect the

validity of any loan guarantee made before such data.

AMENDMENT TO CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT

SEC. 10. The first sentence of section 303(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1923(a)) is amended by inserting "and points" before the period.

DEFINITIONS

SEC. 11. For purposes of this Act—

(1) the term "beginning farmers assistance program" means the program established by the Secretary under section 3(a),

(2) the term "family farm" means a farm which—

(A) is owned and operated by an individual with the assistance of the members of such individual's family and of not more than the equivalent of the labor of 1 person working full-time,

(B) is small enough to be operated by such individual with the assistance of the members of such individual's family or of not more than the equivalent of the labor of 1 person working full time, and

(C) provides sufficient income in years with average or better than average crop yields to enable such individual to meet not less than 30 percent of such individual's necessary family and operating expenses, including the maintenance of essential chattel and real property, and the payment of debts,

(3) the term "family farmer" means an individual—

(A) who operates a family farm,

(B) who derives not less than 30 percent of such individual's gross income from the operation of such farm, and

(C) whose employment off such farm does not prevent such individual from personally performing necessary tasks of operating such farm,

(4) the term "Secretary" means the Secretary of Agriculture,

(5) the term "State" includes the several States, the District of Columbia, Puerto Rico, Guam, the Virgin Islands of the United States, the Commonwealth of the Northern Mariana Islands, and the territories and possessions of the United States, and

(6) the term "State agency" means an agency of a State, which administers the beginning farmers assistance program throughout such State.

AUTHORIZATION OF APPROPRIATIONS

SEC. 12. There is authorized to be appropriated to carry out the beginning farmers assistance program $250,000,000 for each of the fiscal years 1982, 1983, and 1984.●

CONSOLIDATION OF CERTAIN FUNCTIONS OF VA REGIONAL OFFICES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

● Mr. MONTGOMERY. Mr. Speaker, on Thursday, March 26, the Committee on Veterans' Affairs adopted budget recommendations for the Budget Committee's use in considering those functions of Government administered by the Veterans' Adminstration in relation to President Reagan's proposed budget cuts.

Though I strongly support the President's efforts to reduce overall Federal spending, I do not agree with all of the administration's proposed reductions of $743.7 million in budget authority and $830.9 in outlays for veterans' benefits and services.

It should be noted, Mr. Speaker, that these reductions would be in addition to those already recommended by former President Carter. When the former President's reductions are added to the current administration's, the proposed outlay reduction for veterans' programs approaches $1 billion.

Mr. Speaker, I cannot accept any reductions in direct health care personnel out of the Department of Medicine and Surgery; nor can I accept the consolidation of hospital wards proposed by the administration. At a time when we know that staffs of most VA hospitals are inadequate, and at a time when we know and have documented that eligible veterans who need care and treatment are being turned away from some medical facilities, we cannot afford to lose any more operating beds. Nor can there be any further cuts in medical care and medical and prosthetic research personnel.

Mr. Speaker, of more concern to me at the moment is the administration's proposed plan to consolidate most of the current functions now being performed in our 58 regional offices located throughout the country. The President has proposed the consolidation of the adjudication and loan guaranty functions of these regional offices into one central location. If we allow this to happen, it will eventually bring about the closing of some, if not most, of the existing regional offices—although the administration would suggest otherwise. Under the President's proposed plan, if regional offices are not closed, such offices would be a "regional office" in name only. There would be nothing left but a few veteran contact personnel.

Mr. Speaker, under the administration's proposed plan, there would be established a centralized nationwide claims processing and loan guaranty center in fiscal year 1982. This center would house the majority of the Department of Veterans' Benefits operating personnel. Currently, the Department of Veterans' Benefits has 16,404 employees. The plan is to cut this number to 14,521 in 1982. Of this number 12,000 employees would be transferred to the proposed central location.

Obviously, Mr. Speaker, this proposal did not come from the Veterans' Administration. In my view, the decision was made by the Office of Management and Budget without the VA's knowledge.

Anyone familiar with current VA programs would understand that this objective cannot be achieved in fiscal year 1982.

Why?

It would be administratively impossible to bring about a change of this magnitude in such a short period of time. First and foremost, where would you find the space? As stated by a member of our committee, it would take a building almost as big as the Pentagon to house the number of people and the records that would be contained in such a move. The physical move of 12,000 personnel would be impossible to accomplish in such a short period of time. The expense to move these 12,000 people would be prohibitive, and the expense of terminating current leases would be enormous.

It would take years to acquire GSA lease space large enough to accommodate the number of employees required for the proposed national processing center. Many additional problems would have to be worked out.

Mr. Speaker, the reason I point this out is to show that this proposal was obviously not very well thought out. It appears to have been made by someone at OMB with a calculator in hand, rather than by experienced VA personnel who understand the impact of a decision of this nature.

Having said all of this, Mr. Speaker, I want to clearly establish my firm and strong opposition to any consolidation proposal and would urge my colleagues on the Committee on the Budget and the Appropriations Committee to reject this proposed plan.

The personnel reductions proposed by the administration must be restored. If not, it will only be the first of several to be proposed in the next 2 or 3 years—resulting in the closing of existing regional offices.

So that my colleagues will be aware of the impact the proposed consolidation would have on the 58 regional offices located throughout the country—at least 1 in each State—there follows at the close of my remarks a listing of full-time employment equivalency and expenditures by regional office for the Department of Veterans' Benefits.

I want each of my colleagues to take note of the amount of funds now being spent in each State to operate these offices. If they are closed in the future, not only will the State and local governments lose the income due to the operation of these offices, but more importantly, Mr. Speaker, veterans can expect lengthy delays in getting their applications processed in the future. The efficient operation we now have will be lost.

I frankly do not understand why this decision was made. In my view, it goes against the basic commitment the President expressed so many times during his campaign—his commitment to decentralizing the Federal Government and returning those functions to State and local governments wherever possible. This decision, Mr. Speaker, would have just the opposite effect.

It will take from State and local communities those functions which are being managed so efficiently and place them in the hands of one Federal bureaucratic office centrally located. It would be a terrible and tragic mistake, and I hope it is rejected.

Should this proposal be contained in the appropriations bill when it is considered by the House, I want my colleagues to know that I shall consider offering an amendment to add back the amount of money necessary to keep the regional offices operating in the various States at the current operating level.

A listing of full-time employment equivalency and expenditures by regional office for the Department of Veterans' Benefits follows:

FISCAL YEAR 1980 COSTS

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GUNDERSON), to revise and extend their remarks and include extraneous material:)

Mrs. HECKLER, for 10 minutes today.

(The following Members (at the request of Mr. BONIOR of Michigan), to revise and extend their remarks and include extraneous material:)

Mr. HUBBARD, for 5 minutes, today.

Mr. BONIOR of Michigan, for 30 minutes, today.

Mr. LAFALCE, for 15 minutes, today.

Ms. FERRARO, for 5 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BOLAND, for 5 minutes, today.

Mr. HANCE, for 5 minutes, today.

Mr. HARKIN, for 10 minutes, today.

Mr. BEDELL, for 5 minutes, today.

Mr. SHARP, for 5 minutes, today.

Mr. DYMALLY, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. GUNDERSON), and to include extraneous matter:)

Mr. ROUSSELOT.

Mr. RUDD.

Mr. DERWINSKI in two instances.

Mr. JEFFORDS.

Mr. HAMMERSCHMIDT.

Mr. BAILEY of Missouri.

Mr. ROBERTS of South Dakota in three instances.

Mr. FISH.

Mr. COURTER.

Mr. GILMAN in two instances.

Mr. MICHEL in three instances.

(The following Members (at the request of Mr. BONIOR of Michigan), and to include extraneous matter:)

Mr. BENJAMIN.

Ms. MIKULSKI.

Mr. STUDDS.

Mr. BROWN of California.

Mr. WEISS.

Mr. RATCHFORD.

Mr. MOFFETT in two instances.

Mr. FOGLIETTA.

Mr. LOWRY of Washington.

Mr. GARCIA.

Mr. GUARINI in two instances.

Mr. MCDONALD in two instances.

Mr. NOWAK in five instances.

Mrs. SCHROEDER.

Mr. LANTOS.

Mr. HEFTEL.

Mr. DONNELLY.

Mr. SCHUMER.

ADJOURNMENT

Mr. BONIOR of Michigan. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 12 minutes p.m.), under its previous order, the House adjourned until Monday, April 6, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1002. A letter from the Executive Associate Director, Office of Management and Budget, Executive Office of the President, transmitting a report that various appropriations have been apportioned on a deficiency basis as a result of pay increases for Federal employees, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1003. A letter from the Adjutant General, Veterans of Foreign Wars of the United States, transmitting the proceedings of the 81st National Convention of the Veterans of Foreign Wars, pursuant to section 8 of the act of May 28, 1936 (H. Doc. No. 97-39); to the Committee on Armed Services and ordered to be printed.

1004. A letter from the Chairman, National Credit Union Administration, transmitting the Board's second annual report on activities of the Administration, pursuant to section 102(d) of the Federal Credit Union Act, as amended; to the Committee on Banking, Finance and Urban Affairs.

1005. A letter from the Acting Director, U.S. Arms Control and Disarmament Agency, transmitting a draft of proposed legislation to authorize appropriations under the Arms Control and Disarmament Act, and for other purposes; to the Committee on Foreign Affairs.

1006. A letter from the Chairman, Board of Governors of the Federal Reserve System, transmitting a report on the Board's activities under the Government in the Sunshine Act during calendar year 1980, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

1007. A letter from the National Quartermaster and Adjutant, Veterans of World War I of the U.S.A., Inc., transmitting the proceedings of the organization's national convention and its financial statements for the 9 months ended June 30, 1980, pursuant to section 16 of Public Law 85-530, and section 3 of Public Law 88-504 (H. Doc. No. 97-40); to the Committee on the Judiciary and ordered to be printed.

1008. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to authorize the necessary funds for the completion of certain comprehensive river basin plans for flood control, navigation, and for other purposes; to the Committee on Public Works and Transportation.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALBOSTA:

H.R. 2976. A bill to modify the project for flood protection on the Saginaw River,

Mich.; to the Committee on Public Works and Transportation.

By Mr. BEDELL (for himself and Mr. DORGAN of North Dakota):

H.R. 2977. A bill to establish a pilot program to provide guarantees for loans made under State programs to assist individuals who are qualified, but lack financial resources, to acquire family farms, and for other purposes; to the Committee on Agriculture.

By Mr. BONKER (for himself, Mr. AUCOIN, Mr. DICKS, Mr. PRITCHARD, and Mr. SWIFT):

H.R. 2978. A bill to provide for additional protection of steelhead trout as a game fish, and for other purposes; jointly, to the Committees on Interior and Insular Affair and Merchant Marine and Fisheries.

By Mr. BROOKS (for himself, Mr. FOUNTAIN, Mr. ENGLISH, Mr. WEISS, Mr. HORTON, Mr. BUTLER, Mr. KINDNESS, and Mr. BOWEN):

H.R. 2979. A bill to extend the authorization of appropriations for the National Historical Publications and Records Commission for fiscal years 1982 and 1983; to the Committee on Government Operations.

By Mr. CARMAN:

H.R. 2980. A bill to give the Federal Reserve Board authority to impose reserves on money market mutual funds; jointly, to the Committees on Banking, Finance and Urban Affairs and Energy and Commerce.

By Mr. CHAPPELL:

H.R. 2981. A bill to repeal section 3402(q) of the Internal Revenue Code of 1954 which requires for income tax purposes, amounts to be withheld from certain gambling winnings; to the Committee on Ways and Means.

By Mr. COLEMAN (for himself and Mr. ROBERTS of Kansas):

H.R. 2982. A bill to amend the Internal Revenue Code of 1954 to allow the estate of a decedent a deduction for certain bequests of interests in property used in farms or other trades or businesses, and for other purposes; to the Committee on Ways and Means.

By Mr. COURTER:

H.R. 2983. A bill authorizing supplemental appropriations for the fiscal year 1981 for the Board for International Broadcasting; to the Committee on Foreign Affairs.

By Mr. DAN DANIEL:

H.R. 2984. A bill to amend the Immigration and Nationality Act to repeal the authority under section 212 of that act to establish an adverse wage rate for nonimmigrant aliens brought into the United States for agricultural labor; to the Committee on the Judiciary.

By Mr. DAN DANIEL (for himself, Mr. PRICE, Mr. WHITE, Mr. DICKINSON, Mr. BEARD, Mr. STRATTON, and Mr. NICHOLS):

H.R. 2985. A bill to amend title 10, United States Code, to provide employment protection for employees of nonappropriated fund instrumentalities of the Department of Defense who report violations of law or mismanagement; to the Committee on Armed Services.

By Mr. DONNELLY:

H.R. 2986. A bill to amend the Home Owners' Loan Act of 1933 to permit savings and loan associations to make and invest in reverse annuity mortgages to the extent permitted by the Federal Home Loan Bank Board; to the Committee on Banking, Finance and Urban Affairs.

H.R. 2987. A bill to amend the Internal Revenue Code of 1954 to allow individuals a refundable tax credit for certain amounts of the rent they pay on their principal residences which is attributable to real property taxes; to the Committee on Ways and Means.

H.R. 2988. A bill to amend the Internal Revenue Code of 1954 to provide for the exclusion from gross income of interest on savings deposits which may be used by the financial institution only for mortgages on owner-occupied residences; to the Committee on Ways and Means.

By Mrs. FENWICK (for herself, Mr. FORSYTHE, Mrs. ROUKEMA, and Mr. COURTER):

H.R. 2989. A bill to establish a mandatory final offer selection process in the case of any labor dispute between the Port Authority Trans-Hudson Corp. and representatives of employees of such corporation that is not resolved under the procedures of the Railway Labor Act, and for other purposes; to the Committee on Energy and Commerce.

By Mr. HAMMERSCHMIDT:

H.R. 2990. A bill to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes; to the Committee on Armed Services.

By Mrs. HECKLER:

H.R. 2991. A bill to require Federal agencies to report to the Congress concerning rules and regulations which result in different treatment based on gender and to insure that words and the effect of words in Federal statutes and regulations are gender neutral; to the Committee on Government Operations.

By Mr. HEFTEL:

H.R. 2992. A bill to encourage and enhance the use of domestic renewable resources in small power production facilities, and to encourage the efficient use of energy resources in cogeneration facilities, by removing certain regulatory restrictions respecting small power production and cogeneration facilities, and for other purposes; to the Committee on Energy and Commerce.

By Mr. HUGHES:

H.R. 2993. A bill to amend the Internal Revenue Code of 1954 to allow certain individuals who have attained age 65 or who are disabled a refundable tax credit for property taxes paid by them on their principal residences or for a certain portion of the rent they pay for their principal residences; to the Committee on Ways and Means.

By Mr. JEFFORDS (for himself and Mr. JONES of Tennessee):

H.R. 2994. A bill to further local and State efforts to address the continuing permanent conversion of agricultural land to nonagricultural uses, and for other purposes; to the Committee on Agriculture.

By Mr. McDONALD:

H.R. 2995. A bill to amend the Fair Labor Standards Act of 1938 to repeal the minimum wage requirements of that act; to the Committee on Education and Labor.

By Mr. MINISH:

H.R. 2996. A bill to amend the Internal Revenue Code of 1954 to increase to $150,000 the amount of group-term life insurance which may be provided by an employer and exluded from the gross income of an employee; to the Committee on Ways and Means.

By Mr. MITCHELL of Maryland (for himself and Mr. McDADE):

H.R. 2997. A bill to amend the Small Business Act; to the Committee on Small Business.

H.R. 2998. A bill to consolidate and modify the terms of the Small Business Administration programs under sections 7(a), 7(e), 7(h), 7(i), and 7(l) of the Small Business Act and sections 501 and 502 of the Small Business Investment Act of 1958; to the Committee on Small Business.

By Mr. MONTGOMERY:

H.R. 2999. A bill to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. LUNDINE (for himself and Mr. BARNARD):

H.R. 3000. A bill to assist cities, counties, and States by amending section 5136 of the Revised Statues, as amended, with respect to the authority of national banks to underwrite and deal in securities issued by State and local governments, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. NELLIGAN:

H.R. 3001. A bill to amend section 1751 of title 18 of the United States Code to provide the same penalties for attempting to murder the President or other person protected under such section as are provided for the murder of such a person; to the Committee on the Judiciary.

By Mr. OTTINGER (for himself, Mr. DINGELL, and Mr. SHARP):

H.R. 3002. A bill to authorize appropriations to the Department of Energy for civilian programs for fiscal year 1982; jointly, to the Committees on Energy and Commerce, Interior and Insular Affairs, and Science and Technology.

By Mr. ROBERTS of South Dakota:

H.R. 3003. A bill to amend the Internal Revenue Code of 1954 to provide estate and gift tax equity for family enterprises, and for other purposes; to the Committee on Ways and Means.

By Mr. ROUSSELOT (for himself, Mr. CONABLE, Mr. DUNCAN, Mr. ARCHER, Mr. PHILIP M. CRANE, Mr. FRENZEL, Mr. MARTIN of North Carolina, Mr. BAFALIS, Mr. GRADISON, Mr. MOORE, Mr. LOTT, Mr. WALKER, Mr. COLLINS of Texas, Mr. GRISHAM, Mr. KEMP, Mr. LAGOMARSINO, Mr. GINGRICH, and Mr. SHUMWAY):

H.R. 3004. A bill to amend title IV of the Social Security Act to improve the operation of the AFDC program, to give the States, a fiscal incentive to reduce error and waste in the AFDC program, to permit the States to use savings from the AFDC program to defray the costs of other welfare programs, to provide fiscal relief to the States under the AFDC program, to make it clear the States may impose work requirements as a condition of eligibility for AFDC payments, and to establish a demonstration project to provide a pilot test of the States ability to create their own welfare programs as an alternative to the AFDC program; to the Committee on Ways and Means.

By Mrs. SCHROEDER:

H.R. 3005. A bill to encourage States to provide unemployment benefits to certain partially unemployed workers; to the Committee on Ways and Means.

By Mr. SENSENBRENNER:

H.R. 3006. A bill to amend the Bail Reform Act of 1966 to authorize consideration of danger to the community in setting conditions of release, to authorize revocation of pretrial release for persons who violate their release conditions, intimidate witnesses or jurors, or commit new offenses, and for other purposes; to the Committee on the Judiciary.

By Mr. SHUMWAY:

H.R. 3007. A bill to amend chapter 44 (relating to firearms) of title 18 of the United States Code to prohibit the importation of any part of a firearm if the importation of such firearm is prohibited under that chapter; to the Committee on the Judiciary.

By Mr. SOLARZ:

H.R. 3008. A bill requiring U.S. persons who control enterprises in South Africa to comply with certain fair employment principles, prohibiting any new loans by U.S. financial or lending institutions to the South African Government or to South African corporations or other entities owned or controlled by the South African Government, requiring reports with respect to loans to other South African entities, and prohibiting the importation of South African krugerrands or other South African gold coins; jointly, to the Committees on Foreign Affairs and Banking, Finance and Urban Affairs.

By Mr. SOLARZ (for himself and Mr. BINGHAM):

H.R. 3009. A bill to place restrictions on military assistance and sales to El Salvador; to the Committee on Foreign Affairs.

By Mr. WHITTEN:

H.R. 3010. A bill to establish the Reconstruction Finance Corporation to make loans and loan guarantees to individuals or concerns engaged in industry, agriculture, and commerce, who would otherwise be unable to obtain needed financing or refinancing essential or continued operation thereby preventing unemployment and resulting disruption of the economy, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 3011. A bill to amend the Internal Revenue Code of 1954 to provide that the deduction for medical and dental expenses shall be allowable without regard to whether such expenses exceed certain percentages of the taxpayer's adjusted gross income and to provide that such deduction shall be allowable whether or not the taxpayer itemizes deductions; to the Committee on Ways and Means.

H.R. 3012. A bill to amend the Internal Revenue Code of 1954 with respect to the determination of whether certain charitable organizations are publicly supported; to the Committee on Ways and Means.

By Mr. SOLOMON (for himself, Mr. MOLINARI, Mr. MCGRATH, and Mr. HOPKINS):

H. Con. Res. 104. Concurrent resolution commending Secret Service Agent Timothy J. McCarthy, Officer Thomas Delahanty, President Ronald Reagan, and Assistant to the President James S. Brady; to the Committee on Post Office and Civil Service.

By Mr. HARKIN (for himself and Mr. GILMAN):

H. Res. 122. Resolution urging support for an international code, proposed by the World Health Organization and UNICEF, on the marketing of breast milk substitutes; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. MURPHY:

H.R. 3013. A bill for the relief of Kap Sun Butka; to the Committee on the Judiciary.

By Mr. DORGAN of North Dakota:

H.R. 3014. A bill to provide for the reinstatement and validation of U.S. oil and gas lease No. M-15450 (ND); to the Committee on Interior and Insular Affairs.

H.R. 3015. A bill to provide for the reinstatement and validation of U.S. oil and gas lease No. M-16402 (ND) Acq.; to the Committee on Interior and Insular Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 4: Mr. LAFALCE, Mr. LAGOMARSINO, Mr. BIAGGI, Mr. DUNCAN, Mr. ERLENBORN, Mr. LEWIS, Mrs. HOLT, Mr. MCKINNEY, Mr. WILSON, Mr. COLLINS of Texas, Mr. FRENZEL, Mr. BOWEN, Mr. BAFALIS, Mr. FIELDS, Mr. MILLER of Ohio, Mr. DE LUGO, Mr. STANGELAND, and Mr. HENDON.

COYNE, Mr. PHILLIP BURTON, Mr. RUSSO, Mr. CORRADA, Mr. WIRTH, Mr. DWYER, Mr. BONER of Tennessee, Mr. LEHMAN, Mr. WAXMAN, Mr. RITTER, Mr. FROST, Mr. BADHAM, Mrs. HECKLER, Mr. DYSON, Mr. SCHEUER, Mr. ZEFERETTI, Mr. CHAPPELL, Mr. NOWAK, Mr. MARKS, Mr. ALEXANDER, Mrs. BOGGS, Mr. LOWERY of California, Mr. DE LUGO, Mr. SIMON, Mrs. BOUQUARD, Mr. MARTIN of New York, Mr. MICA, Mr. FAUNTROY, Mr. ANDREWS, Mr. MCHUGH, Mr. GRAY, Mr. WILLIAMS of Montana, Mr. MINETA, Mr. ANTHONY, Mr. LEWIS, Mr. MCCLORY, Mr. LELAND, Mr. MITCHELL of New York, Mr. LOTT, Mr. PASHAYAN, Mr. HOLLAND, Mr. CHENEY, Mr. SMITH of New Jersey, Mr. HEFNER, Mr. JEFFORDS, Mr. TAUZIN, Mr. LOWRY of Washington, Mr. FRANK, Mr. CROCKETT, Mrs. SCHNEIDER, and Mr. PATTERSON.

H.R. 1335: Mr. CHAPPELL.

H.R. 1337: Mr. RAILSBACK, Mrs. FENWICK, Mr. BURGENER, Mr. SIMON, Mr. NEAL, and Mr. WEBER of Minnesota.

H.R. 1432: Mr. GINGRICH.

H.R. 1714: Mr. PORTER, Mr. HILER, Mr. CLAY, Mrs. CHISHOLM, Mr. FOGLIETTA, Mr. MARRIOTT, Mr. SUNIA, Mr. MITCHELL of Maryland, Mr. WHITEHURST, Mr. FROST, Mr. HANSEN of Idaho, Mr. SOLOMON, Mr. DE LA GARZA, and Mr. FRENZEL.

H.R. 1989: Mr. GIBBONS and Mr. FISH.

H.R. 2159: Mr. FASCELL, Mr. FORSYTHE, Mr. COELHO, Mr. CLAY, Mr. IRELAND, Mr. LAGOMARSINO, Mr. AKAKA, Mr. LOWERY of California, Mr. FAZIO, Mr. PATTERSON, and Mr. BURGENER.

H.R. 2160: Mr. WEAVER, Mr. GUNDERSON, Mr. STANGELAND, Mr. FORSYTHE, Mr. BEDELL, Mr. WEBER of Minnesota, Mr. EMERY, Mr. FOLEY, Mr. HANSEN of Idaho, Mr. BROWN of Ohio, Mrs. SNOWE, and Mr. BONIOR of Michigan.

H.R. 2326: Mr. BARNES, Ms. MIKULSKI, Mr. SIMON, and Mr. FISH.

H.R. 2420: Mr. BAFALIS, Mr. MCCOLLUM, Mr. HUTTO, Mr. PEPPER, Mr. MICA, Mr. FASCELL, Mr. FUQUA, Mr. YOUNG of Florida, Mr. GIBBONS, Mr. NELSON, Mr. CHAPPELL, Mr. RAILSBACK, Mr. IRELAND, Mr. EVANS of Georgia, Mr. MOORE, and Mr. MAZZOLI.

H.R. 2451: Mr. SMITH of Oregon, Mr. MCCOLLUM, Mr. BUTLER, Mr. RAHALL, Mr. FOUNTAIN, and Mr. MAZZOLI.

H.R. 2561: Mrs. SMITH of Nebraska, Mr. FUQUA, Mr. WHITEHURST, Mr. ANDREWS, Mr. AKAKA, Mr. EMERSON, Mr. ROBERTS of Kansas, and Mr. JEFFORDS.

H.R. 2841: Mr. EDWARDS of California and Mr. SAM B. HALL, JR.

H.J. Res. 128: Mr. DASCHLE, Mr. DERRICK, Mr. GORE, Mr. GUYER, Mr. FOUNTAIN, Mr. JONES of Tennessee, Mr. MARTIN of New York, Mr. PRICE, Mr. WOLPE, Mr. YATRON, and Mr. YOUNG of Missouri.

SENATE—*Thursday, April 2, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Right Reverend John T. Walker, Episcopal Bishop of Washington and Dean of the Cathedral, Washington, D.C., offered the following prayer:

Almighty God, we bow before Thee in gratitude for this Nation, its leaders, and its people. We seek Thy blessing on the enterprise begun here in the name of liberty, and we earnestly pray for the protection of those who serve the people of this land.

We especially thank you that the President of the United States has survived the attempt on his life and pray that You will continue to be with him and with those others felled with him. May Your healing powers flow in them and Your love and mercy be with their families.

As this Senate begins its work today, we especially pray that Your spirit will be in and with them, reminding them of the need to show compassion for the hungry, the homeless, and the suffering. As they struggle with the economic and international problems that beset us, may they never forget the children of the Nation and the world who need our special attention.

And finally, O Lord, lead us along the paths of peace. Grant us the courage and the wisdom to make the difficult decisions by which alone our peace may be secured. Sustain in us the hope that the day will soon come when all our people, with all of our diversity intact, will know the blessings of liberty, justice, and tranquillity.

In the name of God we pray. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

WELCOME TO THE EPISCOPAL BISHOP OF WASHINGTON

Mr. STEVENS. Mr. President, I join my colleagues in welcoming the Episcopal Bishop of Washington.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, I have no request for time on this side.

Did the Senator from Wisconsin have any request for time?

Mr. PROXMIRE. I have no request for time unless the Senators from Ohio and Illinois would like time. I have a statement I should like to make during the time of the leader.

Mr. METZENBAUM. Mr. President, the Senator from Ohio had intended to join with the Senator from Iowa (Mr. JEPSEN), the Senator from Illinois, and perhaps the Senator from Minnesota in connection with a colloquy.

Mr. PROXMIRE. Mr. President, it is my understanding that there are two special orders, one for the Senator from Arkansas (Mr. BUMPERS) and one for the Senator from Iowa (Mr. JEPSEN).

Mr. STEVENS. Mr. President, I yield the time of the majority leader on this side to Senator JEPSEN, to be used as he desires in connection with his special order. I ask unanimous consent that I may do that.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The acting minority leader is recognized.

Mr. PROXMIRE. Mr. President, I thank the Chair.

GAYLORD NELSON—CLASS PERSONIFIED

Mr. PROXMIRE. Mr. President, Gaylord Nelson was one of the finest persons who ever served in the Senate. A man of strong and deep convictions and great strength of personal character, he was also one of the most liked of our colleagues. No Senator could have asked for a better person to serve with.

Gaylord Nelson was defeated last November by an eyelash. He has taken his defeat in stride without any bitterness and with a great deal of aplomb. Gaylord Nelson has class.

Now he is working with the Wilderness Society, pursuing his life-long conservation interest.

People magazine has just done an article about his elections and his defeat and his attitude toward them. It is a revealing and complimentary piece of journalism. It could not be about a nicer person.

I ask unanimous consent that the article from People be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A VETERAN SENATOR COMES TO TERMS WITH HIS GRAVEST FEAR: DEFEAT AT THE POLLS

(By Gaylord Nelson)

Nobody likes to take a licking. When you run for office 11 times, you've gone through the discipline 11 times of saying you're making as hard a fight as you can make but you might lose it. You've sort of steeled yourself to face up to the possibility of defeat. Still, after 32 years of doing what you most love to do in life, it's a substantial shock to face up to.

I felt all along this was a tough year. Even though three weeks before the election the Milwaukee Journal and the Milwaukee Sentinel showed me with 20 percentage point leads I saw there were 14, 15 percent undecided, and I could anticipate a possibility of defeat. I thought the odds were against it, and they were. But then it fell apart after the President's debate with Mr. Reagan. You could feel it happen. At 10:30 election night, when I was carrying Milwaukee only 56–44, I knew it was all over. I was with my wife, Carrie Lee, my three children and eight or 10 friends. It wasn't until two o'clock in the morning when I was absolutely certain, and then I just said, "This is it, it's all over, we're defeated." There weren't any tears, and people went to bed about three o'clock. I thought it was particularly important to have the kids and family together then. Everybody did well, and I was proud of them.

You know, I've wanted to be in politics since the time my dad, a country doctor in northwestern Wisconsin, took me to hear Bob La Follette speak from the back of a train. I was 8 or 9 years old at the time. I remember I didn't understand the speech, but the gestures and the noise were impressive and on the way back my dad asked me whether I wanted to be in politics. I said yes, but that I was afraid by the time I grew up Bob La Follette would settle all the problems and there would be nothing for me to do. Thirty years later, in 1958, my dad was at the state Democratic convention in La Crosse. He was 81 years old, and he had a stroke that night, and I was a gubernatorial candidate and the keynote speaker. The last words he said to me were, "Do you think young Bob La Follette left enough problems behind for you to solve?" Since I was a boy I had dreamed about being in the U.S. Senate, but I never thought it would happen. And then it did.

So I've said to hell with the disappointment. It's in the past. I've had a marvelous career, I've enjoyed what I've done, and there's no reason to be fussing and worrying about what's past. When I lost, I did not permit myself to mope around about it. If you do that you're just eating away at yourself and spoiling your life. You have to say it's over with, and look into the future. Since I got the opportunity to get into the environmental field, which I had spent a political career on anyway, it hasn't been a big problem for me. I'm enjoying what I'm doing. I love it.

Of course it's different now. When I'm up on Capitol Hill and I see old friends in the Senate, I think it would be fun to be involved in the fight. Every time I've been over there when a roll call bell rings, all of a sudden I'm alerted to think that they're calling me, when the fact is, they aren't.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

My staff people faced a shocker when I lost the election. They came to the Hill because they loved politics, and suddenly there are thousands like them around this town, and there aren't that many openings. I've tried to help with recommendations and telephone calls. That part is very troubling to me because, after all, I was lucky. There was no financial problem. My wife and I are pretty conservative and always save some money. And neither of us will miss invitations to the White House or embassies. They're the most boring events that anybody ever contrived. So are those obligatory dinners in the state where the senator is the guest of honor: three speakers, finally they introduce you at 10 o'clock at night, then you speak, and you've shot four or five hours, to say nothing of the time getting there and leaving, and it turns out to have been the 20th event by the same economic interest group around the state that year, and they're the same. I won't have to go though that again.

Unfortunately, a large amount of the work of a U.S. senator has nothing to do with legislating. You're meeting every day with the state delegations that staff people could just as easily see. There are too many roll calls—600 one year, a tremendous waste of time. You also spend too much time running back to your state. The public demand to show yourself makes it impossible for a legislator to give serious thought to important issues.

But I miss the Senate. I love the legislative process and I love the participation in decision making, as who wouldn't? I've been involved in the biggest issues of the past 18 years—the Civil Rights Act of 1964, the Vietnam war, Earth Day and Watergate, and all the foreign policy and domestic issues. It's been a challenge and it's been fun.

You always wonder after a defeat whether you might have done more, campaigned harder, spent a little more time at it. But politics is such an all-consuming business that you must set some limits on how much you're going to do. I suppose it's becoming a job in which everybody ought to be single: Your constituents will be your family and you'll just be at it all day and all night, Saturdays and Sundays. But if that's the case, I'd say to hell with it, I'd give up the job before I'd be consumed by it and have no time for my family at all. My only regret is I didn't have more time with my kids as they were growing up.

For 18 years my wife has been going to the theater with friends or alone. Not long ago I told her we'll start going to the Kennedy Center together. Another thing: I've had a garden every year. The problem was that the Senate usually recesses in August, and when everything was coming into fruition, I'd be back in Wisconsin and the damn garden would turn into a weed bed. The time it needed attention, I wasn't here. Well, this year, I won't be gone, and instead of being beautiful for just June and July, that garden is going to be beautiful in August.

DAYS OF REMEMBRANCE OF VICTIMS OF THE HOLOCAUST

Mr. PROXMIRE. Mr. President, the week of April 28 through May 3, 1981, has been named the "Days of Remembrance of Victims of the Holocaust." This annual event is sponsored by the U.S. Holocaust Memorial Council, which is chaired by Elie Weisel, a teacher and author and a survivor of the holocaust.

As part of the national observance, the American Film Institute at the Kennedy Center for the Performing Arts is presenting two films about the holocaust. Both films will be screened on April 28, starting at 8:45 p.m.

Yesterday, I spoke about the first film in the series, "Night and Fog," a half-hour documentary on the concentration camps. "Night and Fog" contrasts actual black-and-white footage of the camps during the war with contemporary, color shots of Auschwitz today. Its factual tone contrasts dramatically with the story tone in the Institute's second film.

This second film, "The 81st Blow," is in Hebrew with English subtitles. It is the story of a Jewish boy living in the ghetto who suffers a merciless beating—a full 80 blows. After the liberation, he tells his story but nobody believes him, which to him, of course, is the 81st blow. The film is comprised of documentary footage and still photographs shot during this period, and the narration comes from the 1961 Eichmann trial in Jerusalem. The Long Island Press said of "The 81st Blow:"

> Seeing this film is not a depressing experience. It is a memorial to the spirit and courage of those who survived.

Mr. President, the Days of Remembrance perform a vital function. We must remind ourselves of the holocaust. But we must do so in a substantial way, not a symbolic way. The American Film Institute is doing what they can to commemorate the Days of Remembrance. What can the Senate do? Is there no way for the Senate to show our dedication to this idea?

Of course there is. We can take this opportunity to ratify the Genocide Treaty. Mr. President, have we not waited long enough to take action on this crucial treaty? Is 32 years not enough?

Thirty-two years is more than enough. We should take action now and ratify the Genocide Convention.

ORDER OF BUSINESS

Mr. PROXMIRE. Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. STEVENS). What does the Senator wish to do with the remainder of the minority leader's time?

Mr. PROXMIRE. Mr. President, I have no request for time on this side. I presume that the Senator from Iowa and the Senator from Arkansas have their own time, so I yield it back.

The PRESIDING OFFICER. The minority leader's time is yielded back.

RECOGNITION OF SENATOR JEPSEN

The PRESIDING OFFICER. The Chair recognizes the Senator from Iowa for not to exceed 15 minutes pursuant to a special order. The Senator from Iowa also has the remainder of the majority leader's time.

Mr. JEPSEN. Mr. President, how much time is that?

The PRESIDING OFFICER. Twenty-four minutes total.

Mr. JEPSEN. I thank the Chair.

OPPOSITION TO PROPOSED F-15 ACCOUTREMENT SALE

Mr. JEPSEN. Mr. President, I have come here today to review the issue of the proposed sale to Saudi Arabia of advanced missiles, fuel, and sensor packs for use on the 62 F–15's that the Saudis are currently buying from us. I shall examine the arguments that have been advanced in favor of the sale in detail and then show why there are compelling reasons for standing in direct opposition to this sale.

Back in 1978 when the Carter administration requested the original sale of the advanced F–15 fighters to Saudi Arabia, very serious concerns were raised in Congress as to the fighter plane's potential offensive capability. After much debate, the proposal was finally approved, but only after the administration assured us that:

> Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that could increase the range or enhance the ground-attack capability of the F–15.

Before leaving office, President Carter violated this agreement by going ahead and requesting advanced equipment that would give the F–15's the capabilities mentioned above: Increased range and enhanced ground-attack capability.

Because of the serious nature of the understanding between Mr. Carter and the Congress regarding the original sale of F–15's to Saudi Arabia, one might conclude that there were sound and compelling reasons for this complete reversal of position on the part of the Carter administration. Let us look at some of the reasons that have been given in support of the proposed sale.

One reason used to justify the sale goes as follows:

Currently the price the Saudis charge for oil is $4 per barrel less than OPEC's price. Saudi Arabia increased oil production substantially because of the Iraq-Iran War. For these measures they have suffered criticism both internally and from other Arab and OPEC member nations. Do not these actions show Saudi Arabia as a moderate member of OPEC with friendly intentions toward the Western World? Should we not sell them the equipment that they consider necessary for their national defense to show our gratitude for their perseverance and to encourage them in these actions for the future?

There are two strong objections to this argument that spring to light with even a cursory look at the facts and recent history. The fact that the Saudis have lower prices than the OPEC level and increased production to take up the cuts caused by the Iraq-Iran War can be explained purely by the mechanics of the international oil market and Saudi Arabia's particular oil supply situation. Due to the Saudis' large oil reserves, it is in their best interest to keep world oil demand as high as possible as long as possible. The Saudis are one of the few OPEC members who plan to be exporting oil well into the 1990's. It is in their best interest to keep

oil prices lower than alternative energy sources and thus keep up demand.

Conversely, any attempt to interpret Saudi Arabian actions with respect to oil price and demand within the framework of United States-Saudi Arabian relations is totally unsupportable. As Douglas Feith wrote in a recent article in the journal "Policy Review"—

> The oil market speaks plainly: Nations that render political concessions to the Arab oil regimes are spared neither price nor supply headaches when those regimes' business considerations impel a cut in oil production or an increase in prices . . . in 1978 and 1979—a period when Washington began to pressure Israel strenuously, courted the PLO and sought to win the Saudis' goodwill by consenting to sell them F–15's—OPEC oil prices skyrocketed. This is not to suggest that a direct relationship exists between the intensity of U.S. efforts to please the Saudis and the rate at which America's oil woes increase; it does suggest that the link between U.S.-Saudi political cooperation and cheaper oil is a figment of theorists at odds with the lessons of both history and economics.

It has also been argued that it would be in our strategic interest to allow the Saudis to arm themselves against threats from her neighbors and from the Soviet Union. Such a move might serve to stabilize a volatile area and protect oil deliveries to Western Europe and the United States.

This view is utter nonsense. Saudi Arabia is not currently menaced by any of its immediate neighbors. Any would-be aggressor nations are sufficiently deterred by the current strength of the Saudi Armed Forces. The Soviet Union is not in a geographical position to directly threaten Saudi Arabia. Given the small size and ineffectiveness of the Saudi Armed Forces and the large land area of Saudi Arabia, the sale of the F–15 equipment is not going to improve their defense posture against a threat by the Soviet Union.

The effect on Middle East stability is another question. In the past 32 years, Saudi Arabia has been involved in four armed conflicts—three of them against our proven ally in the Middle East: Israel. Saudi Arabia would not be able to attack Israel on a 1-to-1 basis, but F–15's equipped with improved missiles and other advanced equipment would be an important asset in a pan-Arab attack on Israel.

What is the Saudi attitude toward Israel at the present time? Only last month Saudi leaders called for a holy war against the State of Israel. They actively aid the PLO and its worldwide terrorist activities. Saudi Arabia has openly opposed the Camp David accords, condemned Egypt for having signed the peace agreements, and refused to take part in any negotiations that could lead to a lasting peace in the Middle East.

The Saudis have gone on record this month as opposing any attempts by the United States to establish facility rights around the Gulf region. The United States needs these facilities if it hopes to in some measure counter the growing threat of Soviet incursions into the Middle East. Thus have the Saudis opposed U.S. attempts to insure peace and stability in the Middle East area. Has the request for the equipment packages been tied to any stated assurances on the part of Saudi Arabia that its past record of opposing U.S. initiatives in the area will be reversed? No; there have been no public assurances of any kind whatsoever. No one I have spoken to is aware of any private assurances. Any hopes for a change in any of the Saudi attitudes on the basis of this sale are dubious at best.

Now I shall point out reasons why this sale is not in either the short- or long-term interests of the United States.

Probably the greatest threat to Saudi security is internal instability. We face a danger of having any advanced equipment that we sell them fall into unfriendly hands, as happened with the F–14's in Iran. We have constantly relied on our technological superiority to counter Soviet military quantity advantages. Any time one of our advanced systems is compromised the U.S. quality edge is further eroded. The events surrounding the takeover of the Grand Mosque in Mecca last year showed how unstable the Kingdom of Saudi Arabia is.

There is also a great deal of concern about the possibility that this sale will only encourage the Saudis to demand additional offensive equipment such as multiple ejection bomb racks, KC–135 tanker aircraft, and AWACS—airborne warning and control system—aircraft. This equipment would give them an unmistakable aerial offensive capability and would seriously endanger Israeli air superiority in the event of another Arab-Israeli War.

Further such a sale would break a commitment we made to Israel. In 1978, when the original sale of the F–15's was approved, we gave the Israeli Government our assurances that no sale of offensive equipment to Saudi Arabia would be contemplated. This understanding was made public and congressional approval of the sale was contingent on this understanding. Yet the administration is contemplating turning on this commitment to the only consistent friend we have in the entire area.

No one here needs to be reminded how important our relationship with Israel has been in the last 30 years to U.S. strategic policy. As I have shown, there is no reason to undertake this action which would call into serious question the value of our commitments to Israel.

But approval of the sale will have far wider implications on U.S. foreign policy. On the one hand, we have made a commitment to a proven ally in a troubled and vital area of the world; on the other hand, we are proposing canceling that commitment in order to appease Saudi Arabia and gain an uncertain short-term advantage in the name of misguided self-interests. What are our other allies and friends the world over to think of this action? Will they have any choice but to carefully review the commitments that the United States has made with them in light of our proposed action? We are setting a serious precedent if we approve this sale in our relations with the Saudis, in our commitments to Israel, and in our dealings with the rest of the world.

In summarizing the points I have made above, I must restate that there is no valid argument to be made for the sale of this advanced equipment for the Saudi F–15's. Any possible improvements in our relations with the Saudis are uncertain at best. The potential damage to U.S. foreign policy is certainly more concrete and more far reaching.

Mr. President, I along with all our colleagues with whom I have discussed this support efforts to bring about a strong and real cooperation between the United States and Saudi Arabia. However, I cannot approve an action which will attempt to do this at such a high cost. We must not abandon our lifelong ally, Israel, for the sake of an expedient short term supposedly self-interest gain.

Mr. President, I yield now for 1 minute to the distinguished Senator from Illinois (Mr. DIXON).

Mr. DIXON. Mr. President, I thank the distinguished Senator from Iowa.

Mr. President, amid reports that the administration is currently considering the addition of an early warning AWACS to complement the attachment of sophisticated offensive weaponry to the more than 60 F–15's sold to Saudi Arabia, I again rise to voice my opposition to the increasingly hardened outline that defines the administration's plans.

Mr. President, the threats that this proposal poses to Israeli security and Mideast stability, in general, should be of great concern to all Americans. Not only does the administration propose to supply the Saudis with the capability to attack Israel with fighter planes, but it also offers them the ability to fend off Israeli countermeasures, survey Israeli security tactics, and pass on such information to Israel's enemies in the gulf region.

I submit, Mr. President, that such an arrangement could have a profound and perilous impact on American interests in the Mideast.

I urge President Reagan fully to consider the ramifications of such a sale, and I ask my colleagues to contemplate most carefully any proposal brought to us that pertains to arming the Saudis with AWACS.

(Mr. CHAFEE assumed the chair.)

Mr. ANDREWS. Will the Senator from Iowa yield?

Mr. JEPSEN. The Senator from Iowa yields whatever time he needs to the Senator from North Dakota.

Mr. ANDREWS. I thank my colleague.

Mr. President, the fall of the shah 2 years ago severely hurt American interests in the Middle East, and when Soviet troops invaded Afghanistan last year, the tension of the region was raised even further. To meet these circumstances, the United States has committed itself to increasing its presence in the region to meet the Soviet challenge. I applaud this effort, but there is a right way to do it. I fear that we have ignored the lessons of history and we are about to embark on the wrong path.

The fall of the shah should have taught us the danger of selling the latest American technology to unstable regimes. In 1977, the Carter administration attempted to sell AWACS to Iran, explaining that Iran was vital in meeting the Soviet threat. State Department and Defense Department witnesses all marched up to Capitol Hill to tell us how stable Iran was and how minimal was the risk of the advanced technology being compromised. By 1979, however, American flags were being burned in the streets of Tehran, and the secrets of American-supplied F–14's and Phoenix missiles were on their way to the Soviet Union.

Now, 2 years later, we are being told that Saudi Arabia needs the most advanced missiles and fighter-bombers and AWACS to meet the Soviet threat.

I agree that the security of Saudi Arabia is of vital interest to the United States. But, Mr. President, the security of the United States is the primary interest of the United States, and I am therefore opposed to the sale of the latest armaments and the most sophisticated aircraft in our arsenal to Saudi Arabia. There is just too great a chance of the systems' secrets being compromised by defection, accident, diversion of technological manuals or Soviet intelligence activities.

Mr. President, I do not think this is the way to handle it.

Just think of how seriously our Nation's security would have been hurt had the sale of AWACS to Iran been completed.

I appreciate Saudi Arabia's concern for regional stability, and I support America's commitment to protect Saudi Arabia. But let us make our relationship with Saudi Arabia a true partnership, let us work together to achieve stability in oil pricing and supply, let us work together to support the Egyptian-Israeli peace treaty and to suppress the radical and terrorist forces in the region. Working together, protecting the region together, and expanding together the promise of the Egyptian-Israeli peace will ultimately bring security both to Saudi Arabia and to the United States.

Mr. JEPSEN. Mr. President, I now yield 2 minutes to the distinguished Senator from Ohio (Mr. METZENBAUM).

Mr. METZENBAUM. I thank the Senator from Iowa.

Mr. President, I begin by warmly commending the Senator from Iowa for his lucid analysis of this complex issue and for his outstanding work in bringing together today's discussion.

It is always a pleasure to work with Senator JEPSEN, who is a gentleman and an able Member of this body.

Our purpose here today is to discuss the administration's shortsighted decision to provide Saudi Arabia with some of the world's most lethal weaponry.

This is a bad decision—a dangerous decision that threatens to entrap this Nation and the nations of the Middle East in a destabilizing arms race.

It is a decision that works directly against the basic interests of the United States. It threatens the security of Israel. And it does nothing whatever to enhance the stability of the Saudi Arabian monarchy. In fact, the sale will endanger Saudi Arabia by forcing upon that country the status of a front-line combatant in any future conflict between Israel and the Arab nations.

I do not intend, Mr. President, to discuss at any great length the broken promises that make up the background to this sale.

All of us know in detail about the written assurances given by the previous administration in May 1978 that the Saudis would not receive this offensive capability. Without those assurances the original F–15 sale—which I strongly opposed—would never have been approved by the Senate. Last year, more than two-thirds of the Members of the Senate made that abundantly clear by signing a letter expressing to the previous administration their opposition to the specific sales that will soon come before this body.

That letter was prompted by reports that the Carter administration was preparing to move away from its promises to the Congress and give in to yet another Saudi "litmus test."

A Saudi spokesman said in July of 1980:

> We have a commitment, a firm commitment . . . and we expect that it will be fulfilled.

As a candidate for President, Ronald Reagan publicly asked which commitment would come first—the public commitment to Congress to withhold offensive weaponry or the presumably private commitment to the Saudis to provide it.

Mr. Reagan pointed out last September in a speech before the B'nai B'rith forum:

> It was Mr. Carter who agreed to sell sixty F–15 fighters to Saudi Arabia. To get Congress to go along, he assured that these aircraft would not have certain offensive capabilities. Now, the Secretary of Defense tells us he cannot say whether this commitment to Congress will be honored.

Today, candidate Reagan is President Reagan and we have a definitive answer to that question. Unfortunately the answer is "No." The administration will not keep the promises of the previous administration.

Mr. President, I can understand the sense of urgency which the administration feels about strengthening our position in the Persian Gulf region. But let us look at the implication for that position of providing the Saudis with this advanced hardware.

First let us remind ourselves of just what the F–15 is.

The F–15—the "Strike Eagle"—is not designed as a status symbol.

It is not just something to fly over a crowd on this or that country's independence day.

The F–15 is the world's finest fighter aircraft—by far the most sophisticated, deadly plane in the world today.

The administration proposes to send these instruments of death to the one place in the world where they are most likely to be used.

In a little more than 30 years, Israel and the Arab nations have fought four bitter, bloody wars.

Saudi Arabia has participated in three of them.

In 1948, in Israel's war of independence, 21,000 Israelis and 40,000 Arabs were listed as killed, wounded or missing.

The toll for the 1956 war was 1,300 on the Israeli side and nearly 13,000 for the Arabs.

In the Six-Day War of 1967, Israel took more than 5,500 casualties and inflicted nearly 18,000 on her enemies.

And in the last round, the Yom Kippur War of 1973, losses on both sides grew dramatically—12,000 for Israel, 36,000 for the Arab countries.

Saudi participation has not been extensive but only because the Saudis have not had much to contribute.

With this sale, they will have a military contribution—a major contribution, to make in any future Arab-Israeli conflict.

I have heard the argument that the Saudis would not dare to attack Israel. By themselves, perhaps not.

But the problem for Israel is not a one-on-one conflict with Saudi Arabia. It is a concerted attack by several Arab countries Saudi Arabia among them.

Consider what the Saudis themselves have to say about their own role. In April 1978, shortly before this body voted on the original F–15 sale, Prince Fahd gave an interview to the French magazine Paris Match.

The Prince stated:

> Saudi Arabia allocated all its forces and strength to bring about victory of the Arab rights, their honor and all that is sacred in their eyes. . . This means that the task entrusted to our army is not only to protect the kingdom, but that it could intervene anywhere that our national duty commands. Our army was in Syria—we have units in Jordan . . . All this shows our readiness.

Prince Sultan, the Defense Minister, told the Christian Science Monitor around that same time that—

> All we own is at the disposal of the Arab nations and will be used in the battle against the common enemy.

Are those quotes outmoded?

Not at all.

In January of this year, Saudi Arabia hosted an Islamic Summit Conference that opened with a prayer for divine assistance to help the Moslems "cleanse Jerusalem of Jews."

And that same conference concluded with a call, issued from Islam's holiest place by the Saudi King himself, for a "Jihad" or holy war against Israel.

The Saudis would not attack Israel?

Maybe not. Perhaps their talk is just bluster.

But one thing Israelis know better than any other people in the world is the elemental truth that if someone says he is going to kill you, take him seriously.

And there is another truth involved here as well. Regardless of Saudi wishes, whatever they may be, their own violent and irresponsible rhetoric about fighting "the Zionist enemy" has potentially moved them into the forefront of the Arab-Israeli conflict.

With this purchase, the Saudis will have the world's finest fighter aircraft.

They will have the range to strike at Israel.

They will have advanced missiles, capable of destroying Israel aircraft from great distances. Those missiles will neutralize a large part of Israel's traditional advantage in skilled and experienced pilots—it does not take a highly trained pilot to push a button and head for home.

In effect, Mr. President, this sale is creating a new military front for Israel.

The administration is forcing Israel into billions of dollars in new expenditures. Dollars that Israel cannot afford to spend.

And by providing this capability, the administration is issuing an open invitation to the Arab militants to force Saudi Arabia's hand in any confrontation with Israel.

How could the Saudis refrain from supporting their brother Arabs? If they tried to do so, how long could the Saudi regime survive? And if that happens, how long will it take before America's best, most advanced weapons fall into the hands of the Soviet Union?

We should know better.

We should have learned in Iran that supersonic fighter planes cannot protect a government from internal opposition.

And we should have learned that it makes no sense to encourage foreign governments to invest in prestige items that do nothing to enhance their stability and their capacity to meet their real defense needs.

The Saudis may believe that they are buying prestige, that they are demonstrating their leverage over U.S. policy.

But what they are buying in fact is danger—profound danger for themselves and for the stability of their vital region of the world.

And what, Mr. President, does our country stand to gain through this sale?

Are the Saudis going to be grateful enough to join in—or at least not to impede—the Middle East peace process? The answer is no. Only this week Saudi Arabia reaffirmed categorically its opposition to any talks with the "Zionist enemy" until the 1967 borders are restored.

Are the Saudis going to provide facilities for an American presence in the Gulf? No.

Are they going to help pay for our investments in their security? Not a chance.

Are the Saudis prepared to recognize Israel's right to exist? Are they, in other words, going to begin acting like a responsible and mature friend and ally? The answer to all of these questions is a clear and unambiguous "no."

Mr. President, I do not oppose strengthening Saudi Arabia's ability to defend itself.

I do not deny that Saudi Arabia's security is a vital U.S. interest.

But I reject the notion that our relations with the Saudis must be a one-way street. We need the Saudis and their oil. But they need us as well. We are the key to their survival. And there is no reason in the world why this country must bribe them with weapons to persuade them to sell us oil at $40 a barrel.

President Sadat of Egypt understands that. Repeatedly, he has urged our leaders to stop treating the Saudis with kid gloves. Require them, he has told us time and again, to show due respect for America's political and military interests.

But that is not what we have done and it is not what we are doing.

This sale is a signal—a signal that this administration can be bluffed into acting against the Nation's own best interests.

I do not think that is what the people of this country expected from Ronald Reagan and Alexander Haig.

If this sale is approved, Mr. President, it is beyond doubt that AWAC's will be the next "litmus test" of Saudi-American friendship.

Providing AWAC's to Saudi Arabia would be a true catastrophe for Israel. It would amount to a reversal by the United States of our commitment to the security of a loyal and courageous democratic ally.

But my purpose here is not to talk about a future prospect that is even worse than selling the missiles and the fuel pods.

My purpose, Mr. President, is to say that it must be stopped here—with this proposed sale.

It is also my purpose to call upon this body to prevent this new administration from falling into a trap that could tragically ensnarl all of us—Americans, Israelis, and Saudi Arabians alike—in a disaster whose consequences cannot be foreseen.

Mr. JEPSEN. Mr. President, I now yield 1 minute to the distinguished Senator from Alabama (Mr. HEFLIN).

Mr. HEFLIN. Mr. President, I wish to lend my support today to the eloquent statement of my colleagues. I have serious concerns over the consequences of this sale to Saudi Arabia. In its present form, I believe that it does not help to stabilize the present regime in Riyadh, and more importantly, it does not bolster our own security interests in this vital region of the world. But, without a doubt, it undermines the security of our one true reliable democratic ally in the Middle East—the State of Israel.

I would respectfully counsel our President that a sudden and drastic change in our policy in this most turbulent area is a matter that should be weighed and considered extremely carefully. I support the President on a great number of his initiatives to improve the economic and strategic position of the United States, but a careful evaluation of this proposed sale is needed and is premature at this point.

Some have argued in the past that we must provide Saudi Arabia whatever it asks of us because that regime's "moderate" oil policies have proved it to be one of our closest friends. I believe that a close analysis of Saudi Arabia oil pricing and supply policies will show that this is highly questionable.

I ask unanimous consent to have printed in the RECORD, at the conclusion of my remarks, an article by Peter Lubin, "Taming the Saudis," which appeared in the National Review, and the letter to the Secretary of State by Hobart Rowen, which appeared in the Washington Post. The article and letter raise issues that need careful study about the nature of United States-Saudi relations.

The PRESIDING OFFICER. Without objection, it is ordered.

(See exhibit 1.)

Mr. HEFLIN. Furthermore, Mr. President, as I see it, these sales cannot be justified in terms of the legitimate defense needs of Saudi Arabia. They do not need conformal fuel tanks (which doubles the range of the F-15's) or state of the art, air to air missiles to defend their oil fields. For in the final analysis, the Saudi Arabians cannot defend themselves from any credible threat, no matter how much equipment we provide them. We should not delude ourselves—only the United States, in conjunction with our western allies, including Israel, have the ability and will to defeat Soviet or radical Arab military moves on the oil fields.

Finally, Mr. President, I am deeply worried about the implications of this sale of our embattled ally, Israel. The history of Saudi Arabian military adventures since 1948 leaves little doubt but that these offensive weapon systems are most likely to be used against Israel. Squeezed by high inflation rates and military expenditures, Israel cannot keep up with the type of arms race which we are fueling in the region. The sale is the wrong message to be sending a reliable ally.

I strongly urge the administration to re-examine and scrutinize the impact of the sale of AWAC's, air to air missiles, and conformal fuel pods to Saudi Arabia. I simply fail to understand how the present package of military sales to the Middle East can help Saudi Arabian, Israeli or ultimately U.S. security.

EXHIBIT 1

TAMING THE SAUDIS

(By Peter Lubin)

When the Carter Administration was finally put out of its misery last November, there was gloom among the Al Saud, the family that owns and rules Saudi Arabia. The Saudis had enjoyed four uninterrupted years of bullying and bamboozling the American government. The lead role (in a star-studded cast) was played by Jimmy Carter, who gushed with gratitude whenever the Saudis, for cold financial reasons, temporarily raised oil production. A supporting role was played by National Security Advisor Brzezinski, who confided to the New York Times last March that we had no reason either to "fear or deplore" an "Islamic renaissance," and who envisioned a natural partnership with Islam to protect the Gulf. (No wonder a journalist in Riyadh described Brzezinski as "a man after Crown Prince Fahd's own heart.") There was Secretary of the Treasury Miller, who winged his way to Saudi Arabia in November 1979 hoping, as he put it, to convince "our friends" in the Gulf that there was no reason to raise prices further after the gigantic boost of the previous June ("It's unrealistic not to expect some upward adjustment in prices," said a chastened Mr. Miller on the plane home). There was Secretary of Energy Duncan, whose Saudi pilgrimage took place in late February 1980, to beg for royal assent to our Strategic Petroleum Reserve (permission denied). And on location in Riyadh there was Ambassador John C. West. Mr. West began his service by obtaining a job for a close friend, Crawford

Cook, in the Saudi lobbying machine, and ended his tour with a valedictory that admonished, not the Saudis, but his own government for failure to satisfy every Saudi demand.

All this abasement before the Saudis has taken place in an atmosphere of myth, cliché, and received ideas in which Saudi Arabia is repeatedly described as "moderate," "pro-Western," and "friendly." No evidence is ever adduced for these epithets, but they stick nonetheless. On a recent CBS program on Saudi Arabia, for example, Ambassador West described U.S.-Saudi relations as "good faith, good friendship, and what I call that special relationship." An unsuspecting listener might assume that West had evidence for this. Unfortunately, that listener would be wrong.

The OPEC quasi-cartel operates to mulct the West of tens of billions more each year than would be received were there no limit on, and manipulation of, supply by its members. And the key villain is Saudi Arabia, because that country, not Libya, not Nigeria, not Venezuela, is keeping many millions of barrels off the world market. It is foolish to applaud the Saudis for producing "close to capacity" when they have deliberately and severely restricted that capacity themselves. The Saudis have broken every agreement on oil they have entered into since the Teheran Agreement of 1971. As energy economist Morris Adelman puts it: "There were repeated unilateral revisions, and it [the Teheran Agreement] was finally discarded in September 1973 . . . Sheik Yamani pronounced a classic epitaph: 'We in Saudi Arabia would have liked to honor and abide by the Teheran agreements, but . . .'" Under cover of the "oil embargo" in 1973–74 came the fourfold rise in price. In 1974 the Saudis kept promising to lower prices, and "they repeatedly raised prices. Twice Mr. Kissinger flew into Riyadh and announced that he and his friend the King agreed, prices should be lowered. Each time prices were raised" (Adelman).

In 1974 the United States undertook to guarantee Saudi security, and the Saudis agreed to produce at current capacity, a promise never kept. In late 1978 the Saudis extracted a further American pledge—not to fill the Strategic Petroleum Reserve. In turn the Saudis would keep production up close to 10.5 million barrels a day. So they did—for seven weeks. On January 20, 1979, as Iranian production collapsed, the Saudis slashed their output by a full two million barrels. In the ensuing panic buying and spot-market runup, prices rose more in five weeks than they had in the previous five months. Having accomplished their aim, the Saudis raised production by one million barrels. Again Adelman:

The net result of Saudi maneuvers, concerted with their neighbors between October 1978 and mid-1980, [was] to increase the price of oil from $12 to $30 [now $32 and up]. At any moment they could have put the price down to any desired level by raising output to capacity, announcing they would maintain that output and even increase it by gradually investing to raise capacity.

The Saudis are the major obstacle to an American presence in the Gulf. They expect us to defend them, but only on their terms, with the means they choose, no matter how difficult or dangerous that makes our task. The Saudis are terrified of any resolute display of American power near them; thus they sponsored a resolution at Islamabad in May condemning the American hostage rescue attempt. By hiring Pakistani mercenaries, by buying German tanks and French planes, they hope to build an armory that will make them independent and able to keep the Americans from establishing a presence nearby. They do not seem nearly as concerned about the Soviet over-flights they permit to Aden and Ethiopia, and they have allowed Soviet-built tanks to be unloaded at Saudi ports for transshipment to Iraq.

While the Saudis have backed Iraq's invasion, though Iraq is linked to the Soviets, the Saudis are not benevolently inclined toward smaller neighbors. Saudi Arabia is the leading local bully and troublemaker, detested and feared by Oman and the sheikhdoms. The Saudis backed the Marxist-supported Dhofar rebellion. They have pressed territorial claims on both Abu Dhabi and Oman. They have meddled with American arms shipments to North Yemen, which led the Yemenis to look to the Soviet bloc arms.

SAUDI "MODERATION"

On Israel the Saudis are as implacable as Syria or Iraq. Twice in recent months they have called for jihad, a word that, despite the attempt of our State Department to give it a soothing gloss, means exactly what it says: warfare by all means, including military force. The flavor of Saudi "moderation" can be gauged from their description of Jerusalem as "purely a genuine Arab and Islamic city. Thus it has been for thousands of years, and thus it should remain forever." Loyalty to a fellow Moslem (who massacred his Christian subjects) has led the Saudis to give refuge to Idi Amin. The Saudis subsidize the most notorious of terrorists; the Arab who recently killed 15 and wounded 85 by bombing a hotel in Kenya escaped, his deed accomplished, to Saudi Arabia.

All this activity, however, is muffled in a vast Saudi disinformation and propaganda effort, aided by Westerners with financial ties to the Saudis. There are two themes. The first is, "we are doing you a favor" by "producing more oil then we [need, want]" so "don't jeopardize this 'special' relationship." Note Yamani's recent interviews: "Don't take the Saudis for granted" (Wall Street Journal); "We've gotten no sign of appreciation for everything we've done" (New York Times); "We are America's number one friend" (Time). By dint of constant repetition, journalists and politicians come to believe this nonsense.

But the evidence shows otherwise. The Saudis are not doing us any favors. Saudi pricing in OPEC, like the pricing of its fellows, is based on their calculation of their "perfect" (optimal monopoly) price. That price will tend to maximize their total revenues over time. Each OPEC member determines its "perfect" price at any moment by taking into account the size of its reserves, its current surplus or deficit, the value of its foreign currency holdings and investments, and the likely production response of its fellows in OPEC. Absent Western pressure, that is all OPEC need worry about. Of particular concern to the Saudis is demand elasticity for oil. As the producer with the largest reserves (whose value they wish to protect), the Saudis must worry about too precipitous a rise in price, and thus too preciptious a drop in demand. These considerations, not some phony melodrama starring "hawks" and "moderates" are what OPEC price differentials are all about.

Nor are the Saudis "producing more than they need." Detailed studies of Saudi revenues and expenditures show that they always manage not only to squander the surplus funds that may initially be accumulated, but end up needing more. There is every reason to believe that the phenomenal waste, corruption, and extravagence of recent years will continue. Nor have the Saudis ever chosen to lessen current revenues. They may have to, however, when Iran and Iraq resume prewar production levels. Otherwise, there is a possibility of price-cutting and the destruction of OPEC. The Saudis, having previously threatened to cut as many as seven million barrels a day, will at that point cut a few million at most, and expect to be applauded.

Yamani's claim that by slashing production Saudi Arabia could receive as much current revenue as at a higher level of production is demonstrably false, yet none of the journalists he tells this to has bothered to point it out. Demand elasticity is high, and growing. Professor Robert Pindyck of MIT has noted that every 5 per cent rise in oil prices results in a drop in demand of between 1 per cent and 1.8 per cent. Another way of understanding this is that for every OPEC cut in supply of between 1 per cent and 1.8 per cent in the total amount of oil available in the non-Communist world's market, OPEC can impose a price rise of 5 per cent and still "clear the market" (have demand equal supply) so as to avoid problems of glut and price-cutting.

Suppose the Saudis were to cut production by four million barrels. That represents about 7.5 per cent of non-Communist world production (assuming Iran and Iraq are exporting at prewar levels; otherwise four million barrels represent about 8 per cent). Using the lower figure for demand elasticity would permit the Saudis a price rise on the six million barrels they did produce of about 38 per cent. Using the higher figure, the rise is less than 25 per cent. In either case, the Saudis stand to lose tens of billions of dollars annually. And the expensive infrastructure for natural gas collection requires a minimum oil production of eight and one-half million barrels. The Saudi subsidy to the PLO, aid to Syria and Jordan, and other pan-Arab aid amounts at most to a few billion. That offers a measure of the financial sacrifice they are willing to make on behalf of fellow Arabs. Why should we believe that the Saudis would suddenly—for "political" reasons—risk the loss of many times that amount?

Such threats tell us a lot about the Saudis. A friend would never say: "Saudi Arabia alone . . . is in a position to inflict very severe damage on the world economy as a whole or a selected group of nations . . . Definitely, I'm not threatening. You threaten when you need to. Among friends, I don't think we are threatening."

Yamani's bluster is as hollow as his bonhomie. For as a number of economists and other commentators have noted, there is no "oil weapon." A study "demystifying" the oil weapon was made by Douglas Feith in Policy Review (Winter 1981). Being fungible, oil cannot be selectively denied to one country or group of countries. The only way to "punish" is to cut production massively, and that would harm any producer far more than any potential victim among the importing nations. It might also have unforeseen political consequences. If there are sound economic reasons for raising the price of oil, or cutting production, such a price rise, or such a cut, will take place in any case. If such a price rise or production cut is made to "punish" (i.e., employed as a "weapon") then by definition it would go against, rather than promote, the economic interest of the producer instituting it. Otherwise it would have been made for that economic reason. Unlike Khomeini, the Saudis have not shown a taste for self-inflicted wounds.

OUR GOAL: SAUDI COOPERATION

Our policy should be to obtain, not the chimera of Saudi "goodwill," but Saudi cooperation, however unwilling that cooperation will be, on bases, on oil, and on other matters. Policy should be rooted in understanding that: 1) Wahhabi Islam regards the Christian West with hostility, but that need not concern us overmuch; 2) there is no "oil weapon"; 3) the Saudis are not "doing us favors"; 4) politically, economically, and socially Saudi Arabia remains a primitive tribal kingdom, advanced only in the bankbook sense; 5) the Soviet Union has strengthened its grip on the Saudi perimeter; 6) Saudi Arabia may have to be "saved in spite

of itself," and while we understand the Saudis are incapable of protecting themselves, their vulnerability must be brought home to them; 7) the Saudis must be disabused of their inflated notion of their own significance vis-a-vis America and the West; 8) taming the Saudis will demand both intelligence and imagination, but the risks from further appeasement are too great not to make the attempt.

A drastic change in our policy toward Saudi Arabia is essential, beginning with a change in attitude. Diplomatic personnel posted to Riyadh should be chosen so that those with a chronic case of furor arabicus (a peculiar nervous disease first diagnosed by J. B. Kelly n Arabia, the Gulf, and the West), are carefully selected out. Cabinet members should no longer rush to Riyadh, seeking the royal indulgence. No more dancing attendance upon Yamani on his various tours. Instead of misplaced gratitude, Washington can by appropriate comments demonstrate a real "appreciation" of all the Saudis have been doing in OPEC.

We should proceed with plans for whatever bases we deem necessary—in the Sinai, in Oman, and elsewhere—explaining to Riyadh that we have no intention of courting disaster simply because the Saudis may be displeased. There is a basic conflict here that cannot be blinked. The Saudis fear such bases nearby because they would have an intimidation value (which, of course, is a further point in their favor).

Washington has been worrying aloud about the stability of Saudi Arabia ever since the collapse of the Shah. The Saudis, in turn, have been quick to react with a propaganda barrage: Saudi Arabia is very different from Iran; the Saudi royal family is revered by all its subjects; its devotion to Islam is profound; and so on. Both American worry over, and Saudi insistence upon, the "stability" of Riyadh are beside the point. Saudi stability is not intrinsically desirable to anyone but the Saudis. Continued rule by the Al Saud, or the continued existence of Saudi Arabia in its present borders, may or may not best serve the interests of the oil-consuming world. If firm Saudi rule promotes Western access to Persian Gulf oil at reasonable prices, then let it be encouraged. But it may be that a severe shock to Saudi complacency, or even a sustained effort to keep the Saudis off balance, would serve Western interests better.

The smug belief of the Saudis that no matter how they behave we will be there to protect them is revealed in a statement Yamani made to an interviewer from Time: "You are not protecting us. When you send your airplanes, you are defending your own interests." The Saudis have not yet understood the significance of General Petrovsky in Ethiopia, Cubans and East Germans in South Yemen, Soviet treaty links and base rights in Syria and Iraq, PLO training in Baku, Tashkent, and Simferopol. It is long past time to heighten their sense of unease. Further, we should make the distinction between protection of oilfields in the physical sense and protection of a regime or a country. Since the Iranians are now in no position to harm the Saudi oilfields, one simple and elegant way to demonstrate our studied insouciance as well as make clear our displeasure with Saudi behavior would be to recall our Airborne Warning and Control Systems, on the grounds that we need them for our own use (we possess only twenty in all).

As for the Saudi demand for additional equipment for the F–15s that Mr. Carter granted them, that demand should either be rejected out of hand or put under indefinite "review" until such time as Saudi behavior has drastically changed. At the time of the original plane sale, both the Saudis and the Carter Administration offered assurances that the equipment now sought (bomb racks, Sidewinder missiles, fuel tanks) would not even be asked for, much less granted. But the Saudis are convinced that in their case such commitments are meaningless. So great is their contempt for us that they no longer bother to conceal it. Prince Faisal stated on Meet the Press that no Iraqi planes are being sheltered in Saudi Arabia; Ambassador Alhegeland recently denied that Soviet-built weapons have been unloaded for Iraq in Saudi ports. Both men knew that Western intelligence sources have confirmed these activities; neither thought it worth his while even to obfuscate.

The equipment demanded cannot be used by the Saudis effectively against the Soviet Union. If used at all, it will be used against its lesser neighbors (Oman, the littoral sheikdom), against Israel, or possibly against Western forces should they move decisively into the region. As far as the Israelis go, even if they decide (for reasons of their own) not publicly to oppose the sale, that is no reason for it to go through. Such weaponry makes much likelier a Saudi role in another Arab-Israeli round, and in that case virtually guarantees an Israeli preemptive strike. Such a capitulation would dishearten the Omanis, who hate and fear the Saudis and have been ready to serve the West but may now be intimidated by a display of Saudi power.

But the main reason for denying the Saudis the equipment is that they regard the sale as "an important test case in relations between the two countries." Exactly. After two years of uninterrupted and astronomical price hikes, after the resolution condemning our rescue mission, after the efforts to deny us bases, after the open calls for jihad and support for terrorism, after backing the Iraqi invasion of Iran, after meddling with our arms supplies to North Yemen and facilitating Soviet bloc supplies to Iraq, after the attempt to throttle our Strategic Petroleum Reserve, after all this the Saudis want to test whether America will jump once again through the Saudi hoop. If we do so, we will signal that nothing has changed, and that we continue to adhere to the "doctrine of common interest" so lucidly analyzed by J. B. Kelly:

"All that the constant reiteration of the doctrine of common interest achieves is to convince the Middle Eastern oil-producing states that the West needs them as much as (or even more than) they need the West, thereby confirming them in their hauteur and their illusions of power."

Rejecting the Saudi demand would be the first step in forging a coherent strategy for protecting the West's interests. The immediate response will be Saudi bluster and bluff, of the kind Crown Prince Fahd offered in the newspaper Al Hawadith: "We are not compelled to be friends of the Americans. There are many doors wide open to us, be it on the military, technological or economic level. . . . We can easily replace the Americans."

WHO NEEDS THE GULF?

But Pakistani mercenaries, German tanks, Tornado fighters will not really fill the bill. Weapons suppliers are not as easily interchangeable as Fahd pretends to believe. The American equipment already acquired by the Saudis would be greatly diminished in usefulness without easy access to American spare parts, American technical help, American training. And only the United States offers Saudi pilots extensive training on simulators.

Should they proceed, nonetheless, not to yield on policy but attempt to replace us with European arms suppliers, we have the means to obtain European cooperation. In the end the United States could do without oil from the Gulf; Western Europe and Japan cannot. It is our allies' advantage that the Saudis be brought to heel, even if they choose not to admit it publicly. They may distance themselves from our effort (out of fear) but should not interfere with it. We have a right to ask from those for whom we are protecting the Gulf that they not persist in currying Saudi favor at our expense. The American people may grow weary of safeguarding oil to keep German or French or Japanese industry humming, if those same Germans or French or Japanese make that job more difficult.

The Saudis will also attempt a rhetorical rally of the Third World. But the speciousness of that concept can be exposed. A farmer in Senegal or Brazil has more to gain from our efforts to protect access to, and hold down prices of, Saudi (and OPEC) oil through political pressure even than the Europeans.

The Arab oil states, not least the Saudis, also employ the Arab-Israeli dispute as the perfect diversionary tactic. How dare the West raise the little matter of oil pricing and production (here the face of Faisal or Fahd assumes an aggrieved air, and eyes are raised heavenward) when the "Palestinian problem" has not been solved to Arab satisfaction? But as J. B. Kelly has noted, even if we posit the total disappearance of Israel, our problem with the oil states would be exactly the same.

The past two years have given us a good dose of what the Muslim Middle East, unadorned, is all about. The Saudi regime's legitimacy comes from force and the threat of force. Not surprisingly, it responds only to pressure, not to blandishments.

As long as the Saudis believe that our only reaction to their behavior will be "economic" (i.e., to conserve oil, and to look for non-OPEC sources), they will behave without any constraints. In the long run, a decade or more away, our problem with OPEC may be well solved. In the short run, we must protect the major oilfields and apply pressure to hold down prices and hold up production. That is why any energy policy must include a strategy for taming the Saudis.

LETTER TO THE SECRETARY OF STATE

DEAR MR. SECRETARY: As you prepare for a "familiarization trip" to the Middle East next month, may I be bold enough to call your attention to a bit of economic mythology that in the past has tripped up the experts?

According to this imaginery view, the friendly Saudi Arabians are so anxious to help the United States that they are producing more oil—at a moderate price—than it serves their own interest to produce. If they were less sympathetic to the United States, the story goes, they would keep more of their treasure in the ground delaying the day that desert fields run dry.

Mr. Secretary, the Saudis do a marvelous PR job to perpetuate this little bit of fiction. But I call your attention to a fascinating dispatch—Feb. 5, 1981—in the Christian Science Monitor from C. L. Cranford in Dhahran, Saudi Arabia. There, at a seminar at the University of Petroleum and Minerals, Sheik Ahmed Zaki Yamani was taken to task by one of his fellow countrymen for selling oil cheaper than other members of the Organization of Petroleum Exporting Countries.

Yamani's answer, as Cranford said, was a lesson in international oil economics. Other OPEC countries may have an interest in boosting oil prices as high as possible because their supplies will run out fairly quickly, Yamani pointed out. Algeria, for example, will no longer be an oil exporting country by 1990.

But the shrewd Yamani told his Arab questioner that the Saudis, with huge reserves, must approach things differently, maintaining moderate prices along with a good supply

so that the West won't be driven too quickly into developing oil substitutes. Their policy is based on no special consideration of, or love for, the United States. Rather, it involves a search for a price high enough to reflect "the true value of oil," Yamani said, but not so high as to cause a rush of energy research and investment that might knock the Saudis out of the oil business too soon.

"If we were to force the Western countries to invest large sums of money in alternative energy resources, it would take 7 to 10 years to bring about some results of these investments, which would reduce oil demand to a level that would affect Saudi Arabia, which at that time would not find enough markets to sell its oil to meet its economic demands," the Harvard-educated oil minister explained.

Thus, if the Saudis were to lower their production, creating a shortage of oil supplies, that would result in higher prices. In turn, that would speed the West's drive for alternatives to oil, cutting demand for the only commodity the Saudis have to sell on the world market. And that would be something that the Saudis could not afford.

Mr. Secretary, nobody has made this more explicit than Yamani did in Dhahran. So as you deal with Saudi officials on security matters of mutual interest, remember that what they are doing on oil prices and production is based on their best calculation of what is in their own best economic interest, period. We don't owe them anything for it. But if they can make gullible Westerners believe their oil-pricing policy is a favor, well, that's an extra dividend politically.

A blinders-off approach to the Saudis should make it easier for the nation to develop an explicit national policy toward OPEC. Happily, your administration is taking steps to increase funding for the Strategic Petroleum Reserve—a move the Saudis don't like. You also have the support, as you deal with the Saudi government, of congressional Democrats who argue for the first time that the United States together with its allies, should come to grips with OPEC, and who now support an expanded SPR. An excellent statement along these lines is included in the recent report of the Joint Economic Committee.

The Saudis, as you know, Mr. Secretary, were able to frighten the Carter administration into scrubbing the SPR. Naturally, the smaller the reserve stocks of any kind, the greater advantage OPEC can take of even small political disturbances in the Middle East. The critical importance of reserves, as the JEC report notes, can be seen by comparing the sky-rocketing of prices right after the Iranian revolution, and the contrasting calm in the wake of the Iran-Iraq war, when inventories were at a record level.

Since it's a long flight to Riyadh, Mr. Secretary, let me recommend three supplements to your departmental briefing papers.

The first is a great book on the Middle East, titled "Arabia, the Gulf, and the West" by Prof. J. B. Kelly, which brilliantly explains how the Arabs for years have bamboozled the Western powers (including some fellows who used to sit in your seat).

The second is an article by Israeli economist Eliyahu Kanovsky, visiting professor at Queens College, New York, entitled, "Middle East Oil—of Diminishing Importance?"

A third is an article by Douglas Feith of the Washington Center for International Security with the self-explanatory title: "The Arab Oil Weapon De-Mystified."

Good reading, and good luck, Mr. Secretary.

Sincerely,

HOBART ROWEN.

Mr. JEPSEN. Mr. President, I now yield to the distinguished Senator from Minnesota (Mr. BOSCHWITZ).

Mr. BOSCHWITZ. Mr. President, in this portion of the colloquy, I speak for myself and for the distinguished Senator from New Hampshire (Mr. RUDMAN).

I read from the UPI and UP reports of March 13, 1981, which outline how the Saudi Arabians look upon the weapons they are purchasing.

Saudi newspapers, in reporting on the arms deal, have said:

> We are arming our army for the liberation of the plundered lands.

Two Saudi newspapers reacted yesterday to the criticism expressed in Israel regarding the American-Saudi arms deal by writing that:

> The Saudi government does indeed intend equipping its army in order to liberate the plundered Arab lands.

In an editorial published on March 12 in the newspaper "Al Yom," it is stated:

> Until now, we have sought peaceful ways for the return of our lands, but the arrogance and boastfulness of the Zionist entity have prevented the attainment of this goal. Therefore, we are arming our army and preparing it for the liberation of the lands and the holy places.

The newspaper "Al Riyadh" wrote on March 12:

> The campaign of vilification by the terrorist Menachem Begin began when the present Israeli leader became aware of Saudi Arabia's determined approach to fight on all fronts, and with all its strength, against Israeli expansionist plans in the region.

Mr. President, I add a word of my own by saying that this is the same Menachem Begin who has negotiated peace, and the same Menachem Begin who has withdrawn from vast areas of lands that were gained after the war of 1967.

Mr. President, there was another comment by the Saudi newspaper "Al Riyadh," on March 17 which said in an article concerning the AWACS:

> The Zionist have to understand that the Arabs know how to speak the language of force.

It is indeed sad that by hoping to arm these countries for the purpose of sharing stability in the area that indeed we may be accomplishing the opposite end.

I yield the floor.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. JEPSEN. I yield.

Mr. STEVENS. Mr. President, I wish to commend the Senator from Iowa for taking leadership in initiating this colloquy today.

Many of us have expressed privately and publicly our concern over the proposed sale to Saudi Arabia. It is a matter which I think requires deep, in-depth analysis of its impact upon the stability of the Middle East and in particular upon the attitudes that have been expressed by Saudi Arabians concerning other nations in that area.

It appears to me that there is no question that there should be some movement on the part of the Saudi Arabians if we are to change the policy that was initiated at the time we made the original agreement to sell the F–15's to Saudi Arabia.

I will be speaking in depth on this at a later time.

But I do commend Senator JEPSEN and those who have taken the initiative here today again to raise the subject and to present to the Senate this most difficult issue.

We are hopeful that the President and the new administration will thoroughly review the total implications of the proposals that we have read about to date.

I thank the Senator.

Mr. JEPSEN. Mr. President, I respectfully advise the Chair that there will be other Senators from time to time today who will be coming to this Chamber asking unanimous consent to submit their remarks in the RECORD.

(By request of Mr. BOSCHWITZ, the following statement was ordered to be printed in the RECORD:)

● Mr. ARMSTRONG. Mr. President, I do not regard myself as an authority on the issue of selling F–15 enhancements to the Saudis.

But I would be remiss if I failed to express concern about the pending proposal. My colleagues have raised very significant and serious questions about the wisdom of such a sale. It would be my hope that the administration will meet with Senators and others who have raised these issues and take steps necessary, in negotiations with the Saudis or otherwise, to allay these concerns.

If this is not possible, then the administration should seriously consider deferring the sale. It is my judgment that such a sale presents serious policy questions which have not, as yet, been satisfactorily resolved.●

● Mr. BIDEN. Mr. President, I welcome this opportunity to reiterate my opposition to the administration's decision to sell military equipment which would significantly enhance the offensive capability of the Saudi Arabian Air Force. That decision repudiates assurances previously given to the Congress and needlessly and dangerously increases the level of armaments in the volatile Middle East.

When the administration's plan was announced on March 6, I announced my intention to introduce a resolution of disapproval when formal notification is received, so that the Senate can act to reject these proposed sales. Already many of my colleagues have joined as cosponsors. I welcome the support of additional Senators who share my belief that these sales are not in the national security interest of the United States.

Mr. President, in 1978 the Senate narrowly approved the original sale of F–15 aircraft to Saudi Arabia. Many Members supported that sale only after receiving explicit assurances that no future actions would be taken to increase the offensive capability of those aircraft. As then-Secretary of Defense Harold Brown declared to the chairman of the Foreign Relations Committee:

> Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground-attack capability of the F–15.

Notwithstanding those assurances, the administration now plans to sell, either immediately or after further discussions and study, several items of equipment that vastly improve the already formidable capabilities of the F–15's. The conformal fuel tanks more than double the

combat range of the aircraft. The AIM–9L missiles incorporate major technical advances permitting all-aspect engagements. Aerial refueling and airborne surveillance systems—if later provided—would be dramatic force multipliers which would further enhance the offensive power of the aircraft.

Saudi concerns may be temporarily assuaged by this proposed sale, but what does the United States get in return for repudiating past policy? Any change in Saudi policies toward Israel, the Camp David agreements, or the PLO? Any change in Saudi oil price policy or opposition to the American strategic petroleum reserve? If these sales are to be in our own national interest, we should receive some tangible benefits—but none have even been promised.

Mr. President, I do not believe that our national interests are served, for either the short term or the long run, by a policy that seeks to promote peace and stability in the Middle East by increasing so dramatically the capabilities for war.●

Mr. BAUCUS. Mr. President, I have a very short statement to make in connection with the administration's proposed arms sales to Saudi Arabia. Personally, I am concerned about the wisdom, timing, and scope of the administration's proposal.

To the extent that there is a felt need on the part of Saudi Arabia for additional arms, I believe it is imperative that our Government be judicious in taking a second look to see whether the proposed arms for sale are truly needed. I was recently impressed by an article written by Steven Emerson, who formerly worked on the staff of the Senate Foreign Relations Committee, which presents a number of powerful arguments that have led me to question the wisdom of the administration's proposal. For the benefit of my colleagues, I ask that Mr. Emerson's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEW SALAAMS TO THE SAUDIS

(By Steve Emerson)

Rumors of the death of the Carter administration have been greatly exaggerated. The Reagan decision to acquiesce to Saudi Arabia's demands for offensive F–15 hardware means that one of the Carter administration's most short-sighted policies remains alive and well. It is ironic that the new administration, which campaigned promising to reassert American toughness abroad and to promote the national interest unapologetically, has accepted the policies of its predecessor so uncritically.

Reagan policy-makers undoubtedly believe that they have resolved the F–15 dilemma by giving Israel military credits to partially compensate for its increased vulnerability. And they view the sale as part of a new strategic emphasis on containing Soviet expansion in the Middle East, not unlike former secretary of state John Foster Dulles's application of the Truman Doctrine, which produced the short-lived Baghdad Pact among Turkey, Pakistan, Iraq, and Iran in 1955.

It is unfortunate that the issue of an increased threat to Israeli security was the only argument against the sale that the administration considered. There are many others, including the absence of a sound military rationale for the equipment perpetuation of an unhealthy American-Saudi relationship, the possibility of Saudi mischief in the Persian Gulf, and potential destabilizing effects on Saudi Arabia itself.

Lest anyone forget, during the 1978 congressional debate over the initial sale of F–15s to Saudi Arabia, Carter administration officials imposed explicit and public restrictions on the sale of "any system of armaments that could increase the range or enhance the ground-attack capability of the F–15." It was specifically stipulated to Congress that the Saudis would not receive auxiliary fuel tanks, multiple ejection (bomb) racks, air-refueling capabilities, early warning radar planes (AWACS), or "all-aspect" AIM 9L ("Sidewinder") air-to-air missiles. Last year the former president reaffirmed these restrictions in numerous press interviews and in discussion with elected officials.

Citing new security considerations and changing circumstances, the Reagan administration now has granted immediate approval to the sale of the extra fuel tanks by future approval of the advanced radar planes, mid-flight refueling capability, and, possibly, bomb racks. This approval only further entraps the US in a vicious cycle of escalating Mideast arms sales. And it perpetuates the pattern whereby the Saudis get what they want from the US by representing every request as a "litmus test" of American-Saudi relations. Instead of initiating a "new beginning," the Reagan administration has signaled willingness to endure an obsequious and inherently counterproductive relationship. The United States would be well advised to heed the advice of Egyptian president Sadat, who repeatedly has urged US officials to stop babying the Saudis and to demand that they respect our military and political interests.

Developing a healthy relationship with the Saudis depends on a clear-headed evaluation of what they do for us, and we for them. The Saudis supply 17 percent of the world's oil production, which is vital to the well-being of the Western economy. Saudi rulers pay a political price for keeping production up. Younger, more conservative princes (ironically, often Western-educated) charge that their elders are squandering the national patrimony. Also, by producing at rates commensurate with Western needs, the Saudis get accused by Islamic fundamentalists and Arab radicals of being allied with "infidels" and "imperialists."

But in setting their levels of oil production, the Saudis also are guided by self-interest. They need to prevent the collapse of the Western economy and devaluation of Saudi investments in the United States and the West. They don't want to induce the West to develop alternative energy supplies. They need money for their massive development and industrialization program, estimated to cost $270 billion over the next five years. And, in the end, they do not want to drive the West to military action to preserve its oil supply.

Saudi Arabia has reaped considerable rewards from its relationship with the United States. Since 1945 Washington has provided the House of Saud with a security umbrella against aggression from potential enemies—the Soviet Union, Yemen, Libya, Iraq, and Iran. Over the past six years, the US has sold more military equipment to Saudi Arabia than to any other non-NATO country, totaling more than $22 billion. In 1980 alone Saudi purchases of American military equipment and construction amounted to about five billion dollars.

Saudi Arabia also derives vast quantities of nonmilitary goods and services from the US—$23 billion worth between 1976 and 1980. American companies are heavily involved in building and running modern Saudi Arabia. Aramco alone employs over 10,000 American citizens to produce the kingdom's oil.

In short, each nation is compelled to depend upon the other. Given American superiority in military and technological fields, however, a strong case can be made that the Saudis are more dependent on us than we are on them. The United States imports 1.2 million barrels per day from Saudi Arabia. This is just one-sixth of all American oil imports and only six percent of America's total petroleum consumption of 16.7 mbd. The Saudis have an "oil weapon" all right, but its potency is more limited than Americans often realize.

For one thing, the Saudis do not have a limitless capacity to increase production to reward satisfactory behavior in the West. In April 1979 the Senate Foreign Relations Committee issued a detailed analysis of Saudi production and reserves based on subpoenaed documents from Exxon and Socal, two partners in Aramco. The report concluded that Saudi Arabian production is never likely to exceed 12 mbd, and that this level could be sustained only for 15 or 20 years before it started to decline. Because of reductions in projected recoverable reserves and rising costs of maintaining prodouction, the report also indicated that Saudi Arabia might never raise its maximum sustainable capacity beyond the present 10 mbd. The fundamental conclusion of the Senate study was that Saudi Arabia produces its oil based on its own economic self-interest and on geological realities, and that "linkage" with the Arab-Israeli dispute never has been figured into production decisions. The New York Times twice reported that CIA analysts supported the report's findings.

There is evidence that even the October 1973 oil cutoff may have had geological and conservationist explanations. In any event, various oil experts maintain that actual production cutbacks were limited in duration and magnitude. US gas lines made the embargo seem successful, but according to MIT economist M. A. Adelman they were the product of the "explosive combination of controlled prices and no rationing. . . ."

Finally, an increasing number of Middle East oil economists believe that Saudi Arabia actually will be forced into raising its oil production to finance balance of payment deficits. Eliyahu Kanovsky, a visiting professor of economics at Queens College, has examined the Saudi economy and found deficits in 1977, 1978, and 1979. In order to meet massive capital development projects, and increased international economic needs, the kingdom may require a minimum production level perhaps 8.5 mbd. According to Business Week Saudi government sources confirmed this assessment and said that sharp budget cutbacks would provoke greater economic and social dislocations than the social pains of development.

In short, "responsible" Saudi production and price levels—represented in the US as a political favor to the West—are actually the product of self-interest and will continue to hold unless there is a change of regime as in Iran. It can be argued that it is the US that contorts itself, including its own laws, to please the Saudis. One example is Northrup's control of the multi-billion-dollar modernization program of the Saudi Air Force, awarded without competitive bidding at Ridyadh's request. Similarly Saudi Arabia receives selective treatment in the operation of foreign military trust funds. Unlike any other foreign purchaser, Saudi Arabia makes deposits for military purchases in an interest-bearing account under an arrangement whereby the US would not be protected should Saudi Arabia decide to cancel its contracts, as Iran did.

Saudi Arabia also gets special treatment in State Department human rights reports, compiled annually for Congress. The 1981 report

is so meticulously crafted that, even after citing stonings, beheadings, severances of the hand, a "heavy stress on obtaining confessions," and the lack of habeas corpus or the right to counsel, one still gets the impression that Saudi Arabia has not violated the standard of human rights that was judiciously applied elsewhere.

The Carter decision in 1978 not to fill the strategic petroleum reserve was an astonishing concession to the Saudis. Officially, Saudi Arabia professed a desire to prevent pressure for higher oil prices, but Americans close to the Saudis acknowledged that they also wanted to maintain US dependence on their oil. Congress finally forced the administration to resume filling the reserve. That the Saudis have not objected demonstrates that Carter's concession was unnecessary.

The 1978 sale of 60 F–15s to the Saudis was a major demonstration of Saudi political influence. Many senators voting to approve the sale conceded openly that they were doing so because of US dependence on Saudi oil and goodwill. The sale of 60 planes was approved despite a 1974 Pentagon recommendation and a 1978 Arms Control and Disarmament Agency report saying only 40 F–15s should be provided. A 1976 Defense Department reassessment advised the Saudis not to purchase F–15s at all, on the grounds that they could not assimilate them.

If the F–15 sale had resulted in Saudi support for American peace efforts in the Middle East—as promised by the Carter administration—then it might be argued that the United States had received a quid pro quo for the planes. But since Camp David, what has happened? At both Baghdad pan-Arab summits, the Saudis were instrumental in building a consensus for punishing President Sadat and for paying out billions to Jordan and Syria to stay out of the peace process. This year the Saudis led the Islamic nations in calling for a jihad against Israel.

Not only did the Saudis not deliver on their part of the quid pro quo, the Carter administration actually shifted its peace policy in Saudi Arabia's direction. How else can one explain Washington's attempts in 1979 to involve the PLO in peace negotiations? How else explain the effort to alter UN Resolution 242, when it had formed the cornerstone of the Camp David accords? And how else explain the counterproductive attempts to reach prematurely for a "comprehensive solution" at the expense of the Camp David accords and the repeated acquiesence to one-sided Security Council resolutions?

In spite of the record and its own public promises, it's likely that the Carter administration would have approved the new Saudi request for offensive ordnance. According to the biweekly Middle East Policy Survey, Secretary of Defense Harold Brown gave his personal commitment to Saudi defense minister Sultan that the kingdom's request would be fulfilled.

The Reagan administration thus inherited a difficult situation, but not an impossible one. It could have invoked the 1978 executive commitments in refusing the sale. But in consultations with Congress during the past three weeks, Reagan administration officials have parroted the same vague and superficial justifications that previously had been cited by the Carter administration. "If we don't sell them this equipment, then they will buy it elsewhere," goes one verse. Another maintains that the Saudis are a "force for stability and moderation in the Middle East." (The corollary is that Saudi Arabia's moderation would disappear if they are not granted their requests.) Yet another cites the security threat to Saudi Arabia, especially to the Eastern oil-producing provinces; but doesn't quite explain how Saudi Arabia would defend itself against the blows of the Soviet Union, Iraq, Iran, or the People's Democratic Republic of Yemen. The final line assures all concerned that Saudi Arabia never would use its F–15s, or transfer them for use, in direct combat against Israel.

A preview of this administration's embrace of previous policies was provided last month in Defense Secretary Caspar Weinberger's maiden news conference. He expressed the American desire to bolster Saudi Arabia's security by providing the offensive F–15 equipment they had requested. When asked about the American commitment to Israel, Weinberger responded sympathetically to Israel's needs, maybe a bit too sympathetically, in offering to station troops in Israel.

Actually, it is Saudi Arabia that needs American troops, not Israel. With vulnerable oil fields, limited military capability, vast territory to defend (over 4,400 miles of coastline), and surrounded by militarily superior adversaries, Saudi Arabia must depend upon the American security umbrella. The closer American forces are to Saudi Arabia, the more protection they can provide.

But, it's argued, the Saudis are unwilling to become overly identified with the United States (or any foreign power) for fear of inciting domestic resentment. Therefore the US has to sell the Saudis sophisticated weapons to use in protecting themselves. So goes the military justification for the F–15 sales. But key military questions have not been faced: from which potential adversary can Saudi Arabia realistically be expected to defend itself? What are the most likely situations in which the planes will be used? Can the Saudis absorb the weapons? What are the other potential effects generated by transforming the kingdom into a massive arms arsenal?

According to the 1980–81 annual report of the International Institute for Strategic Studies and other sources, the balance of forces between Saudi Arabia and every one of its potential adversaries is overwhelmingly weighted against Saudi Arabia. This imbalance is further accentuated by the vast territory Saudi Arabia has to protect. No matter how many F–15s Saudi Arabia possesses, the kingdom always will be incapable of defending itself. The Saudis and Americans are both well aware that should the kingdom be subjected to an external attack, the Saudis would have to rely on American military forces to protect their oil fields from destruction. The creation of the American Rapid Deployment Force attests to the acceptance of this contingency.

If the F–15s have no credible defensive role, why do the Saudis want them? One answer is prestige. Another is that they may hope to acquire an offensive option. The F–15 is the most sophisticated fighter plane in the world, capable of challenging any other aircraft. When equipped with extra fuel tanks, advanced radar, and AIM 9L air-to-air missiles, the F–15 is capable of inflicting lethal damage 1,000 miles away from its takeoff point. It could fly from Saudi Arabia to anyplace in the Middle East and return.

Having acquired 60 F–15s and offensive enhancement gear, the Saudis may be tempted to use them. How? One possibility is to settle old scores with weaker Persian Gulf rivals such as Oman. Religious and tribal animosities characterize the Saudi-Omani relationship and, on more than one occasion, the Saudis have tried to occupy Oman's Buraimi Oasis. The Omanis themselves probably will be granted additional weapons by the United States, too. The US is in the process of creating a version of mutual assured destruction in the Persian Gulf, a kind of Mideast balance of terror.

What about the threat to Israel? Proponents of the sale discount the possibility of a direct Saudi attack because of the more destructive Israeli retaliatory capability. The logic of this thesis is sound, but logic does not always govern behavior in a region of the world where dying by the sword is preferred to political compromise. In the event of another Arab-Israeli war, it is naive to believe that Saudi Arabia could resist pressure to use its weapons against Israel, or to transfer its planes to some other Arab state. Saudi Arabia took part in three past Arab-Israeli wars, but its involvement was limited to support roles and joint maneuvers with Syria and Jordan. The important difference is that then the kingdom simply did not have the modern weaponry it now has at its disposal. The mere existence of the superior F–15s, hardly a secret, would generate overpowering demands upon the kingdom from both within and without for use in an actual jihad against Israel. In the past, the Israelis never have felt a military need to attack Saudi territory. But if they feared a new war with the Arabs was imminent, they would have a strong incentive to launch a preemptive strike to knock out the Saudi F–15 force.

In all fairness, responsibility for fueling the arms race in the Middle East must be spread among several Western countries and Russia. The Saudis apparently will get 300 West German Leopard tanks and 200 British Tornado jets. Reportedly they have made a secret $3.4 billion agreement with France to buy ships and helicopters, and are negotiating to finance production of Mirage 4000 jets. The lure of recycling oil debts, lowering unit costs of weapons, and engendering goodwill have proven irresistible to the Europeans.

The dangers of an arms race are somewhat mitigated by reported Saudi inability to absorb such vast quantities of sophisticated weapons. A similar problem arose in Iran, yet the surplus cash skimmed off the top of the defense contracts ensured that the contracts continued. Multinational corruption in Saudi Arabia probably has not risen to the levels reached in Iran, but the issue of Saudi absorptive capacity should be a fundamental consideration in determining the feasibility of appropriate military sales. Is the US prepared to sanction the Saudis' use of Pakistani mercenaries to fight on their behalf?

Even more troubling are the negative domestic repercussions of the massive arms sales, an issue relating to the larger problem of internal Saudi instability. The strains caused by accelerated industrialization, accompanied by liberalization of the kingdom's social or political institutions, well may provoke a violent reaction against the regime. Add the factors of corruption, a large foreign presence, Islamic revivalism, class disparities, and Shia-Sunni and other intra-clan tensions (particularly in the oil regions), and the future looks even more ominous. On top of this, the impact of a massive arms infusion could prove disastrous. Many sectors of Saudi society, from religious ascetics to those with rising expectations about the benefits of oil wealth, may end up increasingly dissatisfied with an uneven development program that goes too far and simultaneously not far enough. A conspicuous arsenal of Western arms may create, as in Iran, an irritating reminder of the regime's wasting of precious, dwindling resources. No one can predict that massive internal insurrection will occur in Saudi Arabia, but it would be a tragic irony if sometime in the future American troops were forced to protect American interests from the ravages of American arms.

Mr. BAUCUS. Mr. President, Saudi Arabia has been a loyal ally to the United States. I think it is imperative that we use all of our collective wisdom to insure the continued close cooperation between our two nations.

However, we should not be blinded by our Nation's need for a stable supply of

Saudi oil. While I believe it is important to keep the current supply of oil from Saudi Arabia to the United States flowing, I think it is also important to examine carefully any arguments that suggest that the failure to provide additional arms to Saudi Arabia will in some way curtail the current supply of oil. In this connection, I ask unanimous consent that Douglas Feith's recent article in the Wall Street Journal be included in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SAUDI PRODUCTION CUTBACK AN EMPTY THREAT?

(By Douglas J. Feith)

The following report appeared a few weeks ago in The New York Times: " 'We've gotten no sign of appreciation for everything we've done,' said Ahmed Zaki Yamani, the [Saudi] minister of petroleum, maintaining that Saudi development needs would require oil production of only half the current rate of 10.3 million barrels a day. 'Why should we accumulate a surplus of funds?' Yamani asked rhetorically."

Soon thereafter, the U.S. ambassador to Saudi Arabia, John C. West, announced his thoughts on Saudi oil policy, and they resembled Yamani's. The Saudis are producing "double the amount of oil they need for their own national economy," Mr. West asserted, and added, "If they cut their production to 4.5 million barrels a day they could generate all the money they need for their five-year plan." Mr. West warned that if the Reagan administration's relations with Riyadh "deteriorate," the consequence will be lower Saudi oil production.

Either the Saudis are history's most unusual businessmen or Sheik Yamani has been pulling legs. Yamani frequently tells Western journalists that the Saudis would prefer to produce and sell less oil. "We really hope that we can cut down a little bit as soon as it is possible," he confided recently to the Washington Star.

Such a comment, from an official of a state where oil sales to foreigners account for over 90% of GNP and virtually 100% of exports, seems designed to engender astonishment, if not disbelief. Why should a businessman—a seller of goods—desire less demand for his product and thus less revenue? But Yamani usually pre-empts the question by asserting that the Saudis would actually increase their oil revenues by selling less oil, and that Saudi Arabia anyway has more money than it needs and even more than it wants, so it can best enhance its wealth by taking less oil out of the ground.

RAISING ANOTHER QUESTION

Such remarks of course raise another question: Why don't the Saudis do the apparently sensible thing and cut their oil production? There is a ready answer to this too. We would do so, Yamani explains, but it would hurt our friends in the West. In the face of such benevolence, what can interviewers say? How about: "I'm skeptical." They never do.

Talk of Saudi satiety, friendship and beneficence should get one reaching for his pocket calculator.

When The Wall Street Journal interviewed Yamani in November 1980, its report noted that Saudi oil production amounted to around 10 million barrels a day (as at present) and the price of Saudi oil was $30 per barrel (it is now $32). In connection with a discussion of the "link" between Saudi oil policy and U.S. foreign policy, the Journal quoted Yamani: "For us, production of three million barrels a day when the price would be $50 a barrel would increase our revenue and conserve our resource. . . . Don't take the Saudis for granted."

Not taking Yamani's figures for granted, I calculated Saudi Arabia's then current revenue: 10 million barrels a day times $30 per barrel equals $300 million a day. I compared this to the figures Yamani put forward to prove that Saudi Arabia would increase its revenues by lowering its production: 3 million barrels a day times $50 per barrel equals $150 million. To assert that 150 is greater than 300 is a large and rather self-serving miscalculation on the part of the Harvard-educated sheik.

Furthermore, according to prevailing oil demand elasticity projections, it is questionable that a 7 million-barrel-a-day cut in Saudi output would have allowed crude oil prices to rise as much as 66.6% (from $30 to $50). Be that as it may, OPC's current "oversupply crisis" (which additional production from revenue-starved Iraq and Iran will likely aggravate in the next few months) eliminates altogether the possibility that such a cut by the Saudi would now bring about so great a rise in prices. Thus, a substantial drop in Saudi oil production would mean a substantial drop in the kingdom's revenues. A loss of $150 million a day cannot be sneezed at, even by the Saudis.

Saudi Arabia's ability to sneeze at a loss of revenues was the theme of a feature article this month in the Washington Post. The following items were reported: Current Saudi output is around 10 million barrels a day. Saudi oil sells for $32 per barrel. The Saudi budget this year is $75 billion. Saudi "reserves" (presumably, foreign assets) now equal $125 billion. And Saudi Arabia is adding to these reserves at the rate of $2 billion a month.

That means the Saudis are spending at a rate of around $96 billion a year. The Saudis announced a budget of $75 billion for this year, but they evidently are exceeding it, which conforms with their past practice.

Official figures just released in Saudi Arabia reveal, as reported in The New York Times on March 23, that "last year's expenditures [by the Saudi government] exceeded budgeted allocation by as much as 93% in some sectors." As for the roughly $140 billion budget for its 1975–80 development plan, the Saudi government confirmed a few months ago that the plan actually cost around $210 billion—despite Saudi Arabia's having accomplished, by all accounts, substantially less development than the plan called for.

The $96 billion current spending figure puts into perspective the amount of Saudi Arabia's financial reserves, which Yamani (probably erring on the high side) estimates to be $125 billion; those reserves amount to a bit more than one year's spending for the Saudi regime. It bears noting that despite Yamani putative preference for oil in the ground over money in the bank, Saudi Arabia has never financed spending by drawing down its bank holdings when it was able to finance it through oil sales at current prices.

In fiscal 1977–78, the Saudi government was forced to reach into its central bank's foreign assets; the government that year had spent all its revenues (oil revenues as well as investment and other income) and incurred a fiscal deficit of more than $4.1 billion.

In the next fiscal year, Riyadh ran up an even larger fiscal deficit—over $4.6 billion—and drew down foreign assets approximately 10%, by more than $6 billion. (An admirable study of Saudi economic policies, written by Queens College Visiting Professor E. Kanovsky will appear in the forthcoming "Middle East Contemporary Survey" published by Holmes & Meier in New York.)

Crude oil prices are too high to allow all the OPEC countries to sell all the oil they are producing; hence the grumbling among the oil states about production cuts and price reductions. If, as Yamani predicted in the Post article, Iraq and Iran add 7 million barrels a day to world supplies and this forces Saudi Arabia to cut its output by 5 million barrels a day, the Saudi cut will not force prices up; total world supplies will remain at least as plentiful as at present (even if other smaller exporters feel compelled to reduce their production somewhat), with Iranian and Iraqi production simply displacing that of Saudi Arabia.

GRIM TALE FOR SAUDIS

Under these circumstances, a Saudi production cut from 10 million to 5 million barrels a day would cut Saudi revenues in half—from the current $120 billion a year to around $60 billion. But official Saudi spending is at the rate of $94 billion a year, and thereby hangs a grim tale for the Saudi regime.

Therefore, notwithstanding Yamani's bold front and Ambassador West's dubious insights into Saudi fiscal requirements, Saudi Arabia can be counted on to persist in seeking ever higher revenues, even in periods when it is accumulating a current-account surplus, and to resist (so long as market conditions allow resistance) pressure from whatever source to cut Saudi output. (Note that the real pressure for a Saudi production cut comes not from the Saudi populace which benefits from high Saudi revenues, but from the other oil-exporting states, which wish to be spared the necessity of having to cut their own production or prices when the market goes "soft.")

Saudi Arabia produces and sells as much oil as it can find customers for at current prices. It does so because its rulers enjoy wealth and wish to preserve their rule. Whether those rulers are "pro-Western," "friendly" or pleased with any or all of the elements of U.S. foreign policy is an issue "linked" to Saudi oil policy only in diplomatic rhetoric and in the minds of those who do not actually bear responsibility for turning Saudi oil into money.

● Mr. HATCH. Mr. President, the Reagan administration has announced its consideration of the sale of Airborne Warning and Control System (AWACS) E–3A aircraft, AIM–9L air-to-air missiles, and fuel and sensor tactical (FAST) packs to Saudi Arabia.

The AWACS is a modified Boeing 707–320B aircraft equipped with a 30-foot rotating radar dome antenna. It is equipped with computers, data-processing, communication, and identification equipment, and multipurpose consoles. The AWACS is a combination early warning radar station, battlefield surveillance plane, and a tactical battle control station which, until now, has only been provided to NATO members.

The FAST pack is a conformal fuel and equipment pod attached on each side of the aircraft that would increase the combat radius of F–15's (already in Saudi possession) from about 450 miles to more than 1,000 miles, bringing all of Israel, Egypt, Iraq, and Iran within the aircrafts' combat range. The pods, which actually improve the aerodynamic performance of the F–15, are capable of carrying two AIM–7 Sparrow air-to-air missiles or 4,400 pounds of air-to-ground ordinance.

The AIM–9L, featuring all-aspect attack, maneuverability, resistance to jamming, and a more lethal warhead, is the most advanced version of the Side-

winder air-to-air missile. Sale of any of the above to Saudi Arabia may seriously endanger American interests in the Middle East for several reasons:

First, the credibility of the executive branch to Congress and to U.S. allies would be jeopardized. During the 1978 debates concerning the sale of the F–15 to Saudi Arabia, the executive branch assured Congress in writing that enhancement accessories would not be sold to Saudi Arabia in the future. In a letter to the Senate Committee on Foreign Relations dated May 9, 1978, then Secretary of Defense Harold Brown stated—

> Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground attack capability of the F–15.

To go back on such a promise would be to damage U.S. credibility.

Second, many argue that there exists no threat to Saudi Arabia that would warrant the sale of such systems to that nation. Soviet forces, in Afghanistan are more than 1,000 miles away, inaccessible to F–15's. Furthermore, even 62 enhanced F–15's would never be able to ward off a Soviet attack singlehandedly. A Saudi-Iraqi conflict is highly unlikely. Iraq, in fact, is receiving both diplomatic and military aid in its war against Iran from Saudi Arabia.

The current Saudi arsenal is an effective defense against South Yemen, a country further deterred by obstacles of desert and distance. Iran, whose threats have been blunted by the stationing of American AWACS in Saudi Arabia, could only perceive offensively equipped F–15's as a strategic threat, thus destabilizing the region.

Israel would also suffer a threat to her national security. Although Israel has been promised a quid pro quo package of weapons and money, the sale of these top-of-the-line items to Saudi Arabia would damage the technological edge upon which Israeli security has relied. Furthermore, an arms spiral would be an economic disaster for inflation-plagued Israel. All of Israel would come under "real time" surveillance if Saudi Arabia were equipped with AWACS. Israel hoping to not offend the new administration, is taking a dormant attitude while Saudi Arabia continues its calls for a Jihad (Holy war) to liberate Jerusalem. Indeed, Saudi oil minister, Sheik Yamani announced that his country is ready to "shed blood to liberate Jerusalem. We are prepared to use all we have to fight." Israel is understandably nervous.

Another risk involved in the proposed deal is the question of Saudi internal stability. The seizure of the Grand Mosque in Mecca was too big a problem for security forces. The Royal family has met popular resentment against its concentration of power, its shrewed budgetary priorities, and its pervasive corruption. There exists a prevailing sense of instability reminiscent of prerevolution Iran. Just as training manuals for systems such as the F–15 and the Phoenix missile were compromised within 30 months of the fall of the shah, compromise of the AWACS' secrets would be a dangerous blow to American security.

Finally, an historical analysis of the American-Saudi "special-relationship" demonstrates that gestures of good will between the two countries have for the most part, been unilateral. Since the 1978 F–15 sale, the price of oil has jumped from $12 to $32 per barrel. Saudi Arabia successfully threatened the Carter Administration to stop the stockpiling of the strategic petroleum reserve. Following the Iranian revolution, Saudi Arabia followed, and in some cases instigated, the escalation of OPEC oil prices while also raising its prices retroactively. Saudi Arabia has since opposed the Egyptian-Israeli peace while supporting the PLO, has opposed American bases in Saudia Arabia, has expelled American CIA officers, has threatened Oman, an American ally, and has allowed Soviet supplies through Saudi Arabia to Iraq. Recently, during the summit meeting of the Organization of the Islamic Conference Saudi Arabian King Khalid warned his coreligionists against forming alliances with "or taking refuge under the unbrella of a superpower."

Therefore, at this time, I lean against this sale and unless someone can show me ample reason to change, I will probably vote against it.●

Mr. SASSER. Mr. President, I join with many of my colleagues today, from both sides of the aisle, in expressing opposition to the sale of auxiliary equipment for the F–15's previously sold to Saudi Arabia.

I do not oppose the development of effective military relationships between the United States and friendly nations in the Middle East. Those relationships are, and must remain, of a defensive character. We changed the name of our own Department of War to the Department of Defense long ago, and our policy at home and abroad must reflect that subtle yet profound difference.

I did not believe the original sale of the F–15 aircraft to Saudi Arabia was consonant with that policy, and I voted to disapprove the sale in 1978. We may hear in debate today from some in this body who voted the other way for a variety of reasons, perhaps the most forceful of which were the hidebound, guaranteed assurances that these aircraft would be equipped for a defensive mission, and nothing more. Although I was not convinced, I can certainly see where the carefully thought out and repeated commitments of the administration could satisfy a reasonable individual.

But not this. Not the sale of AIM–9L Sidewinder missiles, not fast packs (fuel and sensor tactical packs). We are looking at a proposal based on the idea that the best defense is a good offense—this is no game, Mr. President. What possible reason, consistent with our policy, could there be for providing advanced all-aspect air-to-air attack missiles to the Saudi Air Force? How could we seriously even consider adding to their squadrons of defensive fighter-bomber F–15's the same conformal tanks that this country almost literally swore would never accompany the F–15 sale? I do not oppose the necessary, gradual shifts in the U.S. policy which must accompany changes over time in international situations. But this is not necessary, it is not gradual, and there is no shift in the situation that demands such a horrendous reversal of a solemn pledge.

We are going to hear today about the similarities between the arming of Iran and the arming of Saudi Arabia. While I do not hold with every aspect of those arguments—and I have an incomparably more hopeful view of the future of the Saudi system than any such comparison would indicate—I think we have to view, with justifiable caution, any impulse to relegate this much influence and this much technological authority to a third party. Saudi Arabia is not a NATO country; it sounds strange to say, but there is a critical difference here, and the difference is not reflected in this proposed weapons sale.

The fast packs are the items that add the greatest insult to this potential injury. Then-Secretary of Defense Harold Brown's now-famous quote to the Foreign Relations Committee chairman declared that:

> Saudi Arabia has not requested nor do we intend to sell any other systems or armament that would increase the range or enhance the ground-attack capability of the F–15.

The fuel and sensor tactical packs do precisely that. They double the range of the aircraft and enable it to carry greater payloads over longer distances. For defense purposes? I challenge anyone to justify it.

Even if all the aforementioned objections were insufficient—and they are not; I object—there is the key consideration of our relationships with other friendly nations in the Middle East, particularly Israel. I opposed the original sale fundamentally on the grounds that it would further destabilize a volatile area, and antagonize and threaten all other nations in the region, traditional friend or traditional foe of the Saudis. That assessment is vastly magnified with this proposal. It is not in our interest or the interest of any country in the region to allow this sale to go through.

The discussion of future oil prices in this context is inappropriate; the discussion of future oil supplies has strayed from its proper place in the argument. Even though a tremendous proportion of the justifiable arguments for maintaining military and political strength and stability in the Middle East are related to the continued smooth operation of petroleum, from its point of supply to its point of demand, the concept of being bartered into a corner is abhorrent. It is also unnecessary.

Mr. President, I urge those of my colleagues who have not yet decided how they will vote to consider these points. I believe that failure to disapprove this sale could have the most serious damaging effects on every aspect of our own relationships throughout the Middle East, and on the already-fragile relationships among those nations.

Mr. MATSUNAGA. Mr. President, I rise to join my colleagues in expressing

grave concern over the administration's announced intention to sell Saudi Arabia warplane equipment—equipment which would significantly enhance the offensive capability of the F–15 aircraft previously sold to that country by the United States.

Mr. President, not only would this sale, if carried out, serve to threaten the security of our close ally, the State of Israel, and heighten tension in that region by escalating the Middle East arms race, but it would also fail to achieve the administration's purported objective; to strengthen the U.S. presence in the Middle East-Persian Gulf region generally, and, in particular, to enhance Saudi Arabia's ability to resist Soviet aggression.

We must realize at the outset one critical fact: the sale of this equipment would not significantly strengthen Saudi Arabia's military posture vis-a-vis the Soviet Union. It would, in fact, prove to be insignificant were the Saudis or others be faced with a Soviet threat to the region. This minor upgrading of a small Saudi armed force is no deterrent to a military goliath such as the Soviet Union. Mr. President, I must emphasize that while this equipment would be meaningless as a deterrent to Russia, it would pose both a real threat to the security of Israel, and act to destabilize the balance of arms in the Middle East, given the entirely different scale of weapons existing within the region.

The conformal fuel tanks that the administration plans to sell to Saudi Arabia will provide their F–15 jets with an additional 1,500 gallons of fuel, enabling those planes to remain airborne longer and extending their combat radius from 450 miles to over 1,000 miles. This would, in effect, needlessly place Israel within easy striking distance of Saudi Arabia's military aircraft.

Should there be any doubt as to the potential impact this would have for the military security of Israel, let us remember that Saudi Arabia has never endorsed the goal of peace in the Middle East, has never embraced the Camp David peace process, and has remained an avid and active backer of the terrorist organization, the Palestine Liberation Organization—an organization bent on the destruction of the State of Israel.

Israel is a stable and reliable democratic ally in the troubled and generally unstable Middle East region. Saudi Arabia, I should note, has neither the record of stability nor the strength of a democratic tradition. The U.S. commitment to the continued viability of the State of Israel is, indeed, in our national security interest. Certainly, we should not embark on a policy which would weaken the security of Israel and destabilize the military balance in the Middle East.

Mr. President, in 1978, during consideration of the original sale of F–15's to Saudi Arabia, the administration gave Congress explicit assurances that no future actions would be taken to increase the offensive capability of those aircraft. While I recognize the need to insure the security of Saudi Arabia, I do not believe that the present circumstances warrant a reversal of that commitment. I repeat, the decision to sell warplane equipment to Saudi Arabia lacks any sound military rationale, and would only result in an increased military threat for Israel and an increase of arms escalation in the Middle East.

We must never forget that the United States was largely instrumental in the creation of the State of Israel as it exists today and must never abandon our responsibility to keep that beacon of democracy burning brightly in the Middle East.

Mr. ROTH. Mr. President, I rise today to join my colleagues in raising serious questions as to the wisdom of providing Saudi Arabia—or any potentially unstable government for that matter—with the very latest in American electronics warfare equipment. I would have thought that our experience in Iran would have taught us this lesson. We provided the shah with some of the most advanced weapons systems in our arsenal. When he was overthrown—not by outside forces but by his own people—these systems, the F–14 and the Phoenix missile among others, were irrevocably compromised.

I am not suggesting that the ruling family in Saudi Arabia is about to be overthrown. For all I know, they may reign forever. But what I am saying is that we should not take unnecessary risks with the only thing we have that gives us an edge over a Soviet Union that is devoting some 15 percent of its GNP to building up its military capabilities. If we lose the technological edge by inadvertently allowing state-of-the-art electronics weapons to fall into Soviet hands, we will have placed our own security in grave danger.

There is no question that Saudi Arabia should be able to defend itself from outside aggression. The question is how much is enough, especially if the weapons system can be turned against our one permanent friend in the region: Israel.

I had grave concerns about the wisdom of providing F–15's to Saudi Arabia and with a number of my colleagues sent a letter to the President to that effect. I have even graver doubts concerning the proposed sale of the AWACS system. This is not just an early warning system. It is an entire command and control center that, when wedded to 60 F–15's, would present Israel with a very serious security problem.

I urge the President not to approve this sale.

● Mr. RIEGLE. Mr. President, I wish to join my colleagues in the Senate who are speaking today in opposition to the Saudi request for equipment to enhance the offensive capabilities of their U.S.-supplied F–15 warplanes.

I applaud those Senators who are also speaking out against providing the requested conformal fuel tanks and "Sidewinder" air-to-air missiles.

When President Carter first proposed selling 60 F–15's to the Saudis, the request was accompanied with assurances that no further action would be taken to increase the offensive capability of those aircraft. Despite those assurances, I voted against the sale. I believed then that the sale of the F–15's, coupled with the scaled down request for Israeli weapons, clearly tipped the scale away from Israel and toward the Arab States.

Today, my convictions in this regard and my opposition are even stronger. The 1978 sale was painted as a "litmus test" of U.S. relations with Saudi Arabia, with compliance with the Saudi request holding the promise of more moderate and supportive policies coming from that country. Clearly events have shown otherwise.

Since the 1978 sale, the Saudis have done nothing to encourage a peace settlement in the Middle East. Rather, they have sought to aggravate such efforts in a number of ways. In addition to breaking relations with Egypt, they have led the Arab political and economic boycott of that country. Furthermore, the Saudis have opposed the use of the Suez Canal by Israeli ships; have called for a holy war against Israel; have continued to finance the PLO and other terrorist organizations; and have increased the price of oil from $12 a barrel to roughly $30 a barrel.

The argument that Saudi defense needs require the acquisition of the additional sophisticated weaponry does not hold up. The ongoing Iran-Iraq conflict has virtually removed any threat to Saudi Arabia from those countries. Furthermore, 62 enhanced F–15's would not protect Saudi Arabia against a full Soviet attack. Only the United States could do this.

The party most threatened by a continued Saudi arms buildup is clearly Israel. For, while Saudi Arabia might not move alone against Israel, Saudi arms could well be transferred to others.

The introduction of additional sophisticated armaments into the Saudi arsenal will serve only to increase tensions in the Middle East and encourage a further arms race in that fragile part of the world.

Some would argue that the United States must honor the Saudi request in order to insure U.S. access to Arab oil supplies, a concept that must be rejected outright. Even those who advance that reasoning have no tangible reason to believe that this, or any other sale, will provide such guarantees. Following the original sale of the F–15's, Saudi Arabia threatened to cut back on the world supply of oil if the United States continued filling its strategic petroleum reserve.

When President Carter first proposed selling enhanced F–15 equipment to Saudi Arabia last year, I joined 67 of my Senate colleagues in sending a letter to him, urging him not to violate the assurances given at the time the original sale of the F–15's was approved. The same arguments for rejecting the Saudi request then apply today.

I intend to work against—and vote against—further offensive weapons arms shipments to Saudi Arabia.●

● Mr. KENNEDY. Mr. President, I wish to join with my colleagues in expressing my strong opposition to the Reagan administration's decision to sell advanced

military equipment with obvious offensive capability to Saudi Arabia.

I voted against the sale of 62 sophisticated F–15 fighter aircraft in 1978, because they would endanger the security of Israel. In fact, the F–15 sale generated so much concern that the Carter administration promised explicitly to draw the line there—and never to increase the offensive capability of aircraft in the Saudi arsenal. Without those assurances, Congress would surely have disapproved the sale.

A new administration must not repudiate the solemn obligations of the U.S. Government. We are not talking about some technical "enhancement" of the F–15. We are talking now about the most advanced Sidewinder missiles and about extra fuel tanks which would permit the Saudi F–15's to range far wider to attack the territory of Israel.

And now we learn that there is even more to come. The administration is considering aerial refueling capabilities and AWAC's planes to give Saudi Arabia not just early warning of attack, but a command platform in the air that could guide attacks against Israel. America must never give the Saudis or any other nation the power to defeat Israel air defenses. And I pledge to oppose absolutely the AWAC's plane sales to Saudi Arabia.

The administration is pursuing a policy based on a false premise. More arms cannot buy or bribe the Arab States into a peace settlement in the Middle East. Just 2 weeks ago, two Saudi newspapers reacted to criticism of the latest arms deal by admitting—and I quote—that "the Saudi Government does indeed plan to equip its army in order to liberate the plundered lands."

The Reagan administration claims that it is pursuing an antiterrorist strategy. Then let them stop selling offensive arms to Saudi Arabia, which spends nearly $400 million a year to finance the terrorists of the PLO—and only last week gave the PLO another $27 million for joining the Taif declaration of holy war against Israel.

The administration claims that it wants peace in the Middle East. Then let them stop selling offsensive arms to Saudi Arabia, which fiercely opposes the Camp David peace process.

Instead of giving the Saudis a needless offensive military capability, we must recognize their real security needs. We must pursue a stable, independent, and pro-Western Saudi Arabia, but our relationship with the Saudis cannot be a one-way street. We are entitled to expect Saudi cooperation and not rejection of the peace process. We are entitled to expect the reality, not a charade, of oil price restraint and oil supply reliability in the Middle East.

Saudi Arabia does face an external threat from the Soviet Union, South Yemen and possibly Iran and Iraq. I support American supplies of the defensive arms necessary to meet this threat. But of this we must be certain: that the defensive arms we supply to Saudi Arabia, Egypt, or other Middle East states must always be aimed in the right direction—and never against Israel.

Later this week the Secretary of State will travel to Egypt, Israel, Jordan, and Saudi Arabia. Yet seldom in the last generation has there been greater uncertainty about American policy in that region of the world.

It is time for the United States to be clear about its objectives in the Middle East. And it is time for the United States to carry out these objectives consistently, reliably, and effectively.

First, we must assure the security and prosperity of Israel, our strongest friend and surest ally in the entire region. We cannot and must not jeopardize Israeli security by supplying offensive arms to its mortal enemies.

Second, we must promote peace and stability in the Middle East. Israel and Egypt are strategic cornerstones in the broader peace we must seek. The Camp David accords are a historic achievement. We cannot, and must not, set them aside in a futile effort to appease those sworn to an unholy war against the Holy Land of Israel. Nor can we allow the Soviet Union or its surrogates to undermine a just and lasting peace in the Middle East.

Third, we must achieve full energy security for ourselves and our allies by reducing, and finally eliminating, the crushing burden of our dependence on foreign oil. We cannot, and must not indenture ourselves indefinitely to the Arab oil barons, and open ourselves and our allies to Arab oil blackmail.

Mr. President, in the March 21, 1981, issue of the New Republic, Steve Emerson wrote an interesting and perceptive article which makes clear the dangers of the administration's policy toward Saudi Arabia. As he points out, in addition to "the issue of an increased threat to Israeli security," there are many other arguments against offensive arms sales to Saudi Arabia, "including the absence of a sound military rationale for the equipment, perpetuation of an unhealthy American-Saudi relationship, the possibility of Saudi mischief in the Persian Gulf, and potential destabilizing effects on Saudi Arabia itself."

I commend Mr. Emerson's articles to my colleagues, and request that it be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

NEW SALAAMS TO THE SAUDIS

(By Steve Emerson)

Rumors of the death of the Carter administration have been greatly exaggerated. The Reagan decision to acquiesce to Saudi Arabia's demands for offensive F–15 hardware means that one of the Carter administration's most short-sighted policies remains alive and well. It is ironic that the new administration, which campaigned promising to reassert American toughness abroad and to promote the national interest unapologetically, has accepted the policies of its predecessor so uncritically.

Reagan policy-makers undoubtedly believe that they have resolved the F–15 dilemma by giving Israel military credits to partially compensate for its increased vulnerability. And they view the sale as part of a new strategic emphasis on containing Soviet expansion in the Middle East, not unlike former secretary of state John Foster Dulles' application of the Truman Doctrine, which produced the short-lived Baghdad Pact among Turkey, Pakistan, Iraq, and Iran in 1955.

It is unfortunate that the issue of an increased threat to Israeli security was the only argument against the sale that the administration considered. There are many others, including the absence of a sound military rationale for the equipment, perpetuation of an unhealthy American-Saudi relationship, the possibility of Saudi mischief in the Persian Gulf, and potential destabilizing effects on Saudi Arabia itself.

Lest anyone forget, during the 1978 congressional debate over the initial sale of 60 F–15s to Saudi Arabia, Carter administration officials imposed explicit and public restrictions on the sale of "any system or armaments that could increase the range or enhance the ground-attack capability of the F–15." It was specifically stipulated to Congress that the Saudis would not receive auxiliary fuel tanks, multiple ejection (bomb) racks, air-refueling capabilities, early warning radar planes (AWACS), or "all-aspect" AIM 9L ("Sidewinder") air-to-air missiles. Last year the former president reaffirmed these restrictions in numerous press interviews and in discussions with elected officials.

Citing new security considerations and changing circumstances, the Reagan administration now has granted immediate approval to the sale of the extra fuel tanks and Sidewinder missiles, to be followed by future approval of the advanced radar planes, midflight refueling capability, and, possibly, bomb racks. This approval only further entraps the US in a vicious cycle of escalating Mideast arms sales. And it perpetuates the pattern whereby the Saudis get what they want from the US by representing every request as a "litmus test" of American-Saudi relations. Instead of initiating a "new beginning," the Reagan administration has signaled willingness to endure an obsequious and inherently counterproductive relationship. The United States would be well advised to heed the advice of Egyptian president Sadat, who repeatedly has urged US officials to stop babying the Saudis and to demand that they respect our military and political interests.

Developing a healthy relationship with the Saudis depends on a clear-headed evaluation of what they do for us, and we for them. The Saudis supply 17 percent of the world's oil production, which is vital to the well-being of the Western economy. Saudi rulers pay a political price for keeping production up. Younger, more conservative princes (ironically, often Western-educated) charge that their elders are squandering the national patrimony. Also, by producing at rates commensurate with Western needs, the Saudis get accused by Islamic fundamentalists and Arab radicals of being allied with "infidels" and "imperialists."

But in setting their levels of oil production, the Saudis also are guided by self-interest. They need to prevent the collapse of the Western economy and devaluation of Saudi investments in the United States and the West. They don't want to induce the West to develop alternative energy supplies. They need money for their massive development and industrialization program, estimated to cost $270 billion over the next five years. And, in the end, they do not want to drive the West to military action to preserve its oil supply.

Saudi Arabia has reaped considerable rewards from its relationship with the United States. Since 1945 Washington has provided the house of Saudi with a security umbrella against aggression from potential enemies—the Soviet Union, Yemen, Libya, Iraq, and Iran. Over the past six years, the US has sold more military equipment to Saudi Arabia than to any other non-NATO

country, totaling more than $22 billion. In 1980 alone, Saudi purchases of American military equipment and construction amounted to about five billion dollars.

Saudi Arabia also derives vast quantities of nonmilitary goods and services from the US—$23 billion worth between 1976 and 1980. American companies are heavily involved in building and running modern Saudi Arabia. Aramco alone employs over 10,000 American citizens to produce the kingdom's oil.

In short, each nation is compelled to depend upon the other. Given American superiority in military and technological fields, however, a strong case can be made that the Saudis are more dependent on us than we are on them. The United States imports 1.2 million barrels per day from Saudi Arabia. This is just one-sixth of all American oil imports and only six percent of America's total petroleum consumption of 16.7 mbd. The Saudis have an "oil weapon" all right, but its potency is more limited than Americans often realize.

For one thing, the Saudis do not have a limitless capacity to increase production to reward satisfactory behavior in the West. In April 1979 the Senate Foreign Relations Committee issued a detailed analysis of Saudi production and reserves based on subpoenaed documents from Exxon and Socal, two partners in Aramco. The report concluded that Saudi Arabian production is never likely to exceed 12 mbd, and that this level could be sustained only for 15 or 20 years before it started to decline. Because of reductions in projected recoverable reserves and rising costs of maintaining production, the report also indicated that Saudi Arabia might never raise its maximum sustainable capacity beyond the present 10 mbd. The fundamental conclusion of the Senate study was that Saudi Arabia produces its oil based on its own economic self-interest and on geological realities, and that "linkage" with the Arab-Israeli dispute never has been figured into production decisions. The New York Times twice reported that CIA analysts supported the report's findings.

There is evidence that even the October 1973 oil cutoff may have had geological and conservationist explanations. In any event, various oil experts maintain that actual production cutbacks were limited in duration and magnitude. US gas lines made the embargo seem successful, but according to MIT economist M. A. Adelman they were the product of the "explosive combination of controlled prices and no rationing. . . ."

Finally, an increasing number of Middle East oil economists believe that Saudi Arabia actually will be forced into raising its oil production to finance balance of payments deficits. Eliyahu Kanovsky, a visting professor of economics at Queen's College, has examined the Saudi economy and found deficits in 1977, 1978, and 1979. In order to meet massive capital development projects, and increased international economic needs, the kingdom may require a minimum production level, perhaps 8.5 mbd. According to Business Week Saudi government sources confirmed this assessment and said that sharp budget cutbacks would provoke greater economic and social dislocations than the social pains of development.

In short, "responsible" Saudi production and price levels—represented in the US as a political favor to the West—are actually the product of self-interest and will continue to hold unless there is a change of regime as in Iran. It can be argued that it is the US that contorts itself, including its own laws, to please the Saudis. One example is Northrup's control of the multi-billion-dollar modernization program of the Saudi Air Force, awarded without competitive bidding at Riyadh's request. Similarly Saudi Arabia receives selective treatment in the operation of foreign military trust funds. Unlike any other foreign purchaser, Saudi Arabia makes deposits for military purchases in an interest-bearing account under an arrangement whereby the US would not be protected should Saudi Arabia decide to cancel its contracts, as Iran did.

Saudi Arabia also gets special treatment in State Department human rights reports, compiled annually for Congress. The 1981 report is so meticulously crafted that, even after citing stonings, beheadings, severances of the hand, a "heavy stress on obtaining confessions," and the lack of habeas corpus or the right to counsel, one still gets the impression that Saudi Arabia has not violated the standard of human rights that was judiciously applied elsewhere.

The Carter decision in 1978 not to fill the strategic petroleum reserve was an astonishing concession to the Saudis. Officially, Saudi Arabia professed a desire to prevent pressure for higher oil prices, but Americans close to the Saudis acknowledged that they also wanted to maintain US dependence on their oil. Congress finally forced the administration to resume filling the reserve. That the Saudis have not objected demonstrates that Carter's concession was unnecessary.

The 1978 sale of 60 F–15s to the Saudis was a major demonstration of Saudi political influence. Many senators voting to approve the sale conceded openly that they were doing so because of US dependence on Saudi oil and goodwill. The sale of 60 planes was approved despite a 1974 Pentagon recommendation and a 1978 Arms Control and Disarmament Agency report saying only 40 F–15s should be provided. A 1976 Defense Department reassessment advised the Saudis not to purchase F–15s at all, on the grounds that they could not assimilate them.

If the F–15 sale had resulted in Saudi support for American peace efforts in the Middle East—as promised by the Carter administration—then it might be argued that the United States had received a quid pro quo for the planes. But since Camp David, what has happened? At both Baghdad pan-Arab summits, the Saudis were instrumental in building a consensus for punishing President Sadat and for paying out billions to Jordan and Syria to stay out of the peace process. This year the Saudis led the Islamic nations in calling for a jihad against Israel.

Not only did the Saudis not deliver on their part of the quid pro quo, the Carter administration actually shifted its peace policy in Saudi Arabia's direction. How else can one explain Washington's attempts in 1979 to involve the PLO in peace negotiations? How else explain the effort to alter UN Resolution 242, when it had formed the cornerstone of the Camp David accords? And how else explain the counterproductive attempts to reach prematurely for a "comprehensive solution" at the expense of the Camp David accords and the repeated acquiesence to one-sided Security Council resolutions?

In spite of the record and its own public promises, it's likely that the Carter administration would have approved the new Saudi request for offensive ordnance. According to the biweekly Middle East Policy Survey, Secretary of Defense Harold Brown gave his personal commitment to Saudi defense minister Sultan that the kingdom's request would be fulfilled.

The Reagan administration thus inherited a difficult situation, but not an impossible one. It could have invoked the 1978 executive commitments in refusing the sale. But in consultations with Congress during the past three weeks, Reagan administration officals have parroted the same vague and superficial justifications that previously had been cited by the Carter administration. "If we don't sell them this equipment, then they will buy it elsewhere," goes one verse. Another maintains that the Saudis are a "force for stability and moderation in the Middle East." (The corollary is that Saudi Arabia's moderation would disappear if they are not granted their requests.) Yet another cites the security threat to Saudi Arabia, especially to the Eastern oil-producing provinces, but doesn't quite explain how Saudi Arabia would defend itself against the blows of the Soviet Union, Iraq, Iran, or the People's Democratic Republic of Yemen. The final line assures all concerned that Saudi Arabia never would use its F–15s, or transfer them for use, in direct combat against Israel.

A preview of this administration's embrace of previous policies was provided last month in Defense Secretary Caspar Weinberger's maiden news conference. He expressed the American desire to bolster Saudi Arabia's security by providing the offensive F–15 equipment they had requested. When asked about the American commitment to Israel, Weinberger responded sympathetically to Israel's needs, maybe a bit too sympathetically, in offering to station troops in Israel.

Actually, it is Saudi Arabia that needs American troops, not Israel. With vulnerable oil fields, limited military capability, vast territory to defend (over 4,400 miles of coastline), and surrounded by militarily superior adversaries, Saudi Arabia must depend upon the American security umbrella. The closer American forces are to Saudi Arabia, the more protection they can provide.

But, it's argued, the Saudis are unwilling to become overtly identified with the United States (or any foreign power) for fear of inciting domestic resentment. Therefore the US has to sell the Saudis sophisticated weapons to use in protecting themselves. So goes the military justification for the F–15 sales. But key military questions have not been faced: from which potential adversary can Saudi Arabia realistically be expected to defend itself? What are the most likely situations in which the planes will be used? Can the Saudis absorb the weapons? What are other potential effects generated by transforming the kingdom into a massive arms arsenal?

According to the 1980–81 annual report of the International Institute for Strategic Studies and other sources, the balance of forces between Saudi Arabia and every one of its potential adversaries is overwhelmingly weighted against Saudi Arabia. This imbalance is further accentuated by the vast territory Saudi Arabia has to protect. No matter how many F–15s Saudi Arabia possesses, the kingdom always will be incapable of defending itself. The Saudis and Americans are both well aware that should the kingdom be subjected to an external attack, the Saudis would have to rely on American military forces to protect their oil fields from destruction. The creation of the American Rapid Deployment Force attests to the acceptance of this contingency.

If the F–15s have no credible defensive role, why do the Saudis want them? One answer is prestige. Another is that they may hope to acquire an offensive option. The F–15 is the most sophisticated fighter plane in the world, capable of challenging any other aircraft. When equipped with extra fuel tanks, advanced radar, and AIM 9L air-to-air missiles, the F–15 is capable of inflicting lethal damage 1,000 miles away from its takeoff point. It could fly from Saudi Arabia to anyplace in the Middle East and return.

Having acquired 60 F–15s and offensive enhancement gear, the Saudis may be tempted to use them. How? One possibility is to settle old scores with weaker Persian Gulf rivals such as Oman. Religious and tribal animosities characterize the Saudi-Omani relationship and, on more than one occasion, the Saudis have tried to occupy Oman's Buraimi

Oasis. The Omanis themselves probably will be granted additional weapons by the United States, too. The US is in the process of creating a version of mutual assured destruction in the Persian Gulf, a kind of Mideast balance of terror.

What about the threat to Israel? Proponents of the sale discount the possibility of a direct Saudi attack because of the more destructive Israeli retaliatory capability. The logic of this thesis is sound, but logic does not always govern behavior in a region of the world where dying by the sword is preferred to political compromise. In the event of another Arab-Israeli war, it is naive to believe that Saudia Arabia could resist pressure to use its weapons against Israel, or to transfer its planes to some other Arab state. Saudi Arabia took part in three past Arab-Israeli wars, but its involvement was limited to support roles and joint maneuvers with Syria and Jordan. The important difference is that then the kingdom simply did not have the modern weaponry it now has at its disposal. The mere existence of the superior F–15s, hardly a secret, would generate overpowering demands upon the kingdom from both within and without for use in an actual jihad against Israel. In the past, the Israelis never have felt a military need to attack Saudi territory. But, if they feared a new war with the Arabs was imminent, they would have a strong incentive to launch a preemptive strike to knock out the Saudi F–15 force.

In all fairness, responsibility for fueling the arms race in the Middle East must be spread among several Western countries and Russia. The Saudis apparently will get 300 West German Leopard tanks and 200 British Tornado jets. Reportedly they have made a secret $3.4-billion agreement with France to buy ships and helicopters, and are negotiating to finance production of Mirage 4000 jets. The lure of recycling oil debts, lowering unit costs of weapons, and engendering goodwill have proven irresistible to the Europeans.

The dangers of an arms race are somewhat mitigated by reported Saudi inability to absorb such vast quantities of sophisticated weapons. A similar problem arose in Iran, yet the surplus cash skimmed off the top of the defense contracts ensured that the contracts continued. Multinational corruption in Saudi Arabia probably has not risen to the levels reached in Iran, but the issue of Saudi absorptive capacity should be a fundamental consideration in determining the feasibility of appropriate military sales. Is the US prepared to sanction the Saudis' use of Pakistani mercenaries to fight on their behalf?

Even more troubling are the negative domestic repercussions of the massive arms sales, an issue relating to the larger problem of internal Saudi instability. The strains caused by accelerated industrialization, accompanied by liberalization of the kingdom's social or political institutions, well may provoke a violent reaction against the regime. Add the factors of corruption, a large foreign presence, Islamic revivalism, class disparities, and Shia-Sunni and other intra-clan tensions (particularly in the oil regions), and the future looks even more ominous. On top of this, the impact of a massive arms infusion could prove disastrous. Many sectors of Saudi society, from religious ascetics to those with rising expectations about the benefits of oil wealth, may end up increasingly dissatisfied with an uneven development program that goes too far and simultaneously not far enough. A conspicuous arsenal of Western arms may create, as in Iran, an irritating reminder of the regime's wasting of precious, dwindling resources. No one can predict that massive internal insurrection will occur in Saudi Arabia, but it would be a tragic irony if sometime in the future American troops were forced to protect American interests from the ravages of American arms.●

● Mr. PELL. Mr. President, I share the concerns expressed by my colleagues. The administration's plan to sell equipment to Saudi Arabia to enhance the attack capability of the Saudi F–15 force is ill conceived, ill planned, and I hope, ill fated.

It was not justified 3 years ago. And it is no better justified now.

I joined a number of my colleagues in opposing the sale of advanced, sophisticated F–15 aircraft to Saudi Arabia. Then, as now, I have felt that we should avoid, whenever possible, adding to the arms race in the steaming cauldron that is the Middle East.

The aircraft were sold following a favorable vote, 54 to 44, in the Senate. Congress was assured at that time that no further actions would be taken to increase the offensive capabilities of these aircraft. Congress received renewed assurances on this score as recently as last summer. There is no reason to change that policy.

Mr. President, this enhancement package—to consist, at least, of conformal fuel tanks and AIM9–L missiles for the F–15 fleet—is not necessary to meet Saudi Arabia's legitimate defensive needs

Enhancement of the aircraft will not help the Saudis face any internal threat. Factors beyond any enhanced capabilities of the Air Force would govern the outcome of internal strife.

Enhancement would not be a decisive factor in a conflict with the Soviet Union. If the Soviets were to move against Saudi Arabia, it would be irrelevant whether the Saudi F–15 force had been enhanced or not.

It is not at all clear that the regional threat to Saudi Arabia has increased since 1978, when Congress was assured by then Secretary of Defense Harold Brown—

> Saudi Arabia has not requested nor do we intend to sell any other systems or armaments that would increase the range or enhance the ground attack capability of the F–15.

Mr. President, the regional situation has changed in the last several years. But this sale would not be the right answer to these changed circumstances.

The answer is not to fuel the fires beneath the steaming cauldron that is the Middle East. If this sale were made without any compensation for Israel, there is no question that the threat to that beleaguered nation would increase. Even with compensating steps for Israel, the result would be a higher level of armament and increased prospects of instability.

Rather than pursue this role, the administration would be well advised to turn its attentions to promoting a true, lasting peace in the Middle East. An escalation in armaments to the region would be both shortsighted and counterproductive, and directly counter to the interests of both Israel and Saudi Arabia.

Mr. President, if the administration pursues this sale, I intend to join with others of my colleagues in introducing a resolution of disapproval and in giving this matter thorough scrutiny in the Committee on Foreign Relations.●

● Mr. WEICKER. Mr. President, I join my colleagues in urging careful consideration of the critical issues at stake in the decision to provide military equipment to Saudi Arabia. This sale would augment the 62 F–15 aircraft sold them in 1978 and possibly include the sophisticated AWACS system.

Unfortunately, Mr. President, this is the third time we have had to face this issue. In 1978, I opposed the original sale. The Carter administration narrowly secured approval of that sale by assuring us it would not provide further equipment to increase the offensive capabilities of the F–15's. In 1980, I joined with 67 of my colleagues in counseling the administration against violating that assurance. And should the Reagan administration persist in its intention to sell the Saudis equipment to increase the range or ground attack capability of their F–15 aircraft, I will support a resolution of disapproval on this floor.

Mr. President, in many ways the issues today are the same as those over which we fought nearly 3 years ago. Like its predecessors, this sale supposedly stems from the twin needs to stabilize the Middle East and keep petroleum flowing from Saudi Arabian fields. I would venture to say, Mr. President, that those two justifications, wobbly then, are buckling now under the weight of current exigencies in our Nation and world.

The tragic experience of this Nation's relationship with Iran should raise compelling questions as to the wisdom of proceeding on our present course. In the seventies it was Iran which, by virtue of sophisticated American arms, was to be the bulwark against Soviet expansion. We were assured then, as we are being assured now, that sophisticated military technology would be in trustworthy and stable hands. It is only because of the opposition of this body that AWACS aircraft are not now part of the potent arsenal at the disposal of the Ayatollah Khomeini and company. The Saudi monarchy faces the same threat which eventually dethroned the shah: a religiously inspired rebellion, against which militarv hardware is useless.

There should be no illusions, Mr. President, that such a move can be made without undermining the security of Israel. We would be foolish to assert that we can predict how arms we sell today will be used 5 or even 2 years from now. Israel is a tiny country. She does not have great land areas to retreat into when she fights. She does not have a large population to expend in a war of attrition. She must, therefore, respond instantaneously and overwhelmingly when attacked; all the more so if she faces 62 offensively configured F–15's with or without support of AWACS aircraft.

To borrow an appropriate Biblical image, Mr. President, for the United States to entrust its vital interests in the Middle East with the Saudis at the expense of Israel is akin to building a house on sand rather than upon a rock. When the forces of instability buffet that house it will certainly tumble with a

deafening crash. Israel, our historic, stable, democratic ally must be the foundation of U.S. policy and interests in the Middle East.

Unfortunately, Mr. President, we probably have too much oil on our glasses to see this clearly. To an even greater degree than in 1978, we are at the mercy of OPEC for our economic survived. The absence of a realistic energy policy, which encourages conservation to reduce our voracious energy appetite and increase domestic supplies, is perhaps the greatest obstacle to a genuine, long term foreign policy which serves our best national interests. We would be most foolish, Mr. President, if we allowed one mistake to beget another.

Mr. President, I urge the administration to rethink its premises and conclusions with respect to arms sales to Saudi Arabia. As a precedent-setting action with broad future consequences, this decision demands the highest standards of intellectual integrity and political accountability. I commend the Senator from Iowa for providing this opportunity to air our views on this matter before the die is cast.

● Mrs. HAWKINS. Mr. President, all of us hope that a comprehensive Middle East peace can be achieved. All of us understand that since such a peace is indispensable to international stability, it is critical to our own national interests. Such a peace must be founded on the security of Israel, since the security of Israel and America are inextricably bound. Israel is our only longtime, reliable ally in a troubled region. The welfare of Israel is crucial to our own welfare. Let me express just one concern over the present course of events in the Middle East.

I must express my grave concern about the sale of the airborne warning and control system (AWACS) E–3A aircraft to Saudi Arabia. My concern is based on the offensive threat that these aircraft pose to Israel. AWACS is the most advanced airborne surveillance and battlefield command system in the world. AWACS, because of its sophisticated radar, and on board computer systems, can detect anything moving faster than 80 miles per hour in the air, on the ground or at sea for a radius of 250 miles. This means that Saudi AWACS could detect even a speeding car anywhere in Israel while still flying within their own borders.

According to Department of Defense studies, an AWACS supported air force can stand off an attack force twice its size. AWACS is not just another airplane. AWACS would double the capacity of the F–15's we have sold the Saudis. Considering that the F–15 is the most sophisticated aircraft of its class in the world, questions about possible disruption of the balance of power in the Middle East should be raised. Preservation of this balance of power is one of America's critical interests. Saudi Arabian statements, policies and past action all indicate that the Saudis are not satisfied with the status quo in the Middle East. Saudi Arabia generously contributes to the PLO, and is committed to blocking the Camp David peace process.

I do not discount the acts of friendship that Saudi Arabia has exhibited toward the United States. But we must be cautious in aiding even a friend such as Saudi Arabia if that aid may be used against another friend such as Israel. If we must sell the AWACS to Saudi Arabia, the Saudis should be willing to recognize the legitimacy and sovereignty of Israel. The administration should obtain an acceptable quid pro quo for any military aid.

We share a common concern with Saudi Arabia over potential Soviet activity in the Middle East, our uneasiness over recent events in Iran, and about the Iran-Iraq war. But the recognition of these common interests should not take any form that would be one sided, or that would, on balance, pose a threat to Israel. Such a threat to the only true democracy in the Middle East would also be a threat to our own democracy.●

Mr. TSONGAS. Mr. President, I have tried to approach the issue of arms sales to Saudi Arabia with an open mind. Recalling the F–15 sale in 1978 and the assurances made by Secretary of Defense Brown, it is difficult to accept the sale of AIM–9L missiles, conformal fuel tanks, AWACS, aerial refueling tankers, or bomb racks as consistent with those assurances. There is no question that these defense items would increase the offensive capability of the Saudi F–15's and therefore pose an added threat to Israel. That is a very serious implication of this possible sale. The security of Israel stands as one of the highest foreign policy concerns of the United States.

But, the question does not stop there. The Saudis are a key component of American interests in the Persian Gulf. In a region seized by instability, conflict, terrorism, and extremism, the Saudis certainly stand out as one of the more moderate Arab States. The Saudis want this equipment package to upgrade their own capability. They, of course, claim that the equipment is not intended for anti-Israel contingencies. The Saudi Government fears a possible attack from a radical Arab State, such as Iran or even Iraq. Coming from our major supplier of oil and a moderate on OPEC oil pricing and production, this is a serious request, not easily rejected.

We may question whether Saudi fears of an attack are justified by Midwest realities. We may doubt the Saudi capacity to absorb and man the equipment. We may speculate that the Saudis are preparing for an external threat when the real danger is internal. Even if all these doubts are based in fact, the Saudis nonetheless believe they have a case. They feel threatened. They want the weaponry. They believe they will get it from us or somewhere else. The administration would have us supply some or all of this equipment to the Saudis because they are "friends" who need and deserve American support. With the Soviets firmly entrenched in Afghanistan and facing their own domestic oil shortage, there can be no downplaying the Soviet threat to the Persian Gulf.

How one looks at this issue is in a large way shaped by how one looks at the history of the Mideast. Is another Mideast war probable? Have the principals in the region changed their essential aims? Has the Camp David process removed the threat of war with the certainty of peace? To those questions, some would answer "Yes." I am not that optimistic. The possibility of another Mideast war is ever present. Israel s security cannot be guaranteed by diplomacy alone. Arming potential foes of Israel heightens anxieties in the region and accentuates risks.

Will the Saudi Air Force, never so strong as it is today, stay out of an Arab-Israeli war? Will the Saudi Air Force of tomorrow, urged on by Arab allies and equipped with the formidable, all-aspect attack AIM–9L air-to-air missile, long-range conformal fuel tanks, airborne lookdown radar planes, and new air refueling tankers, simply shelve all of this state-of-the-art capability and remain on the sidelines? Wars are fought according to calculations of capability. The Saudis will acquire a significant improvement in the offensive and defensive capability of their air force. I cannot simply brush aside these cold military realities as I evaluate this issue.

The administration has not yet notified Congress of its formal intention to sell some or all of this military equipment. Secretary of State Haig will be traveling to the Mideast shortly, and I will look forward to the results of his consultations. As a member of the Foreign Relations Committee, I have expressed my views on this issue on two previous occasions in letters to the Carter administration and more recently to President Reagan. But even now, it must be clear to the President and his Cabinet that our commitment to Israel cannot be compromised. At this time, I am deeply concerned that the President's decision on this arms sale reflects that commitment and achieves the reliability and balance we have been told to expect from this administration.

Mr. CRANSTON. Mr. President, I am firmly opposed to the decision of the Reagan administration, announced on March 6, to sell offensive arms to Saudi Arabia, including conformal fuel tanks and Sidewinder missiles, for its fleet of F–15 fighter aircraft and to "be responsive" to Saudi requests for AWACS surveillance planes.

Just as I opposed the original sale of the F–15's to Saudi Arabia, I am strongly opposed to this additional sale of equipment. It was stated by the Carter administration when the sale was originally made that such equipment would not be added. I am particularly concerned about the proposal to sell AWAC's which, in Saudi hands, could seriously compromise the safety of Israel.

I believe this sale would increse Israel's insecurity and would fuel another round of the destabilizing arms race in the Middle East—an arms race which benefits neither Israel nor the Arabs, an arms race that diverts essential resources from the crying social needs in that part of the world.

There is no concrete evidence that in exchange for receiving this equipment the Saudis will support efforts to build a lasting peace in the Middle East through the Camp David process or any other

process designed to deal with the root causes of conflict in the Middle East.

I am cosponsoring the resolution of disapproval on this sale and am working very closely with Senator BIDEN of Delaware, author of this draft resolution. We will be working with our colleagues on the Foreign Relations Committee and with other interested Senators, both Republicans and Democrats, over the next several weeks to seek the support of a majority of Senators for this resolution.

● Mr. QUAYLE. Mr. President, I understand that the administration is nearing a decision regarding the proposed sale of offensive equipment for the F–15 and possibly the sale of the AWACS to Saudi Arabia. There is no question that the United States has vital interests in assuring the security and peace of both Saudi Arabia and Israel. The entire region is of strategic importance to the United States.

However, there are concerns which must be weighed by the Congress should such a proposal be submitted by the administration. I have reservations as to whether a case for the sale of such weaponry can be convincingly made.

Are there indeed strong national security reasons for the U.S. Government to reverse previous commitments against the sale of such offensive equipment to the Saudi Government?

Will the sale of this military equipment to the Saudis spark a military arms race thus destroying the military balance in the area?

Would we be further endangering the peace and security of Israel by providing weapons that would increase the range of the F–15 dramatically and enhance the firepower of these Saudi aircraft?

These are questions which should be answered in the coming weeks.

At the same time, it is essential to ask what is the quid pro quo involved in making such a deal with Saudi Arabia?

In addition to providing us with a major portion of our imported oil resources, will the Government of Saudi Arabia reverse its opposition to the Camp David accords? Will it be willing to work toward meaningful peace in the Middle East in exchange for this sale? Will it actively discourage PLO terrorism by ceasing its financial support which is reportedly approximately $173 million per year?

There are reports that the administration plans to offset the sale of offensive equipment to Saudi Arabia by offering additional military credits to Israel in the next 2 fiscal years at a 12- to 13-percent interest rate. Israel already is engulfed by a 133-percent inflation rate. We would be further aggravating the situation by forcing Israel to increase its already record defense expenditures.

Mr. President, these are some of the concerns and questions which should be raised and answered as we approach the decisionmaking process which affects two nations—both of whom are our friends and vital to our own security. Our decisions and actions must be taken in the interest of assuring peace and stability in the region and indeed, the world.●

● Mr. DANFORTH. Mr. President, I rise to express my strong opposition to the anticipated sale of AIM–9L air-to-air missiles and fuel and sensor tactical (FAST) packs to Saudi Arabia. This equipment would clearly establish an offensive capability for the 62 F–15's purchased by Saudi Arabia in 1978 by dramatically increasing the firepower and the range of these aircraft. I do not believe this action would be in the interests of the United States, Israel, or, for that matter, Saudi Arabia.

My views on this issue have not changed since July 1, 1980, when I stated:

When I voted to approve the initial sale of these F–15's in 1978, I stated that my decision was the most difficult one I had made as a Senator. At the time, it was my view that the arms sale then proposed served the interests of moderation in the Middle East, and that if the sale were not made by the United States, similar equipment would be forwarded by other countries with fewer restrictions on its use. What persuaded me to support the 1978 sale was that the United States could maintain some reasonable controls on how the F–15's would be used, and that the F–15's utility would be purely defensive.

In 1978, many Administration officials, including the President and the Secretary of Defense, gave repeated assurances that the offensive supplements such as those now requested would not be sold to Saudi Arabia. In addition, in April 1978, the Saudi Ambassador, along with a member of the Saudi royal family, sat in my office and assured me that their country desired these fighters only for defensive purposes and was not interested in these specific additional offensive items for the F–15.

I continue to maintain that the sale of this equipment runs directly counter to commitments made by our Government to the people of Israel.

Moreover, I find it hard to imagine this sale going through without the United States once again, in the near future, being faced with Saudi requests for additional offensive equipment—specifically multiple ejection bomb racks, KC–135 jet tankers, and AWACS aircraft.

And what, Mr. President, has changed since the thought of such sales last year?

I have yet to see any evidence of real oil price moderation on the part of the Saudis. Since 1978 when the original F–15 sales took place, oil prices have increased over 133 percent. They have gone up from $2 to $32 a barrel in the past 8 years, with no end to that trend in sight. Does the United States have to buy its friends? Forever appease its friends? And if so, how many times? For how long?

The sale certainly will not strengthen the Arab-Israeli peace process: Saudi Arabia has been, and continues to be, a leading opponent of the Camp David accords. To my mind, the recent call for a "holy war" against Israel certainly does not constitute a positive effort.

Finally, I question whether the sale of F–15 attachments would really be in the best interests of the Saudis. Not only might it increase the instability in the Middle East, but it would still not enable Saudi Arabia to defeat a Soviet offensive.

The proposed sale has nothing to recommend it. I certainly cannot.●

Mr. SARBANES. Mr. President, I rise to reiterate my opposition to the proposal to sell significant arms equipment to Saudi Arabia as an add-on to the 1978 sale of the F–15 aircraft. In my view the proposed sale runs counter to the dictates of the national interest and of commonsense. To proceed with the sale would only compound the error made in agreeing 3 years ago to the sale of the F–15 planes themselves, and will take us farther down a path we were ill advised to embark upon in the first place.

There are several compelling reasons for rejecting the sale. First, the 1978 sale was approved against the background of specific assurances that the equipment now being proposed for sale would neither be offered nor asked for. In a letter dated May 9, 1978, to Chairman Sparkman of the Foreign Relations Committee, Secretary of Defense Brown stated:

Saudi Arabia has not requested nor do we intend to sell any other systems of armaments that would increase the range or enhance the ground attack capability of the F–15.

Assistant Secretary of State Bennet, in a letter of February 16, 1978, to Congressman LEE HAMILTON of the House Foreign Affairs Committee, offered the following unequivocal assurance with regard to the AWACS:

An F–15 sale will not lead to the sale of E2C or E3A (AWACS). The F–15 has an excellent radar.

Furthermore, 66 Members of the U.S. Senate in a letter dated June 27, 1980, to President Carter, underscored the importance of those assurances and asked the President to reject any requests from the Saudis for the equipment in question.

Second, it was argued in support of the 1978 sale of the F–15 that the sale, which the Saudis were said to regard as a litmus test of the U.S. friendship, would have important positive effects on other aspects of U.S. relations with Saudi Arabia, that is, our concern for change in the Saudi attitude toward the Israeli-Egyptian peace treaty and negotiations and our concern for oil supplies at reasonable prices.

There is absolutely no evidence to suggest that the Saudis look more favorably on the peace treaty today than they did 3 years ago. Participation in the peace process would require of the Saudis the recognition of Israel as a sovereign state entitled to live in peace and security within defensible borders. Such recognition has most emphatically not been forthcoming. Instead the Saudis continue to talk about waging a jihad, or holy war, against Israel. Since 1978 a second resolution in oil prices has occurred in the Middle East, a revolution deliberately and cynically engineered. In 1978 the price of a barrel of Saudi oil was $12.70. Today it is $32, or nearly triple the 1978 price. This hardly reflects the kind of cooperation that it was suggested would be forthcoming if the Saudis were to receive the F–15 aircraft they had requested.

Mr. President, the 1978 sale of the F–15 aircraft to Saudi Arabia was a step in

the wrong direction. It has had none of the beneficial results that its proponents claimed it would have, and it has introduced a new element of disequilibrium in the Middle East—in no way, therefore, serving our Nation's interests there. The sale now being proposed would take us a giant step farther along a path that was ill advised in the first place. It is contrary to our national interest and to commonsense, and the Congress should not acquiesce in it.

Mr. CHAFEE. Mr. President, in my judgment, today's colloquy regarding the administration's proposal to provide supplemental equipment to Saudi Arabia for use on the F–15 aircraft we sold them 3 years ago serves a useful purpose. It gives us a chance to express our concerns and questions regarding the administration's policy in this regard.

I voted for the sale in 1978, and, as many of you may recall, it was not an easy decision. At the time the sale was approved, we agreed on a package with certain conditions and assurances that were as much a part of the deal as the number and type of aircraft. Since that time, as the administration and my colleagues, Senators TOWER and GOLDWATER, have so ably pointed out, the circumstances in the Middle East have changed.

Today's colloquy, then, provides us with an opportunity to put on the record some of our thoughts about considerations which must be taken into account as the administration proceeds with this matter. There are so many unknowns regarding the proposed sale that it is difficult to comment with any specificity.

The administration has yet to submit a formal request to the Congress regarding the sale to the Saudis of F–15 equipment or early warning aircraft. In fact, the official word from the State Department at this point is that the matter is under review.

However, if we assume that some sort of proposal will be forthcoming, then there are these questions:

Do we know whether a quid pro quo will be sought?

Do we know if something for Israel will be suggested?;

Do we know if AWACS, on any type of early warning aircraft, will be requested? and

Do we know exactly what items of supplemental equipment will be proposed?

To say yes for the sale or no against it, without knowing precisely what will be proposed, seems to me to be premature, unless we simply wish to redebate the issue of the original sale in 1978.

Any consideration of the problems presented by the request must be viewed against the background that it is official U.S. policy that the Persian Gulf is an area of vital concern to our Nation; an area in which we cannot tolerate Soviet domination. I agree with this policy. One has only to observe what the Soviets have done in Ethiopia and South Yemen, not to mention Afghanistan, to appreciate the continued thrust the Soviets are making.

Should the administration come forward with a proposed arms sale to the Saudis, what will influence my thinking?

A major factor will be how this sale affects our ability to carry forward our policies in the Persian Gulf area. Another major factor will be what affect such a sale would have on Israel's security. If those two factors are in conflict, are there alternatives available that can produce the desired results without the downside effects?

Without details of the proposal, we are unable to ask a host of questions that deserve answers. For example, what, if anything, will the United States receive in return? Do the Saudis have an alternative source of weapons and equipment? Is this truly a litmus test of our relationship with the Saudis? If early warning aircraft are requested, are they really necessary; and if so, what is the matter with E–2C's, as opposed to AWACS. Is such a sale a major risk to Israel or a lesser one? What might be done to assist Israel to reduce the risk factor? How does the sale affect the military balance in the region?

Mr. President, these are questions I would want to have answered before voting to approve, or disapprove, the sale of supplemental F–15 equipment or early warning aircraft to Saudi Arabia.

Mr. FORD. Mr. President, as Sectary of State Haig prepares to embark upon his journey to the Middle East, I would like to issue some words of caution against the planned sale of fuel pods and advanced missiles designed to boost the operational capability of the 60 F–15 jets that Saudi Arabia has already ordered from the United States. The administration should think twice before sending the proposal to the Congress.

By increasing the range and firepower of the F–15, this equipment doubles the plane's combat radius out to 1,000 miles—thus giving it the ability to attack Israel from any Saudi air base, and gives the Saudi forces enhanced air-to-ground interdiction ability. By any measure this is a threat to Israel's air superiority in the region.

If the sale were to go through, what choice would Israel have but to ask the United States for increased arms aid in order to retain its security? A country that already spends 40 percent of its budget on defense cannot withstand an arms race. To offer Israel special credits with which to purchase similar systems or extra planes is not a solution. With an inflation rate of 155 percent and an external debt of $18 billion, Israel can ill afford to counterbalance the Saudi sale.

Not only would this proposed sale engender an arms race, it would destabilize the Middle East. The administration says the sale would serve to calm fears; I argue that the sale would only add to them. Let us look at the threat to Saudi Arabia. That country's most conceivable outside danger is from a Soviet-backed invasion by South Yemen. Much more worrisome is the question of internal stability; Saudi Arabia's real threat is that of revolution and upheaval. But neither case provides a justification for a long-range, heavily armed jet fighter. Against whom else but Israel would the Saudis have occasion to deploy this advanced weapon?

This fact will only make the concept of a preemptive strike more central to Israel's defense planning and will insure the destruction of the Saudi F–15 force on the ground at the first sign of threat to Israel. Heretofore the Saudis have been reluctant to commit themselves to any war against Israel. Such an attack upon Saudi planes would add another dimension to any Arab-Israeli war in the Middle East.

As a final point, I think the United States may be beginning to make the same mistake it made by overloading Iran with sophisticated weapons systems, only to see them fall into the hands of a fanatical government. If either of the threats to the royal family and their kingdom were to manifest themselves, the Saudi arsenal could easily fall under control of revolutionaries or already radicalized states such as Iraq or even the Soviet Union.

In closing, Mr. President, let me say that I sincerely hope the White House will listen to the colloquy that is being conducted here on the Senate floor today. The implications of this proposed arms sale to Saudi Arabia are far reaching and any pluses it might bring are far outweighted by its minuses.

The PRESIDING OFFICER (Mr. WARNER). The time of the Senator from Iowa has expired.

RECOGNITION OF SENATOR BUMPERS

The PRESIDING OFFICER. Under the previous order, the Chair recognizes the distinguished Senator from Arkansas.

S. 859—AMENDMENT OF MINERAL LEASING LAWS

Mr. BUMPERS. Mr. President, on January 23, 1981, the Bureau of Land Management announced a recordbreaking oil and gas lease sale totaling $43,021,599 on 24,876 acres within the Fort Chaffee Military Reservation in Arkansas.

Since the lands involved in this lease sale were originally acquired by the Federal Government for use as a military reservation and were not covered by one of the many statutes governing disposition of proceeds from oil and gas leases or other leases on acquired lands, the State of Arkansas, the school districts and local governments will not share in the bonuses paid by the oil companies for the leases or the royalties which will be received by the Government if production is obtained on the leases.

If this sale had been conducted on public domain lands, or other types of acquired lands, such as Forest Service lands, national grasslands, or almost any other type of Federal land, the State, local governments, and school districts in which the Federal lands were located would have shared in the proceeds of the sale.

Mr. President, there is no logical reason for the proceeds from lease sales on

military reservations on acquired lands to be treated differently from sales on public domain lands, almost every other type of acquired lands.

The lack of authority to distribute part of the revenues of this sale to the State is a result of an omission when the mineral leasing law was changed in 1976 to allow leasing for oil and gas exploration on military reservations on acquired land.

The first competitive lease sale under the amended statute was the sale that occurred at Fort Chaffee in January. However, no provision was made in 1976 for sharing the proceeds from mineral leasing with the States in which the leasing activity took place.

The lands at Fort Chaffee are classified as "acquired" lands—that is, lands which are acquired by the United States through purchase or other transfer from a State or private individual, dedicated to a particular use. In contrast to such acquired lands are "public domain" lands, which are owned by the United States by virtue of its sovereignty. The distinction between these types of Federal real estate is different in that, as a matter of historical perspective, it was the basis for the evolution of the present statutory scheme through which the Congress has delegated responsibility to the Secretary of the Interior for the leasing of Federal lands for mineral development.

The authority of the Secretary to administer the grants of mineral rights on public domain lands has been recognized by Congress since the middle of the last century, although it was not until 1920 that Congress authorized the present system of leasing such lands for oil and gas exploration and production by the Secretary. (Mineral Leasing Act of 1920, currently codified as amended at 30 U.S.C. 181 et seq.).

During the 1920's questions were raised about the applicability of the Mineral Leasing Act of 1920 to acquired lands. The Department of the Interior had granted several leases on certain Indian reservation lands and the U.S. Attorney General was asked to rule on the validity of those leases.

The Attorney General concluded that there was no congressional authority to lease mineral rights on the Indian lands in question. This opinion was reaffirmed in 1941 when the Attorney General ruled that the Mineral Leasing Act of 1920 "had peculiar application to the public domain."

However, there were other congressional grants of authority to lease mineral rights on certain lands acquired by the United States. In 1917 the Secretary of Agriculture was given authority to grant certain mineral leases on lands acquired under the Weeks Act (16 U.S.C. 520) and during the years prior to 1947, several additional statutes were enacted which allowed mineral leasing on certain other acquired lands. After authority had been granted to lease acquired lands on an ad hoc basis for some time, the Mineral Leasing Act for Acquired Lands was passed in 1947. (30 U.S.C. 351 et seq.).

Section 352 of title 30 of United States Code denotes which acquired lands are subject to lease. As originally passed, it provided:

All deposits of . . . oil and gas . . . which are owned or may hereafter be acquired by the United States and which are within the lands acquired by the United States (*exclusive of such deposits in such acquired lands as are* (a) situated within incorporated cities, towns and villages, national parks and monuments, (b) *set apart for military or naval purposes*, or (c) tidelands or submerged lands may be leased by the Secretary of the Interior under the same conditions as contained in the leasing provisions of the mineral leasing laws, subject to the provisions hereof. . . . No mineral deposit covered by this section shall be leased except with consent of the lead of the executive department . . . having jurisdiction over the lands containing such deposit. 30 U.S.C. Sec. 352 (1970) (emphasis supplied):

The exclusion of military reservations from mineral leasing was continued until 1976—my second year here—when section 352 was amended to delete that exemption. (Federal Coal Leasing Amendments Act of 1975, codified at 30 U.S.C. 352).

The Federal Coal Mineral Leasing Amendments Act of 1975 (30 U.S.C. 351 et seq.) permits the leasing of oil and gas on military reservations on acquired lands by the Secretary of the Interior with the consent of the Secretary of Defense.

Mr. President, pursuant to this statute, the Department of Defense consented to the leasing of oil and gas interests underlying 24,876 acres of acquired lands at Fort Chaffee, Ark. The Secretary of the Interior conducted the lease sale on January 23, and various oil and gas companies paid $43,021,599 for the rights to explore for oil and gas on these tracts of land. These bonus payments and the revenue from these leases are collected by the Secretary of the Interior and deposited into the Department of the Army's account.

According to 30 U.S.C. 355, all receipts from sales issued under the Mineral Leasing Act for Acquired Lands are paid into the Treasury and distributed—

in the same manner as prescribed for other receipts from the lands affected by the lease, the intention of this provision being that this chapter shall not affect the distribution of receipts pursuant to legislation applicable to such lands . . . (emphasis supplied).

The phrase "in the same manner as prescribed for other receipts from the lands affected by the lease" means that all moneys received from rents royalties and bonuses from mineral leases on acquired lands are shared with State or local governments in the same fashion as other revenues realized from similar types of lands. For example, revenue received from mineral leases on acquired national forest lands are shared in the same fashion as are other revenues derived from national forest lands.

In the Fort Chaffee lease sale, the revenue received from the lease will be distributed like proceeds from other lands that are owned and managed like Fort Chaffee. The Military Leasing Act (10 U.S.C. 2667) prescribes procedures for disposing of receipts from leasing on military reservations and this would appear to include mineral leasing. Under this act the bonuses and rentals will be deposited into the U.S. Treasury and no portion of the proceeds will be paid to the State of Arkansas or the local governments or school districts.

Mr. President, when the law was changed in 1976 to allow mineral leasing on military reservations, a change should have also been made in the Mineral Leasing Act to permit a sharing of these proceeds with the States and local governments where the leasing occurs.

The tax immunity of these military reservations places an unfair burden on the taxpayers within the counties and local governments where the lands are located. Over the years, Congress has established programs to partially compensate States and local governments for the impact of Federal ownership, but in most cases the revenues that they receive do not approach what would be received from property taxes if these lands were in private ownership. Most of the present payments bear no relationship to the direct and indirect burdens imposed on local governments by the presence and use of these Federal lands.

Counties in which military reservations are situated will face an increasing financial burden if the law is not changed. Counties in which active military reservations are located are not entitled to count that acreage for receiving payments under Payments in Lieu or Taxes Act, and they would not be entitled to any payments from mineral leasing on the military reservations.

The lease sale at Fort Chaffee is only the first sale conducted on a military reservation since the law was changed in 1976 to allow mineral leasing on military reservations. There will be many other lease sales in the future and more oil and gas development that will increase the demand for governmental services.

The arguments that were made in 1976 when the States' share from mineral leasing on public domain lands was increased from 37½ percent to 50 percent can be made just as forcefully today in support of the bill I am introducing today.

Governor Ed Herschler of Wyoming said:

This rapid influx of workers and associated service employees has put a substantial strain upon our small communities, some of which have seen their populations double over the past few years. They are rapidly approaching the limits of their bonded indebtedness.

It is inevitable that such activity will have some adverse effects upon our people, our environment, and our way of life. Nevertheless, Wyoming is willing to do her part in meeting the national energy crisis. I strongly believe that the federal government has a mutual obligation to provide this financial assistance to an area struggling with the effects of federal energy policies.

Mr. President, when Governor Herschler made that statement, he was supporting a change in the law which allowed States to receive 50 percent of the proceeds from mineral leasing on public

domain lands within their borders an increase from 37½ percent. There is absolutely no reason why States with acquired lands for military reservations should be treated differently. If the lease sale at Fort Chaffee had been conducted on Forest Service lands, the State of Arkansas would have received 25 percent of the proceeds. (16 U.S.C. 500.)

The county with Forest Service lands would also be entitled to payments in lieu of taxes (PILT) payments, but the county with an active military reservation is not entitled to any PILT payments. There is no reason for the county with mineral leasing on military reservations to not only be denied payments under the Payments in Lieu of Taxes but also a share of the proceeds from mineral leasing on the military base.

Mr. President, I am not advocating a change in the Payments in Lieu of Taxes Act to include active military reservations, but only to point out the additional hardship this places on those counties when they are denied their share of the revenues from the mineral leasing.

Mr. President, I am asking that we amend the law to correct a simple omission that occurred in 1976 when we changed the law.

Another example will demonstrate the anomaly that exists in our current law. When the Corps of Engineers leases acquired lands for civil works, such as flood control, or hydroelectric projects, the State receives 75 percent of the money received by the Corps. (33 U.S.C. 701 c–3.)

The Federal Government has recognized its responsibility to the States and local governments, and I am convinced that the law would have been changed in 1976 if this issue had been raised at that time. However, the lease sale at Fort Chaffee is only the first of many that will be conducted on military reservations, and other local governments will be demanding their fair share of the revenues from mineral leasing.

An expanded mineral leasing policy by the Federal Government on Federal lands will create new demands from local governments. The Federal responsibility was clearly outlined by President Reagan recently when he was meeting with the National Association of County Officials when he said:

> Responsibility of ownership requires landholders to pay their fair share of the cost of local government, and the Federal Government shouldn't be exempt.

It is essential for the Federal Government to bear its fair share of the costs of the increased demands that will be made on local governments as a result of expanded oil and gas exploration on military reservations. Local governments will be called on for more law enfrocement; improved road maintenance, and other services directly and indirectly related to the activity on these lands.

New Federal requirements, such as those required by EPA for sewage treatment as populations will increase, will add considerable costs on counties with relatively small populations and small tax bases. Local governments with small tax bases to work with are hard pressed to find new sources of revenues to fund services. These local governments should not be denied a share of the proceeds from the mineral leasing on military reservations at a time when revenue sharing and other types of Federal assistance are being cut back.

Mr. President, in the case of Fort Chaffee I can personally vouch for the hardship that is created because I live in one of the communities hardest hit when the lands were acquired for that reservation in 1940. I live exactly 2 miles from the border of Fort Chaffee. My father was a small town merchant and a member of the local school board when the lands were acquired. Some of our finest citizens and some of our best farming land in and around our little community were within the thousands of acres acquired for the fort.

We lost hundreds of citizens who had to leave because they could not acquire comparable lands. But the really terrible impact, and one from which my little community and others similarly situated around Fort Chaffee never recovered, was the loss of 40 percent of our tax base.

The bill that Senator PRYOR and I are introducing today will allow States to receive 50 percent of all rents, bonuses and royalties received from mineral leasing on military reservations. The remaining portion will be divided as follows: 40 percent into the reclamation fund and 10 percent to the general fund of the Treasury. This is the same distribution formula provided for mineral leasing on public domain lands (30 U.S.C. 191.).

There is no reason for the difference in the distribution of the proceeds from mineral leasing on military reservations on public domain lands and military reservations on acquired lands. The Mineral Leasing Act for acquired lands should have been amended to allow States to share in the proceeds in 1976 when the mineral leasing was permitted on military reservations. I urge the Senate Committee on Energy and Natural Resources to act quickly in correcting this inequitable situation.

Mr. President, I ask unanimous consent that the text of the bill be reprinted in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 859

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 of the Act of August 7, 1947 (61 Stat. 915; 30 U.S.C. 355) is amended by adding the following at the end thereof: "Notwithstanding the preceding provisions of this section, all receipts derived from leases on lands acquired for military or naval purposes, except the Naval Petroleum Reserves and National Oil Shale Reserves, shall be paid into the Treasury of the United States and disposed of in the same manner as provided under section 35 of the Act of February 25, 1920 (41 Stat. 450; 30 U.S.C. 191), in the case of receipts from sales, bonuses, royalties, and rentals of the public lands under that Act.".

SEC. 2. The amendment made by this first section of this Act shall take effect with respect to leases entered into after January 1, 1981.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of the pending business, Senate Concurrent Resolution 9, which the clerk will report.

The assistant legislative clerk read as follows:

> A concurrent resolution (S. Con. Res. 9) revising the congressional budget for the United States Government for the fiscal years 1981, 1982, and 1983.

The Senate resumed consideration of the concurrent resolution.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORT ON THE PRESIDENT'S CONDITION

Mr. BAKER. Mr. President, this morning I had a conversation with the Vice President of the United States. He gave me a very glowing report on the President's recovery, and I would like to pass that cheerful note of news on to Members of the Senate.

The President continues to make good progress. He is in excellent condition and his recovery continues to be rapid and successful. He had a good night last night. He slept for most of the night, from about 9 o'clock until about 6 o'clock this morning.

He is sitting up, reading the newspapers. He ate a breakfast this morning of solid food and walked about the room and the adjoining areas of the hospital.

This morning he met with his staff and was presented with the daily Presidential security briefing. He engaged in extensive conversations with his staff members on certain questions raised during that briefing. He signed official documents.

The President is performing his role as President of the United States and continues to be a most remarkable human being. I thought the Senate would like to have that information before it.

Mr. ROBERT C. BYRD. Mr. President, I am sure that my colleagues on this side of the aisle welcome the reports that are given to the Senate by the distinguished majority leader. We are all very thankful to note the progress that the President is making, and we wish for him the very earliest and complete recovery.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar

beginning with the Department of Housing and Urban Development and on through the nominations under the Department of Justice.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I would ask that the distinguished acting majority leader withhold for a moment, for a moment only, on the consideration of the nomination of Mr. Arthur E. Teele, Jr., until Senator PROXMIRE comes to the floor.

Mr. STEVENS. Mr. President, that was my intention, after we were in executive session. I do ask unanimous consent that we postpone temporarily the consideration of the nomination under the Department of Transportation of Arthur E. Teele, Jr., of Florida, to be the Administrator of Urban Mass Transportation.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT AND DEPARTMENT OF JUSTICE

Mr. STEVENS. Mr. President, I ask unanimous consent that Executive Calendar Nos. 81, 83, 84, 85, and 86 be considered en bloc and approved en bloc.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I believe the distinguished assistant leader may have meant to exclude for the moment Executive Calendar No. 83.

Mr. STEVENS. I do, Mr. President. It was my intent and I ask unanimous consent that Executive Calendar Orders Nos. 81, 82, 84, 85, and 86 be considered en bloc and approved en bloc.

Mr. ROBERT C. BYRD. Mr. President, there is no objection on this side.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

(Nominations confirmed en bloc are as follows:)

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Philip D. Winn, of Colorado, to be Assistant Secretary of Housing and Urban Development.

Emanuel S. Savas, of New Jersey, to be Assistant Secretary of Housing and Urban Development.

DEPARTMENT OF JUSTICE

Carol E. Dinkins, of Texas, to be Assistant Attorney General.

D. Lowell Jensen, of California, to be Assistant Attorney General.

Theodore B. Olson, of California, to be Assistant Attorney General.

STATEMENT ON THE CONFIRMATION OF CAROL E. DINKINS, OF TEXAS, TO BE AN ASSISTANT ATTORNEY GENERAL

Mr. THURMOND. Mr. President, as chairman of the Committee on the Judiciary, it gives me great pleasure to recommend to the Senate, President Reagan's choice of Assistant Attorney General for the Land and Natural Resources Division of the Department of Justice, Carol E. Dinkins.

In my judgment, Mrs. Dinkins is highly qualified for this important position. She graduated from the University of Texas in 1968. Mrs. Dinkins then attended the University of Houston where she received her law degree and immediately upon graduation, in 1971, became an assistant professor at the same institution, serving there until 1973.

In late 1973, Mrs. Dinkins became the first woman attorney in the firm of Vinson and Elkins of Houston, Tex. Her fellow partners and associates hold her in high regard as being an extremely competent and learned practitioner of the law.

During Mrs. Dinkins' testimony before the Judiciary Committee, she showed determination and courage in the prospect of dealing with the many complicated problems involved in the areas of land and natural resources.

President Reagan has made a wise choice in nominating Mrs. Dinkins to be Assistant Attorney General for the Land and Natural Resources Division of the Department of Justice. I urge my colleagues to vote for her confirmation.

STATEMENT ON THE CONFIRMATION OF D. LOWELL JENSEN, OF CALIFORNIA, TO BE AN ASSISTANT ATTORNEY GENERAL

Mr. THURMOND. Mr. President, I rise to state my enthusiastic support for President Reagan's nominee to head the Criminal Division of the Department of Justice, Mr. D. Lowell Jensen.

There is no question that Mr. Jensen is highly qualified for this position; he has been a distinguished government prosecutor his entire legal career.

Mr. Jensen attended the University of California Law School, and upon graduation in 1952, served 2 years in the U.S. Army. After leaving the Army Mr. Jensen immediately became the deputy district attorney in Alameda County, Calif., and through perseverance and hard work, he obtained the position of district attorney.

Among his many noteworthy cases, Mr. Jensen was the chief prosecutor in the Patricia Hearst kidnaping trial, involving several Symbionese Liberation Army members.

Mr. Jensen handled this case, as he does all others, in a low-keyed, self-assured and pragmatic manner. He has maintained this style over his 25 years as a government prosecutor in the State of California.

During his appearance before the Judiciary Committee, which unanimously voted to support his confirmation, Mr. Jensen showed himself to be a reflective, decisive individual, who expresses himself in a scholarly manner.

Mr. Jensen is well equipped to handle the challenging tasks which face him.

I strongly urge the Senate to confirm the President's nomination of D. Lowell Jensen as Assistant Attorney General for the Criminal Division of the Department of Justice.

STATEMENT ON THE CONFIRMATION OF THEODORE B. OLSON, OF CALIFORNIA, TO BE AN ASSISTANT ATTORNEY GENERAL

Mr. THURMOND. Mr. President, I rise to state my support for Mr. Theodore B. Olson for the position of Assistant Attorney General for the Office of Legal Counsel of the Department of Justice.

Mr. Olson graduated cum laude, from the University of Pacific in 1962. He then continued his education at the University of California School of Law and upon graduation in 1965 joined the law firm of Gibson, Dunn & Crutcher of Los Angeles, Calif.

In 1972 he became a partner in that firm and has remained in that position to the present time.

Mr. Olson is an intelligent and dedicated individual. During his testimony before the Judiciary Committee he reflected confidence and enthusiasm in the presentation of his views.

All members of the Judiciary Committee voted favorably on this nomination and I urge my colleagues in the Senate to vote for the confirmation of Theodore Olson for the position of Assistant Attorney General for the Office of Legal Counsel of the Department of Justice.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum while we are awaiting the arrival of a Senator who may wish to speak on the nomination which still remains.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF TRANSPORTATION

Mr. STEVENS. Mr. President, I ask that we now proceed with the nomination of Arthur E. Teele, Jr., of Florida, to be Urban Mass Transportation Administrator.

The assistant legislative clerk read the nomination of Arthur E. Teele, Jr., of Florida, to be Urban Mass Transportation Administrator.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, Mr. Teele came before the Banking Committee for approval of his nomination and recommendation to the floor. Mr. Teele has an interesting background. Unfortunately, it has nothing to do at all with the job to which he has been assigned.

Mr. Teele is a young man, 34 years old. He served with great distinction in Vietnam. He was a genuine, bottled in bond war hero. He won the Bronze Star for valor, the Bronze Star for service, the Purple Heart, and the Air Medal with two clusters. He obviously was an extraordinarily courageous soldier.

Also, he took great advantage of his time in the Army. He served 9 years in the Army. While he was in the Army, he earned a law degree at Florida State University.

When he got out of the Army, he went to work as a lawyer. He served very briefly, for a few months, in the Department of Labor as an expert consultant.

In November of last year, he became a transition team leader for the Reagan administration, with particular responsibility for the U.S. Department of Transportation.

Here is a young man with no background at all in transportation until last

November, with no training, no experience, no record; a young man who is obviously very bright. He impressed the committee with his intelligence, with his knowledge. He understands the issues facing the agency very well. But he has no experience. He has no record.

There is no way that a person with this limited knowledge could be appointed to a position of responsibility for a $4.5 billion operation, and that is what we are appropriating each year to the mass transit agency, with so little experience.

I recognize that he is going to be confirmed. Of course, the administration has the right to appoint anybody they wish to this kind of a job. We have the responsibility for passing on the nomination. He is intelligent, and he obviously has demonstrated great courage and ability in the military.

Here is a man well qualified, I think, to be a U.S. Senator or a Congressman. He probably could have won an election in most States with that kind of background. But he is not qualified for this particular job.

I do not know what we should do to persuade administrations, and this administration is no different than any other—the Carter administration, the Ford administration, the Johnson administration—not to appoint people to office based on their personality, their intelligence, and their political connections, and without any knowledge as to whether they have experience. No wonder these agencies are badly operated.

I fervently hope this man will be able to a good job. The Urban Mass Transportation Administration has a tough row to hoe over the next few years. We are going to phase out many of these programs in the next few years. It is a period when considerable competence must be in management to handle that agency.

I would hope that the administration would appoint someone with some knowledge and background of the industry. It has not done so. That is unfortunate. The Senate will act on this nomination approvingly. I hope in the future the administration will be more careful in trying to select nominees who have more experience.

Mr. President, I yield the floor.

● Mr. GARN. Mr. President, the Committee on Banking, Housing, and Urban Affairs yesterday favorably reported to the Senate the nomination of Arthur E. Teele, Jr. of Florida to be the Administrator of the Urban Mass Transportation Administration. I rise in support of Mr. Teele's nomination and recommend his confirmation.

Mr. Teele, a practicing lawyer in Tallahassee, Fla., headed the Department of Transportation transition team for President-elect Reagan; was the chief author and staff director for a State of Florida constitutional tax revision initiative; principal advisor to the Florida Department of Administration; served as a member of the Mayor's Advisory Council in Tallahassee; and acted as a consultant to the U.S. Department of Labor on labor-management issues. Mr. Teele's experience also includes distinguished service in the U.S. Army, as a company commander of a combat unit, as senior aide-de-camp and special private counsel, and he is the recipient of numerous awards and decorations.

The incoming Administrator of the Urban Mass Transportation program faces both significant challenges, and opportunities to improve the program and it is our committee's judgment that Art Teele is well equipped to meet these challenges and to be a forceful advocate for the Reagan administration with respect to Federal public transportation policy.●

The PRESIDING OFFICER. Who seeks recognition?

Mr. STEVENS. Mr. President, I ask unanimous consent that the nomination be approved.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. STEVENS. Mr. President, I ask that the President immediately be notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The Senate continued with the consideration of the resolution.

AMENDMENT NO. 29

(Purpose: To restore funds for immunization programs)

Mr. BUMPERS. Mr. President, I call up my amendment No. 29, which is printed and at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS), for himself, Mr. RANDOLPH, Mr. BAUCUS, Mr. CRANSTON, Mr. GLENN, Mr. LEVIN, Mr. MATSUNAGA, Mr. HART, Mr. CANNON, Mr. METZENBAUM, and Mr. JACKSON proposes an amendment numbered 29.

Mr. BUMPERS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with $52,144,000,000 in line 17 strike out through $47,694,000,000 in line 20 and insert in lieu thereof the following: "$52,137,967,000, and outlays by $36,416,967,000 in fiscal year 1982; and to reduce budget authority by $59,016,967,000 and outlays by $47,687,967,000".

On page 10 beginning with $10,303,000,000 in line 6 strike out through $10,913,000,000 in line 9 and insert in lieu thereof the following: "$10,296,967,000 in budget authority and $7,921,967,000 in outlays for fiscal year 1982; and $12,356,967,000 in budget authority and $10,906,967,000".

Mr. BUMPERS. Mr. President, all of us who feel very strongly about a particular amendment and program and in which we have deep and abiding interests always deplore the fact that Senators are in committee meetings or other places and do not really get a chance to hear the debate, to hear our persuasive, compelling arguments that Senators love to make. I hope that many Senators will read the "Dear Colleague" letter I put on their desks last evening. I hope a lot of them will be listening on their intercoms and those who are not, I hope their aides are present and will be communicating with them. This is a different kind of amendment.

Mr. President, this is no partisan amendment. If there ever was a bipartisan matter presented in the Senate, this certainly ought to be it. It is a simple amendment. It takes virtually no money.

What I am asking for here is money for the childhood immunization vaccine and the childhood immunization program, designed to vaccinate all the children in this country against preventable childhood diseases. I am simply asking for an additional $6 million.

I cannot for the life of me, Mr. President, understand why anybody would have suggested reducing this program from $24,100,000 in 1981 to $18 million, a 25-percent reduction. This is one program where a preconceived notion of saving 25 percent has absolutely no justification whatever. Nobody could possibly have looked at this program seriously and said, "Let us cut it by 25 percent."

Mr. President, we have been talking about economies here. I voted for some of the amendments that have been offered to this resolution, and I voted against some of them. But I have the feeling that maybe some of them are not being examined as closely as they ought to be. Here, we are talking about a simple $6 million that translates into an unbelievable saving of money and, just as importantly, human misery.

Maybe the argument is going to be that Secretary Schweiker, our former distinguished colleague from Pennsylvania, first of all, said we are not going to put the childhood immunization program in the block grant program. Childhood immunizations cross State lines. You simply cannot give one State a block grant of money and say, "Vaccinate all your children." It is more important than that.

I welcome the news from Secretary Schweiker that he is taking this money out of the block grant program and leaving it intact as a separate program. But they are still cutting the funds by 25 percent.

Let me just give a little personal note on the history of this program. It is a program that my wife started in the State of Arkansas when I was Governor. She wanted to know what she could do that would have a lasting impact on my State, one in which she and I both and the people of the State could take great pride. She chose childhood immunization. Arkansas, which had the lowest number of its children immunized

against childhood diseases, within 2 years during which we had a massive immunization program, became second in the country in the percentage of children vaccinated against preventable childhood diseases.

When we came to Washington, Betty wanted to translate what she had done in Arkansas to a national level.

I say this in absolutely no spirit of partisanship, but when President Ford was President, he was not interested in this. When the Carters came to town, simply because we were friends of theirs, Betty was able to go to the White House and get Mrs. Carter's attention and, therefore, President Carter's and Secretary Califano's attention. It was then, with President Carter's support that we embarked on a nationwide crusade exactly like the one we had in Arkansas to save billions of dollars and unbelievable human suffering by trying to immunize all the children in this country.

It was such a simple idea, Mr. President. Here we were with all these vaccines—rubella, measles, mumps, chicken pox, polio—and not using them, and so it began.

In 1975, my first year in the Senate, there was only $6.2 million in this program. That was not one-fourth enough to pay for the vaccine and immunize all the children in the country.

Because of the help of the President and the Secretary of HEW, we finally got started with this massive program.

Any Senator who does not look at the chart that lies on his desk does himself, every parent who is a constituent of his, and every child in this country a grave disservice. Let me give you an example.

In 1975, we had 59,000 cases of mumps, almost 60,000 cases. That is when we were putting $6 million a year into the program. We got the appropriations level up, and the massive campaign took place in 1979, when we put $35 million into it. Last year we had reduced the number of cases to 8,000, a reduction of something like 800 percent.

Measles: We have cut the number of cases of measles from 24.374 to 13,430.

Rubella: Rubella is German measles. In 1975 we had 16,652 cases of rubella, and in 1980 we had reduced that to 3.837 cases. So far in 1981, the first 3 months, we have had 599 cases. So the reduction continues.

Incidentally, with respect to measles, we had 13,000 cases last year, and so far this year, in the first 3 months, we have had only 610 cases.

Pertussis—that is plain old whooping cough—was a fatal disease when I was a child. In 1975 we had 1,738 cases. For the first 3 months of 1981, we have had only 22 cases in the whole country.

Mr. President, it would be a tragic thing to reverse an unbelievable trend and go right back to where we just came from.

What about measles and rubella? What do they do? I will tell you what they do.

The sickest my children have ever been in their lives was with red measles. What do measles do? Measles can leave you blind. It can impair your hearing. It can do brain damage, because encephalitis is a common corollary with measles and mumps both.

What does rubella do? If a woman is pregnant and she gets German measles in the first 3 months of pregnancy, her child is going to be seriously affected. That child is going to be physically or mentally retarded or have some impairment such as loss of hearing or sight.

Of the 250,000 people—I want everybody to listen to this—of the 250,000 people institutionalized in mental institutions in this country, 5 to 9 percent of them are rubella syndrome, because they were born of a mother who had German measles during the first 3 months of pregnancy. And we are asking for $6 million.

Do you know what the Secretary of HEW said in 1979 when we finally reached the point that we had immunized 90 percent of all the children under 12 in the country? They had a calculation. He said that reaching 90 percent immunization levels has saved this Nation $15 billion in health care cost. For less than $100 million, Mr. President, we have achieved a $15 billion saving—and that does not include the tears, lost sleep, none of the things friends and parents do not endure when their children are properly immunized.

Why is this $6 million important? HHS might come here and say, "We will find the money, Senator. Don't worry. We will take it out of another fund. We're not going to let these children go without these vaccinations."

That is what everybody said before 1976, but they were going without vaccinations, and human suffering costs were going apace.

If they do not need the money, I assume they will not ask for it. I do not want to involve the Communicable Disease Center, because they did not ask me to do this, but I can tell you this: If you take that $6 million away from them, the measles eradication program will end. You will be able to get measles vaccine, but you are not going to have those two nurses in each State going to every school district, to every forum they can find, to point out that we need to eliminate measles once and for all in this country. That program to eliminate measles in this country has been fantastically successful, and to halt it now would be a terrible tragedy.

I want everybody here who votes against this amendment to understand the implications of what he or she is doing.

One of the trendiest things in this country right now—some of it justified, and some of it I deplore—is to curse government. You cannot go into a coffee shop anyplace in America without the topic of conversation getting around to the idea that government cannot do anything right. Everything government touches turns sour. Some people are even suggesting that we would be better off without government.

I understand some of that, and I understand the disenchantment and the dismay many people in this country feel toward government.

But I will tell you one thing: If I could make the argument I am making here to the American people and know that 220 million of them were listening, there would not be one-half of 1 percent who would not say, "For God's sake, put that $6 million or whatever you need into that program. The Government does one thing right. They have embarked on a program that works."

I will give you a little vignette. I probably should not. But when Betty Bumpers went to the White House, she said to the President, "You know, here is something you can do, and at the end of your term you can say, 'Here is something we embarked on, here is something we started, and it has been a colossal success.' "

We all know how much attention this sort of thing gets. It never gets one line in the newspapers, never gets one line in the press. This is something we have to do inhouse; and we, as Senators, have to be aware of our responsibilities and make it happen, and not worry about whether we gather accolades in the process.

If you are looking for some political credit, do not. It is not the sort of thing that is going to win many brownie points back home. But if you are interested in your own children, if you are interested in the future health of this Nation, vote for it.

If you want to prove for political reasons that not one amendment is going to be permitted to be passed during the consideration of this resolution, then vote against it, and let us get on with it; and we will just tell the American people that, for political and partisan reasons, we were not even going to let a little $6 million appropriation slide through, even though it means reversing one of the most dramatic achievements ever in this country. Let us just put it on the sacrificial altar and be done with it.

I plead with Senators when they walk into this Chamber: Do not walk down there and just vote "No" because that is the way you have been voting.

I yield the floor, Mr. President.

Mr. QUAYLE. Mr. President, I commend the Senator from Arkansas for bringing this matter to our attention. I listened with a great deal of interest and understanding. I applaud him and his wife for the efforts they have made in this matter in past years.

The Senator from Arkansas began his remarks by saying—and I believe I am quoting him fairly and accurately—that it takes virtually no money. We talk about $6 million, which is not very much of the total budget that goes into HHS.

As a matter of fact, the total budget of HHS is about $250 billion.

I have tried to compute what kind of a fraction that we are talking about here—$6 million of the entire Federal budget. It comes out to about point nine ten-thousandths of 1 percent. I do not know how to write that down. I am not yet well versed in the mathematics of the budgetary process. But that is what it comes out to what we are talking about. We are not talking about that much money.

I do not think anyone is in opposition to eradicating measles or anyone would want to see the children of our country not have proper immunization against these diseases such as rubella, measles, tetanus, mumps, diphtheria, or polio—no one; no, Senator, no one in this country.

The Senator from Arkansas said if the American people were listening, all 220 million of them, they would vote for this $6 million addition.

I suggest, and I would certainly be of assistance to the Senator from Arkansas, that he make this same speech and this same plea to the Labor and Human Resources Committee that will be determining on how much money will go into that program and then to make that same speech and that same plea to the Subcommittee on Health and Human Services of Appropriations which will be making that determination. I suggest that once those two committees discuss this issue they, in fact, will agree with the Senator from Arkansas that these programs shall go forward, that no one is going to stop a program that eradicates measles, that no one wants to stop any kind of a program that provides for better immunization of our schoolchildren.

I happen to be the father of three children. They are just beginning school. Their ages are 6, 4, and a 2-year-old.

The results of immunization have been good. They are not as good as we wish to see but, probably because of the leadership of the Senator from Arkansas and others, we are in a better position today than we were 5 or 6 years ago. He is to be commended for that. I commend him for it.

The statistics I have show that more than 90 percent of our children, kindergarten through eighth grade, have been immunized against measles, polio, diphtheria, tetanus, and whooping cough, and 84 percent of this population has been immunized against rubella and German measles.

We can do better. We can do better and we will do better.

But I suggest to the Senator that this amount of money at this particular place in the budget reconciliation process is not timely. The Labor and Human Resources Committee has $60 billion to deal with, and I am sure that if he takes his eloquence and the merits of these programs there, that committee is not going to turn its back and say "no" to these worthwhile programs.

He indicated that Secretary Schweiker has already agreed to take this out of the block grants, if I understand the Senator correctly, and put it in to categorical grants. That is a step in the direction the Senator from Arkansas wants to go to make sure that this program is adequately funded and adequately taken care of, so that no one can accuse this administration or this Congress of trying to eliminate a program that has seen success.

So, in conclusion, Mr. President, I urge that this amendment not be offered. The proper debate and the proper argument will take place in the Labor and Human Resources Committee, the authorizing committee, and the Appropriations Committee. I say with optimism that the final result of this Congress through the reconciliation process, the budget process, the appropriations process, and the legislative process, will be that these programs will go forward, that they will in fact go forward without this amendment.

I just cannot fathom anything but that being the final result of this debate.

I also am aware, and I think that in this day of preventive medicine where, as stated by the Senator from Arkansas, we saved $15 billion, this is precisely what we are looking for, cost savings in health care. That is what this administration is looking for. That is what people are looking for when they say let us get better efficiency for our taxpayers' dollars. Let us have a more efficient management of programs so as to achieve ultimate savings. This obviously has the statistical data to move in that direction.

So I hope that this amendment will not go forward. I do not think it is necessary. I do not think it is timely. The Budget Committee deals in functional categories and to get down to dealing with a relatively minuscule amount on something that is very worthwhile, point nine ten-thousandths of 1 percent of the budget, I feel would not be timely. Though the intent of the Senator is obviously meritorious and I appreciate his concern and his leadership in the past, I look forward to working with him as a member of the Human Resources Committee in the future.

Mr. President, I reserve the remainder of my time.

Mr. BUMPERS. Mr. President, I ask unanimous consent that Senators SARBANES, PRYOR, RIEGLE, EXON, LEAHY, EAGLETON, and DECONCINI be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, I shall only take a minute.

I appreciate the argument made by the distinguished Senator from Indiana (Mr. QUAYLE). I only wish to make this point: This amendment does not direct the Labor and Human Resources Committee to put money in this program. The Senate is simply saying by this debate that we believe in this program.

Why should I have to go make this same plea before the Labor and Human Resources Subcommittee and the full committee and go through all of that? All we are debating this argument for here is to say if they do not want to put this extra $6 million in there and they want to take it from someplace else, that is fine. They do not have to increase their budget $6 million. If they have another program within the $60 billion they are going to be disbursing and they can find the $6 million someplace else that is fine with me.

But is that not what every amendment that has been offered in this Chamber is for—to let the committee know that we have an interest in a particular program? They are not bound by anything we do. If we accept the argument of the Senator from Indiana we would just pass a reconciliation instruction and send it out to the committees and then we will all take our chances before those various committees, if we lose come back and offer it again.

But if that is what we are doing we have wasted 5 days on all these amendments.

But as I understand it, this resolution is still $2.3 billion below even President Reagan's budget cuts. In other words, the Senate, if we pass this resolution tonight, will have cut $2.3 billion more out of the budget than even President Reagan recommended, and I think this whole body is due a lot of credit for that.

But here, we are offering these amendments as instructions to those committees. Whether they abide by them or not is their business. If they can find that $6 million someplace else that is fine, too, but they should know when they start marking this bill up that the Senate has spoken on childhood immunization and if they want to come back with $59,994,000,000 that is fine with me.

The PRESIDING OFFICER. The Chair hesitates to interrupt the distinguished Senator, but I do wish to call to his attention that his time under the amendment has expired.

Mr. BUMPERS. Mr. President, I yield myself such time under the resolution as I may use.

The PRESIDING OFFICER. The Senator has that right.

The Senator from Arkansas may proceed.

Mr. BUMPERS. So, Mr. President, let us not hang our hat on any kind of semantics such as that, that you can go to the Labor and Human Resources Committee and make your argument, you can go someplace else or even offer it again here in the Chamber.

We are here debating what our priorities are. This should be a priority of the Senate and the Senate should vote for it.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EAGLETON. Mr. President, will the Senator yield for a question?

Mr. BUMPERS. Mr. President, I yield such time as the Senator from Missouri may use.

ORDER OF PROCEDURE

Mr. EAGLETON. Mr. President, will the Senator have any objection if we stack his vote and some succeeding votes on Eagleton amendments and others, all votes to begin at 1 p.m., the first vote being on the Bumpers amendment, it being a 15-minute rollcall vote and succeeding stacked votes being 10 minutes in duration?

Such has apparently been cleared with the Republican majority leader.

I ask the following question of Senator BUMPERS: Would he be willing to consider deferring the vote on his amendment to 1 p.m., that his be the first amendment voted on, a 15-minute

rollcall, that succeeding stacked amendments which will include the next two Eagleton amendments ensue thereafter, and that they be of 10-minute duration?

Mr. BAKER. That is fine with me.

Mr. President, in response to that suggestion, I ask unanimous consent that the vote which has been ordered on the Bumpers amendment be delayed until the hour of 1 o'clock, and that any other amendments which are taken up and considered and on which votes are ordered also be delayed until after the Bumpers amendment, the first amendment being a 15-minute vote and each subsequent stacked amendment, if any, be 10 minutes in length.

Mr. EAGLETON. Mr. President, reserving the right to object to my own proposal, we are checking signals with the minority leader.

Mr. BAKER. Mr. President, I will temporarily withhold the request I have just made and will express it again as soon as it has been cleared on the minority side.

Mr. BUMPERS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGEEMENT

Mr. BAKER. Mr. President, I observe the minority leader is on the floor, and I would inquire of him if it is cleared on his side to take votes at 1:30 p.m. on the Bumpers amendment and any other amendment that may be ordered in the interim.

Mr. ROBERT C. BYRD. Mr. President, I know of no problem on my side of the aisle.

Mr. BAKER. I thank the Senator.

Mr. President, I renew my request but that the time be 1:30 p.m., instead of 1 p.m.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. I thank the Senator from Missouri and the Senator from Arkansas and, of course, I thank the minority leader.

Mr. QUAYLE. Mr. President, before I yield back my time, I would like to take 30 seconds. I want to make one final statement. The Senate Budget Committee did, in fact, restore about $1 billion in additional spending over and above the President's recommendation.

Even though the total reconciliation was $2 billion more than the President requested in that particular committee to which this amendment goes, there was an additional $1 billion.

Finally, I will say that even without this amendment these programs the Senator from Arkansas has talked about will, in fact, go forward.

Mr. BUMPERS. Mr. President, I yield such time to the Senator from Nebraska as he may require on the resolution itself.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, I enthusiastically cosponsor the amendment offered by my friend and colleague from Arkansas. I heard him say a few moments ago in this Chamber that his fear was that our colleagues would be coming in here at 1:30 or shortly thereafter, going down to the well, reading the instruction sheets that customarily appear on the Democratic and Republican tables, and we very likely would see the customary votes that we have seen on a whole series of amendments, 55 against and maybe 35 or 38 votes for.

I think this is a very important amendment. I hope our colleagues will recognize that this is just not one more of a whole series of amendments they have had to come into the well and make their decision on, and oftentimes on very short notice.

I appeal to my colleagues on both sides of the aisle to take a very close look at the recommendation of the Senator from Arkansas. It is for about $6 million.

I say this, Mr. President, as one who has voted "No" on most of the increases in the President's budget. But the record will clearly show, Mr. President, that I and many others in this body similarly situated have voted and supported cuts in the overall Federal budget which exceed those recommended by the President both, as I say, as a member of the Budget Committee and on votes I have cast on this floor.

I say to the President that many of those votes I have cast have been tough votes for me to cast, but I feel very strongly about the need to turn around the direction of ever-increased Federal expenditures.

However, here we are talking, Mr. President, about $6 million that is part and parcel of a very successful program. This is a good Federal program. This is for kids, this is for health, this is to prevent suffering on the part of youngsters of today who may well indeed be drawing upon some of the resources of the Federal Government in the future unless we prevent disease with immunization, as we have been doing over the past several years.

So, Mr. President, as we near the end of the debate on this issue, I simply hope that those of my colleagues will heed the words of the Senator from Arkansas, whom I consider an expert on this subject.

I feel that those of us who have voted time and time again for cuts do not automatically have to go to the table and hold up our hands to show our macho—macho spirit to be in lock step with what most of us feel is necessary in the U.S. Senate.

I, therefore, make an appeal, Mr. President, for our colleagues on both sides of the aisle to stop, think, ponder before they cast a vote on this increase that I think is totally justified.

I yield back to my friend from Arkansas.

CHILDHOOD IMMUNIZATIONS

Mr. KENNEDY. Mr. President, I rise in support of the amendment of the Senator from Arkansas to increase funding for childhood immunization programs.

The national childhood immunization initiative was begun in 1977 when surveys revealed that over one-third of school aged children were inadequately immunized against the major vaccine preventable diseases. A goal was established to raise immunization levels to over 90 percent by the fall of 1979. Resources were committed to that goal, and that goal was attained. Today, fully 91 percent of the 24 million children between kindergarten and eighth grade are adequately immunized.

The health impact of this level of protection is enormous considering the morbidity and mortality associated with these common childhood diseases. For example, encephalitis occurs in 1 of every 1,000 measles cases, often producing permanent brain damages; death occurs in 1 of every 10,000 cases. One case of deafness occurs in every 16,000 cases of mumps. Diphtheria, whooping cough, and tetanus can cause serious respiratory, cardiovascular, and nervous system complications. Whooping cough is fatal to 1 of every 100 children afflicted. No one would want to recall the scourage of paralytic polio.

Yet our children can be protected from every one of these childhood diseases, and the savings in human life, misery, and economic resources are huge. For every dollar we spend to immunize our children against measles, for example, we save $8 in treatment costs.

We cannot afford to be complacent and deem the national immunization initiative a final victory. Each year millions of new children must be protected. Only by a sustained effort can we assure that these serious childhood diseases do not afflict our children.

The substance of the Bumpers amendment was a part of the amendment which I offered yesterday. I know that when the Senator from Arkansas was Governor, he placed a very high priority on that program. He has a very strong commitment to an effective immunization program.

We have worked very closely together over the years, and we share a common belief in the effectiveness of immunization as a cost-efficient approach to disease prevention.

It is important to recognize that the fight against most communicable diseases is an ongoing one. Even when the incidence of the disease is decreased, the disease is latent, waiting to spring back if we drop our guard.

If we cut funds for immunization, if we have an interruption in our efforts and when we let our guard down, we can expect that the citizens of this country are going to suffer, and the ones who will suffer the most, are going to be the children who are going to be affected.

I strongly support the Senator from Arkansas' amendment and urge my colleagues to support this important program.

COMMENDATION FOR AGENTS McCARTHY AND PARR AND OFFICER DELAHANTY

Mr. BAKER. Mr. President, I have discussed this with the distinguished minority leader. I ask unanimous consent

that it may be in order at this point to offer a resolution for immediate consideration.

The PRESIDING OFFICER (Mr. JEPSEN). The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 106) to commend Agents McCarthy and Parr and Officer Delahanty for their unselfish courage and patriotism during the recent attempt on the life of the President of the United States.

The PRESIDING OFFICER. Without objection——

Mr. ROBERT C. BYRD. Mr. President, if there is no objection, I ask that the resolution be read. It is brief.

The PRESIDING OFFICER. The clerk will read the resolution.

The legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), for himself, Mr. ROBERT C. BYRD, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BAUCUS, Mr. BENTSEN, Mr. BIDEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. HARRY F. BYRD, JR., Mr. CANNON, Mr. CHAFEE, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. CRANSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DIXON, Mr. DODD, Mr. DOLE, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. EAST, Mr. EXON, Mr. FORD, Mr. GARN, Mr. GLENN, Mr. GOLDWATER, Mr. GORTON, Mr. GRASSLEY, Mr. HART, Mr. HATCH, Mr. HATFIELD, Mrs. HAWKINS, Mr. HAYAKAWA, Mr. HEFLIN, Mr. HEINZ, Mr. HELMS, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. INOUYE, Mr. JACKSON, Mr. JEPSEN, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KASTEN, Mr. KENNEDY, Mr. LAXALT, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. LUGAR, Mr. MATHIAS, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. MCCLURE, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. PACKWOOD, Mr. PELL, Mr. PERCY, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. QUAYLE, Mr. RANDOLPH, Mr. RIEGLE, Mr. ROTH, Mr. RUDMAN, Mr. SARBANES, Mr. SASSER, Mr. SCHMITT, Mr. SIMPSON, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. STEVENS, Mr. SYMMS, Mr. THURMOND, Mr. TOWER, Mr. TSONGAS, Mr. WALLOP, Mr. WARNER, Mr. WEICKER, Mr. WILLIAMS, and Mr. ZORINSKY, submits the following resolution:

S. RES. 106

Whereas those charged with the duty of protecting our Nation's leaders place their lives in jeopardy every day of their service;

Whereas these people perform their duty in an anonymous manner except during times of national crisis when the eyes of the country are focused on them;

Whereas on March 30, 1981, in the city of Washington, Agent Timothy J. McCarthy of the United States Secret Service and Officer Thomas K. Delahanty of the Metropolitan Police Force suffered critical injuries in the line of duty while protecting the President of the United States; and

Whereas the unselfish and skillful efforts of all these men in helping to save the life of the President placed their own lives in the greatest peril: Now, therefore, be it

Resolved, That the United States Senate commends Agent McCarthy and Officer Delahanty for their courageous actions on behalf of the Nation and prays for their speedy recovery and commends Agent Jerry S. Parr for his phenomenally quick action and judgment in time of crisis and further commends all of the brave men of the Presidential Protective Detail who acted to save the life of the President of the United States on March 30, 1981.

SEC. 2. The Secretary of the Senate shall transmit copies of this resolution to Agents McCarthy and Parr and Officer Delahanty.

Mr. BAKER. Mr. President, I ask unanimous consent that the resolution be kept open for cosponsors for the remainder of this legislative day.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE BETTER SIDE OF TRAGEDY

Mr. DOLE. Mr. President, this resolution rightly honors secret service agents Parr and McCarthy and District of Columbia policeman Delahanty for their exemplary professionalism and outstanding performance of duty in protecting the President last Monday. A true mark of their professionalism was that in the suddenness of a crisis, these men did not panic, no weapons were fired other than the attempted assassin's, and the perpetrator was subdued in seconds. It would be indeed an injustice if their valor were not recognized. The Senator from Kansas is honored to cosponsor this resolution and join in this tribute.

But, as I pay tribute to these three dedicated public servants, I cannot fail to recall the scores, if not hundreds of people, whose names will never be known to us or appear in a resolution, who also gave of themselves and illuminated the human side of Monday's tragedy. They range from paramedic, Roberto Hernandez, who at the very beginning, through quick response and competence, helped with the early care of the President when he first entered the emergency ward, to unnamed nurses, pharmacists, anesthesiologists and hospital personnel without whose devotion the remarkable recovery of the four wounded men would have been slowed or endangered.

That the President of the United States was a victim serves only to bring these people to our attention. For they are there everyday, serving with the same devotion and skill both the high and lowly. If an attempt to assassinate a President can be said to have a felicitous side effect, I think the realization of how much we owe to so many dedicated people, is such an effect.

Mr. President, in view of the attempted assassination, it might be easy to become cynical at times about people in general. But, in particular, we must remember people will always confound cynicism. As long as men are as they are, imperfect in so many ways, there will be the murderers, fanatics, and madmen who kill and wound. Astonishing as it is, there always have been and always will be the heroes and heroines, who with bravery and skill and devotion protect the injured.

We honor the Parrs and the McCarthys and the Delahantys and through them we do some small honor to the anonymous army of those who try to hold the civilization together or patch it up.

Once again the unthinkable has occurred. The events of Monday have taken their toll on each and everyone of us. Despite this, however, as the Nation bounces back from yet another tragedy, let us hope that it does not rebound so far as to forget how very much we owe not only to those men honored in this resolution before us but also those unsung heroes who are not receiving resolutions and commendations here today.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 106) was agreed to.

The preamble was agreed to.

Mr. BAKER. Mr. President, I thank all Senators for permitting me to interrupt the proceedings at this point. I may say that I discussed with the minority leader and advised him that I plan to visit with the President in the hospital today. I am grateful for the opportunity, then, to convey to him the information that the Senate has acted on this matter.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The Senate resumed consideration of the concurrent resolution.

The PRESIDING OFFICER. The Senator from Missouri.

UP AMENDMENT NO. 45

(Purpose: To restore funds for trade adjustment assistance)

Mr. EAGLETON. Mr. President, I have an amendment on trade adjustment assistance. The figures are being edited right now. I ask unanimous consent that I may be permitted to proceed with my remarks on this amendment. The amendment will be at the desk in a moment when my remarks are completed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield myself 1 minute off the resolution.

Mr. President, I ask Mr. EAGLETON to assume the position here at this desk, and I designate him, on behalf of Mr. HOLLINGS, to control the time on the resolution during the discussion of the two amendments of the Senator from Missouri.

Mr. EAGLETON. Mr. President, I thank the minority leader, and I thank the Chair.

Mr. President, I rise to offer an amendment to increase function 600, income security, to restore $400 million for the trade adjustment assistance program.

Under the present Trade Act of 1974, workers adversely affected by imports are entitled to:

Trade readjustment allowances for up to 52 weeks;

A maximum weekly benefit equal to the average weekly wage in manufacturing, or $289; and

Employability services including job search allowances and relocation allowances, as well as job training.

Senate Concurrent Resolution 9 proposes to change the whole nature of this program by limiting it to the regular State unemployment compensation levels and providing these benefits only after unemployment benefits have been exhausted.

Mr. President, trade adjustment assistance provides financial and technical assistance to workers adversely affected by import competition. The program began in 1962 as part of the Kennedy round of tariff and quota reductions. This program, then and now, recognizes that a trade expansion policy, although aimed at benefiting the Nation as a whole, may cause particular worker groups to be dis-

advantaged. Thus, trade adjustment assistance has been considered a key element in American free trade policy since 1962, compensating those who are found to bear the burden of that policy.

The benefits under this program are intended to assist workers thrown out of their jobs for extended periods of time as a result of long-term decline as well as sudden, unexpected, large-scale economic dislocations. That is why the benefits exist for longer periods and provide for training, job search, and relocation assistance, should workers require it.

It was understood that regular unemployment compensation could not deal with the types of situations TAA addresses. And it has always been the case that TAA benefits are reduced to the extent that workers receive regular unemployment benefits.

The decline in our domestic auto industry, caused in some measure by the general deterioration in the economy and the failure to anticipate economic trends, has resulted in the layoff of more than 300,000 autoworkers, most of whom are laid off indefinitely. This decline is admittedly the product of a number of factors, but chief among them are Federal policies governing trade and energy.

Our policy of free trade has made it possible for the Japanese to flood the domestic market with their products, especially their automobiles. Japan's auto exports over the last 9 years have accounted for more than 80 percent of their expanded auto production. Our 3-percent tariff, less than one-third of the tariff that the European Economic Community has placed on cars coming into their markets, has made this the case. Japanese imports account for approximately 23 percent of our market. By way of contrast, France has kept the Japanese share of its market to under 3 percent; Italy permits only a few thousand Japanese cars to enter its markets; Britain and Germany have similarly negotiated import controls.

Another undeniable factor behind our auto industry's decline has been the policy of decontrolling the price of domestic oil. As gasoline prices more than doubled last year, auto buyers flocked to smaller, more energy efficient imports.

I admit that American automakers have been slow to respond to shifts in consumer demand, but the Carter administration's decontrol policy could have been postponed under the law until October 1981, allowing Detroit some time to shift its production to smaller, more energy efficient cars.

Mr. President, an unwarranted reduction in trade adjustment assistance would target autoworkers, who through no fault of their own, have become casualties of these Federal policies.

Mr. President, this amendment restores only a small portion of the Budget Committee's proposed reconciliation. That is because the cost of TAA benefits in fiscal years 1982 and 1983 will fall dramatically over the next few months, without major changes in current law as proposed by the Budget Committee. Most recipients whose benefit period began in 1979, are now approaching the end of their 2-year benefit period. Thus, 1980 costs can be exceeded only if large new segments of industry are laid off, and that is not anticipated. In the natural course of events, a savings of some $900 million will undoubtedly be achieved; that is, with no changes in current law.

Adoption of this amendment will insure that the commitments made by Congress, as recently as last year when we passed the Multilateral Trade Act, to the workers of America are honored.

Finally, Mr. President, I would point out that this amendment will insure adequate levels for the trade adjustment retraining component of the program. Trade adjustment assistance recipients are entitled to job retraining and relocation services, and yet in fiscal year 1980, funds ran out in May, only 7 months into the fiscal year. For this fiscal year, only a first quarter allocation of the fiscal year's training funds were released and these are long gone. Opponents of this program have criticized the program for only providing income support and reducing the incentive to find new jobs in growing industries. This is an emphasis we should all press for.

Mr. President, I have completed my prepared remarks.

I now send the amendment to the desk with the appropriate figures.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON), for himself, Mr. BIDEN, Mr. KENNEDY, Mr. LEVIN, Mr. METZENBAUM, Mr. RIEGLE, Mr. WILLIAMS, and Mr. MOYNIHAN proposes unprinted amendment No. 45.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, strike out lines 9 through 18 and insert the following:

"(7)(A) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $212,000,000 and outlays by $295,000,000 in fiscal year 1981; to reduce budget authority by $4,354,000,000 minus $400,000,000 and outlays by $9,354,000,000 minus $400,000,000 in fiscal year 1982; and to reduce budget authority by $4,494,000,000 minus $300,000,000 and outlays by $10,870,000,000 minus $300,000,000 in fiscal year 1983; and

Mr. EAGLETON. It is $400 million in 1982, $300 million in 1983, in both BA and outlays.

Mr. President, I note the distinguished Senator from Michigan (Mr. RIEGLE) wishes to speak on this amendment. Does the Senator from Indiana wish to proceed until Senator RIEGLE arrives?

Mr. QUAYLE. I am prepared to proceed at this point.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. Mr. President, coming from the State of Indiana, I have a great deal of sensitivity to auto imports and a great deal of sensitivity to the unemployment situation. One out of five people in our State is employed in an industry related to the auto industry. So this amendment is of great importance.

However, I must rise in opposition to it, Mr. President. I note that the distinguished Senator from Missouri restores $400 million in budget authority and outlays in 1982 and $300 million in budget authority and outlays in 1983, which, if my figures are correct, would still be a reduction from the proposals of about $1 billion in 1982 and 1983.

I applaud the Senator because of the fact that we do have to bring down the amount of money spent on the TAA program. The dispute is whether the President's recommendation of $493 million should prevail or should we add another $400 million in fiscal year 1982. At least we do have an agreement that the implementation of this program and its expenditures, which have increased 950 percent since 1979, must be managed better and curtailed.

I think that is an agreement in which we can concur, but we disagree on the appropriate level.

Mr. President, I would also like to point out that the President's economic program will create additional job opportunities so that this program and other programs, as such, will not be necessary at the present levels.

I am also hopeful that we can come to an agreement with Japan to do something about the imports. I trust we will be able to do something about revitalizing the auto industry and revitalizing other businesses in this country to provide opportunities, not just in the auto industry even though that seems to be the one we are talking about right now with the Senator's amendment.

I would point out that GAO has found that the TAA has helped fewer workers to adjust to a changing economy because most payments were received as a lump sum after—and I want to emphasize after—returning to work. TAA has evolved into an income maintenance program. Studies show that it provides little adjustment. For instance, workers rarely take advantage of relocation and retraining assistance.

Mr. President, the President's proposal eliminates duplication between unemployment compensation and trade adjustment assistance. This is the duplication that I am sure the Senator from Missouri would be directing his amendment to. The question, again, is at what level are we going to finally arrive.

Mr. President, there was a GAO recommendation that TAA benefits would only be available after a person received unemployment benfits. At present, benefits are received simultaneously and provide workers with as much as 70 percent of their normal wage. Thus, many workers suffer little or no real loss from a layoff when taxes and work expenses they would pay if working are taken into account.

Mr. President, in conclusion I would like to point out that it is my understanding that, in testimony delivered to a House subcommittee just this week, the administration formally presented and discussed its proposed changes in the TAA program. By tightening up the criteria for eligibility and by bringing

TAA payments into line with State unemployment compensation payments, additional money will be available for retraining. I want to repeat that. Additional money will be available for retraining.

The administration estimates that as much as $100 million in additional retraining funds will be available in fiscal year 1982.

Mr. President, I reserve the remainder of my time.

Mr. RIEGLE. I commend the distinguished Senator from Missouri for his leadership on this amendment, I am happy to cosponsor it with him.

Mr. President, I think what is being recommended here is very modest in scope, very reasonable and, I hope, something that the Senate will support.

Even without major changes in current law, it is likely that the cost of trade adjustment assistance will decline sharply over the next few months. Many people who have received this help are approaching the end of the period for which benefits are available and therefore they will no longer qualify for assistance. So, Mr. President, much of the budgetary reductions sought by the administrations will occur in the normal course of events, without the sweeping changes in law that the administration has proposed.

Almost every auto plant that can be affected by rising imports has been certified eligible for TAA. New claims are falling off very fast. Of course, many Senators hope that the Reagan administration will take firm action shortly on the problem of automobile imports. The huge surge in imports has driven up the cost of TAA to the levels we have seen. Effective action on imports would be of major help to the 1 million workers in this country who have been displaced by the tremendous influx of foreign automobiles in the United States. And it would further reduce the cost of TAA.

This amendment would help insure that we can maintain our assistance to the families of workers who have lost jobs because of foreign imports. It will help insure that they can receive training for new jobs if that is necessary.

Mr. President, when Congress passed the trade bill in 1974, Congress decided that workers would not be forced to suffer financial damage from sudden changes in foreign trade. The TAA program was established to help workers adjust to new conditions of foreign competition. I do not know that the trade bill would have had broad support if it did not include this safety net program for workers who might otherwise lose their jobs to a surge of foreign imports.

Mr. President, opponents of TAA have in the past criticized the program for only providing income support and not helping workers find new jobs in growing industries. GAO found that a high percentage of those TAA workers who did receive training completed the training and found jobs related to their training experience. GAO found that training, job search, and relocation have worked well but it has been woefully underfunded.

This amendment would help maintain part of a compact between the Nation and its workers.

Therefore, Mr. President, at a time when there is widespread unemployment across the United States, I hope that we shall not fail to recognize the special problem of workers in industries which are under attack by foreign products and foreign economic interests.

Again, I commend the Senator from Missouri for his leadership on this issue. I hope that, because of the modest size of this amendment and its importance, the Senate will support it. I thank the Senator for yielding.

Mr. EAGLETON. Mr. President, if I haves 5 minutes remaining, I yield 5 minutes to the Senator from Michigan (Mr. LEVIN).

The PRESIDING OFFICER. The Senator from Michigan (Mr. LEVIN) is recognized.

Mr. LEVIN. I thank the Senator from Missouri and I thank the Chair.

(Mr. COHEN assumed the chair.)

Mr. LEVIN. Mr. President, I am proud to be cosponsor of this amendment and I congratulate the Senator for taking the lead in bringing this important issue before the Senate.

In his message to the Congress last February 18, President Reagan explained his rationale for proposing reductions in the TRA program. At that time, he said:

> The Trade Adjustment Assistance program provides benefits for workers who are unemployed when foreign imports reduce the market for various American products causing shutdown of plants and layoff of workers. The purpose is to help these workers find jobs in growing sectors of our economy. But because these benefits are paid out on top of normal unemployment benefits, we wind up paying greater benefits to those who lose their jobs because of foreign competition than we do to their friends and neighbors who are laid off due to domestic competition. Anyone must agree that this is unfair.

In fact, however, the President is just plain wrong in his basic criticism of the concept of the program. In point of fact, the Congress very clearly intended to provide more for workers who lost their jobs through foreign competition. They did so because they recognized that fairness required such additional assistance and because they recognized that compelling economic conditions required such additional assistance. Let me read from the report of the Senate Finance Committee on the Trade Reform Act of 1974 printed November 26, 1974. On page 131 of that report, the committee laid out a clear and compelling rationale for additional assistance to import impacted workers. They said there that:

> Congress established a special program or worker assistance in the belief that the special nature of employment dislocation resulting from changes in trade policy necessitated a level of worker protection somewhat beyond what is available through regular State unemployment insurance programs. Increases in imports of a given type of product can simultaneously and abruptly produce a combination of situations which have a particularly severe effect on employment. Because entire industries and not only individual firms may be adversely affected, workers may not have a realistic opportunity to find new employment which is at all related to the skills and training they may have accumulated over many years. Moreover, it can happen that the affected industry is one which is concentrated in a particular region with the result that the possibility of quickly absorbing displaced workers into other types of employment available in the area would be minimal. Thus, because trade-related unemployment may differ somewhat in nature from unemployment arising from other causes and because such trade-caused unemployment is a result of a Federal policy of encouraging increased foreign trade, worker adjustment assistance was provided for. . . .

Mr. President, the rationale provided by the Senate Finance Committee back in November of 1974 is still valid.

Additionally, Mr. President, I remain deeply concerned by the regional imbalance contained in the President's budget and this resolution. In the case of TRA, I believe that the reduction proposed here simply adds to that imbalance. In my own State of Michigan, the State hardest hit by the import problem and the general decline in auto sales, over 285,000 workers have received TRA benefits since October of 1979. These benefits have injected over $1 billion into the depressed economy of Michigan since then. Despite that assistance, Michigan is one of only a few States which has seen a fall in its tax revenues despite the inflationary pressures which have pushed receipts up in most States around this country. Denying Michigan TRA at the level suggested by Senator EAGLETON'S amendment would have the effect of piling on. In football, piling on is a penalty—but in the Senate it seems to be viewed as an act of political courage and fiscal responsibility.

Mr. President, I suggest we can be both courageous and fiscally responsible without piling on. There is no reason for us to reject the economic rationale for TAA which was developed by the Finance Committee in 1974. Nor is there any reason for us to break the promise we made to the working men and women of this country in the Trade Reform Act—a promise that when Federal trade policy did harm to a domestic industry, the workers in that industry would be protected.

Earlier in our consideration of this resolution, I joined with other Members in an effort to cut $2 billion from the proposed expenditure levels. We made that effort because we recognized that there is waste, fraud, and abuse which can be eliminated without harming legitimate and helpful Government programs designed to aid people. That amendment was rejected in the context of this resolution. But I believe we will pursue it in both the reconciliation bill and in the budget resolution. Accordingly, I am convinced that there are ways—ways already considered and ways yet to be presented—to find the savings needed to pay for the retention of TAA. I am not calling for increases in total expenditures because I believe we can find ways to pay for this program. But I must say, Mr. President, that I believe so strongly that we ought to honor our commitment to these workers and I believe so strongly that there is an economic and philosophic rationale for TAA that I would support this amendment even if it ultimately meant an increase above the President's budget mark.

Again, let me indicate my appreciation for the leadership role played by Senator EAGLETON in this effort and my pleasure at being an original cosponsor of this amendment.

TRADE ADJUSTMENT ASSISTANCE

Mr. KENNEDY. Mr. President, I am pleased to cosponsor the amendment offered by Senator EAGLETON which would restore $400 million in fiscal year 1982 and $300 million in fiscal year 1983 for the trade adjustment assistance program.

The administration has announced that it will propose legislation to provide that as of October 1, 1981, TAA benefits will be limited to workers who have exhausted their unemployment insurance benefits and limit TAA benefit levels to the amount a worker receives from unemployment compensation.

If enacted these proposals will drastically reduce benefits for eligible workers, 5,500 workers in my own State of Massachusetts are currently receiving trade adjustment assistance. If the administration proposals are adopted unemployed workers in Massachusetts stand to lose an estimated 13 million in benefits.

They would also undermine the essential purpose of the trade adjustment program. Ever since the enactment of the Trade Expansion Act of 1962, Congress has recognized that the Federal Government bears a responsibility to groups of workers hurt by increased imports. The trade adjustment assistance program created at that time established a uniform national policy to deal with the effects of liberalized rules of international trade.

The underlying rationale of the policy has always been that workers who are displaced because of increased imports are injured not as a result of normal economic forces, but as a direct result of Federal policy decisions that our import barriers should be reduced—and that they are therefore entitled to special relief.

The administration's proposal would in effect integrate the TAA program with the regular U.I. program. This simply fails to recognize that both the concept and the operation of the two programs are very different. The unemployment compensation program operates on insurance principles and is funded for the most part by payroll taxes on employers. There are few Federal standards. TAA is a compensatory program which is fully funded by the Federal Government without employer or State government participation.

The fact that TAA benefits are higher and available for longer periods than unemployment compensation reflects the compensatory nature of the program as well as congressional recognition of the difficulties permanently displaced workers face in preparation for and loacting new employment opportunities.

Mr. President, we should realize that significant reductions in the cost of the trade adjustment program are likely to occur next year without resorting to the major legislative changes the budget proposal assumes cost have substantially increased during the past year because massive auto import penetration and a precipitous drop in sales of U.S. cars has doubled the number of workers eligible to receive benefits under the program. It is unlikely that this extraordinary situation will be repeated. Petitions under the act are currently running between 180 and 200 per month compared with a rate of 600 to 800 just 7 months ago; and there is every reason to believe that applications for assistance will continue to decline in 1982 and 1983.

By adopting this amendment we can continue to provide this important safety net for workers in industries such as autos, steel, footwear, apparel, and electronics who face the prospect of permanent job loss because of increased foreign competition.

At a time when the tide of protectionism is rising and support for the free trade is at a low ebb, we will be making a serious mistake if we break the longstanding commitment to American workers which this program represents.

I urge adoption of the amendment.

Mr. President, we hear a great deal about our economic strength in the debates on the budget items. But the fact is we are living in a world of economic interdependence—we must recognize that there is a price to pay if we are going to participate in the international economy. There will be areas in this country which will benefit from the importation of products and goods which are made in other parts of the world. These goods are often produced under conditions which fail to meet any kind of minimal standards of decency in terms of the payment of wages and other benefits. The result is a serious dislocation of American workers.

Trade adjustment assistance has been a program which recognized a national need, a national responsibility, to help workers who are going to lose their jobs because of the importation of various goods. While we recognize this as being in the overall national interest, nonetheless, we have to ask ourselves whether there are going to be particular families who are going to bear the burden of such a policy.

In the past we have recognized that since the Nation benefits from an expansion of trade and the opening up of new markets, we bear a special responsibility to workers who are displaced. The trade adjustment program has recognized that. It is a matter of record.

To now renege on that basic and fundamental commitment, Mr. President, I believe is unfair and I believe is unjust and basically unwise. So I support the amendment of the Senator from Missouri (Mr. EAGLETON).

Mr. EAGLETON. Mr. President, I am prepared to yield back the remainder of my time on the trade adjustment amendment.

Mr. QUAYLE. I yield back my time.

Mr. EAGLETON. I yield back my time.

I ask for the yeas and nays on both the trade adjustment amendment and the National Science Foundation amendment which will follow.

The PRESIDING OFFICER (Mr. DANFORTH). Is there objection to it being in order that the yeas and nays may be ordered with one show of hands?

Mr. EAGLETON. First, I ask for the yeas and nays on the trade adjustment amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. EAGLETON. I now ask for the yeas and nays on the National Science Foundation amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT NO. 46

(Purpose: To restore funds for the National Science Foundation)

Mr. EAGLETON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Missouri (Mr. EAGLETON), for himself, Mr. KENNEDY, and Mr. PELL, purposes an unprinted amendment numbered 46.

Mr. EAGLETON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with line 12, strike out through line 2 on page 3 and insert the following:

SEC. 9. (a) Congress hereby determines and declares that it is necessary to make changes in enacted laws in order to reduce budget authority by $14,667,000,000 minus $82,000,000, and outlays by $2,353,000,000 minus $35,000,000, in fiscal year 1981; to reduce budget authority by $52,825,000,000 minus $78,000,000, and outlays by $36,945,000,000 minus $39,000,000, in fiscal year 1982; and to reduce budget authority by $59,228,000,000 minus $90,000,000, and outlays by $47,694,000,000 minus $59,000,000, in fiscal year 1983.

(b) The Committee on Appropriations of the House and Senate shall report not later than June 5, 1981, legislation to reduce previously enacted appropriations by $13,300,000,000 minus $82,000,000 in budget authority and $1,500,000,000 minus $35,000,000 in outlays for fiscal year 1981; by $3,200,000,000 minus $31,000,000 in outlays for fiscal year 1982; and $1,800,000,000 minus $11,000,000 in outlays for fiscal year 1983.

On page 9, beginning with line 24, strike out through line 10 on page 10 and insert the following:

(B) The Senate Committee on Labor and Human Resources shall also report changes in laws to modify programs within the jurisdiction of that committee sufficient to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $2,388,000,000 minus $82,000,000 in budget authority and $414,000,000 minus $35,000,000 in outlays for fiscal year 1981; $10,303,000,000 minus $78,000,000 in budget authority and $7,928,000,000 minus $39,000,000 in outlays for fiscal year 1982; and $12,363,000,000 minus $90,000,000 in budget authority and $10,913,000,000 minus $59,000,000 in outlays for fiscal year 1983.

Mr. EAGLETON. Mr. President, this amendment seeks to restore funds under function 250, general science, space,

technology, and specifically for the National Science Foundation research activities and science education, to the current policy levels of the Congressional Budget Office; that is, current law plus an inflation factor.

Mr. President, reducing the rate of inflation and improving the overall performance of the economy are laudable goals shared by every Member of this Chamber. Substantial reductions in Federal spending are a necessary step toward reaching these goals. However, Mr. President, as important as how much we cut is how we cut. It seems to me essential that, under the immediate pressures for instant savings, we not sacrifice the long-range goals critical to the very health and spirit of our Nation.

It is essential that every Senator understand that, if we accept the Budget Committee's recommendations to reduce the National Science Foundation research activities and science education programs, we are, in effect, abandoning the best minds in this country—abandoning the human talent that plays an integral role in increasing this Nation's productivity. If we adopt the Budget Committee's reductions, I submit that we have lost any sense of perspective about long-range investment priorities.

The effectiveness of the NSF fellowship program is well established; reductions in its support will surely exacerbate the current shortages of scientists and engineers in fields critical to our national needs. Over the long term, those shortages will adversely affect any commitment to economic revitalization.

In December 1979, the National Academy of Sciences issued a worrisome report that American science no longer dominates the world the way it did 20 years ago. The Academy warned then that America was seeing the emergence of other countries in ways that allow them to do things that only we were able to do before. In 1955, Americans were responsible for three-fourths of the scientific endeavor around the world. Three-fourths of it was done here. The percentage has dropped dramatically. In 1979, the United States accounted for no more than one-third of the world's science. So in about a quarter of a century, 24 years, we went from doing three-fourths of it to one-third of it.

A 1978 study by researchers Bruce Smith and Joseph Karlesky reported that America's national investment in research and development had actually dropped between 1964 and 1975, from 3 percent of the gross national product to 2.4 percent. In the same period, scientific research grew in the Soviet Union from 2.4 to 3.1 percent of the gross national product and in West Germany from 1.5 to 2.4 percent.

Why is our superiority in science dwindling? Clearly, the dramatic fluctuations in Federal support from 1 year to the next are damaging to us, producing serious imbalances within certain disciplines, destroying research teams, and underutilizing costly scientific facilities. Added to this, industry has generally reoriented its research priorities in favor of short-term payoffs rather than long-term fundamental inquiries. The general economic squeeze on universities has left them unable to offer researchers new positions, and inevitably, an ever-increasing number of individuals are being diverted from research and scientific professions.

The proposed elimination of any new science and engineering education activities and the reduction in research and related activities will further insure that scientific advances in this country continue to shrink. If this body allows that to happen, we should do it with the full knowledge that we are being manifestly wasteful of human talent and natural resources and that we are "saving" a few dollars today, which will result in untold costs tomorrow.

Mr. President, permit me to set aside the specifics of this amendment for a moment to put this dilemma we face into a broader context.

As I have said, nobody can dispute that this country has serious economic problems. We need to cut the budget substantially and I am for doing so. We could cut the budget in the gross amounts the administration suggests if the defense budget had not been declared "sacrosanct." The General Accounting Office has pointed out billions and billions of dollars of savings that could be made if Pentagon policies were tightened up.

But, I reject this administration's effort to create a panic psychology. We are not standing on the beaches of an economic Dunkirk. We are not in anything like the mess of the Great Depression.

The purpose of fostering a crisis atmosphere is clear—to stampede the Congress into accepting a program which, in the name of economic recovery, is in fact a retreat from fundamental national goals and values.

This administration has a mandate for change. I do not question that. But I reject the assumption which some in this administration apparently have made that there is no limit to that mandate. Yes, Americans voted for a change, but they did not, in my judgment, vote to repeal the 20th century. They did not vote to trade their legacy of social progress and justice for a handful of short-term budget savings.

We are in danger here of being swept up in a budget-cutting frenzy in which a dollar cut anywhere seems as good as a dollar cut anywhere else. It almost has become a game. There is no reality to it, no thought to the real human lives behind the numbers we so blithely move from column to column.

This budget plan merrily chops away at programs to preserve the environment. Save a dollar today. Let tomorrow's generation worry when our forests are clear cut, our air choked with pollution, and our rivers and lakes turned to acid ponds.

Here is an example: In the interest of saving $4.6 million, the administration proposes to terminate the cooperative wildlife and fishery research unit program.

This program, which has been in existence for over 45 years, provides funds to conduct basic research into the management of fish and wildlife. It is one of the key programs in the field.

In Missouri, 49 of the department of conservation's top personnel are graduates of this program. They have provided the leadership in protecting Missouri's fish and wildlife. Without such trained leaders, we cannot provide protection for our fish and wildlife resources, or the research to provide answers to the perplexing problems which face our environment today and down the road tomorrow.

In addition, we cannot talk about the shortsightedness of these budget proposals without mentioning the cuts proposed for nutrition and feeding programs. We in America have become comfortable over the past few years with the fact that we are generally a well-fed population and free of hunger. We soon forget that it was only 14 years ago that a group of physicians set out across America and came back with the following report:

> Wherever we went and wherever we looked we saw children in significant numbers who were hungry and sick, children for whom hunger is a daily fact of life, and sickness in many forms, an inevitability.

They went on to say—

> They are suffering from hunger and disease, and directly or indirectly, they are dying from them—which is exactly what starvation means.

The report of that group of physicians shocked America into demanding programs to bring starvation in our land of plenty to an end. The Congress responded by establishing the food stamp program, WIC, the school breakfast program and further improving the school lunch program.

In 1977, the physicians returned to many of the same sites they had visited 10 years before. What they found was that although the outward signs of extreme poverty persisted, there was one crucial difference, and that was in the area of food. It was their firm belief that it was the feeding programs that made the difference.

What this instruction contains can be categorized in no other way than as a wholesale attack on the feeding programs; an attack based on proposals which no one denies will reduce benefits even for the very poor.

I will not be a party to a measure which turns the clock back 14 years to a day when hunger was commonplace and help unavailable to those who need it.

Not only must we be concerned about insuring that our current abundant supply of food is equitably distributed, we must be concerned that the basic component of the food production system, our agricultural land, is not allowed to deteriorate any further. Over the past few years we have been losing almost 3 million acres of farmland a year to development and 4 billion tons of soil to our Nation's rivers due to erosion. The Soil Conservation Service has concluded that to sustain crop production indefinitely at even present levels, soil losses must be cut in half.

And yet, the Federal commitment to

soil conservation continues to slip and the administration proposes cutting this commitment even further. What will we do in 20 years when it is expected that the world's population will increase by almost 50 percent; when the malnourished people in just the lesser developed countries could number 1.3 billion; when use of land for energy production may directly compete with food production and when we find that because we had neglected the problem in the 1980's, the resources necessary to feed our people and many others in the world are no longer available? What will we do? It will be too late to do much of anything then.

Mr. President, I could go on to cite a number of other shortsighted budget cuts. I could mention urban mass transit, housing, student aid and preventive health programs. But I hope I have made my point.

The administration's proposed budget is one of the most tightfisted that has ever been sent to Congress. It asks the greatest sacrifices from those who have the least to give; it disavows good and bad Federal programs alike in its quest for transient dollar savings.

That is bad enough. But, in a mindless show of one-upmanship, this resolution proposes even to surpass the administration. To be exact, it would cut $3.1 billion in budget authority more than the administration's "scorched-earth" budget proposals. That to me is totally unacceptable.

I know a stampede when I see one. The most eloquent arguments in the world are going to be trampled under in this onrush.

I can only speak as one Senator, aware that nothing I do is likely to alter the outcome of this resolution. I could have supported substantial budget cuts that were fair and balanced. Many such cuts are contained in this resolution. But there are so many other cuts in this resolution which I deem to be reckless, punitive, and shortsighted that I must, on balance, vote against the resolution when we get to final passage.

Mr. President, I know not now how historians will evaluate the year of 1981. It is quite apparent to me, of course, with the recent tragic events befallen our President, that that item will play very large in the historical news as historians look back upon this year. But I think I can predict what historians in 1991 will be saying of 1981. I think that a lot of historians will look back to this year and say that the United States went on a budget-cutting frenzy and that we got caught up in the pellmell rush of chasing dollars, figures, columns, budget authorities, outlays, and all kinds of code words and buzz words that we use around here, that we lost track of ourselves because when they look back in 1991 to what we have done to science, to what we have done to agriculture research, to what we have done to nutrition, to what we have done to a whole wide array of programs, those historians will look at each other and say, "My God, what was in their minds? What was in the minds of those 98 men and 2 women in the U.S. Senate when they decided to save a few pennies in the year of 1981 and punish this country into the future."

When we break up these research teams, and that is the immediate amendment before us, when we break up these research teams, whether they be at hospitals or universities or think tanks, and we break them up in 1981, we do not get them back in 1982, or 1983. When those research teams are broken up, those people will scatter. They have been burned. They will not come back, and we are going to pay a horrendous national penalty in the year 1991 and in the year 2001 for some shortsighted frenetic, frantic budget cutting done in the name of fiscal austerity in the year 1981.

We all have different religions, but there is one utterance in my religion that I will use to close my remarks: "Forgive them, Father; they know not what they do."

Mr. QUAYLE. Mr. President, what we are trying to do here is to reverse the trend of a drastic increase in Federal spending. There is absolutely no way that we can reverse that trend unless the restraint in spending and the reductions are across the board.

The Senator from Missouri talked very passionately when he said perhaps we are repealing the 20th century.

We are not repealing the 20th century. What we are trying to do is repeal an attitude that has been prevalent around here, and that is that we can spend money for every single conceivable idea that anyone comes up with.

I am sure that the Members of this body, the 98 men and the 2 women that the Senator referred to, know full well that to reduce spending in the amount of the $36 billion that we are talking about everyone is going to have to be included, and this has to be an across-the-board appeal.

The reductions in the National Science Foundation come to about 10 percent. I am sure that there are many, including myself, who do not want to see reductions in any number of programs, but to get a hold on the fiscal policies in this country we are all going to have to make some sacrifices.

We talk about the year 2000. Let us talk about the year 2000. What is going to happen in the year 2000 if we continue our past fiscal policies? Instead of having inflation at 11 or 12 percent, it could be double. Instead of having interest rates, and the prime now has gone down to the grand total of 17 percent, they may double, perhaps to 34 percent.

So what we are trying to do is get hold of the economy. The President is headed in the right direction and he is not going to be able to do it without stepping on some toes and in the short term it may be a little bit painful. But I suggest that as we approach the year 2000 the long-term results will be very pleasing.

I do not find anything painful about reducing inflation. I do not find anything painful about trying to bring interest rates down. I do not find anything painful about saying perhaps the Federal Government has spent unwisely or spent without restraint or without responsibility. I do not find that painful.

I find that we are now pursuing the proper course of action.

I believe there is a constituency that will support this.

If I read the remarks of the Senator from Missouri, correctly, he has indicated perhaps he will on final passage vote against this because it is not equitably balanced. He says he believes there should be reduction in spending but not this particular package.

I commend him for that because I wish to point out to this Chamber that there was a lot of talk in that Budget Committee. We heard a lot of rhetoric about how this was regressive. I think as a matter of fact someone even talked about repealing the 20th century on the Budget Committee. They talked about undoing 30 years of social legislation in 3 days. But then when the final vote came not one Senator voted against it. It was 20 to 0, which showed me that Senators were willing to respond to the message that was sent loud and clear last November, and that message was to get the budget and spending policies of Congress under control.

The National Science Foundation is not new. It has been here since 1950. It is going to go on.

I am sure that Senators are aware of some of the Golden Fleece Awards that have been presented to this Government agency.

This modest reduction of 10 percent is not going to eliminate that, and I would just recite for the record that in the committee Senator KASTEN from Wisconsin offered an amendment that would have restored one-half of the cuts recommended by the Reagan administration. That proposal did not pass because another proposal was offered by the Senator from Utah (Mr. HATCH) restoring $1 billion to the Labor and Human Resources Committee, which superseded the Kasten amendment.

I will say again we are dealing with functional categories, and when we take up the deliberations in the authorizing committees and in the Appropriations Committee there can then again be made efforts to restore some of this funding.

I hope the Senate will stick with the administration, will stick with the Budget Committee, which had a unanimous support on a vote of 20 to 0 and, as I say, in conclusion, this has to be across the board. It has to apply to everyone, otherwise we will have failed in that responsibility and mandate we accepted last November.

I reserve the remainder of my time.

Mr. EAGLETON. On the National Science amendment I now yield 3 minutes to the Senator from Massachusetts.

THE NATIONAL SCIENCE FOUNDATION

Mr. KENNEDY. Mr. President, I am pleased to cosponsor an amendment to restore funding to the research and science education activities of NSF.

For 30 years NSF has been the primary impetus for our scientific and technological advancements. Restoration of adequate funding for research is necessary if we are to achieve our national economic, social, and political goals and reverse the trend of our rapidly diminish-

ing international prominence in science and technology.

Restoration of NSF funding is necessary to upgrade deteriorating scientific equipment and instruments in over 200 universities and 14 national research centers. Upgrading this equipment is critical to improve the productivity of our research efforts and increase the probability of making new scientific breakthroughs.

Restoration of NSF funding is necessary to maintain support for over 2,000 graduate training fellowships and to provide opportunities for continuing education for close to 3,000 science teachers who will have an impact on hundreds of thousands of students. These efforts are essential to maintain a high level of expertise among our Nation's scientists and to insure a basic level of scientific literacy among our Nation's general populace.

Restoration of NSF funding is necessary to implement the women and minorities in science program which, if funded at restored levels, is projected to expose over 12,000 women and other minority students to science career opportunities. This is essential to cultivate new scientific talent, ultimately determining the innovativeness, quality, and scope of our scientific endeavors.

For a number of years I chaired the authorizing subcommittee with responsibility for the National Science Foundation. I know from long study that the long-term economic and social interests of the United States depend on maintaining a competitive position in research and development. For this reason the amendment the Senator from Missouri has offered makes good sense. You cannot turn on programs that affect research and development one year and turn them off the next. This amendment would keep a stable level of funding for NSF to permit continuation of vital activities. I urge my colleagues to support this amendment.

Mr. EAGLETON. Mr. President, I yield back my time.

Mr. QUAYLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back.

MASS TRANSIT FUNDING

Mr. DOMENICI. Mr. President, I yield myself whatever time I need off the resolution.

I now yield to the distinguished junior Senator from New York who wants to engage in a colloquy with the Senator from New Mexico.

Mr. D'AMATO. Mr. President, I thank my distinguished colleague from New Mexico.

I have several questions about the Budget Committee's instructions to the Banking Committee, particularly in the area of mass transit funding. As you know, New York City has the largest transit system in the Nation with 5 million daily users while deriving less than 10 percent of its operating expenses from the Federal Government. However, smaller cities will be severely hurt by the proposed cutbacks in mass transit aid. Such cities as Buffalo, Syracuse, Rochester, Corpus Christi, Grand Rapids, and Peoria currently receive large percentages of their operating budgets from Federal assistance and cannot afford the proposed reductions. The President has proposed large cuts in mass transit for fiscal year 1982 and fiscal year 1983. Is it correct that the Budget Committee assumed the President's proposed level of reductions in formulating its instructions to the Banking Committee?

Mr. DOMENICI. Mr. President, let me say to my good friend, the junior Senator from New York, that the answer to his question is "Yes," the committee did assume the President's level of reduction in its instruction to the Banking Committee in the area of urban mass transit.

Mr. President, I ask unanimous consent that the baselines from whence those assumptions were taken be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

URBAN MASS TRANSIT

[In millions of dollars, fiscal years]

	FY 1981		FY 1982		FY 1983	
	BA	O	BA	O	BA	O
Baseline	4,615	3,950	5,090	4,090	5,507	4,340
Budget reductions			−1,321	−200	−1,878	−735
Amount remaining	4,615	3,950	3,769	3,890	3,629	3,605

Mr. D'AMATO. Mr. President, since the Budget Committee has made this assumption in arriving at its final recommendations, are the Budget Committee's assumptions necessarily binding on the Banking Committee, of which I am a member and which authorizes funding in the area of mass transportation?

Mr. DOMENICI. Mr. President, I say to the Senator that the only binding element in this reconciliation process will be the final total found in the instruction to be given to the Banking Committee. The Budget Committee is not a line item committee.

What we have done is simply to recommend a reduction in funding for mass transit programs under the jurisdiction of the Senate Banking Committee. That funding reduction matches the total reductions requested by the President. But it is the sole responsibility of the Banking Committee to decide whether it wishes to reduce authorization levels for a particular program or to make reductions in other programs within its jurisdiction.

Mr. MOYNIHAN. Mr. President, will the Senator from New Mexico yield to me for a question?

Mr. DOMENICI. Mr. President, I am pleased to yield to the senior Senator from New York.

Mr. MOYNIHAN. Mr. President, I thank my distinguished chairman and friend.

As the chairman will recall, on March 13, a letter was sent to him by the chairman, Senator GARN, and the ranking minority member, Senator WILLIAMS, of the Banking Committee, in which they specifically point out that the mass transit program must now be reauthorized for fiscal years 1983 to 1986; that the program, in that sense, expires, and they ask that the Budget Committee provide broad flexibility in its assumptions about fiscal 1983 so as not to conflict with the Banking Committee's efforts to review all of the complex issues of Federal assistance to transit.

I raised this matter with the committee and the chairman was very generous and open about it, pointing out that there is no reduction in operating assistance in fiscal 1982, which is the budget year we are principally concerned with here.

As a result of our discussion, we included, on page 66 of our report having to do with the Committee on Banking, Housing, and Urban Affairs, the statement:

> The committee agrees with the Senate Banking Committee's recommendation that that committee be given the broadest flexibility to review the issue of Federal assistance to mass transit.

By that statement we intended to say that we leave open and do not foreclose the question of operating subsidies for fiscal 1983 and thereafter. Will the chairman agree with that statement?

Mr. DOMENICI. Mr. President, the Senator is absolutely correct with reference to the committee report. It was at his request that that language was included. The question is open for 1983 in outyears, but it is open only to the extent that I have heretofore described. The committee that the distinguished junior Senator from New York serves on has a number of programs that are within its authorizing jurisdiction. Certainly it is not only mass transit.

And to the extent that the Banking Committee, with reference to Eximbank, community development, UDAG, mass transit, capital improvements for mass transit, and a host of other authorizing authorities already in existence and from whence appropriations are forthcoming, they have the greatest flexibility among those programs that they have that kind of authority over to decide which authorizations they cut and how much in arriving at the reduction figure that the reconciliation instruction imposes on them.

Mr. MOYNIHAN. Mr. President, could I simply add, in that context, thanking the chairman, that what remains to be done is to reauthorize the entire mass transit program. Without wishing to I go back to the painful memory, I remind the chairman that last December a 5-year transit program was reported to the floor, after having been agreed to in conference with the House, a program which 79 Members of this body had voted for the previous June. But it was decided by the Members on the other side of the aisle that we would not accept that program then and there. So it now remains for the new authority to produce a new program.

I said at that time to the distinguished, then junior, Senator from Indiana, "Sir, you are creating a crisis and you know this. When that crisis comes, you will have to hold yourself accountable and you will be held accountable."

Mr. D'AMATO. Mr. President, will my distinguished colleague from New York permit me to ask a question of my distinguished colleague from New Mexico?

Mr. MOYNIHAN. Yes.

Mr. D'AMATO. Along the line of our concern for the future of mass transit, I am particularly concerned about the President's proposal for fiscal years 1983, 1984, and 1985, which would totally eliminate by 1985 all operating subsidies. In this regard, I think it is important that we understand that after the disposition of the Senate Concurrent Resolution 9, there will be other opportunities to examine the validity and the need for the total elimination of these subsidies within the next 4 years. Is that not true?

Mr. DOMENICI. Yes, the Senator is correct. I do not want to overstate or understate the degree of optimism that should exist, but the direct answer is, yes, this item is part of function No. 400 within the budget function and it includes all Federal transportation programs. The functional levels are reviewed twice a year, as the distinguished Senator from New York, Senator MOYNIHAN, knows, because he serves on that committee.

Mr. MOYNIHAN. To my sorrow.

Mr. DOMENICI. Mr. President, we are delighted that the Senator is on the committee.

At least twice each year during those years that the Senator mentioned, that function, as far as its grand totals, will be before the Senate. The first one for fiscal year 1982 will be here right after the Easter recess. Obviously, it will include within it the proposed savings that this instruction mandates on the committee. But it certainly would be appropriate, at that time or any time in the future, to examine the particular question of Federal assistance and mass transit.

Now, that is an oversimplification because, obviously, you would have to change some laws by then. You will have a new bill you would have to get passed and you would have the overriding concern of the administration that we keep the long-term commitments of the Federal Government to a minimum.

But the technical answer is absolutely as the Senator stated it. I am certain that it will be looked at and reviewed.

Mr. MOYNIHAN. Mr. President, I wonder if I can make one additional statement concerning a thought that is shared with my distinguished associate from New York. That is that it has fallen to the Senators from New York to have this dialog. It may appear, and would normally not be unreasonable to assume, that New York had a special interest in this matter.

May I put it to the Senator that we do have a special interest, which is simply that we have had, apart from the city of Boston, the oldest mass transit system in the country. We know a lot about it. We built our city around it. We know the special quality and central importance of this kind of transportation.

But we are not recipients of singular benefits from the Federal Government. To the contrary, there is no city in the United States to which as low a portion of its operating costs are provided by the Federal Government as New York City. While we have about 35 percent of the mass transit rides covered by the operating assistance in section 5, the subsidy only accounts for 8.9 percent of New York's operating costs.

I am sorry to say that Albuquerque does not report its percentage.

Topeka, Kans., receives 35.4 percent; Des Moines, Iowa, receives 27.5 percent; Memphis, Tenn., receives 29.3 percent, and Detroit, Mich., receives 53.4 percent.

We are not the principal beneficiaries of this program, but we think the Nation would be.

Mr. President, I ask unanimous consent that a table entitled "Percentage of Operating Expenses Covered by Federal Aid for Cities Represented by Members of Senate Budget Committee" be printed in the RECORD, along with my statement in the RECORD of December 12, 1980.

Mr. DOMENICI. What did the Senator say about Albuquerque?

Mr. MOYNIHAN. Unfortunately, we have no data on Albuquerque.

Mr. DOMENICI. Mr. President, I have no objection.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PERCENTAGE OF OPERATING EXPENSES COVERED BY FEDERAL AID FOR CITIES REPRESENTED BY MEMBERS OF SENATE BUDGET COMMITTEE

Member	Major city	Percent covered by sec. 5 in 1980
Mr. Domenici	Albuquerque	(1)
Mr. Armstrong	Denver	13.4
Mrs. Kassebaum	Topeka	35.4
Mr. Boschwitz	Minnesota-St. Paul	19.2
Mr. Hatch	Salt Lake City	25.6
Mr. Tower	Dallas	17.8
Mr. Andrews		(2)
Mr. Symms	Boise	35
Mr. Grassley	Des Moines	27.5
Mr. Kasten	Milwaukee	21.8
Mr. Quayle	Indianapolis	37.94
Mr. Gorton	Seattle	14.74
Mr. Hollings	Charleston	(1)
Mr. Chiles	Miami	13.3
Mr. Biden	Wilmington	26.3
Mr. Johnston	New Orleans	25.2
Mr. Sasser	Memphis	29.3
Mr. Hart	Denver	13.4
Mr. Metzenbaum	Cleveland	17.8
Mr. Riegle	Detroit	53.4
Mr. Exon	Omaha	33.7
Mr. Moynihan	New York	8.9

SURFACE TRANSPORTATION ACT OF 1980

Mr. MOYNIHAN. Mr. President, earlier in the debate on the mass transit bill, I called attention to the extraordinary disparities between the levels of support for the Nation's largest transit system, that of the New York-New Jersey area, and the other systems in the country. I noticed the very modest but important changes that the new bill would make. By modest, I mean they are vital to us but they only close an intolerable gap and make it less intolerable.

I observed that the Senators opposite are taking upon themselves the responsibility to avoid the crisis in mass transit by the failure to pass the mass transit bill.

I would like to mention one particular. That is that the bill before us and the committee report, which the chairman has so brilliantly brought forward to this floor, makes possible a change in the congressionally mandated provisions for the handicapped that would be possible for the New York-New Jersey metropolitan region to put into place. If these new provisions are not law the first of January, which they could be only by allowing this body to vote, to work its will, if they are not in place, the transit systems of the city of New York and northern New Jersey are not going to be able to abide by Federal law. We will be in violation of Federal law. There will be no way to come into compliance, and you will have the bizarre and altogether unnecessary situation of the Nation's largest system becoming, in effect, illegal very possibly under court orders which would make it impossible to function, and the New York metropolitan region could come to a halt. A crisis of unprecedented proportions would come about and it will have come about because of the willful determination of the gentlemen opposite not to allow the Senate to work its will.

There is no point in shouting about this. Those opposite know well enough what they are doing. They are about to put into place an altogether unnecessary crisis, an altogether destructive one, and, if they do, let the blame be squarely placed where it clearly belongs, on those gentlemen who have only to allow the Senate to vote on this bill to make responsibility for the solution, such as it will be, ours. If they do not, the crisis will be theirs. They must expect to hear about it daily when it comes about. I hope they understand what they are doing.

I fear they are not listening. They will not hear us; they will hear an outraged metropolis not 3 weeks hence.

Mr. President, I yield to the Senator from California.

Mr. MOYNIHAN. Mr. President, I do want to say that the mass transit systems that would be most affected by this legislation are those in the medium-sized cities in America that have grown up in response to this Federal program. While it is described as a subsidy, sidewalks are a subsidy, highways are a subsidy, canals and improved rivers are subsidies. The Government has long learned that facilitating society makes good sense. The Senator from New Mexico and I have been much involved in that concerning waterways.

We think about this issue as having as much to do with energy in the form of oil as any other matter.

I thank the distinguished chairman for his generous, open, and precise comments.

Mr. DOMENICI. Mr. President, I will close by saying to both Senators, I understand the concern they express and I concur wholeheartedly that it is not exclusively a New York problem. On the other hand, I think I would be remiss if I did not say that I really hope this whole exercise that we are going through in budgetary restraint, in addition to saving taxpayers' dollars, pushes us to be more innovative, to use the resources that we have at the national level in a better way, to better prioritize them.

We have had a tendency to try to shotgun and try to solve many, many problems. It might very well be had we not done that, that the President would not be recommending major changes in subsidies at this time. It might be a very high national priority.

The problem is we have tried so many things and have tried to do so many

things. When you try to bring it under control, you certainly have to attack a broad spectrum of programs.

Having said that, I ask the junior Senator from New York if he desires additional time.

Mr. D'AMATO. I would like to have 5 minutes, if I may.

Mr. DOMENICI. I yield 5 minutes from the resolution.

Mr. D'AMATO. First, I thank my distinguished colleague from New Mexico and the distinguished senior Senator from New York for engaging in this colloquy on a most important issue. I think it is more important than just the colloquy.

Mr. President, I have stated on the floor of this Chamber that I am supporting the administration's proposal to halt runaway inflation and bring the Federal Government under control. I believe, and have stated many times, that the Federal Government dispenses taxpayer dollars to many programs that have become fat with administrators who do not seem to be able to control the voracious appetite of many special interest groups. However, when it comes to the area of mass transit, I believe that Federal assistance in the areas of operating subsidies and capital grants are absolutely necessary if our cities are to survive.

I certainly hope that it is not national policy to force commuters and urban residents to use their cars to get to work. I certainly hope that we still believe that conservation is in the national interest. Finally, Mr. President, I know that many of my colleagues are not in favor of bankrupting the mass transit systems in their States.

Unfortunately, many of my colleagues may assume that my only concern is for New York City. But let me assure you that I am equally concerned with the transit systems of many other cities across this Nation. Cities like Birmingham, Chicago, Boston, Philadelphia, Detroit, Los Angeles, Baltimore, Pittsburgh, San Francisco, and Atlanta, as well as many other cities and counties throughout the Nation.

On Thursday, March 19, I chaired the hearing on the 1981 supplemental and 1982 budget for the Urban Mass Transportation Administration. In discussing the effects of the proposed elimination of operating subsidies with Mr. McManus, the Acting Administrator of UMTA, the plight of the smaller transit systems became evident. He stated that if operating assistance were eliminated, there would be a dropoff in ridership and that increases at the fare box could not rise to meet the reduction in revenue. In fact, he agreed with me that the loss of operating assistance money would probably lead to either a doubling of the fare, or closing down of some of the smaller transit systems.

Mr. President, I ask whether this Nation can afford to cast our mass transit systems aside. In fact, in an article entitled "Rumbling Toward Ruin" in the March 30, 1981, issue of Time magazine, a bleak picture is painted of America's mass transit systems. In addition, in today's Wall Street Journal an article entitled "End of the Line?; Mass Transit Is Facing a Financial Crisis; Service Cutbacks and Higher Fares Loom." I ask unanimous consent that these two articles be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Apr. 2, 1981]

END OF THE LINE?—MASS TRANSIT IS FACING A FINANCIAL CRISIS; SERVICE CUTBACKS AND HIGHER FARES LOOM

(By Harlan S. Byrne)

Mass transit is lurching toward a financial crisis.

For the 12 million or more people who regularly ride buses and trains, the prospect is unpleasant: higher fares and reduced service, possibly no service in some areas. For taxpayers generally, the cost of subsidizing mass transit will continue climbing.

Beset by inflation, recession and labor problems, several systems are already in serious financial trouble. Commuters, up in arms over fare increases, are beginning to desert buses and train, just a few years after hundreds of thousands were lured out of their automobiles by shortages and soaring prices of gasoline.

To make matters worse, the Reagan administration is planning to phase out more than $1 billion a year in federal subsidies that have covered about one-third of the operating deficits in recent years. The remainder of the money has come from state and local governments, but they too are financially pressed; hence, their lawmakers are resisting transit operators' pleas for more help. Transit managers are under mounting pressure to control operating costs, which have been rising 17 percent a year in the past decade, and to improve efficiency.

"BLOOD WILL POUR"

"Transit systems are confronted with a crisis, and they aren't prepared for it," says Robert P. Neuschel, director of Northwestern University's transportation center and a professor at the university's J. L. Kellogg Graduate School of Management. "I see no end to the pain, and when the buses and trains stop running, the blood will pour out. The last job I would want today is managing a transit system."

Recently, transit's troubles have been dramatized by a string of setbacks. In December, the Boston transit system shut down for a day before it was reluctantly bailed out by the Massachusetts legislature. Its travail, deeply rooted in fat labor contracts and political obstacles to higher fares, is far from over. Next fall, a spokesman says, the system may run out of money for the third time in three years, again bringing service to a halt.

In Birmingham, Ala., buses have stopped running indefinitely; the money ran out at the end of February. After two fare increases last year, ridership dropped 17 percent and revenues declined. A hostile state legislature has balked at providing additional money. "I can't see the light at the end of the tunnel, but I'm still groping," says Jerry Haight, general manager of the Birmingham transit system.

Philadelphia's 400,000 rail and bus commuters are experiencing the sixth strike there in three years. It is pushing the transit system close to bankruptcy. The Southeast Pennsylvania Transportation Authority has been plagued by chronic money shortages, a deteriorating system, and a 20-percent drop in ridership on its rail commuter lines following a 60-percent fare increase and sharp service cuts last year. "We're in real trouble if we lose our federal financing," says George Miller, controller of the authority.

One of the big financial juggling acts involves Illinois' Regional Transportation Authority. It oversees the Chicago Transit Authority and suburban rail and bus service in a six-county area. The CTA consumes 70 percent of the RTA budget. RTA officials say that the entire system, the nation's second largest, will close down in mid-April unless the state rescues it.

The RTA, which is more than $100 million short of meeting this year's budget, is mired in political controversy. As part of the price for pushing a bailout plan, Gov. James Thompson, a Republican, is seeking to replace the RTA board, which is dominated by Chicago Democrats, with a fiscal watchdog agency controlled by the state.

Chicago-area commuters, hit by eight fare increases in 13 years and faced with still another along with reductions in service, are riled by reports of excessive labor costs and waste in the Chicago transit system. Chicago's bus and train drivers are the nation's highest-paid, drawing annual base pay of nearly $25,000 after 42 months, besides overtime and other benefits that often run as much as $5,000 a year.

Henry Lowenstein, a transit expert who is a professor at the University of Illinois College of Business Administration, says that more and more commuters in the Chicago area are going back to driving their cars. He also has firsthand evidence that some people are seeking employment closer to home because of rising transit costs. His wife, who is personnel manager for a suburban company, recently has recruited several secretaries who were leaving jobs in downtown Chicago because of commuting costs.

HEADACHE IN NEW YORK

In a class by itself when it comes to transit problems is the New York City area, which probably accounts for 25 percent of this country's regular users of mass transit. Well publicized is the decrepit condition of New York's once-efficient subway system. Gov. Hugh Carey is seeking to get together $5 billion of state aid to help finance rebuilding of the subway, though that is less than half of what transit authorities feel is needed. Fare increases are certain this year.

Adding to New York's headache is the planned elimination of federal operating subsidies. That would cost the city nearly $150 million a year.

Oddly enough, the Federal Government gets both credit for rebuilding many of this country's approximately 1,000 transit systems and blame for contributing to current financial difficulties. Serious federal efforts began in the mid-1950s, when Washington helped state and local governments take over failing private systems. By that time mass transit had been in a 20-year decline in ridership after reaching a peak shortly after World War II. In the early '70s, governments at all levels stepped up their participation in mass transit, mainly helping to finance new facilities and equipment.

The big push came after the Arab oil embargo of 1973–74. Federal capital grants since then have exceeded $13 billion, to provide 80% financing of new equipment and facilities, including nearly 25,000 buses and rapid-transit cars.

SUBSIDIES BLAMED

More crucial, perhaps, to the current situation was the enactment of the National Mass Transportation Assistance Act of 1974 to give cities additional aid in the form of subsidies to help cover operating deficits of transit systems. For many years, mass transit had made at least a small profit, but beginning about 15 years ago, deficits appeared and have been steadily widening. No wonder then, experts say, that transit operators eagerly went after the extra assistance from the federal government. But "operating subsidies took away some of the incen-

tive of transit managers to increase efficiency and to hold down labor costs," says Prof. Neuschel of Northwestern.

At any rate, federal outlays for operating subsidies rose from $142 million in 1975 to $1.1 billion last year and an estimated $1.4 billion this year. Rising dependence on these subsidies makes it hard for transit systems to adjust to their prospective loss beginning in 1983.

Although the Reagan administration has indicated that it will continue 80% financing of new equipment purchases and will probably help to finance new rail and subway systems already under construction, it plans to halt aid for new rail starts. The American Public Transit Association, which is leading industry opposition, is seeking a compromise in Congress to salvage part of the operating subsidies. The group argues that because the federal government financed big new transit fleets, it should at least continue operating subsidies to cover maintenance costs. Transit managers doubt, however, that Congress will substantially alter the Reagan plan.

As a result, the outlook for a number of big projects is uncertain. Among them are a 14-mile, $1 billion rail line proposed in Houston, an $80 million monorail system that, would ring downtown Indianapolis, a $1 billion rail system for Chicago, and a $2 billion, 18.6-mile subway system from downtown Los Angeles to the Hollywood area.

Thanks to federal grants, the Los Angeles system has doubled its bus fleet and ridership, and authorities there hope they can make a convincing case that a subway further easing traffic congestion makes economic sense. But they're uncertain whether it can be done without federal help. Another pressing concern of the Los Angeles system is the impending loss of $60 million a year in federal operating subsidies.

Experts say that federal operating subsidies have been covering up the failure of transit managers to control costs. According to a recent report of the General Accounting Office, transit operating costs more than doubled from 1973 to 1979, with two-thirds of the increase going to labor. (Contrary to general belief, diesel-fuel costs accounted for less than one-third of the increase.) Productivity of transit systems declined during the '70s, with one measure, passengers per employe, showing a 13 percent drop.

CRUNCH AND DISCIPLINE

The current crunch is forcing transit managers to exert more discipline over costs, experts feel. A number of systems have obtained concessions from labor unions, such as power to hire part-time drivers for peak hours and thereby reduce overtime and, in some cases, the number of full-time drivers. But that has become a fighting issue in many cities and is one of the sticking points in the Philadelphia strike. Some transit authorities also are talking of the need for wage rollbacks in some areas. In Chicago, union leaders say that any such moves will be resisted and could provoke walkouts.

Prof. Neuschel feels that more systems will have to adopt fare structures that put a premium price on peak-hour service and scale the fares to the length of trips. Innovative marketing tactics may become more widespread. On the unusual side is a trial program to sell newspapers on buses of Indianapolis Public Transportation Corp. The system also is joining a department store in promoting the sale of television sets through product demonstrations on express buses.

"We're looking for every dime we can scrape up," says John N. Gobis, director of marketing for the Indianapolis system.

[From Time Magazine Mar. 30, 1981]

RUMBLING TOWARD RUIN

Nearly 30 million people ride subways, buses, trolleys or commuter trains every weekday in the U.S. Yet everywhere mass transit is either stalling or rumbling inexorably toward ruin. Items:

In Philadelphia last week a bumper-to-bumper procession of cars, sometimes ten miles long, inched into the city while subways, buses and trolleys stood idle, sidelined by a strike of 5,000 transit workers, the fourth such in six years. Thousands of commuters from the city's outskirts tried to get downtown via Conrail, but that overtaxed railroad line had to leave hundreds stranded on platforms. Some of the 400,000 Philadelphians who rely on public transit took to bicycles to get to work. The strike, sparked by union protests over the hiring of part-time help and a decision to require maintenance workers to pass proficiency tests, is costing the city $3 million a day in business and keeping 15% of schoolchildren at home.

In Birmingham, the bus system has been shut down for more than three weeks because of insufficient funding. Some 30,000 riders have been affected, and the school system has signed a contract with the Yellow Cab Co. to provide transportation until the end of the school year. The only proposed solution to the shutdown: nearly halving the 43 routes to 22 and operating only from 7 a.m. to 7 p.m., weekdays, a 65% cutback in daily service.

In Chicago, the nation's second largest transit system (1 million subways, el and bus passengers a day) is going flat broke while the state legislature bickers over funding. Businesses and commuters are already reserving hotel rooms, forming car pools and making other contingency plans for a shutdown that could come as early as this week.

Boston, which closed down its entire transit system for 26 hours last December, has just enough money to operate its subways and buses (300,000 riders) through the fall. City officials have already been forced to lay off 100 of the 6,700 transit workers, and only narrowly averted a walkout last week by postponing the layoffs of an additional 220 employees.

In New York, whose transit system is the nation's largest (5 million daily users) and may also be its worst, already beleaguered straphangers were horrified to read headlines predicting a $1.55 fare by the summer of 1983 (vs. 60¢ today and 30¢ in 1970) in return for steadily deteriorating service in graffiti-sprayed cars.

How did the U.S. transport itself into this mess? Three groups contributed mightily: pusillanimous politicians who refused to risk their constituents' wrath by asking for fare increases when they were unquestionably essential; inept managers who, despite in many cases handsome salaries and generous expense accounts, proved incapable of managing; and inflexible unions that pushed labor costs sky-high (they account for 77 percent of Chicago's operating expenses).

Aggravating the situation were a number of long-term trends. In the 1950's, transit ridership declined precipitously (see chart). Americans fell in love with the automobile, honeymooned on new highways and married into the suburbs. Subways and buses were not part of the post-World War II American dream. When the energy crisis hit in 1973, the country found that its railroad beds had deteriorated and its subways were falling apart. The Federal Government called for more efficient public transit and urged private companies to design a better bus (see box). Mass transit was going to be the methadone that would help America withdraw from its addiction to foreign oil. It would unclog crowded highways and improve the quality of air. Besides, it was an economic necessity: people needed a reliable means of getting to work without being exhausted in the process, businesses needed a way to get customers downtown.

Public transportation is in hot demand again, but today no one wants to pick up the tab. A decade ago, to lure people back to mass transit, city and state officials made the mistake of holding fares to unrealistically low levels. From 1970 to 1975, while inflation was rising nearly 40 percent, fares were not increased at all in many cities; in some, they actually decreased. Mass transit was the closest thing to a free ride.

As labor and energy costs continued to shoot up, fares generally were paying only about half the operating costs. Increased ridership actually exacerbated the problem: rush-hour crowds require heavier overhead, but do not generate enough revenue to cover all off-hour operations. A pattern emerged in which budget deficits were picked up by the Federal Government or, more often, the states. The politics of mass transit sharpened old rivalries: downstate vs. upstate, rural vs. urban.

Like many U.S. voters, Ronald Reagan does not see urban mass transit as a high national priority. Says the President: "There is no reason for someone in Sioux Falls to pay federal taxes so that someone in Los Angeles can get to work on time by public transportation." Federal grants for major construction projects in 1981 will total $3.3 billion; operating subsidies, $1 billion. The Reagan Administration would like to limit, if not eliminate, this aid. High on the Reagan hit list is funding for any new mass transit projects (usually 80 percent federal, 20 percent state), throwing a wrench into planning in Los Angeles and Houston. Construction will proceed on projects already under way—subways in Atlanta and Baltimore, an elevated line in Miami. But some planned extensions are in jeopardy, and transit officials fear that many existing systems will be in trouble without federal help.

Such fears could prove self-fulfilling. Transportation Secretary Drew Lewis has indicated that he also favors slowly eliminating operating subsidies in order to force systems to become cost-effective. Says he: "We do not plan simply to walk away from the transit systems, because we realize that to do so would be to shut down most of them."

Although the average city gets only 13 percent of its operating budget from Washington, cutbacks are bound to mean rising transit fares, reduced services and greater demand for local and state subsidies. Such cutbacks will hurt small cities more than large ones. New York derives less than 10 percent of its operating expenses from federal subsidies, but Corpus Christi gets 69 percent, Grand Rapids 44 percent and Peoria 35 percent. Lewis contends that rehabilitating existing systems will be a top priority. Says he: "We're trying to emphasize large cities, older cities over new systems."

Nowhere does a system need rehabilitation more than New York City. Its subways are a filthy, Dantesque netherworld, plagued not merely by delays (one train in every ten is late) but by violent crime (18 murders, 12,000 muggings, robberies and other felonies in the past year). The Metropolitan Transportation Authority (MTA) carries one of every six people using public transit in the entire nation. The city cannot function without it. During a ten-day strike last spring. New York firms lost about $100 million in sales each workday.

After the 1980 strike, the MTA, already running $400 million in the red, raised the fare from 50 cents to 60 cents. Even without a cutback in federal funding, the price of a token could rise to $1 by summer. One survey shows that 50 percent of New York's riders would willingly pay the dollar if it would mean safer, more efficient service. But the higher fare is unlikely to bring any such improvements. Although the massive system would cost $55 billion to replace, only $300 million a year is being spent on rehabilitation and improvement, $700 million short of what experts say is needed. The Reagan focus on capital improvements may come just in time. Although the accepted life span of a subway car is 35 years, 567 of the MTA's 8,500 cars are more than 30 years old. About a quarter of them are out of service at any given time for maintenance. Soon after shiny new cars were introduced, they had to be withdrawn when they developed cracks in their undercarriages. Admits MTA Member Steven Berger: "The only way at this point to fix things is to shut down the system for a week and call in a faith healer."

To make matters still worse, New York has been facing a congressional mandate to equip subway stations and buses for the handicapped. The MTA estimates that this would cost $1.4 billion over the next 30 years, plus $100 million a year in operating funds. The Reagan Administration may relent and allow New York to provide special but separate facilities for the handicapped.

President Reagan, however, has reaffirmed support for Manhattan's Westway, a six-lane superhighway slated to run for 4.6 miles along the Hudson River. The highway, with an estimated price tag of $1.7 billion, would receive 90 percent of its funding from the Federal Government. New York City Mayor Edward Koch has blocked the project in an effort to get parallel funds from Albany for mass transit improvements or to get Governor Hugh Carey to ask Washington to trade in highway funds for transit money.

In Boston, the finance fight is becoming another Battle of Bunker Hill. Until citizens passed the tax-cutting Proposition 2½ in November, the state legislature regularly bailed out the Massachusetts Bay Transit Authority (MBTA), which serves 79 communities. The 1981 MBTA budget was set at $6 million below the 1980 budget of $340 million, and already the system has exceeded its monthly allocations by nearly $2.4 million. At this rate, the MBTA will be broke by the fall.

Last week MBTA Director Barry Locke laid off 45 executives and 100 employees (not including 200 "door guards," who pull down as much as $33,000 a year for making sure that automatically operated doors open and close). Another 250 MBTA personnel are slated to be laid off April 3. Fares were doubled from a ridiculously low 25 cents to 50 cents last June. Locke had planned to eliminate Sunday service and school bus transportation but limited the cuts in the face of protests. Two subway stations have been shut for a saving of $294,000, and more stations are expected to be closed on weekends. But even those cuts will not be enough to keep the system solvent.

The Chicago Transit Authority (CTA) also has severe money problems. Chicago's bus drivers and motormen are the highest paid in the nation: $24,689 after 42 months. The CTA raised fares from 60 cents to 80 cents this January and promptly lost 6 percent of its riders. During the past two years the Federal Government has spent $143 million to help underwrite expenses, but such grants are bound to be cut. The projected deficit for 1981: $150 million.

Not all the crises involve antiquated subway systems. The prototype of modern transit, the San Francisco region's $1.7 billion, 71-mile Bay Area Rapid Transit (BART) has had problems as complex as its technology. Says American Public Transit Association Spokesman Al Engelken: "We were going to the moon in the '60s, and we figured we could just slap space-age technology into the subways. But what works on the moon doesn't always work in an urban environment." Indeed, BART's fully automated "train control system" was too finely tuned to withstand daily transit pressures and constantly broke down.

From the day it opened in 1972, BART never attracted enough passengers to pay its way. After a fire broke out in its high-technology San Francisco-Oakland tube beneath the bay in 1979, killing one and hospitalizing 40, ridership plummeted from 150,000 a day to 110,000. By 1979 losses were more than $6 million a year. A 1980 fare increase (from 30 cents to 50 cents sent another 8 percent of the riders scurrying elsewhere for transportation. By extending its hours from 8 p.m. to midnight, improving maintenance and getting trains to run pretty much on time, however, BART has now brought ridership up to 165,000 people.

New systems have benefitted from BART's mistakes. The year-old San Francisco subway, which runs about 30 miles and cost only $333 million; shares tunnels with BART and daily transports 100,000 people without hitches. In Washington, D.C., the Metro has been a mass transit showcase. Stations with vaulted ceilings resemble underground cathedrals. Says Engelken: "It's accident-free, clean, safe and on time." But the system cost $71.3 million a mile (*vs.* BART's $22.5 million), and all of it was built at federal expense.

So far, 37 of Metro's planned 101 miles are finished, with work progressing rapidly on lines linking affluent Maryland and Virginia suburbs to downtown. Nearly 300,000 people ride it every day. But the graduated fare, ranging from 50 cents to $2.05, would have to be more than doubled to make the system pay for itself. Losses for 1981 are estimated to be $131.5 million. While the Reagan Administration has promised at least another 40 miles of Metro, the routes that would run through Washington's poorer black neighborhoods remain a low priority.

The Metro may turn out to be the Rolls-Royce of American mass transit. Because of its high cost, transit planners question whether many cities have a dense enough population to deserve "heavy rail" or underground transit. The Department of Transportation rejected Houston's request for a $1 billion heavy rail line last year. Detroit too is in limbo over a proposed 15-mile light railway system linking the city with its northern suburbs. Miami still gets funding for its $867 million, 21-mile elevated rail line, but its downtown "people mover" may fall victim to federal budget cuts.

The country's newest subway system, Atlanta's MARTA, opened its first twelve-mile segment in 1979 and is scheduled to operate a second segment from downtown to the new airport in 1985. The availability of federal funding will determine how much more of the $3 billion rapid-rail system gets built. In Baltimore, construction is half completed on an eight-mile rail line from downtown to the northwest suburbs, but the second leg, in an area where a 15-mile auto commute can take an hour, is in jeopardy. The projected cost of the undertaking: $958 million.

Even Los Angeles, land of the ubiquitous auto, has made what is proving to be an ill-timed move toward mass transit. With buses now moving 1.25 million riders a day, voters approved a .5 percent increase in the 6 percent sales tax last November to finance a metro rail system. One arm would have linked downtown Los Angeles' Union Station with North Hollywood and the San Fernando Valley, an 18-mile project costing $2 billion. Other plans called for a 2.9-mile downtown monorail "people mover" and two elevated systems along the Santa Ana Freeway corridor (17 miles) and the Harbor Freeway corridor (20 miles). With federal money drying up and Proposition 13 in effect, there is now little hope that such projects will be built.

One city in California is making do without federal funds by looking to the past. San Diego will resurrect its reliable old fixed-rail trolley system this summer. Using an existing railroad right-of-way, the city has upgraded the roadbed and laid new rails for a 16-mile run between downtown San Diego and the Mexican border. The cost: $5 million a mile, 7 percent of what the Washington Metro cost and 1.3 percent of what New York's Westway would cost. Featuring a $1 fare, the bright red "Tijuana Trolley" is expected to carry about 300,000 passengers a day. The funding comes from state gas taxes and the cars come from Germany.

Of course, trolley lines—even good ones—are hardly the answer to the nation's transit woes. And it is beyond dispute that, despite America's romance with the automobile, major U.S. cities—like major cities anywhere in the industrialized world—must have effective mass transit systems if they are to survive. The economics of OPEC and the hazards of air pollution leave no other choice. The question is not whether something should be done to make such systems work. The question is what should be done, and how urgently.

Mr. D'AMATO. As a member of the Banking, Housing, and Urban Affairs Committee I will be working with my colleagues to insure that mass transit receives its fair share of scarce dollars. I will work to prevent the disintegration of our urban areas that depend on mass transit for their economic lifeblood. Employment opportunities, economic development and our environment are affected when mass transit systems do not survive. We must not turn our back on mass transit: We must work to make the systems financially strong and physically able to cope with the increasing influx of passengers.

With the able leadership and assistance of my distinguished colleague the senior Senator from New York we will work together for mass transit. He has already begun the task and I will attempt to continue it, both in the Banking Committee and then in the Appropriations Committee. A monumental but necessary task saving mass transit so that workers across this great Nation can get to their jobs and help lead the way to economic recovery.

Mr. President, I yield back the remainder of my time.

UP AMENDMENT NO. 47

(Purpose: To require that reductions be made according to the principle of equal sacrifice)

Mr. MOYNIHAN. Mr. President. I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN) proposes an unprinted amendment numbered 47.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, between lines 23 and 24, insert the following:

It is the further sense of the Senate that these reductions should embody the principle of "equal sacrifice" from every state with respect to the programs and activities under the jurisdiction of each Senate committee. For this purpose, "equal sacrifice" shall mean that to the extent possible each committee will recommend reductions that are proportionate to the population of each state. Any committee that is unable to embody the principle of equal sacrifice in its proposed reductions shall explain why and recommend steps such that this can be done in any future reductions; and

Mr. MOYNIHAN. Mr. President, I have given to this amendment the informal term of the equal sacrifice amendment.

It arises from a concern that was expressed at some length and on repeated occasions during the markup by the Committee on the Budget of the resolution now before us. There inevitably arises a regional imbalance from the nature of the action we are taking in this emergency measure, this imbalance of impact coming from the existing imbalance of Federal expenditures in the Nation. Our understanding of this is a new matter. While it has for years been generally recognized that there are regional imbalances in certain kinds of Federal programs and that they are deliberate.

The Bureau of Reclamation, founded in 1902, was originally confined to 17 Western States and, if my memory serves, it is now 18. These are States of lands once shown on the maps of the United States as the Great American Desert, from whence now come the richest yields of grains, fruits, and what-will-you of any agricultural land in the world.

I have, several times, remarked that in his distinguished state of the Union message, our President—whose daily recovery continues to hearten us and as he amazes us with his own vitality—made the remark that the taxes of the Federal Government must never be used again as an instrument for social change. I said at the time that that sounded to me like a remark a speechwriter might produce; I certainly was not going to spend my time harassing the poor President for having said it. Still, it is a fact that the Bureau of Reclamation brought more social changes to the Imperial Valley of California than anything that has happened there since the receding of the Ice Age. And there is nothing wrong with that social change whatsoever.

As a matter of fact, it is a curious fact that the most substantive exchange that took place in the Committee on the Budget before we reported out this resolution was an inquiry by the distinguished Senator from North Dakota, who sought to make certain that there was nothing in this budget resolution that would in any way reduce funds for the Rural Electrification Administration. He was assured there was none.

I said to him that I thought there ought not to be any, because the Rural Electrification Administration, which is an idea proposed by a New York President, had brought immense social change to the Great Plains. It has taken the people of those parts of the world out of the mud and out of the dust, and created the incomparable agricultural region of the world.

We were for it. New Yorkers had first proposed it. A New Yorker, I point out, had proposed the Bureau of Reclamation, a Republican in fact.

So, I asked the Senator from North Dakota, a gracious and thoughtful man, who said that his personal experience with rural electrification had been that it was a serious and important program; I asked if others of the committee would consider that our urban experience with things like the urban development action grants were equally positive and responsive to problems of even larger concern.

The distinguished Presiding Officer, whose role it is to sit in patience while people speak at him on occasions like this, comes from a city on the Mississippi River that is the principal city of Missouri—St. Louis—that has had a most extraordinary population decline in the last decade and the greatest outmigration. It is but one city that has been associated with social changes which are not very reassuring and have given rise to problems which are pressing.

Government does not know how to solve them all. No one does. But they will not be solved without Government in some measure and we must not denigrate our capacity, limited as it recognizably is, to do these things. It is too important to us as a nation. A government can be the instrument of the purpose of a free people and it can embrace great causes and do great things, and it must do them equitably.

It is the unhappy result of this measure before us that we are inevitably going to diminish the Federal programs of special concern to the Northeast. The abolition of the Economic Development Administration means a particular loss to us as 56 percent of those funds are spent in the Northeast and Midwest; intentionally so. Just as Franklin D. Roosevelt proposed the Tennessee Valley Authority, it was John F. Kennedy whose encounter with West Virginia in the 1960 Presidential election made him realize that Appalachia was a forgotten and extraordinarily depressed part of our Nation and that an effort should be made on its behalf. There was no Bonneville Dam to be built, but there were roads to be built.

The Appalachian program began. As a young Assistant Secretary of Labor at the time, I was involved in it. It was located in the Department of Commerce and eventually redefined as the Economic Development Administration and made nationwide.

Similarly, with regard to the trade adjustment assistance, which we drastically curtailed, 60 percent of the recipients now live in eight of the Northeast and Midwestern States.

We are talking about phasing out Federal mass transit operating assistance. Thirty-five percent of these mass transit riders are in my State alone. But we continue Federal water, rail, highway, and air transport assistance.

It seems to me there is an egregious regional imbalance involved here. It is compounded by the fact that, whilst we are reducing social programs so sharply, we are committed to an even greater increase in defense than President Carter proposed, and he increased that program in each of his 4 years in office, following President Ford who increased it in his final year. It is an indisputable fact that defense funding is markedly unbalanced throughout the Nation.

Some of this is the inevitable consequence of geography. If you have three Pacific wars in one generation—or two, if you wish—you are going to have a large concentration of military facilities on the west coast. But it remains a fact that in a matter as profoundly important as defense, the State of New York, last year, received $1.1 billion in research and development funds from the Department of Defense; the State of California received $5.5 billion—a ratio of 5 to 1.

It is simply a fact that the increase in defense expenditures compounds the already existing imbalance and the decrease in what we think of as people programs—social programs, if you like—further compounds it.

So, Mr. President, I have submitted an amendment which instructs those committees that must bring about these reductions that it is the intent of the Senate that budget reductions embody the principle of equal sacrifice from every State. It cannot, and must not, be a principle of the U.S. Government that we bring about social change through Federal taxation in some parts of the country and not in others, that the opportunity for equity is at least here.

Finally, as an example of our concern, I ask unanimous consent to have printed in the RECORD an account by a distinguished New York journalist, Mr. Harrison Rainie, of the New York Daily News, of our decision just the other day to reject the proposal of Senator CHAFEE. His initiative was one that would have restored some of the imbalance that exists in this matter, and the votes for the amendment. I have to say, only confirmed the imbalance.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SENATE KEEPS TRIMS FOR RON

(By Harrison Rainie)

WASHINGTON (News Bureau).—While he recovered from an assassin's bullet, President Reagan scored his most important budget-cut victory to date yesterday as his troops held firm in the Senate and defeated a move to restore nearly $1 billion to social programs.

With Vice President Bush waiting in the wings in case his vote was needed to break a tie, Senate Republicans were joined by 17 Sun Belt Democrats in handily defeating the budget amendment by a vote of 59 to 40. Every tri-state lawmaker except freshman Sen. Alfonse D'Amato (R–N.Y.) voted in favor of the plan that, among other things, would have restored $325 million to mass transit in the next two years.

The proposal, offered by Sen. John Chafee (R–R.I.), turned into a textbook Frost Belt-Sun Belt confrontation. When it was over, an ecstatic Senate Budget Committee Chairman Pete Domenici (R–N.M.) told reporters that the President had sailed through "the most critical test" in winning massive budget cuts in the Senate.

Chafee's plan would have added $973 million next year and $1.5 billion in 1983 to an array of programs that are heavily used in the Northeast and Midwest. Appropriations in next year's budget would have included: $25 million to mass transit; $300 million to help low-income families pay energy bills; $450 million to education programs; $50 million to health clinics; $50 million to home weatherization, and $98 million to urban-

development action grants. In 1983, according to the proposal, each of those budget additions would have been kept, and $300 million more would have been added to mass transit.

But it was clear that the Senate was in no mood to trifle with the President's program. "This is just a business-as-usual proposal," stormed freshman Sen. Charles Grassley (R-Ind.). "And the people voted last fall against business as usual."

Mr. MOYNIHAN. Mr. President, if the RECORD carried maps—which it wisely, perhaps, does not—the maps of the States of those who voted for the Chafee amendment and those who voted differently could not demonstrate more strikingly what is the concern of the Northeast and the Midwest at this point.

Mr. President, I ask unanimous consent that the names of Senator RIEGLE and Senator LEVIN be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, the Senator from Michigan is here, and I gather that he would like to speak on this matter. I yield him 5 minutes.

Mr. LEVIN. I thank the Senator from New York.

Mr. President, "mild" is not a word one normally associates with the distinguished senior Senator from New York. But in this particular case he has indeed crafted an amendment which is mild. This amendment simply requests that committees explain any significant deviations from a reasonable rate of return on tax dollars sent to Washington from the various States. It does not require that committees make alterations in law to prevent such deviations; it merely requests that they note them and seek to justify them. Surely that is not an unreasonable request.

What is unreasonable, Mr. President, is the fact that such massive deviations exist. According to the Northeast Midwest Institute, for example, my home State of Michigan ranks 51st in rate of return—yet it has the highest unemployment rate in the Nation and would, by consensus, probably be acclaimed the State suffering most from the current economic downturn.

It is hard to explain to the working men and women of Michigan why they should get back only 66 cents of every dollar they send to Washington when they experience a 14.2-percent unemployment rate in 1980, almost 4 percent higher than any other State. I assume it is hard to explain to the people of Indiana why they get back only 70 cents when they had an unemployment rate of 10.5 percent in 1980. It is especially hard to make that explanation when the people see other States with 3 percent unemployment rates getting back much more than a dollar for each dollar they send to Washington.

Mr. President, that kind of inequity is the result of historic deficiencies in Federal funding formulas. Those deficiencies have concerned many members of this body and this amendment will, if its intent is accepted by all committees, assist us in an effort to better understand the inherent structural properties of formulas which result in this kind of inconsistent expenditure pattern.

Finally, Mr. President, I point out that a good deal of criticism has been directed at the President's budget proposal because many of us feel that it perpetuates and intensifies regional imbalances. I was concerned enough about this charge to ask Mr. Stockman to present to the Senate a regional impact analysis of the budget cuts he proposed.

Despite the fact that such an analysis was promised personally to us by the end of March, we have yet to see any formal document which could be considered, even in the most generous of classifications schemes, to be an analysis of the regional impact of the proposed budget.

I believe that before we act on the reconciliation measure itself, it would be helpful to have some sense of the regional impact it will have. This amendment moves us in that direction. By moving us there, it may also move us closer to the day when Federal formulas are more equitable and more reasonable.

I congratulate the Senator from New York for offering this creative, constructive, and imaginative amendment.

Mr. MOYNIHAN. I thank the Senator from Michigan for his remarks.

The PRESIDING OFFICER (Mr. WEICKER). The time of the Senator from New York on his amendment has expired.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that I be given 5 minutes on the resolution.

The PRESIDING OFFICER. The Senator has that right. The Senator has 5 minutes.

Mr. MOYNIHAN. Mr. President, I have a table of Federal expenditures which indicates that the State of Michigan, with 4.1 percent of the population, paying almost 5 percent of the Federal taxes in this country, receives 3.1 percent of the Federal outlays.

Those numbers—3, 4, 5—do not seem much; but, in effect, next to Illinois, Michigan is getting the lowest of the levels of Federal outlays, and in the end it makes a difference. It cannot but have an impact.

Mr. LEVIN. I fully agree with my friend from New York. The way we phrased it was that we get back 66 cents for each dollar.

The figures quoted by the Senator from New York is really another way, an eloquent way, of reflecting that disparate impact. Indeed, that amounts to billions of dollars over a reasonably short period of years.

Mr. MOYNIHAN. One percent is more than $1 billion.

As we often have had occasion to remark, we become used to talking about billions. A billion minutes ago, St. Peter was 10 years dead.

Large amounts of money are involved here. The unwillingness which is in part reflected in the inability of the regional budget office to give us regional breakdowns is something we will have to come to terms with.

You never really do anything about a problem in Government until you learn to measure it. This is a problem we do not measure, out of a fear of what will be learned. It is because of the concern that the time has come that we do learn the things that prompt the remarks of the Senator from Michigan and me. I thank him.

Mr. President, I thank unanimous consent to have this table printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FEDERAL EXPENDITURES AND STATE POPULATION

[Dollar amounts in billions]

State	Fiscal year 1979 Federal outlays in States	Fiscal year 1979 Federal outlays in States as percent of expenditures in all States	State population	State population as percent of national population
Alabama	$7.4	1.6	3,890,061	1.7
Alaska	1.9	.4	400,481	.2

Mr. MOYNIHAN. Mr. President, I ask for the yeas and nays on this amendment, and I request that the matter be put in the sequence that is being developed, as I understand, to commence at 1:30.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. I yield 5 minutes on the resolution to the distinguished Senator from Michigan.

Mr. RIEGLE. I thank the Senator for yielding. I applaud his leadership on this issue.

Mr. President, I speak now not only as a Senator from Michigan but also as cochairman of the Northeast-Midwest coalition in the Senate at this time.

I believe that this amendment gets at a fundamentally critical item in the budget and in our economic recovery strategy which has not received sufficient attention or work at this point.

When we asked OMB Director Stockman, before the Budget Committee, whether a regional analysis had been done prior to the development of their recommendations, his answer to us was no, that they had not done that. Therefore, no attempt was made to try to craft into the economic recovery strategy any particular regional aspects that might be necessary.

So we asked, "Would you then please do a regional analysis after the fact, to give us a clear measure of how this package will impact the various regions of the country?"

I am sorry to say that that has not been done. We are still waiting for it. I doubt that we will ever get it.

So we are asked here to act upon this matter without having that kind of precise information from the administration. But from what work we can do ourselves, it is clear that the pattern of cuts will fall more severely on the Midwest and the Northeast than they will on other regions of the country. This is due to the nature of the programs that have been targeted for the deepest cuts.

This is compounded by the tax side of the recommendations. We find that they also will work a greater hardship and will be of less value in terms of regenerating the industrial base of our region than they will be for other regions. The fact that there is no refundability provision or extension of the number of years for tax loss carry backwards are serious omissions. These are initiatives that might help in distressed industries like autos, steel, and others, which tend to be centered in the industrial Midwest and in the Northeast.

Between the years 1975 to 1979 the Northeast-Midwest coalition States lost a total of $165 billion in the exchange of money with the Federal Government, while States in the South and West were gainers to the tune of $112 billion.

Michigan lost over $7 billion in this exchange last year, while other States were large gainers. This comes at a time when our State is suffering an unemployment rate of 14.2 percent and over 600,000 people are out of work. These are only the people that we know about. I think there are tens of thousands of others who are not counted because of the way the numbers are aggregated.

We need to look at three issues here. Where do the States start from now, in terms of their current economic circumstances? What is the preexisting pattern of Federal funds flow? And finally what is the impact of the new economic program? When you do this you will find that a number of States in the Midwest and the Northeast are damaged the most on all three counts. We are the States in the worst economic condition to start with. We are the States most discriminated against by the flow of Federal funds. We are the States that will be helped least and harmed most by the budget cuts and the tax strategy.

So, this equity question is a profoundly important one. Not just from the point of view of the narrow self-interest from a given State or a given region. The fact of the matter is that the United States as a whole, all 50 States, cannot be economically healthy as a Nation if there is any region in the country that is in serious difficulty and not regaining its health. That is the circumstance we see here, and that is why the authorizing committees have to be given a sense of direction by the Senate as a whole to try to deal with some of these regional inequities. Then the whole country can go forward. In the end, all 50 States will benefit, if those regions that are in serious difficulty are not made to suffer more but, instead are given a chance to work their way back to strength and economic health.

That is the issue here. It is a profound one. In the rush of circumstance we did not have sufficient time to get the analysis together. There is no greater failing in that regard than the fact that the Office of Management and Budget, despite the fact that they promised they would do this work, has failed to do so and as a result we do not have it here in the Chamber today. That, I think, is an omission that is inexcusable.

At the very least, we should adopt the amendment of the Senator from New York, which I am proud to cosponsor. I think it will give some sense of direction and some degree of equity in the proceedings down the road.

I thank the Senator for yielding.

Mr. MOYNIHAN. I thank the distinguished Senator.

The PRESIDING OFFICER. Who yields time?

Mr. MOYNIHAN. Mr. President. I yield myself such time on the resolution as may be required, simply to conclude the discussion we have had of the pending amendment.

I wish to especially address the senior Senator from Michigan to say that it was his continued concern in our hearings that the Office of Management and Budget or alternately the Congressional Budget Office give us some measure of the extent of the imbalance of the actions we were taking, and we never got it. We never got it largely because it is simply not possible for the Government at this time to do these things, not possible because they do not try. When they do try we will have a new basis for this discussion.

Mr. President, my time has expired on the amendment, and the Senator from Washington may wish to speak to this matter.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, first, I should like to associate myself with the eloquent response of the Senator from New York and add my thanks to his at the report we have received from the majority leader on the condition of the President.

The superficial attractiveness of the amendment proposed by the Senator from New York and now under consideration disappears under analysis like the mist of the morning.

This budget resolution is not aimed at the States', the various States' balance of payments with the Federal Government. It is not directed at asking sacrifices from States as such. It does ask for sacrifices, sacrifices made by people, residents of the United States, in every single one of our States and our possessions.

But the resolution is directed at an even more important goal to all of those people, and it will be accepted by them as the people understand the necessity of what we are doing in working through this specific economic proposal, and others which will follow, toward two specific goals: The first, the reduction and hopeful elimination, of a persistent massive double-digit inflation which is now entering its third consecutive year; and second, the consequent loss of growth in productivity, loss in growth of the ability of this economy to finance the very social programs which are often regrettably the subject of this resolution.

When we have met those twin challenges, we will be in better condition to meet with specific social problems which afflict all of the 50 States of the United States of America.

It is important to repeat, however, that we are dealing here with people and not with States. We are dealing with national goals which can be met only by a national program.

Mr. RIEGLE. Mr. President, will the Senator yield at that point?

Mr. GORTON. The Senator will yield when he has completed his remarks, if the Senator from Michigan does not mind.

The assumptions which underlie this resolution involve perhaps as many as 100 or so specific programs, a few of which will be eliminated entirely, others of which will be cut below the dollar level with which they were supported in 1980 and 1981, and others of which will merely grow less rapidly than might otherwise have been the case.

But to the extent this entire package affects more deeply one section or one group of States in the United States of America than it does others, it will do so only because and only to the precise extent that those programs have disproportionately favored those areas of the country since the time at which they were originally put into place.

Very few of the Senators on the floor of this body have dealt with their votes on specific issues which have come before the Senate since this debate began on the basis of the precise effect of those proposals on their individual States.

I must confess that I do not know whether my own State is affected slightly above or slightly below the average of all the other States. While it is not in the Northeast or in the Middle West, it shares some urban characteristics of some portions of those States. But I do know there are very specific proposals such as those dealing with Public Health Service hospitals, which very much disproportionately affect my own State.

I believe the people of my State understand, however, the overriding necessity for a program of this nature in order to create conditions under which economic recovery is possible or we hope very, very likely.

It seems to me fundamentally in error to deal with this resolution or with any other simply on the basis of a chart which illustrates how many dollars are returned to specific States in respect of how many dollars in taxes are collected within those States.

I might say parenthetically, because my own State is slightly above the average in that respect, I dealt extensively with that issue during the course of my campaign in 1980, not entirely unsuccessfully.

Nevertheless, so much of those figures are skewed by payments under social security programs to those who are retired, and so much more based on military spending, much of which was explained eloquently and accurately by the Senator from New York in his own remarks so as to make such figures almost meaningless.

If we were able and willing constitutionally to require that people retire in the States in which they have earned their living, the ratio on these charts would show better for the State of Michigan and, I suspect, North Dakota and a number of other States. But we are not about to do that in the areas in which people receive social security payments because that is simply not relevant to an argument over a budget resolution of this nature nor, I suspect, is military spending.

I hope and I trust we will constantly work in this body for the most effective use of our military budget, the most effective stationing of our military forces, without regard to specific location. If we should ever go to a situation, which is implied in this amendment, that military bases should be placed throughout the United States in precise proportion to the amount of taxes paid by the citizens of the respective States, we would most certainly be wasting infinitely more money on our Military Establishment than anyone claims we are doing at the present time.

Next, of course, this resolution is not the entire economic recovery package. We will be dealing on a far broader basis with Federal spending in the course of the first budget resolution in the next week or the next month. That will deal with military spending, which this does not; that will deal with taxation policies, which this does not. We have much more to come.

Technically, at least, this amendment is simply irrelevant to a resolution which deals with specific and particular goals by making assumptions about specific and particular programs.

Every Senator has the right to make different assumptions and to try to persuade this body that those assumptions should be changed. Many Senators have made exactly such attempts, and there has been a high level of debate on specific policies here during the course of the last week.

This amendment, to the extent that it is only hortatory, is meaningless. To the extent that it has any meaning it is totally contrary to the entire purposes of the Budget Act. We will have many opportunities to debate these ideas and questions of national fairness about specific programs directed at specific people during the course of the future. But this program deals with people. It asks sacrifices of people not of States. It is designed for economic recovery for people not for States.

The amendment should, therefore, be rejected.

Mr. RIEGLE. Mr. President, will the Senator from New York yield me 5 minutes?

Mr. MOYNIHAN. I would be pleased to do so.

Mr. RIEGLE. Mr. President, I have great regard for the Senator from Washington who has just been speaking, but what he has said will just not stand up under the light.

The administration's budget, which is generally reflected in the resolution before us, does not in any way call for equal sacrifice from the people of the country. Every Senator knows that. Everyone who has analyzed the pledge knows that. It would be fine if it did call for equal sacrifice. It does not.

The sacrifice is not equal on the basis of individuals or of States or of regions. The State of Washington is a specific case. Within the last year or two, the State of Washington has suffered catastrophic damage with the Mount St. Helens eruption. This country has responded with special help to the Senator's State. Insofar as I know, he supports that aid. I have not heard him speak against it. I have heard other Senators from the State of Washington speak for that aid. I doubt that the Senator is prepared to stand up and speak against it today.

I happen to support the special help to his State because of the special circumstances.

Other regions, other States are today suffering from equally catastrophic economic disasters. But the programs that help our States are being sharply and abruptly slashed.

Talk about equal sacrifice for individuals sounds great, but it has nothing to do with the consequences of these budget numbers.

I would be astonished, if the Senator from Washington thinks he can seriously argue that it is fair for one State, year after year, to receive back 66 cents on every dollar it sends to Washintgon, which is the case for my State, while another State receives back $1.45 for every dollar it sends to Washington, which is the case for New Mexico. How is it equitable when many loser States are suffering from a deep recession and many winner States are experiencing an economic boom?

Where is the equity in that? To ignore the inequity in this budget is hurtful to the country as a whole.

I hope that when States have special problems that require special recognition, special concern, national help, that we not turn our backs on that problem. We did not turn our backs on the State of Washington.

We must not come in here today and glibly talk about everybody facing their own problems. You have to speak with some consistency. You cannot come into this Chamber for help, as in the case of Mount St. Helens and then not recognize a national concern for other economic disasters that may be occurring in other places. That is inconsistent. It is selfish. And, I think, it is self-defeating for the Nation.

I support a Federal response to a crisis like Mount St. Helens, and I hope that the people of Washington, Oregon, the Northwest, and other regions of the country would at least listen to our plea and not belittle that plea by saying that this budget calls for equal sacrifice.

If the differentials in Federal funds were only 5 or 10 percent or even 15 percent, that would be one thing. But the regional economic impact of Federal policies are far greater. The differentials are reaching 30 and 35 percent.

My State last year, despite its distressed economic condition, was a net loser of $7 billion to the Federal Government. Some of that money, I might say, made its way out to the State of Washington.

What we are looking for here is some degree of understanding, a degree of equity. I hope that we would never be so blind—either by our own good fortune, if we happen to be in a State that is in fine shape, that we cannot see the legitimate arguments and appeals from people from other areas that are in trouble. That is why we have a National Government and why we are not simply 50 separate States. We are not by any stretch of the imagination, asking for something that is unreasonable here.

Good gracious, people in our States are getting less than our fair share and we have been for a long period of time. The fact that some people on social security retire in the South is a red herring. That is a minor part of the problem. In fact, my State does relatively well in those programs. That does not explain the great differentials. They are coming from other areas.

I hope that at some point that people in our region could get some recognition of their problems. I hope that Senators from other regions will at least be willing to look at the problem. I hope that those on the other side of the aisle

will recognize some of the problems that will be created by their proposals. But we cannot let them dismiss those problems with rhetoric that we are accomplishing equal sacrifice.

If we had equal sacrifice in this package, we would not be on our feet here.

I thank the Senator from New York for yielding me the time.

The PRESIDING OFFICER. The Senator's 5 minutes has expired.

The Senator from Washington.

Mr. GORTON. Mr. President, the Senator from Michigan has made a very eloquent statement, much of which I agree with, except to point out that it is irrelevant to the amendment which is before us.

This amendment asks that, somehow or another, without making any specifics whatsoever, that each standing committee will recommend reductions which are proportionate to the population of each State. That is, as the Senator knows, impossible in connection with a rather specifically oriented proposal of this sort.

It is interesting to note that it refers to the population of each State and not the average per capita income of each State and would, therefore, in its own respect, be unequal from the point of view of need, from the point of view of poverty, and the like.

To the extent that the Senator from Michigan, or any other Senator, finds it necessary to come up with a program which is a valid program directed at a real need and is a specific program rather than the merest of rhetoric, I rather suspect that the Senate will be more than willing to go along with him.

Mr. President, I yield back the remainder of my time.

Mr. MOYNIHAN. Mr. President, I yield myself 1 minute on the resolution.

I say to the Senator from Washington's gracious and concluding remarks that I hope he will not take offense if I say that he is relatively new to this body. He will stay here, if that be his wish, the rest of his life. I hope in that long and distinguished career the day comes when, in fact, this body will consider such issues. It has not come in my time here.

For the record, may I say simply that the amendment does not require that which is impossible. It calls for equal sacrifice "to the extent possible."

With that, we would conclude this exchange, Mr. President.

Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair would advise the Senator from New York that until the Senator from Washington yields back his time the amendment would not be in order.

Mr. MOYNIHAN. Mr. President, before doing that, I have asked for the yeas and nays on this. I am not sure that I asked for a 10-minute rollcall, if I may amend my request in that regard.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, will the Senator yield back his time on the amendment?

Mr. GORTON. Mr. President, I yield back the remainder of my time.

UP AMENDMENT NO. 48

(Purpose: To provide for Medicaid funding for Puerto Rico in the manner currently employed for the 50 States and the District of Columbia)

Mr. MOYNIHAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN) proposes an unprinted amendment numbered 48.

The amendment is as follows:

On page 2, beginning with "$52,144,000,000" in line 17, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following: "$52,026,000,000, and outlays by $36,305,000,000, in fiscal year 1982; and to reduce budget authority by $58,894,000,000, and outlays by $47,565,000,000".

On page 7, beginning with "$4,354,000,000" in line 15, strike out through "$10,870,000,000" in line 18 and insert in lieu thereof the following: "$4,236,000,000 and outlays by $8,714,000,000 in fiscal year 1982; and to reduce budget authority by $4,365,000,000 and outlays by $10,741,000,000".

Mr. MOYNIHAN. Mr. President, this is a matter of equity we wish to raise on behalf of the Commonwealth of Puerto Rico, a part of the American system of government, an island of American citizens who fight American wars and serve in distinctive capacities throughout our Nation, but one which is not represented in this Chamber, certainly by its own choice until this point, but the fact remains.

Puerto Rico has the lowest income of any State or Commonwealth in the American system. It is, therefore, a matter of special concern that, under the President's emergency program, Federal expenditures in Puerto Rico are disproportionately reduced.

The best judgment of Commissioner CORRADA is that Puerto Rico will lose 16 percent of all Federal expenditures on the island as a result of the budget resolution we are dealing with here, as against a national reduction of 4 percent overall.

Puerto Rico will feel four times the impact. We are cutting four times, proportionately, from the community which, in economic terms, is least able to afford these reductions.

The amendment I have before you is a simple act of equity which would, in a very small measure, restore some of the loss and make the effect less calamitous—I hope not to use extraordinary words in these debates, but "calamitous" is not too strong a term to describe the impact of a $300 million reduction in the food and nutrition programs, food stamps, child nutrition, in a population where 56 percent of the population is eligible for, and does in fact receive, food stamps.

My measure, Mr. President, is a simple one. It would treat the American citizens of Puerto Rico, who get sick just as do all Americans and who have needs just as everyone else does. Just as we treat them like the 50 States and the District of Columbia with respect to food stamps, this amendment would treat them the same with respect to medicaid.

In 1972 the Senate Finance Committee, and the Congress, froze the Federal Government contribution to medicaid to Puerto Rico at $30 million. It has remained at $30 million since that time, such that Puerto Rico itself spends almost five times as much on medicaid as the Federal Government contributes, while none of the States pays more than an amount equal to the Federal contribution.

This proportion of contribution is the reverse of what the case would be if the present medicaid formula were made available. My amendment simply makes that formula available. It increases the cost of the Federal Government by $118 million in 1982, and $129 million in 1983. It is simple equity. It is no more than that which automatically applies to any of the 50 States. I follow exactly the same formula currently used to determine the Federal match rate, making no change in it, and in doing so I would restore about one-fifth of the total that we are cutting from Puerto Rico.

Passage of my amendment would be a statement by this body that we are aware of the concerns of the island and we share them.

The distinguished Senator from California has been most active in our councils in urging that such a measure be taken. I am happy to see that he is in the Chamber now. I believe he would like to speak on this matter.

(Mr. NICKLES assumed the chair.)

Mr. CRANSTON. I thank my distinguished friend from New York very much for his leadership in this matter and for his very thoughtful and generous remarks.

I ask unanimous consent to be listed as a cosponsor of the amendment offered by the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Let me say very briefly that I strongly support this effort and will strongly support other efforts to be fair in our treatment of Puerto Rico and its people.

First on the issue of equity, Puerto Rico is the most impoverished society within the American society. The budget cuts that are being brought about through the present reconciliation resolution will, therefore, be more painful and do more harm to individuals in Puerto Rico than to any other region or group within the U.S. system, with the possible exception of American Indians.

Unfortunately for Puerto Rico, there will be no offsetting, balancing aid to Puerto Rico due to the tax cuts since Puerto Rico does not pay Federal taxes to the United States. Thus, Puerto Rico will be hit doubly hard, and I think we have to take that into account and take steps like that proposed by the distin-

guished Senator from New York to deal with their particular problem.

Second, there is a foreign policy issue and, indeed, a national security issue involved in this matter. There is now great emphasis on our interest in stability and in maintaining and developing friendships in the Caribbean, in Central America, where there is the conflict in El Salvador, and in Latin America generally.

If we show total disregard for the people of Puerto Rico, if we permit many Puerto Ricans to slide into even deeper poverty than they presently suffer, and conceivably contribute to economic and social turmoil on that island, plainly this will be very damaging to our national security interests in the Caribbean, Central America, and Latin America.

We should do all that we can to make a showcase of democracy and the free enterprise system in Puerto Rico. We should do all we can to make a vivid contrast on that island as against the situation in Cuba and other nations where the people are under Marxist or other systems. It would be a great disservice to our national interests to not understand the needs of Puerto Rico, not take them into account, and not act in accordance with those needs.

I hope that what has been proposed by the Senator from New York is only the beginning, that before we are done with the budget process we will find other ways to do other constructive, helpful things to take into account the special needs of the people of Puerto Rico.

We should find ways, and I trust before the process is done, between the work in the House and the work in the Senate, we will find those ways to help Puerto Rico move toward economic self-sufficiency and to take into account other needs of the people of Puerto Rico until they achieve that economic self-sufficiency. I will be working with the Senator from New York and the Senator from Michigan and others interested in this matter to see to it that we take these factors into account before our budget is in final form.

I believe the Senator from Michigan, who is very interested in this matter, would like to speak at some point.

Mr. RIEGLE. Mr. President, I ask unanimous consent that I may be added as a cosponsor of the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I see that the distinguished chairman of the Finance Committee is on the floor. I believe he wants to speak.

Mr. GORTON. I yield such time as the Senator from Kansas may desire.

Mr. DOLE. Mr. President, the Senator from New York proposes to add money—that is, reduce the savings—in the Finance Committee instruction. Senator MOYNIHAN would allow $118 million more in fiscal year 1982 and $129 million more in fiscal year 1983, for the purpose of providing medicaid funding in Puerto Rico in the same manner as it is provided in the States.

The reconciliation instruction sets a difficult task for the Finance Committee, and I have said that the Finance Committee will need the maximum flexibility possible in reaching our budget goals. Nevertheless, I oppose the suggestion by Senator MOYNIHAN that this flexibility should be achieved by higher authorized levels of spending.

Mr. President, we have had remarkable agreement, by and large, in working through this resolution. We have agreed to accept firm limits on our ability to spend, in the interest of fiscal control, economic stability, and long-term growth. This is no time to break the consensus that has been achieved.

There are many meritorious proposals that we could act on in the Finance Committee, and this may be one of them. In the 96th Congress the Finance Committee approved an increasing in funding for medicaid in Puerto Rico as part of the Child Health Assessment Act. That legislation was never taken up by the full Senate. So at least the Finance Committee believed it had merit.

Of course, the Finance Committee may still consider this proposal within the budget limit set in the instruction. We will have to weigh alternatives, and it will be difficult. But choices are what we must make, and authorizing a higher level of spending is not the way to proceed.

Mr. President, I am sympathetic to what the Senator from New York attempts to do today but I cannot support the amendment. I think if the Finance Committee can find some additional savings, there may be some way to accommodate at least a portion of the Senator's request.

I have just come from a food stamp hearing earlier this morning where we were reminded again that 60 percent of the people in Puerto Rico qualify for food stamps. At one point, 10 percent of the total program was going into Puerto Rico.

There are a number of things that we are doing in the Federal Government that do the very things suggested by the Senator from California and the Senator from New York.

This does not say that the Finance Committee cannot provide additional medicaid funding. But I would hope this amendment would not prevail. It is new spending and should not be in the reconciliation.

Mr. MOYNIHAN. May I thank the Senator for his open and generous response.

I yield 1 minute to the Senator from Michigan.

Mr. RIEGLE. Mr. President, I am pleased to rise as a cosponsor of the amendment of the Senator from New York (Mr. MOYNIHAN).

It was only 23 days ago that the new administration disclosed the details of its budget proposals to the Congress. Most Senators have spent those 23 days trying to understand how these sweeping recommendations would affect the people and the economies of their own States. Since the people of Puerto Rico are not represented in this body, I commend the Senator for taking leadership with his amendment and I join with him.

Mr. President, the people of Puerto Rico face special problems and they have demonstrated enormous ability in their efforts to deal with those problems. Puerto Rico is an island with relatively few natural resources, but in 40 years it has risen from deep poverty to have a fast-growing economy with the highest standard of living south of the Rio Grande.

Mr. President, Puerto Rico has made those great strides while maintaining a special relationship with the United States. It therefore deserves careful attention from the Senators of all 50 States.

When the Budget Committee was considering the reconciliation instruction that is now before the Senate, I was shown a preliminary analysis of how the Reagan administration's budget would affect Puerto Rico. I ask unanimous consent that a table entitled "Estimated Reductions for Puerto Rico" be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Estimated reductions for Puerto Rico

[In millions]

Programs	*Reductions*
Food and nutrition programs	$300.0
CETA (including training and youth employment programs	140.6
Economic Development Administration	7.3
Farmers' Home/business and industrial loans	19.9
Community development and urban action grants	24.6
Small Business Administration assistance	5.5
Highway construction	1.4
Farmers' Home/water and waste disposal loans	13.3
Farmers' Home/community facilities loans	3.4
Pell education grants	11.3
Elementary and secondary education	26.2
Vocational education	1.5
Housing assistance	
Total cuts proposed in Reagan budget	555.0

Mr. RIEGLE. The table shows that the island's economy would suffer a sudden loss of over one-half billion dollars. That is a huge share of the budgetary burden. it is huge whether we compare it with the island's population or its income or with any other measure. It is too great a burden.

In fact, every Federal dollar lost to Puerto Rico will have a depressing effect on the island's economy that is twice as great as a corresponding cut in the Nation as a whole. Federal funds comprise 31.2 percent of Puerto Rico's gross product—twice the national percentage—even though Puerto Rico ranks behind all States in per capita Federal spending.

As a Senator from Michigan, I have a special appreciation for those facts. My State also ranks very low in per capita spending and would also suffer disproportionately from many of the new policies that have been proposed by the new ad-

ministration. And my State, like Puerto Rico, is being asked to absorb the economic blow of these cuts just when local governments and local business leaders must overcome enormous economic challenges and difficulties.

It is obvious that this budget was not developed with a clear knowledge of Puerto Rico's situation.

The administration proposes deep cuts for Puerto Rico with cuts in job programs, in nutrition programs, and in learning programs that have been an important help in raising the quality of life for Puerto Rico's residents.

The administration wants to rely solely on general policies to spur business growth. It proposes the abrupt termination or sharp reduction of programs that have successfully brought industry and jobs to economically distressed areas like Puerto Rico. As a result, local officials, bankers and industrial leaders will lose important and constructive tools that have helped build the island's economy in the past.

The administration claims that its tax package will stimulate all business. However, that package may actually hurt the economy of Puerto Rico, because the proposed Federal tax cuts would not extend to residents of Puerto Rico and Federal spending cuts would place new pressure on the Puerto Rican Government to raise its own taxes. The administration's new "enterprise zone" proposal to attract businesses to economically distressed urban neighborhoods, could further weaken the comparative business incentives that Puerto Rico has been able to offer.

Mr. President, the impact of the administration's budget on Puerto Rico is more powerful evidence of the folly of OMB's failure to consider the regional impact of their budget proposals.

If Federal budget policy is to strengthen the economy, it must address the great diversity of the economy. A strong and growing Puerto Rican economy is vital to the long term strategic interests of the United States. We must not jeopardize those interests with ill-considered, shortsighted actions in the budget process.

This is an important amendment. It should be the start of a more careful consideration of the needs of Puerto Rico in the committees in the Senate and here on the Senate floor. I hope to help shape a special economic development initiative for Puerto Rico which can spur new capital investment and job creation, and with a maximum degree of flexibility, so that the Puerto Rican people can decide for themselves the future direction of their economy.

The budgetary impact is modest. I urge my colleagues to support it.

Mr. MOYNIHAN. Mr. President, it happens that President Reagan last February, February a year ago, wrote an important and eloquent statement on Puerto Rico. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PUERTO RICO AND STATEHOOD

(By Ronald Reagan)

When I formally announced my intention to seek the Republican presidential nomination in 1980, my televised speech to the nation included a commitment to not only support statehood for Puerto Rico if the people of the island Commonwealth desire statehood. It also included a commitment that, as President, I would initiate statehood legislation, which really means that I would take the lead in persuading the people of Puerto Rico—the mainland United States—all American citizens—that statehood will be good for all of us.

A number of people, including close friends, wondered about my remarks. Not that they oppose the statehood idea. They just thought that it seemed odd that I would put such emphasis on an issue that strikes them as routine, when U.S. foreign policy positions everywhere seem to be collapsing. But then I remind my friends that in 1975, when many U.S. foreign policy positions were collapsing, I was putting great emphasis on the Panama Canal.

By this observation I mean to suggest that we cannot expect our foreign policies to be enjoying prestige around the world—attracting support instead of collapsing—when we are having serious problems with our closest neighbors. The American people lost the debate over the Canal when, despite their opposition to the treaties, President Carter pushed them through. We were going to win the applause of the Third World, remember?

Now, it is no longer our neighbors who are being pulled away from us in the world-wide tug-of-war. Now—at least in this hemisphere—the pivot of the struggle is among our fellow citizens in the Puerto Rico Commonwealth.

YANKEE IMPERIALISM

Fidel Castro hardly lets a speech go by without denouncing "Yankee imperialism" in Puerto Rico and calling for its total independence from the United States. The idea is not confined to blustering speeches at Havana's Third World conferences or in the United Nations. Early in December, it came out of the point of a gun. A few miles from San Juan, two Navy employees were assassinated by the Soviet-made machine guns of terrorists who represent the tiny independence movement on Puerto Rico.

While the world watches the Iranian drama unfold, comrades of Cuba and its allies have now established a beachhead of violence on American shores.

Our keen "peacefully coexisting" competitor the Soviet Union, is not unaware of the importance of Puerto Rico in the great global contest of ideas. As a "Commonwealth" Puerto Rico is now neither a state nor independent, and thereby has an historically unnatural status. There is this raw nerve to rub, and our Marxist-Leninist competitors rub it. They've long thought of the island economies of the Caribbean as easy marks. I do not suggest that the Kremlin strategists expect to snap Puerto Rico into the Communist orbit any time soon, only that they find it convenient to use its unnatural status, creating tensions around the idea of American "colonialism," "Yankee imperialism." We can't merely defend ourselves against this attack. We must ourselves attack, not with terror, but with statehood.

It is not only that the fact of Puerto Rican statehood would deny Mr. Castro a raw nerve. But, in cementing itself to us as the 51st state, with unbreakable bonds, Puerto Rico would represent a positive bridgehead into the Caribbean, Latin America and the developing world.

This geopolitical concept of Puerto Rico's exposed position on the front lines of geopolicies isn't new on my account, by any means. It is at the heart of the old Republican Statehood Party on the island, now the New Progressive Party. It is understood by Gov. Carlos Romero Barcelo and San Juan Mayor Herman Padilla, the two young, dynamic advocates of statehood. I know it is profoundly understood by Luis Ferre, the 77-year-old President of the Senate, who was governor of Puerto Rico when I was governor of California. To these men, statehood is an historical imperative.

It is as simple as this: If we in the United States cannot design a model for a political economy that is sufficiently attractive, if we can't win over our fellow citizens in Puerto Rico to the nuptials that statehood involves, how can our model succeed as an instrument of foreign policy anywhere in the world? And, if we can succeed in discovering what it is that drags on the statehood idea, what it is that fosters a volatile independent movement that can harbor assassins, perhaps we can shed light on the failures of American foreign policy around the world this past quarter century.

How do we begin to understood Iran, and what has gone wrong in the Middle East, if we cannot fathom Puerto Rico—what it is that repels it as it is drawn to us?

The one thing I can say for sure, because it is a part of human nature, is that you cannot arrange a marriage unless both spouses believe the union will be greater than the sum of its parts. Because of this, I don't believe statehood will be achieved until a great majority of Puerto Ricans—not just a simple majority—feel the pull of statehood with passion.

Some Puerto Rican leaders here argue that the people of Puerto Rico must sacrifice in order to enjoy statehood, especially by means of greater tax burdens. Yet Puerto Ricans already face higher tax rates and they have shed a disproportionate share of blood, relative to mainland citizens, in our wars. Thus, an American President will have to work with Governor Romero to integrate the two separate fiscal systems in a way that increases opportunity for the average island citizen, and thereby makes statehood an attractive proposition rather than an increased burden. Governor Romero has already been moving in this direction, systematically lowering tax rates in preparation for merger.

In the 1980s, the American President must understand that for U.S. foreign policy to succeed it must be magnetic, as opposed to expansive. This means we must once again make economic policy an essential ingredient of foreign policy. This is behind my idea of statehood for Puerto Rico.

FOREIGN POLICY FAILURES

At the heart of our foreign policy failures of the last 25 years, I believe, has been the attempt to export "economic expansion" through dollars, rather than ideas. While the rest of the world waited for us to assist in the development along the lines of our own "land of opportunity," we responded with ideas that were never part of our own development: high tax rates, plenty of public debt, devalued currencies and less rather than more democracy in the guidance of state-capitalist systems.

Looking back on it, it should be no wonder that GI Joe was turned into the Ugly American.

And now, in our backyard, the Cubans are handing out AK-17 rifles even as they advertise their system—all over the region—as the path of progress. And we sit on our thumbs. The "Cuban Model" has been a disaster. Cuba is incapable of providing its people with the essentials of life. It is totally dependent on the U.S.S.R., which in turn, depends on us for its food. Yet, with noisy propaganda and active support of violent revolution borne of economic failures, the Soviet-Cuban offensive in Latin America continues to slice off one piece of salami at a time.

An American counteroffensive must rely on the greatest weapon we have: the hope of a better life, achieved by adopting America's recipe for prosperity. It must advertise the proven secrets of economic growth, upward mobility for the poor, and, ultimately, political stability—even as we return to this recipe ourselves: reasonable tax rates, modest regulation, balanced budgets and stable currency.

Instead of letting our competitors pick the battleground of violent revolution, we should pick a peaceful battleground of competition between economic systems. Instead of reacting with force to revolutionary situations, we should preempt those situations with a positive foreign policy. We can build from a bridgehead in Puerto Rico. To show the world that the American idea can work in Puerto Rico is to show that our idea can work everywhere.

Mr. MOYNIHAN. Mr. President, I now yield to the distinguished majority leader.

Mr. BAKER. Mr. President, I would like to take just a moment to respond to my friend, the distinguished Senator from New York (Mr. MOYNIHAN) and also to comment on his amendment which recommends the Finance Committee allocate additional funding for the medicaid and other social service programs in Puerto Rico over which that committee has jurisdiction.

First, I wish to commend Senator MOYNIHAN for his compassionate and articulate advocacy of the citizens of Puerto Rico, who, as he ably noted, are also American citizens. Certainly, the dilemma of Puerto Rico is a very special one and a very acute one. It is a matter I have discussed at length with Puerto Rico's must distinguished Governor, the Honorable Carlos Romero-Barceló. And it is a concern to which I am most sympathetic, as is every Member of the Senate, I am certain.

But I must say that it is my belief that the amendment now considered by the Senate is not the best course of action to alleviate the problem of adequately funding social services in Puerto Rico.

Obviously, Puerto Rico would not experience the degree of severity of budget reductions were it a State. Of course, Puerto Rico is not a State and that issue is therefore moot in terms of the immediate needs of Puerto Rico and the immediate impact of the budget reductions proposed by President Reagan. But statehood is not a moot issue in the longer view of this process. And I suggest we would be well advised to look beyond the immediacy of the matter for there will certainly be additional budget reductions necessary in the years to come. In that regard, I and I believe many of my colleagues in this Chamber have previously voiced our support for statehood for Puerto Rico if that is the wish of the Puerto Rico people. As Senator MOYNIHAN noted, were it a State, Puerto Rico would not be faced with budget reductions of the magnitude now under consideration. Thus, as all of us look ahead to the difficult decisions to come in the years ahead, I am hopeful and confident the people of Puerto Rico will speak on the issue of statehood and that the Congress will respond accordingly.

Even in the interim until that decision is made, I still believe the goals of Senator MOYNIHAN's well-intentioned amendment can be otherwise accomplished. There is a degree of flexibility available to the Finance Committee in its future deliberations of this matter, as there is certain flexibility available to each of the Senate's standing committees involved in the budget process. And I am certain the distinguished chairman of the Finance Committee, Senator DOLE, and the other committee chairmen will be cognizant and as responsive as possible to the needs of Puerto Rico as they implement the budget decisions.

Furthermore, I am advised that the President and others within the administration are similarly aware of the unique difficulties of Puerto Rico and that they are formulating special efforts to assist the people of Puerto Rico without unduly upsetting the carefully balanced program of spending reductions.

Thus, in conclusion I would again commend Senator MOYNIHAN for his concern and reassure him that both the administration and we on this side of the aisle share his concern and are also committed to assisting our fellow citizens in Puerto Rico.

Mr. KENNEDY. Mr. President, I support the amendment of the Senator from New York to provide at least a minimal grant of relief to the people of Puerto Rico who will lose an estimated $650 million under the current administration budget proposals.

Drastically reducing the level of Federal assistance to Puerto Rico represents a unilateral slap at 3.4 million American citizens. The Commonwealth of Puerto Rico continues to be the poorest region of this country, falling at some $1,300 per capita, clearly within the range of less developed nations.

The inequity in the President's program as it applies to Puerto Rico is twofold. First, American citizens living in Puerto Rico will lose far more in Federal assistance than they would as residents of any State in the Union. Second, contrary to citizens in any State, there are no counterbalancing benefits in the form of tax reductions. Thus the blow to the island's economy is of the utmost gravity.

The consequences also would be quite dire, both to the island's economy and to the living conditions of the island's people. Puerto Rico always has had its level of Federal assistance based in some way on the recognition that no Federal tax revenues are forthcoming because of the commonwealth relationship. However, in the provision of services, there also has been a recognition of the great need on the island, of Puerto Rican participation in the defense of our country, and of the continuing right of Puerto Ricans to leave the island and resettle in New York or Illinois or any other State.

To impose a massive curtailment on Federal support without in any way attempting to stimulate self sustaining economic development is a prelude to disaster.

Unemployment, which officially is at 19 percent would rise to nearly 40 percent; the island's public sector will be forced to undertake massive firings; the decline in the maintenance of the basic public infrastructure will contribute to industrial flight, small municipalities will be unable to provide basic emergency services; and the entire economy would be forced into a sudden tailspin. Imports from the mainland consequently also will be reduced significantly, imports which were approximately $4 billion last year making Puerto Rico among the two or three major purchasers of U.S. goods in the world.

I would ask my colleagues what the impact would be on any of their States if they were suffering 19 percent unemployment now and saw it rising to 40 percent? What would occur if they saw their citizens with a per capita income of $1,300 and then were told that food stamps were going to be reduced to those persons by some 40 percent?

Puerto Rico, my colleagues know, has been the subject of considerable controversy in the United Nations because of the charge that is has been treated as a colony. We have countered that charge in the past by noting the special character of the commonwealth relationship and by demonstrating the strong support from the Federal Government. We have argued the Puerto Ricans are treated as American citizens with full benefits and rights under our laws.

Now when we find that a Puerto Rican living in Puerto Rico will lose far more in food stamps than if he resided in Alabama. We find that there is a vast cutback of services proposed in the budget to Puerto Rico that exceeds those who live on the mainland. It seems to me that we will have a quite difficult case to make in the United Nations the next time we are challenged.

Let me also emphasize that we have traditionally limited Puerto Rican participation in grant programs but have tried to insure that individual benefit programs were designed so as to avoid that distinction.

Nevertheless, there are a considerable number of programs—even involving individual benefit programs—where Puerto Rico has a cap on the funds that can be made available to them.

Medicaid funding, for example, is capped at $30 million since 1972. If that cap did not exist—and Puerto Rico were treated equitably—an additional $110 million would rightfully go to Puerto Rico. So the amendment of the Senator from New York is particularly appropriate.

If SSI were available to Puerto Rico, there would be an additional $300 million beyond the limited levels of benefits available now under aged, blind, and disabled titles of the Social Security Act.

Similarly, there is a cap on title XX services of $15 million and if Puerto Rico were treated as the States in this area, it would mean an additional $34 million.

Now on top of these restrictions, we find that Puerto Rico will lose an estimated additional amount of $650 million. It will receive no additional economic stimulus.

I find the potential consequences of these reductions to be enormously grave—for social and political stability

in Puerto Rico. For the image of the United States in Latin America, for the suffering sure to be endured by the people of Puerto Rico, and for the likely stimulus to Puerto Rican migration to the mainland. I urge adoption of this amendment.

Mr. President, I am pleased that my colleague from New York, the chairman of the Senate Finance Committee, and the majority leader are expressing their mutual determination to find some mechanism to ease the impact of these reductions.

I would respectfully suggest that a block grant for economic development involving both branches of the Puerto Rican Government can provide the best long-term hope for economic growth on the island. But it has to be done over a period of transition so that the benefits of development can reach individuals before they lose their individual rights and benefits. I ask that testimony by Miguel Hernandez Colón, president of the Senate of Puerto Rico. on the impact on the budget acts be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY BEFORE HOUSE BUDGET COMMITTEE

My name is Miguel Hernández Agosto. I am President of the Popular Democratic Party (PDP) of Puerto Rico and President of the Senate of the Commonwealth of Puerto Rico. In the 1980 elections, the PDP candidate for Governor lost by only 3,434 votes, out of a total of 1,608,802 votes cast. The PDP won control of the Senate and because of the closeness of the elections, the ultimate control of the House of Representatives is now in the courts.

As a heavily populated area with few resources and geographic disadvantages, Puerto Rico has had to depend on fiscal support from the Uniter States ever since its relationship with the United States began following the Spanish-American War of 1898. Over the eight decades of association between Puerto Rico and the United States, this fiscal support has demonstrated a clear pattern which could well be described as the basic economic policy of the United States toward the Island.

Two important facets of this policy are the extension of federal social and economic development programs to Puerto Rico and the exclusion of Island residents and corporations from the federal internal revenue laws. The tax exclusion was enacted in the Foraker Act of 1900—the first federal organic law for governing Puerto Rico. This action was based on the economically impoverished condition of the Island. Since that time, Puerto Rico has made great strides forward but has never reached a degree of economic development sufficiently comparable to the States to justify a revision of the concept. Freedom from federal taxation has enabled Puerto Rico to attract industry which might otherwise have located in foreign countries.

As federal grant-in-aid programs were enacted, Puerto Rico was almost always made an eligible recipient. In the major programs, however, Puerto Rico's rate of participation was frequently limited. For example, limits on participation were established in welfare grants, the programs to aid public schools, the Medicaid Program, the Title XX Social Services Program, and highway aid. Puerto Rico was excluded from General Revenue Sharing. Even the Food Stamp Program has restrictions on the level of participation of households in Puerto Rico. The large federal cost of food stamps—despite the legal limits—demonstrates the tremendous comparative poverty in Puerto Rico.

The principal reason for such limits was the non-taxation policy. As new spending programs were enacted for the United States, Congress and the President repeatedly accepted that the combination of federal tax freedom and full participation in certain grants would give Puerto Rico an unjustifiably large share compared to the States. Thus, the policy has emerged of comparable federal financing in Puerto Rico. When the federal government determines the amount of participation Puerto Rico should have in various national programs, it takes into account the non-taxation factor and works out a comparable participation rate for the American citizens living on the Island. Although the policy described above has never been officially written into law or mainland political party platforms, it has become the customary way of assisting Puerto Rico. It is an evolutionary, de facto policy forming an important element of the political and socio-economic relationship between the Commonwealth and the United States.

Also, one can note a consistent pattern of extending equal participation to the Commonwealth in grant-in-aid programs supporting economic development. Some examples are the Housing and Community Development Act, the Comprehensive Employment and Training Act, the Public Works and Economic Development Act, the Vocational Education Program, the Urban Development Action Grants Program, and the Local Public Works Program. In the area of economic development, as opposed to welfare type program, Congress and the President have recognized the mutual benefits to be achieved by investing in the economy of Puerto Rico.

In summary, the de facto fiscal policy of the United States has always taken into account Puerto Rico's unique and difficult economic problems through a favorable tax policy, supplemented by limited federal grants-in-aid. However, in those federal programs geared to economic development, Puerto Rico is typically accorded full participation.

Today, Puerto Rico receives 1.3 billion dollars under all of the federal grant-in-aid programs. Limits enacted into these laws presently cost the Island some 800 million dollars annually. The Food Stamp Program, which is not a grant but a transfer payment to individuals, adds 800 million dollars yearly. Of great importance is the fact that the total net federal outlays play a major role in the economy of Puerto Rico. At the end of the 1970's, net federal outlays constituted 29.4 percent of both the gross product and the total personal income of the Commonwealth's residents and businesses.

President Reagan has proposed an overall reduction of 48.6 billion dollars in the domestic budget for Fiscal Year 1982. This is reflected in a series of proposed program eliminations, reductions and consolidations. The President also contemplates stimulating the national economy through a series of tax cuts. We are aware that the results of his proposals will not be known for many months. The Resident Commissioner from Puerto Rico has calculated the effects of the President's proposals on Puerto Rico as resulting in a 650 million dollars reduction in federal expenditures in Puerto Rico alone and a loss of some 30,000 jobs. These estimates may not be fully accurate, but the Reagan budget will unquestionably have major detrimental effects in Puerto Rico. For example, we believe that if the President's proposals are not modified, unemployment in Puerto Rico will rise from the present 19 percent to probably 30 percent or 40 percent.

It is our duty to suggest alternatives to accomplish the President's beneficial goals, without causing dramatic and unnecessary social and economic harm to the 3.4 million American citizens residing in Puerto Rico. Our alternatives reflect the serious concern with which the people of Puerto Rico—like their fellow citizens on the mainland—view inflation and other economic ills confronting the country and the sacrifices they are willing to make to combat them. We sincerely hope our alternatives are among the "superior ideas" deemed acceptable by OMB Director, David Stockman, in his Senate testimony of March 12, 1981.

The most serious problem which we see is that only one of the President's two main economic weapons—budget cuts—is available for Puerto Rico. We do not pay federal income taxes; therefore, economic stimulation through significant reductions in federal taxes is by definition impossible for Puerto Rico. The Reagan's plan contemplates that the tax reduction will stimulate private economic activity and in this way mke up for the loss of public sector jobs.

In Puerto Rico this tax stimulation will not occur and large budget reductions will simply lead to even larger unemployment and economic stagnation. The Government of Puerto Rico would have to meet basic human needs with increased spending and increased taxation on a downward sliding amount of personal income. When one considers that unemployment in Puerto Rico is presently 19 percent and the real, uninflated growth rate in the gross Island product was only 2.3 percent in 1980 and predicted to drop even further in 1981, we see the grave danger to Puerto Rico of the President's proposals and the need to alter them to avoid a disastrous downturn in the economy of the Commonwealth. Moreover, the net effect of the cuts as presently proposed in programs designed to assist the truly needy will have an impact of huge proportions simply because of the large concentration of poor persons on the Island.

We offer two basic proposals which, we feel, will accommodate the national need for sacrifice and restraint without unduly harming the Puerto Rican people.

First, we propose that the Congress and the President follow the policy of treating Puerto Rico neither better nor worse than the States in national fiscal policies. If the national economic situation requires strong fiscal medicine, it would violate the historic pattern of the United States-Puerto Rico relations for the Island partner to have to swallow a larger dose than any State. When budget cuts occur, they must follow a careful study of the effects of no tax stimulation and the uniquely difficult economic circumstances of Puerto Rico. While a State of the Union might well be able to absorb a ten percent reduction in federal outlays, that same ten percent could be applied blindly to Puerto Rico. Rather, the budget reduction should be tailored to the economic realities of the Island and the results which they may cause. Further, any reductions in programs providing assistance to individuals must be very carefully examined to assure that such reductions do not result in truly needy individuals being left without the resources necessary to meet basic human needs. This may mean that the present level of support in these programs cannot be reduced to the level proposed by the President immediately, but rather will have to be maintained at near present or minimally reduced levels, until the second part of our proposals can be implemented and begin to take effect.

Second, we suggest that these times of national budgetary reevaluation offer a splendid opportunity to restructure the financing side of the United States-Puerto Rico economic relations. We offer the concept of a single block grant for economic development for Puerto Rico. By a block grant we mean a federal grant to the Commonwealth of

Puerto Rico and its municipalities with broad definitions of permissible uses of the funds. If the annual sum of federal outlays, or a substantial portion thereof, were pooled into a single block grant—or a series of broadly phrased economic development block grants—we would have at our disposal the instruments necessary to substitute the tax cuts proposed by the President and be able to offset more effectively the reductions which may finally result in Puerto Rico. The recapture of such reductions in federal outlays, in terms of the net economic impact, could be achieved, we believe, through the development of programs which would operate more efficiently, because they would be devised locally. We want development, not dependence. An economic development block grant would give us that opportunity.

We note that the timing of the implementation of such an approach as we suggest, is of the essence in relation to the proposed reduction in federal expenditures on the Island. The development of the economic activity in the private sector, through this approach, sufficient to absorb substantial overall reductions in the flow of federal funds would take some time. We believe that such a program would have to be firmly in place to allow the creation of a sufficiently large base to avoid severe dislocation on the Island.

The reductions we have in mind would be a mutually acceptable percentage depending on the total economic analysis of the effects of all economic policies and the structure of the block grant. We would accept, of course, basic norms such as fiscal accountability and the guarantee of equal opportunity, as "strings" attached to the block grant. The federal conditions attached to the grant should not limit the flexibility needed to attack local economic development problems in innovative ways. Further, such a grant should be subjected to the normal appropriations process in the Commonwealth, considering the amounts that legislation would be involved.

There is strong precedent for what we propose. Federal statutes now contain block grants for outlying areas. These grants reflect an understanding of the great differences between the mainland United States and its distant associated areas. They also recognize the great difficulties of administering federal grants in remote areas. Other precedents are the special grants, loans and procurement policies for minority economic development.

We believe that our concept of a block grant for economic development responds to the current awareness that government which is close to the people it serves is frequently better informed and therefore more efficient and effective.

I am pleased to have had the opportunity to discuss these issues with you and would be willing to continue to work with you in a search for alternatives to the present Presidential proposals as they affect Puerto Rico.

Mr. CRANSTON. I yield myself 2 minutes.

Mr. President, I join the Senator from Massachusetts in his remarks about the measure that was proposed earlier today by the Senator from New York (Mr. MOYNIHAN) with respect to Puerto Rico. It is very important that we take into account the particular plight of the people of Puerto Rico, the fact that the general program of the new administration would have particularly harsh effects upon the people of that island if we do not take into account their particular circumstances.

The budget cuts impact directly upon them. The tax breaks will have no effect upon them.

We also should recognize that we have national security interests in the Caribbean that require us to do all we can to see that their economy and their society thrive and that they are not thrown into a deep recession through no fault of their own.

I know that the Senator from Massachusetts is particularly aware—among all Senators—of the situation in Puerto Rico. He has been a staunch friend of the people of that island. He has countless friends and admirers there, and I know that they will be heartened by his dedication to bringing remedial action to ease the grave concerns that are presently existent among the citizens of that island.

Mr. MOYNIHAN. In view of the generous, open response of the Senator from Kansas as chairman of the Finance Committee, and the considered and persuasive views of the majority leader, and, of course, those of our whip and others here, it seems to me the better part in the interest of the Commonwealth at this point to withdraw my amendment. I do so request.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. MOYNIHAN. Mr. President, I suggest the absence of a quorum.

The legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOTE ON AMENDMENT NO. 29

The question is on agreeing to amendment No. 29 of the Senator from Arkansas. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Texas (Mr. TOWER), is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS), is necessarily absent.

The PRESIDING OFFICER (Mr. MURKOWSKI). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 44, nays 54, as follows:

[Rollcall Vote No. 68 Leg.]

YEAS—44

Baucus	Exon	Melcher
Bentsen	Ford	Metzenbaum
Biden	Glenn	Mitchell

Mattingly	Schmitt	

NOT VOTING—2

Tower Williams

So Mr. BUMPERS' amendment (No. 29) was rejected.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. THURMOND. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON UP AMENDMENT NO. 45

The PRESIDING OFFICER. The question is on agreeing to the amendment (UP No. 45) of the Senator from Missouri.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Texas (Mr. TOWER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators wishing to vote?

The result was announced—yeas 29, nays 69, as follows:

[Rollcall Vote No. 69 Leg.]

YEAS—29

Biden	Heflin	Mitchell
Bradley	Heinz	Moynihan
Burdick	Inouye	Pell
Byrd, Robert C.	Jackson	Randolph
Cranston	Kennedy	Riegle
Dixon	Leahy	Roth
Dodd	Levin	Sarbanes
Eagleton	Mathias	Sasser
Ford	Melcher	Specter
Glenn	Metzenbaum	

NAYS—69

Abdnor	Exon	Murkowski
Andrews	Garn	Nickles
Armstrong	Goldwater	Nunn
Baker	Gorton	Packwood
Baucus	Grassley	Percy
Bentsen	Hart	Pressler
Boren	Hatch	Proxmire
Boschwitz	Hatfield	Pryor
Bumpers	Hawkins	Quayle
Byrd, Harry F., Jr.	Hayakawa	Rudman
Cannon	Helms	Schmitt
Chafee	Hollings	Simpson
Chiles	Huddleston	Stafford
Cochran	Humphrey	Stennis
Cohen	Jepsen	Stevens
D'Amato	Johnston	Symms
Danforth	Kassebaum	Thurmond
DeConcini	Kasten	Tsongas
Denton	Laxalt	Wallop
Dole	Long	Warner
Domenici	Lugar	Weicker
Durenberger	Matsunaga	Zorinsky
East	Mattingly	
	McClure	

NOT VOTING—2

Tower Williams

So Mr. EAGLETON'S amendment (UP No. 45) was rejected.

VOTE ON UP AMENDMENT NO. 46

The PRESIDING OFFICER. The question is on agreeing to unprinted amend-

ment No. 46 of the Senator from Missouri (Mr. EAGLETON). The yeas and nays have been ordered and the clerk will call the roll.

Mr. STEVENS. I announce that the Senator from Texas (Mr. TOWER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

I further announce that, if present and voting, the Senator from New Jersey (Mr. WILLIAMS) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 21, nays 77, as follows:

[Rollcall Vote No. 70 Leg.]

YEAS—21

Biden	Ford	Matsunaga
Bradley	Glenn	Moynihan
Bumpers	Hart	Pell
Burdick	Inouye	Randolph
Cranston	Kennedy	Riegle
Dodd	Levin	Sarbanes
Eagleton	Mathias	Tsongas

NAYS—77

Abdnor	Garn	Metzenbaum
Andrews	Goldwater	Mitchell
Armstrong	Gorton	Murkowski

Exon	McClure	Weicker
Ford	Melcher	Zorinsky

NOT VOTING—2

Tower	Williams

So Mr. EAGLETON's amendment (UP No. 46) was rejected.

VOTE ON UP AMENDMENT NO. 47

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York (Mr. MOYNIHAN), UP amendment No. 47. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Texas (Mr. TOWER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER (Mr. WALLOP). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 19, nays 79, as follows:

[Rollcall Vote No. 71 Leg.]

YEAS—19

Bradley	Glenn	Metzenbaum
Bumpers	Inouye	Moynihan
Cranston	Jackson	Pell
Danforth	Kennedy	Riegle
Dixon	Levin	Specter
Dodd	Long	
Eagleton	Matsunaga	

NAYS—79

NOT VOTING—2

Tower	Williams

So Mr. MOYNIHAN's amendment (UP No. 47) was rejected.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. QUAYLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

(The following proceedings occurred earlier:)

Mr. MOYNIHAN. Mr. President, I see our distinguished and beloved majority leader is in the Chamber, and I understand he has a statement of importance to the Senate. I am happy to yield him as much time as he wishes off the resolution.

Mr. BAKER. Mr. President, I thank the Senator.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, I will charge the time against the resolution if the manager will permit me to do that.

Mr. GORTON. That is all right.

THE PRESIDENT'S HEALTH

Mr. BAKER. Mr. President, it was my privilege just now, together with Senator LAXALT, to visit with the President of the United States at George Washington University Medical Center Hospital.

I am pleased to report to the Senate that: The President has excellent color. He appears to be in good spirits. His recovery is remarkable. He is fully alert and conversational.

We discussed a range of issues, including the good progress, I believe, that the Senate is making on the final disposition of this budget resolution.

I reported to the President that this morning we passed a resolution expressing the Senate's appreciation to Secret Service agent Parr for his timely and courageous act in perhaps saving the President's life, Secret Service agent McCarthy for having thrown himself in the path of another bullet and once again perhaps saving the President's life, and District of Columbia policeman Delahanty for his similarly heroic deed.

The President asked me to express his appreciation to the Senate for that action. He was genuinely moved by that expression and by the courageous acts of those three men.

Mr. President, I also report that the President not only was alert, fully conversational, and looked well, but from a medical standpoint he does not have any intravenous tubes in his veins. He is eating solid food. He occasionally has supplemental oxygen, not regularly but occasionally, on the advice of his doctor.

The only remaining treatment he is receiving is the tube inserted to reinflate his lung that is still in his chest and which will be removed shortly.

Mr. President, I must say that I have never seen any person of any age after the third day of major surgery who looks as well as does President Reagan. His humor is good. He quickly quipped that he wanted to just let anyone know, if he had any doubt, that it hurts to get shot. I am sure it does.

Mr. President, I am happy to make this report and I express my appreciation to the distinguished Senator from New York and the Senator from Washington for permitting me to interrupt their debate on the pending amendment.

Mr. President, I ask unanimous consent that this report to the Senate appear after the conclusion of the consideration of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, if I could yield myself some time on the resolution as required, may I just express this Senator's appreciation to our majority leader for his report.

I was glad to hear of the President's health, but there is something larger at stake.

Ernest Hemingway once described courage as grace under pressure. I do not know in our time that we have seen any such greater display, and it makes us proud of our President, and it is no time to talk about the Nation, but it is the Nation that nurtured that quality in him, and we are all enhanced by it.

Mr. BAKER. Mr. President, I thank the Senator for that remark. I could not agree with him more. In his usual eloquence he has expressed, I am sure, the sentiments of all of us.

I may say that I told the President when I first entered the room that I thought the country was proud of him.

I thank the Senator.

Mr. DOMENICI. Mr. President, I believe it is our turn and we do not have an amendment. We were going to yield 10 minutes to the distinguished Senator from Missouri (Mr. DANFORTH) and the Senator from Minnesota (Mr. DURENBERGER) who were going to have a colloquy.

How much time does the Senator need?

Mr. DURENBERGER. I think 10 minutes would be adequate time.

Mr. DOMENICI. I yield 10 minutes to the Senator from Minnesota.

TRANSITION FLEXIBILITY FOR STATE AND LOCAL GOVERNMENTS

Mr. DURENBERGER. Mr. President, I call to the attention of my colleagues the language included in the reconciliation

report on page 9 regarding transition flexibility for State and local governments. The language to which I refer encourages Senate committees that are proposing reductions in grants-in-aid to State and local governments to recommend at the same time program revisions which increase the flexibility of State and local governments to manage Federal funds so that the needs of program beneficiaries are met most effectively. In the report, the Budget Committee suggests such reforms as:

Consolidating similar programs into block grants;

Eliminating unnecessary rules and regulations;

Provided adequate leadtime to adjust State and local laws and practices to new funding levels;

Eliminating the requirement that advisory bodies be established as a condition of receiving funds; and

Modifying mandates not fully funded by congressional appropriations.

Mr. President, I believe that we in Congress need to recognize that the success or failure of the economic recovery plan depends in large part on using Federal funds more efficiently. We are making unprecedented funding reductions. State and local grants-in-aid will be 14.5-percent less in 1982 than they were in 1981. Without changes in program structure, we cannot expect State and local governments to deliver the vital services that we have delegated to them in such important areas as income security, nutrition, transportation, and health care.

Let me give an example of the kind of regulatory flexibility that I have in mind, Mr. President. I understand that the Department of Health and Human Services has notified State agencies in region V of proposed recisions affecting the medicaid program. State agencies were told that they should set priorities among the activities they are now carrying out in the area of survey and certification. Funds will permit them to complete only those activities of the highest priority. Unfortunately, the States have determined that dropping any of the current activities would place them in violation of a contract, a law, or a regulation.

Therefore, I commend the Budget Committee for recognizing this problem in the funding reductions they are recommending. I hope all of the committees that will be making funding reductions will consider the comments in the Budget Committee report regarding flexibility for State and local governments affected.

Mr. President, I am pleased at this time to yield to my colleague from Missouri.

Mr. DANFORTH. Mr. President, I think that the Senator from Minnesota has made a very valuable po'nt. The situation is that, over a period of years, State and local governments have become increasingly dependent on Federal sources of funds. In the categorical grant programs, it is very typical for the Federal Government, along with granting funds to State and local governments, to place a variety of restrictions on those funds and a variety of requirements, some paperwork or reporting requirements, other requirements relating to precisely how State and local governments operate.

In the chase for Federal money, typically, local governments and State governments end up doing some things they might not otherwise do. They operate programs in such a way as to perhaps not be very efficient from their standpoint, but they are anxious to comply with the requirements of the Federal Government.

The theory of budget cutting on funds otherwise going to State and local government is that, while we are cutting the total number of dollars that otherwise would be available, we are at the same time converting categorical grants into block grants and that State governments and local governments will be freed up from needless requirements and be able to use their money in a more cost effective way.

The problem that has been pointed out particularly by the National Governors Conference, and especially by its chairman, Governor Snelling of Vermont, is that there may be a time lag between the reduction and the availability of Federal dollars on one hand and the freeing up of the regulatory burden or the other requirements in the categorical grant programs on the other.

Therefore, it is very important for Congress to bear in mind, as we are in the process of cutting the budget, the need to move as quickly as possible to provide as much flexibility, and therefore as much cost effectiveness, as possible on the State and local levels.

Mr. DURENBERGER. I thank the Senator for his statement.

Mr. President, I yield to the distinguished chairman of the Governmental Affairs Committee, the Senator from Delaware.

Mr. ROTH. Mr. President, I concur in the remarks by Senator DURENBERGER and Senator DANFORTH with respect to the need for greater flexibility in the grant system to coincide with the major funding reductions we are discussing.

The language contained in the reconciliation statement resulted from a meeting between my committee and the Governors Conference; and it is for that reason I am very appreciative of and in support of what the Budget Committee has done.

We cannot expect to cut grants to State and local governments by up to 30 percent and not make compensating changes in the programs. There is no doubt that the Federal aid system needs a tuneup. After completing a 3-year study of the Federal system, the Advisory Commission on Intergovernmental Relations (ACIR) has found today's intergovernmental system a "bewildered and bewildering maze of complex, overlapping, and, often, conflicting relationships among the three levels of Government." More simply put, ACIR says today's intergovernmental system is "overloaded."

The Advisory Commission on Intergovernmental Relations (ACIR) study on the Federal grant system consists of 14 volumes and took 3 years to complete. ACIR found that despite some consolidation, the number of assistance programs is increasing and the programs are becoming more narrow. At last count, there were seven different highway safety grants; a half-dozen grants for forest-related programs; 23 for pollution control and abatement; 36 for social services; and 78 for elementary, secondary, and vocational education. By some estimates, there are over 1,000 separate mandates imposed on local governments. No wonder the system is not running smoothly; no wonder the percentage of Americans that believe the Government will "do what is right" fell from 77 percent in 1964 to 34 percent in 1976.

Through the 500 separate categorical programs, enough paperwork is imposed on State and local governments to cost some $5 billion for them to complete. Federal regulations contribute heavily to this paperwork burden. One study found that between November 20, 1975, and January 7, 1976, 26 issues of the Federal Register contained 31 EPA air pollution items. This translates into an annual rate of 270, or more than 1 for every working day. Between July 1975 and March 1976, 359 changes and additions in the regulations for the program were published in the Federal Register, and 77 new rules were proposed. In the letter transmitting its final report to the President, the Commission on Federal Paperwork wrote:

> Many people feel, and the Commission agrees that a multi-million dollar wall of paperwork has been erected between the Government and the people.

The language contained in the resolution which resulted will help the Senate begin to tear down that wall of paperwork and to promote grant consolidation, and I am prepared to do whatever I can to assist.

Mr. DURENBERGER. Mr. President, I thank the Senator from Delaware for his precise comments.

Mr. BAKER. Mr. President, I would like to take just a moment to commend and join with the distinguished Senator from Minnesota, Senator DURENBERGER, and my other distinguished colleagues in support of more flexible and workable Federal grants to State and local governments. And I am optimistic that, as we go about the business of implementing Federal budget reductions in the coming days and weeks, we shall heed the wise recommendations of our Budget Committee in this regard.

As my colleagues have noted, the present mechanism for allocating grants to local governments is a bewildering array of as many as 500 separate grants, most of which require singular and specific administrative procedures and reports. Clearly, the system has become too cumbersome and is in need of immediate reform.

I would submit that we shall not have a better opportunity to attain that reform than at this time. We have embarked on a difficult but necessary regimen of budget reductions at the Federal level. A substantial portion of those reductions will fall into various grants pro-

grams. Our Budget Committee, several other Members of the Senate, President Reagan, and numerous State and local officials as well, have all noted the need to review the totality of governmental responsibilities and to return to the State and local governments those duties best administered by them.

As we go about this business, Mr. President, of redefining our federalist structure, we must give these State and local governments not only the resources, but also the administrative means to carry out their new, or renewed, responsibilities. We must reduce the intense and choking level of Federal administrative requirements. All of us have listened in recent weeks to the Nation's Governors, mayors, and State legislators as they have commented on the Federal spending reductions. Virtually to a person, they have said they and their governments can continue to carry out their necessary functions if the budget reductions are accompanied by regulatory and paperwork reductions.

I do not mean to imply that the specific problems and needs for which individual grants were created have been eliminated—if that were the case, these grants themselves should be eliminated. Rather, what I am attempting to convey to my colleagues is that we have created a veritable avalanche of Federal grant programs in the last decade and that with those new grants have come an unnecessary and inefficient administrative burden on State and local governments.

Certainly, the purpose of these grants should be maintained. But the means and administration of these specific programs should be left to the wisdom of State and local officials in each possible instance.

Mr. DURENBERGER. Mr. President, I am prepared to yield back the remainder of my time to the Senator from New Mexico.

The PRESIDING OFFICER. Who yields time?

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. RIEGLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, I believe that in the order we have been following, an amendment I will now propose on restoring funds for unemployment compensation would properly be put forward at this time. Unless I hear an objection on the majority side, I will go ahead with my unemployment compensation amendment at this time.

Mr. DOMENICI. That is correct. We expect that the Senator from Michigan will be next, and I assume that is the amendment he has chosen.

Mr. RIEGLE. Yes. I am prepared to proceed, if there is no objection on the other side to my proceeding at this time.

Mr. CRANSTON. If the Senator would proceed, it would be perfectly appropriate.

Mr. RIEGLE. I thank the Senator.

UP AMENDMENT NO. 49

(Purpose: To restore funds for unemployment compensation)

Mr. RIEGLE. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Michigan (Mr. RIEGLE), for himself and others, proposes an unprinted amendment numbered 49.

Mr. RIEGLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "outlays" in line 19, strike out through "1983" in line 20 and insert in lieu thereof the following: "outlays by $47,409,000,000 in fiscal year 1983".

On page 7, beginning with "outlays" in line 17, strike out through "1983" in line 18 and insert in lieu thereof the following: "outlays by $10,585,000,000 in fiscal year 1983".

Mr. RIEGLE. Mr. President, I am offering this amendment on behalf of myself and Senators LEVIN, KENNEDY, SARBANES, METZENBAUM, WILLIAMS, and MOYNIHAN.

My amendment would restore a portion of the funds cut from the unemployment insurance program by this resolution. Specifically, the amendment would add $285 million in outlays in fiscal year 1983, so that we would not force jobless workers, after 13 weeks of unemployment, to accept minimum wage jobs.

I hasten to add that because of the timing of the proposal, which would require States to amend their existing unemployment insurance laws, no dollar impact actually occurs until fiscal year 1983.

The purpose of this Nation's unemployment insurance system is to tide workers through a period of joblessness until they can find employment suitable to their skills, education, and experience. In particular, the unemployment insurance program is designed to provide a way for workers to deal with cyclical unemployment in our society, which is something that affects a number of our industries—not all, but many. Unemployment insurance helps to cushion the impact of those periods, these bursts of unemployment in the country, when recessions occur. President Reagan's budget proposes that we require unemployed workers to seek and accept a minimum wage job, or a job paying an amount at least equivalent to their unemployment benefits, after 13 weeks of unemployment, except in the case of seasonal or other temporary layoffs where it can be demonstrated that the worker's chances of obtaining work comparable to his or her previous job are good. The resolution before us today, as it has been presented by the Budget Committee, assumes savings from making this fundamental change in our Nation's unemployment laws, affecting approximately 280,000 jobless workers.

Mr. President, under current law the first 26 weeks of unemployment insurance benefits are financed wholly by the State. President Reagan's proposal would apply after the 13th week of unemployment. So unless we change this proposal which is incorporated in the resolution, what we would be doing here would be to impose a Federal requirement on a program which is wholly funded by the State. This is a serious incursion into an area of State decisionmaking and in my view, should be rejected on that basis alone.

We have, in the past, been very cautious and very careful about not wanting to invade areas where the States have programs for which they have full financial responsibility. What is being proposed here would breach that line, would, in effect, come in and reorder the activities at the State level.

But this is not the only reason why this change should be rejected. There are also serious questions as to whether this proposal is even a practical or feasible one.

The House Subcommittee on Unemployment Compensation and Public Assistance recently asked the administration for information regarding how many minimum wage jobs are actually available to workers who are collecting jobless benefits. It is my understanding that the Reagan administration was unable to supply this information to the House subcommittee. So we do not even know how many minimum wage jobs are actually out there for these workers.

Let me also point out that there is no reason to believe that these jobless workers will necessarily be able to secure whatever minimum wage jobs might be available. I wonder, for example, how many employers would be willing to hire an overqualified worker, knowing that this overqualified worker is likely to leave that job at the first opportunity, as soon as that worker could find a job that was more suitable to his or her actual job skills and past earnings history.

There is also reason to fear that, to the extent that these highly skilled jobless workers do obtain minimum wage employment, they will do so at the expense of other, far less skilled persons whose education and experience limit their ability to compete in the job market. I am thinking here of the structurally unemployed, the underskilled, women, youth, and minorities.

If this requirement becomes law and highly skilled workers end up displacing unskilled workers in minimum wage jobs, we will not have achieved a reduction in unemployment or a reduction in the jobless rolls. We will instead have moved one set of people into unsuitable jobs, at the expense of another set of people, the young, women, minorities, those who are already at a severe disadvantage in today's job market. I do not think that makes any sense whatsoever.

So there are serious questions as to whether this proposal is a feasible and practical one, quite apart from the basic merits of the issue.

I point out that just a few months ago Congress enacted legislation as part of last year's reconciliation resolution which requires jobless workers to seek

and accept minimum wage jobs after 26 weeks of unemployment. This new Reagan administration proposal chops that in half, from 26 weeks down to 13 weeks, the change in the law passed last year, requiring jobless workers to seek and accept minimum wage jobs after 26 weeks took effect yesterday, the first day of April 1981. So, we have had really no opportunity to see how this might work. The ink is barely dry on this change. To rush in at this point and make another enormous change really makes no sense at all.

Many of the same questions that I am raising today also apply to last year's legislation and because that has not yet had a chance to be fully implemented, let alone evaluated, I do not think it makes sense for us to rush ahead and in a precipitous manner make this change.

In testimony before the House Subcommittee on Unemployment Compensation on March 12, 1981, the Interstate Conference of Employment Security Agencies, which represents the State administrators of the unemployment insurance program, opposed the concept of requiring jobless workers to take minimum wage jobs after 13 weeks. I shall quote from their testimony:

The Interstate Conference urges the Subcommittee to reject this proposal. A federal mandate defining suitable work in the regular state program would be a significant departure from the principles under which the federal-state unemployment insurance system has served us well for over 40 years. This proposal appears contrary to the Administration's stated intention to return responsibilities to the states in order to better serve local needs.

I continue to quote them:

As you know, the regular benefit programs are administered under state laws which both define the benefit qualifying requirements and the conditions under which they may be received. The states are responsible as well for financing the costs of these benefits. All state laws currently include requirements that claimants be available for and seeking suitable work during their benefit eligibility.

That is a critical issue because the States that are now carrying this out presently deal with this problem in their own fashion and I think quite wisely so.

I am continuing to quote now:

Furthermore, each state has determined definitions of suitable work which reflect that state's labor market conditions, the views of employers who finance the program, and the needs of the workers who benefit from the program.

Particularly in the regular benefits program, the theory of suitable work recognizes that each claimant has some skills which were utilized during the period of employment which qualified the individual to receive unemployment insurance benefits. States determine what is suitable work for an individual claimant, based on his skills, past earnings, the local labor market conditions, and the length of his spell of unemployment. States attempt to provide the claimant with guidance to jobs which will utilize his skills and which will pay wages similar to his last employment. This strategy means that claimants are encouraged to continue using the skills which they have developed and have an opportunity to earn the highest wages possible. When it becomes clear that a claimant will not be able to obtain employment commensurate with his or her last job, then energies are directed toward locating other types of suitable work, which may pay lower wages.

Automatic referrals to low and minimum wage jobs at the 13th week essentially short-circuits the State's opportunity to work with the claimant and to seek placement opportunities for individuals at the highest possible commensurate skill and wage level. The impact of this proposal on employers should also be considered. Many employers may not wish to receive referrals of individuals who are overqualified for job openings. Employers who do hire over-qualified workers may find that these individuals seek other job opportunities resulting in increased turnover from the employer. Finally, we should consider the overall economic impact: When lower paying jobs are filled with higher skilled individuals, those with lower skill levels are faced with fewer job opportunities and potentially must turn to welfare or other income maintenance programs for survival.

And that means at the expense of Government.

The Interstate Conference understands that recommendations to modify and reduce benefit outlays in the regular benefit programs are very attractive to the Congress when the Nation faces substantial pressures to balance the federal budget. However, we would only point out that the inclusion of state unemployment insurance trust funds in the federal unified budget, accomplished through Executive Order, creates an artificial fund availability. The state unemployment insurance trust funds, financed entirely through each state's employer taxes, are dedicated solely to the payment of regular unemployment insurance benefits to qualified workers in each state. The state trust funds cannot be utilized for any other purposes or be borrowed from the federal government or other states. Therefore, we urgently request that the Subcommittee reaffirm the basic principles of the federal-state partnership by rejecting proposals which disrupt the integrity of the regular unemployment insurance programs in each state.

Let me also share with you the comments of the Michigan Department of Labor on this proposal, and I quote them as follows:

This proposal is highly undesirable, for several reasons:

This requirement represents an unprecedented intrusion of the federal government into an area that has, since the beginning of the unemployment insurance program, been left to the states. This extension of federal authority runs directly counter to the commitment of the new administration to reducing federal control and giving more autonomy to states in the shaping of programs. State control over benefit amounts, qualifying requirements, duration, and disqualification provisions is essential to tailoring a state program to local needs. Any federal standards in this area will necesarily be arbitrary because no single standard can be sensitive to conditions in all 52 unemployment jurisdictions.

This proposal will impose tolerable administrative burdens on state Employment Service agencies without providing additional staff support. None of the new requirements can be effectively enforced without additional staff to enforce them. The result will be a mass of paperwork with no benefit to claimants or employers.

The proposal assumed in this resolution to force jobless workers to take minimum wage jobs after 13 weeks of unemployment strikes at the very heart of the philosophy underlying this Nation's unemployment insurance system. The unemployment insurance program, which has served this Nation well since its inception, is designed to help jobless workers in a period of unemployment until they can find work commensurate with their skills, their education, their experience, and past earnings history.

The PRESIDING OFFICER (Mr. D'AMATO). The Senator's 15 minutes have expired.

Mr. ROBERT C. BYRD. Mr. President, I yield such time as the Senator may require from the time on the resolution.

Mr. RIEGLE. I thank the Senator for yielding.

So there is also that very important aspect to consider here, which is really the basic human aspect. It goes to the question of why we have an unemployment insurance system in the country in the first place, and that is to try to be of assistance to workers, to tide them over through these economic fluctuations in our economy.

I might say, too, that from the point of view of employers, employers who put together skilled work forces in their own respective areas of economic activity, if they find themselves because of a recession or some other problem that they have to lay off part of their work force, I think those employers are entitled to have a reasonable period of time in which to be able to call those workers back and expect that those workers will still be there ready and able to work.

So, in a sense, I think this amendment not only provides a degree of insurance for the workers involved and for their families, but as well for the companies and for the employers that also will need to try to keep their trained and skilled work force intact until the economy recovers and they are able to recall these workers and get them back on the job.

So, after such a period as 13 weeks, to try to force those workers into a minimum wage job and displace other people really makes no sense. It makes no sense to the worker, in the first instance; it makes no sense to the minimum wage worker who is going to be knocked out of a position, and it makes no sense for the minimum wage employer who ends up with an overqualified worker taking that job and who might not be around for very long, who might leave to go somewhere else or finally try to find some work that is more in keeping with his own job training and level of achievement within his chosen line of work.

The unemployment compensation system has served as an investment in the productive capacity of our Nation's workers and, as such, it is an investment that has been every bit as vital as investments in physical plant or in technology or other things vital to enabling us to have the kind of very complex economy that we see in our Nation at this time.

Once a highly skilled worker would find himself or herself in a minimum wage job, as a requirement of law, their ability to search for more suitable work would be greatly diminished.

To ask highly skilled workers to take minimum wage jobs is a waste of our productive capacity, and is a shortsight-

ed policy which will not serve our Nation well in the long run.

Finally, I would just like to say this. I hope we never get to the point in this country where we feel that we had to direct a punitive response at workers who have been laid off from their jobs. It is very seldom in this country that somebody is laid off and is happy about it or wants to be laid off. I know the workers in my State who are laid off more than anything else want to be called back to work. They want to be able to go back to work. They do not want to be receiving unemployment compensation; they do not want to be receiving any other subsistence benefit. They want to go back to work.

In the auto industry today, a lot of our unemployment is due to Japanese imports flooding into the United States, and those laid-off auto workers are not able singlehandedly to stop this. But until we work out these kinds of problems, we ought to have in place a program where those workers and those job skills in our industrial base can be maintained as a national asset, something that this country needs not just in time of war, when it is absolutely essential, but every bit as much in time of peace.

So I hope we will not ever get to the point where we feel that those workers who are unfortunate enough to have lost their jobs for a period of time, that somehow or other we have to come along here and impose new requirements that go beyond anything we have talked about before, and which are arbitrary and which will create hardship for them. I hope we can resist that impulse.

I think it would be a negative impulse. I think it would be counterproductive and I think it runs exactly contrary to what we ought to be doing to try to have a sense of community and a sense of connectiveness within our society where we help each other and we try to go forward as a Nation of individuals—226 million of us—recognizing that from time to time if people are in difficulty, it makes good national sense to help them get out of difficulty, get through it and get back on their feet so they can continue to produce at the maximum level for the well being of the entire Nation.

Mr. KENNEDY. Would the Senator be good enough to yield?

Mr. RIEGLE. Yes.

Mr. ROBERT C. BYRD. Mr. President, I yield time to the Senator from Massachusetts off the resolution.

Mr. KENNEDY. Mr. President, I rise in support of the amendment offered by Senator RIEGLE, which would restore these funds.

The administration proposed and the Budget Committee accepted several significant changes in the unemployment compensation program, which would save $580 million in fiscal year 1981 and $1.8 billion in fiscal year 1982.

Most of these savings are achieved by making significant changes in the extended unemployment benefits program which provides 13 additional weeks of unemployment compensation during periods of particular economic difficulty. Under present law when the national rate of insured unemployment reaches 4.5 percent the extended benefits program is activated in all 50 States.

The spending reductions which have been proposed would completely eliminate the national trigger. Furthermore, extended benefits would be triggered on a statewide basis only when the increased unemployment rate reaches 6 percent.

In addition, recipients of extended benefits would no longer be counted for purposes of calculating a State's insured unemployment rate.

I am deeply concerned that these proposals will make extended benefit assistance inaccessible to many unemployed workers who are legitimately in need of aid.

If enacted, almost 1 million unemployed workers will lose benefits they would otherwise receive and only seven States will continue to provide extended benefits coverage. These proposals are based on the assumption that unemployed workers simply riding the system until all benefits are exhausted before looking for work.

In the vast majority of instances this is certainly not the case—a fact that is demonstrated whenever employers announce that they are accepting applications for work. In city after city hundreds and sometimes thousands of people line up just to make out an application for 100 or 200 job vacancies. The simple fact is that people who do not return to work simply cannot find jobs.

But as disturbing as I find these changes in the extended benefit program I am unalterably opposed to the provision which this amendment seeks to eliminate. That proposal would require persons receiving benefits for more than 13 weeks to accept jobs paying no more than the value of the benefits they are receiving or the minimum wage.

As the Washington Post noted earlier this week, this proposal would force workers into less skilled jobs thereby lowering their productivity and pushing unskilled workers out of work altogether.

Moreover it will impose a Federal standard on what is now an entirely State supported program.

All States already take into account the length of an individual's employment in determining the suitability of any job offer.

As the period of unemployment lengthens, claimants are generally expected to lower their expectations. Additional requirements, if they are not simply redundant, would compel recipients to accept jobs that even State officials would presently not require them to accept, placing such a burden on both the unemployed worker and the State employment services is both unnecessary and onerous.

Mr. President, I commend the Senator for raising this issue and for the presentation that he has made here today. I would like to just ask him whether, from his own study of the issue, he would agree with me that, if this amendment goes into effect, effectively what we are doing is probably forcing out of the labor market the opportunity for lesser skilled individuals out of the labor market entirely while at the same time lowering the productivity of skilled workers. I think this is obvious. But actually we are closing down the opportunities for new entries into the job market, whether they be young workers or teenage workers or whether they be the women who have come into the job market in recent times. I am just wondering whether the Senator has reviewed that as well as the other excellent points that he has made.

Mr. RIEGLE. Well, I think the Senator makes an important point here. And that is that many of the individuals who are having the hardest time making their way into the labor force today are coming in at entry level, minimum wage jobs. It is obvious that if highly skilled and highly trained workers are forced to take those jobs away from them that these newly entering workers at the lowest skills levels are obviously going to be forced not only out of those jobs and out of that chance for job training, but in many cases are going to be forced on welfare.

Mr. KENNEDY. We recently held hearings in the Human Resources Committee on the youth subminimum wage. The Senator was present during those hearings and I thought made an excellent point when he pointed out that 70 percent of the minimum wage jobs are now held by older workers, or workers that are over 21 years of age and that most of these workers have families to provide for.

In other words, we have one group of individuals who are trying to provide for their families who will be under pressure from more skilled individuals who will probably replace these individuals unless we adopt the Senator's amendment. Therefore, we delude ourselves if we think we are going to be saving the taxpayer much money under the administration proposal because, as the Senator outlined, we will force those individuals with lesser skills to accept welfare and food stamps and all of the other social programs.

Mr. RIEGLE. I would respond by saying that one of the things that troubles me most is that I cannot see how the country can come out ahead financially with this proposal. And I think, with the reasons that the Senator has just cited, it is much more likely that the country as a whole will come out behind with this proposal. Because of that, I wonder why it is being suggested.

That is why I raise this concern that it almost appears that it is a punitive requirement that is actually being used to almost punish, if you will, workers that have been forced out of their jobs. And I hope that is not the motive, but one starts to wonder, because the economics do not make sense.

Mr. KENNEDY. And furthermore, we in the Human Resources Committee, in our day of listening to those that would be affected by some of these budget cuts, heard from two unemployed individuals, one an auto worker and another a machinist, who had been earning well above the minimum wage.

They indicated that they themselves are prepared to take any job in order to provide for their family but many companies won't hire them because if they

get called back to their old job they will leave. So they get caught between a rock and a hard place. For instance, if this amendment goes into effect, they would be required to take that job. But the employer does not desire to take that individual because the employer understands that the new employee will return to his or her former job if it becomes available since it is a higher paying, more highly skilled job. Therefore, the policy the administration proposes will put a squeeze on the individual as well as on the employer.

Mr. RIEGLE. Well, I would say to the Senator that, as it is now, every State is free to tailor their response to their own particular circumstances.

Mr. KENNEDY. And we are circumventing that prerogative in this case.

Mr. RIEGLE. Absolutely. This becomes a Federal preemption, butting right into the States and telling the States what is best for them, which seems to me to run exactly contrary to what the other things are we are hearing which is to the effect that we ought to let States have some flexibility and have some room to try to tailor these things to fit their own unique circumstances.

Mr. KENNEDY. Well, I think that is a very valid point.

I listened to the distinguished Secretary of Health and Human Services during the course of the morning making that point on issue after issue with regards to health care. Here we find, in the afternoon, the administration is effectively usurping the States' prerogatives in this area.

I commend the Senator and I urge my colleagues to support the amendment.

Mr. RIEGLE. I want to thank the Senator for his contribution and for his leadership in the area over a long period of years, and I think that the points he has raised here go right to the heart of this matter. I hope that all of our colleagues that are listening to this debate will weigh these things carefully.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I yield time to the distinguished Senator from Michigan, Mr. LEVIN, from the time on the resolution.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. I thank my friend, the minority leader.

Mr. President, I rise to speak in support of Senator RIEGLE's amendment to reduce the savings in this year's reconciliation instructions. The Budget Committee assumes this savings would come about by requiring the work test for those on unemployment compensation after 13 weeks.

Most States require that a worker receiving unemployment insurance accept suitable employment, if offered. Suitable employment is usually defined as a job in the recipient's customary occupation. That is a fair requirement. It seeks to get the worker back into the work force as quickly as possible in a position for which he or she has been trained and for which the individual has the necessary experience.

The administration and the Budget Committee seek to redefine "suitable employment" as that which pays gross wages equal to at least the higher of the minimum wage or the unemployment benefit. Practically, that means that many unemployed workers will be forced to accept employment after 13 weeks at a salary near or at the minimum wage. This is an unfair requirement.

My first objection to this proposal is that it is an unwarranted Federal interference in the affairs of State government.

This has already been discussed by my colleagues from Massachusetts and Michigan.

The individual States set the standard for the regular unemployment benefit program. The Federal role is limited to the extended benefits program and unless we are to accept a federalization of the unemployment insurance system, we should continue to let the States set the standards for the regular unemployment insurance program. My second objection is that we do not want to hastily force people out of the occupations for which they have been trained. One of the tenets of the system is to maintain the availability of a trained group of workers until there is a recovery in the industry or the individual's employer is ready to call the person back to work. To require a skilled tool and die maker to hastily take a job in a fast food restaurant at the minimum wage makes no sense at all. It will force that person prematurely to pick up stakes and to look for work for which he or she has been trained.

In that regard, this assumption by the Budget Committee and by the administration is anticommunity because it will force people prematurely to leave their own communities, to pick up stakes, to move their families in a search for work for which they are qualified. A person who has been a skilled tool and die maker cannot make a mortgage payment under a minimum wage. They cannot stay around at a minimum wage job. They must leave, with all of the upset that that represents in terms of community stability.

So, Mr. President, I hope my colleagues will support Senator RIEGLE's amendment. We should let the States run their programs in the manner which they have historically been able to do. We should not force a worker prematurely into a job for which they are unsuited while they are waiting to return to their previous job. We should not interfere with the job search of a person who needs the extra weeks to locate a position for which he or she is trained. Finally, we should acknowledge the fact that the problem in our country right now is that we have 8 million persons unemployed and what we should be doing is training those persons for useful lives and providing jobs that will be productive to them and society.

I thank the Senator from West Virginia and I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. GORTON. Mr. President, during the course of his remarks on this amendment the Senator from Michigan said he could not see how we could possibly be ahead as a nation by passage of the reconciliation resolution in the form in which it appears before you. It is perhaps that inability to foresee the effects of the programs which have been adopted over the last dozen years or so which is primarily responsible for the economic morass in which we find our country today, with overwhelming inflation and with the lack of any growth in productivity in our economy, which is the primary cause of the unemployment which nominally this amendment is designed to deal with.

We are speaking here of an amendment which will cost a quarter million dollars, coupled with what must be at least dozens of other similar amendments proposed during the course of the last week, some of which would cost more and some of which would cost less, but the total of which would very clearly subvert completely the economic recovery program which is the sense of Concurrent Resolution 9.

I believe we can tell the Senator from Michigan and the other Members of this body exactly what we propose to do. We propose, through this resolution and through the balance of the economic recovery program with which this body will be dealing in the course of the next 2 or 3 months, to create the kind of growth and opportunity in this society which will reduce unemployment, and reduce it without the excuse that we cannot force or require an individual to take a position other than a position for all practical purposes identical to that which he has lost. For every individual who legitimately is a full-time participant in the work force, and who legitimately wants only a position identical to that which he has already had, there are many who are entitled to unemployment insurance under present programs simply as a result of what is consistently and constantly a part-time or seasonal position, which cannot be duplicated in the marketplace no matter how successful our economy is.

It has, in many professions and many occupations, simply been considered to be one of the supplementary benefits of particular kinds of employment that unemployment insurance is available for an extended period of time after a particular season is over, and when no such jobs are available to anyone under any set of circumstances.

It is important to point out that the program on unemployment insurance, taken as a whole, has three additional elements in it not attacked by this amendment, at least one other of which is directed at this temporary or seasonal type of employment.

In any event, this set of ideas will not force an employer to hire a person too skilled for the position which is offered. Nothing in the proposal which is being submitted to the Finance Committee will affect the employer's right in any respect whatsoever. If they fear that a given individual will stay with them for only a few weeks and then leave for other em-

ployment, they need not hire him in the first place.

This is directed at the employee and says to him, it seems to me quite reasonably, "After 13 weeks you must seek some other reasonable form of employment, not necessarily at the minimum wage but at the minimum wage or at a percentage of your previous salary, whichever happens to be higher." It will not take people who earn $12 or $14 an hour and require them to work at the minimum wage.

It will not remove their unemployment insurance benefits if no position is available to them after 13 weeks, if an employer does not, in fact, want to hire them.

It will simply say that we are going to have greater incentives to work than we have had in the past by saying that an individual after 13 weeks must seek more than precisely the equivalent of the position which he previously held.

Many people will not even seek such employment. They will prefer to go off unemployment insurance entirely because they have always designed their position as a part-time or as a seasonal position.

We must think differently in the future if we are to cause real economic recovery in this country. We cannot simply excuse all of the policies of the past. If the policies which the Senator from Michigan is advocating could bring us out of a double-digit inflation, could provide for economic growth, I say, Mr. President, they would already have done so.

They have not done so. It is time to try something different, something which provides a stronger work incentive, something which provides employers with a greater choice than they have at the present time, something that will lead to economic recovery in this country and not simply the payment of additional benefits.

Mr. RIEGLE. Mr. President. I wonder if I might request the yeas and nays on this amendment? I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CRANSTON. Mr. President, it is my understanding that, out of accommodation to a Member on the majority side, there is no desire for a vote at this particular moment. May I have some time yielded to me on the bill?

Mr. ROBERT C. BYRD. Mr. President, I yield such time as the Senator may need.

Mr. CRANSTON. I thank my minority leader very much.

Mr. President, I intend to vote against passage of the Senate budget reconciliation resolution. I feel I have no other choice. The people of our Nation may have voted last November to cut back Federal spending to eliminate fraud and waste, to curb the Federal bureaucrat, or to put a cap on inflation. I believe that did.

I do not believe, however, that they voted for a cruel abandonment of America's commitment indeed. America's obligation to help those most in need.

This resolution constitutes a cruel abandonment. It needs to be called just that. If we Democrats do not call it that, who will? If we Democrats do not oppose it, who will?

The component parts of this resolution reflect a political philosophy so far to the radical right that there is no reason for mainstream Democrats and moderate Republicans to embrace it. Despite our common commitment to severe fiscal restraint.

Mr. President, long before the beginning of budget consideration, I said publicly that I favored cutbacks in Government spending in an effort to help curb inflation, and that I expected to support a budget reasonably close to the dollar figure proposed by President Reagan.

But I said that to win my vote, the budget would have to insure that the ax fell so as not to hurt inordinately and inhumanely people who were bound, in any case, to be hurt by cutbacks in Government programs—people like children, the elderly or handicapped persons, veterans, people who depend on the Government for their well-being and often for survival itself.

The so-called safety net under the administration's budget cuts, as they came to the floor, was dangerously frayed and threadbare.

It had wide, gaping holes through which many thousands—perhaps millions—of luckless Americans may fall.

It was a safety net that was potentially hazardous to the Nation's health.

It still is.

Most Senate Democrats, with the help of a few Republicans, attempted to rework some of the ragged, raveled threads of the not-so-safe social safety net and to reweave those wide-open holes.

We tried to reduce the cuts in social security. We got shot down.

We tried—three times—to reduce the cuts in veterans health programs. We got shot down.

We tried to reduce the cuts in school lunches and other children's food programs. We got shot down.

We tried to reduce the cuts in elementary and secondary education and in grants to needy college students. We got shot down.

We tried to reduce the cuts in community health centers. We got shot down.

We tried to reduce the cuts in mass transit. We got shot down.

We tried to reduce the cuts in urban development action grants so as to stimulate private investment in urban slums. We got shot down.

We tried to reduce cuts in programs to conserve energy by weatherizing homes. We got shot down.

We tried to reduce the cuts in programs to help low-income people pay high fuel bills. We got shot down.

We tried to reduce cuts in school programs for disadvantaged children. We got shot down.

On the other hand, when we tried to cut Government spending—for example, when we offered an amendment cutting such nonessentials as office supplies, travel and filmmaking—we still got shot down.

We even got shot down trying to help President Reagan get back the money he wants to build up the strategic petroleum reserves the Nation needs for its economic and military security.

And we even got shot down when we offered an amendment that would not have changed spending totals in any significant degree but would have provided a far more balanced energy program permitting more emphasis on solar, geothermal, synthetic, and other alternative fuels and proportionately less on overfunded nuclear energy.

It is clear Mr. President, that not all of these programs could have been saved from the ruthless purge without violating the overall spending target established by the President and accepted by virtually every Senator.

It is clear that several could have been spared within, or very close to, the target figure.

So, when one amendment was shot down, we offered another in hope that we would eventually strike a responsive chord in hardened Republican hearts.

We never did.

The Republican rule was: Do not change anything.

And Republican rigidity won the day.

So some of us voted for a good many more amendments than was our original intention, and the cumulative total of their costs is no valid measure of our commitment to reducing the gap between spending and revenues.

Mr. President, the Republican victory may be a costly victory for the Nation.

Republican leaders, whipping their troops into lock-step conformity, refused any accommodation, any compromise that might have brought about truly nonpartisan support for much of the President's budget.

The Republicans were well disciplined.

But perhaps they were also frightened.

Perhaps they were fearful that if they lost one vote, they might lose a flock of votes. And what they apparently wanted was a Republican—not a bipartisan—budget.

That is where we are at the moment, Mr. President.

The people's hopes now rest with the House, fortunately still in Democratic hands, and then with the conference between the House and Senate.

I hope, and, indeed, except, that in the end, a reconciliation resolution will come to the Senate floor that I can support.

Mr. President, I do not, as our distinguished leader has suggested, view the defeat suffered in amendment after amendment on this floor as defeats for Democrats. I view them, in the words of the distinguished Senator from West Virginia, as defeats for children, for senior citizens, for handicapped people, for working men and women, and for worthy projects like rapid transit and health care, and for veterans. Veterans were among those who suffered the worst and most startling defeats, as the distinguished Senator from Nevada points out.

Mr. President, once our spending commitments for fiscal 1981 have been fi-

nally made, and we have a budget with spending recommendations for fiscal 1982, we will be in a position to make intelligent decisions on the matter of tax cuts.

I support a number of productivity tax incentives—reduced capital gains taxes, a rollover for capital gains, accelerated depreciation for buildings, machinery and vehicles, larger tax exemptions for savings and investments, research tax credits.

But I have said repeatedly that I flatly oppose a 3-year across-the-board 10-percent cut in individual income taxes as too inflationary.

I support a 1-year tax cut that would average out to around 10 percent, revised to provide a bigger tax break for middle and low incomes and less for the upper brackets.

We need to help offset other tax increases and to ease some of the burden of inflation on the less wealthy.

But I am prepared to oppose even a 1-year 10-percent cut in favor of some lesser percentage if we face an appreciable increase in Government spending—either because of add-ons in the course of the budget process or, as is very likely, because the administration's economic projections prove out to be as overly optimistic as most of us believe them to be.

Fighting inflation, not cutting taxes, must remain our No. 1 goal.

Mr. GORTON. Mr. President, I must confess to a certain degree of puzzlement over the long speech of the distinguished Senator from California, in which he joined a number of what seemed to be inconsistent arguments.

First, the point that, in general terms, he agreed with the President's program for cuts in the Federal budget, coupled with the fact that he, I believe, has voted for every increase in Federal spending which has been the subject of the last week of debate here, coupled——

Mr. CRANSTON. Mr. President, if the Senator will yield, I have not voted for every increase. I voted for a number, as I stated, not for all.

Mr. GORTON. I will withdraw that comment. I will say that he voted for a significant number of such increases, although many of his companions on that side of the aisle have voted, for all practical purposes, for all of them.

He then points out at the end that he believes that the economic projections of the administration are too rosy; that, in fact, we will not recover as rapidly as the administration hopes from the economic crisis we face at the present time.

If that is the case, he and the Members on the other side should have been advocating more cuts rather than fewer cuts in the Federal budget in order to bring closer the day on which our budget will be balanced and we would not put pressure on the economy with tremendous deficits.

Yet, so far, the only proposed "cuts"—and I put that word in quotation marks—which have been argued significantly from the other side are ones which they would have laughed at a year ago, because they do not involve programs at all: general matters, not directed to the jurisdiction of any committee, on travel or the like, which certainly will be cut substantially by this administration; picking figures out of the air for waste, fraud, and abuse, for the Committee on Governmental Affairs and the like. The position simply is inconsistent.

This is a difficult process. It is not a process which anyone on this side of the aisle likes any better than the Members on the other side of the aisle. But if we are to change America's direction, we must take tough votes on real programs. We have been willing to do so to a great extent. Many others on that side have not, and yet do not believe that we have gone far enough, in their general speechmaking.

I am not at all convinced that we have gone far enough. I do not like many of the votes that I feel I have been required to cast during the course of the last 4 or 5 days, but I do believe that all of them have been necessary if we are to have the economic recovery we so greatly need in this Nation, if we are to provide job opportunities, real job opportunities, in the private sector for the people of this country, if we are to bring inflation under control for the people of this country.

Mr. President, I am prepared to yield back the remainder of our time on this amendment, if the other side of the aisle is prepared for a vote.

Mr. CRANSTON. Mr. President, I will take a moment on the resolution to respond, and then the Senator who offered the amendment is prepared to yield back his time. I wish to respond briefly to the remarks of the distinguished Senator from Washington, who is a new and remarkably effective Member of this body, and I am delighted that he is with us.

I am pleased to engage in a brief colloquy with him.

If the projections of the administration are off in terms of what is going to happen to the economy, I believe, in the first place, that we should look to change in what is presently proposed with respect to the tax cuts. I believe we cannot afford to make 10 percent tax cuts, particularly not over 3 years, if we are going to have a widened deficit as a consequence of that cut and as a consequence of the situation affecting the economy.

In regard to fraud, waste, and other abuses of a like nature, we heard a great deal about that in the course of the campaigns last fall, and it sounded as if there were huge savings to be made in relation to rooting those things out of Government.

We were told of high percentages that would have led to saving $13 billion to $18 billion when projected into the budget, in terms of elimination of fraud, waste, and abuse. Now it is narrowed down to much smaller figures, something like $6.8 billion that may or may not be rooted out by focusing on that problem.

We are simply endeavoring to assist the Republicans in sticking to their campaign promises and fulfilling them. When we offer amendments designed to do that, they are rejected by an overwhelming vote from the present majority side of the aisle in this body, which leads to some wonderment about the statements we heard so freely during the campaign last year.

The PRESIDING OFFICER. Who yields time?

Mr. GORTON. Mr. President, perhaps our disagreements are best exemplified by that last set of comments.

We believe that after constant increases in the real rate of taxation foisted on the American people by the combination of inflation with the graduated income tax, it is very definitely time to cut taxes, and to cut taxes substantially, and that no single step can do more to renew our growth of productivity in this society.

I yield back the remainder of my time.

● Mr. BRADLEY. Mr. President, the proposal which we are debating would require the States after 13 weeks of unemployment to disqualify a worker who refuses virtually any job, regardless of whether the job is suitable for the worker. This proposal radically changes both the standards of the current unemployment insurance system and the philosophy of the unemployment insurance system.

The unemployment insurance system is not designed as a welfare system. Instead, its purpose is to provide wage insurance to help workers who become unemployed until they can find suitable work. There is a strong interest in helping that worker find work to which he or she is suited because in such a job the worker is likely to maintain a long-term commitment to such work, thereby increasing productivity.

Those who seek to change the law and impose this Federal requirement on the States apparently believe that it is too easy for an individual to collect unemployment insurance under State law.

While there are problems in the administration of State law due to underfunding and enforcement difficulties, the State laws themselves are adequate to insure that unemployment insurance benefits do go to those who are involuntarily unemployed. The State laws do require the claimant to be available for work, they do require the claimant to be actively seeking work, and they do require disqualification from benefits if the individual involuntarily leaves work or is discharged for misconduct.

This proposed change in State laws will only punish those unemployed individuals who are looking for productive, suitable work and it will not deny benefits to those persons who fraudulently convince the local employment service that they are looking for any work at all.

The second major reason why this amendment to restore funds should be adopted is because the proposal to change State laws would undermine the philosophy of the unemployment insurance system.

The unemployment insurance program was first set up as a Federal and State system in 1935 for three major reasons.

First, the drafters of the legislation were concerned that the constitutionality of a wholly Federal system might not be upheld by the Supreme Court. second, the drafters wanted to form a system which would allow for flexibility and experimentation, and third, the

drafters of the unemployment insurance system recognized that the protection of workers was, at that time, a traditional function of the States.

Over the past 46 years, the system has worked well in allowing the States to form their State insurance programs with minimal guidance from the Federal Government.

Unemployment in the 1980's is surely a national problem and we may need a national Federal policy in dealing with it, but we should not attempt to impose a not-too-well thought out Federal policy on State programs which are funded with State moneys. Even those such as the U.S. Chamber of Commerce who favor the idea behind the suitable work requirement are reluctant to support that idea when it is enforced through a Federal benefit requirement. We must not make this major departure from the philosophy underlying the current unemployment insurance program and I urge my colleagues to support this amendment to restore funds for fiscal year 1983 so the Federal requirement will not be necessary.●

Mr. BOREN. Mr. President, it is my intent to vote against the amendment by my distinguished colleague from Michigan, Mr. RIEGLE. I vote against the amendment because it contains no offset for the budgetary savings it would sacrifice. I want to make it clear, however, that my vote should not be construed as unqualified support for the administration proposal on unemployment benefits.

As you know, Mr. President, I have long worked to enact cost-saving reforms of the extended benefits program of unemployment compensation. Indeed, last session, I was joined by a majority of my colleagues in this Chamber in enacting a reasonable work requirement for the federally funded extended unemployment benefits program. I am extremely reluctant, however, to apply a similar standard to regular unemployment benefits which are the province of State governments. I have always believed that States rights should be respected.

In the next few months, the Senate Finance Committee, pursuant to the reconciliation instructions in this resolution, will act upon the specific budget reductions proposed by the administration. I want to approach those proposals with an open mind and at that time, I will urge my colleagues on the Finance Committee to carefully scrutinize the entire program.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan (Mr. RIEGLE), UP No. 49. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Texas (Mr. TOWER) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

I further announce that, if present and voting, the Senator from New Jersey (Mr. WILLIAMS) would vote "yea."

The PRESIDING OFFICER (Mr. BOSCHWITZ). Are there any other Senators desiring to vote?

The result was announced—yeas 38, nays 60, as follows:

[Rollcall Vote No. 72 Leg.]

YEAS—38

Baucus	Ford	Melcher

NOT VOTING—2

Tower	Williams

So Mr. RIEGLE'S amendment (UP No. 49) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 27

(Purpose: To restore funds for the welfare reform demonstration programs in the Department of Labor)

Mr. GLENN. Mr. President, I call up my amendment No. 27.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an amendment numbered 27.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, beginning with "$10,303,000,000" in line 6, strike out through "$10,913,000,000" in line 9 and insert in lieu thereof the following: "$10,228,000,000 in budget authority and $7,845,000,000 in outlays for fiscal year 1982; and $12,310,000,000 in budget authority and $10,852,000,000".

Mr. GLENN. Mr. President, if I got up on the floor of the Senate and said I wanted to cut out fat, fraud, and waste, and I wanted to get the cheats and freeloaders off of welfare and I wanted to save money and help balance the Federal budget, I could get lots of takers. That is an offer we cannot refuse.

There is not a Senate office that does not receive mail every day that says something like this, "Why don't you get those deadbeats off welfare?" Or "I work, I pay my taxes, and he makes more on welfare than I do holding a job, and I work hard."

If you were to sit down and design your own personal welfare program that would effectively address the waste, fraud, and abuse in the present program, as well as answer the complaints you received day in and day out, I daresay it would be something like the following: I think when each welfare recipient came in for revalidation of his welfare eligibility you would probably require that person to sit down with the help wanted ads out of the daily paper. You would get him on a telephone, give him some advice and supervision on how to get a job—not workfare, but a job in the private sector.

Failing that, you would probably then, after an intensive effort of trying to place this person in a private job, provide them with some job training to help them develop an employable skill, one tailored to the need of the local market. Not only that, but you would also require them to show up for 4 hours a day for training. Now, that is little enough to ask.

And you would make the program mandatory for the able bodied, but you would have compassion with this program. You would provide, for example, day care help for AFDC mothers.

The program would include essentials, even very basic things like assistance ranging from appearance to literacy education for those who could not read that want ad in the paper.

Finally, for those who refused to take part in the program, you would kick those deadbeats and those cheats off the welfare rolls.

Now that is probably about a summary of the program that you would suggest.

Mr. President, let me tell you, we already have such a program. At present it is only a demonstration program at 14 different sites across the country. But it shows great promise.

And it even costs less than was anticipated when we authorized it. It is commonly called the employment opportunities pilot program, EOPP.

The budget knows it as the welfare reform demonstration program, administered by the Department of Labor. The results to date, after a little more than a year's experience, are excellent. I repeat, the experience has been excellent.

Just listen to the comments of some of the people closely familiar with the program.

Mrs. Paula MacIlwaine, commissioner, Montgomery County (Dayton) Ohio:

Here in our county over 50 percent of the welfare eligibles going through the program have been taken off welfare. We estimate, and have facts supporting our contentions, that we can deliver $8 million back to the Federal Government for each million spent on this program. We are catching the cheaters. We are insisting every employable welfare recipient try to get a private sector job. Quite frankly, our most conservative business leaders have been our biggest boosters for this Welfare Reform program.

Mr. Neil Hurley, director of the CETA program, Lowell, Mass., consortium:

Seventy percent of the welfare recipients who have participated in and completed the program have found unsubsidized jobs. 719 individuals are now working full time who were previously unemployed and receiving welfare payments.

The 70 percent entered employment rate does not include another 100 welfare clients who removed themselves from AFDC and another 110 welfare recipients who had their welfare payments reduced or terminated because they refused to participate.

Mr. Hurley again, echoing Mrs. MacIlwaine:

The project has had the major impact on eliminating fraud and abuse in the welfare system. The project has screened out ineligibles who were working full time and illegally collecting welfare payments. We estimate that 10 percent to 15 percent of the welfare clients contacted fall into this category.

Mr. President, these statements indicate that this experience is applicable all over the country, and I know of no reason why it would not be: That is up to 15 percent of the people on welfare are already holding other jobs and are collecting their welfare checks as a bonus.

The reconciliation resolution proposes to phase the program out short of completing its 2-year demonstration period, thereby negating any real benefit from the data already collected and insuring that full data will not be available when we turn our attention to long-term reform of the present welfare system. And I think that would be most unfortunate.

I propose, instead, to permit the program to proceed to its natural conclusion, though at somewhat reduced cost. Frankly, the reduction is made possible by the unanticipated success of the program in placing welfare recipients in jobs, especially unsubsidized jobs in the private sector. Only about 15 percent of the enrollees go into public service employment.

My amendment to Senate Concurrent Resolution 9 would restore budget authority of $75 million and outlays of $83 million in fiscal year 1982 and $53 million in budget authority and $61 million in outlays for fiscal year 1983.

Just a few interesting sidelights on EOPP—the employment opportunities pilot program.

First, the 4-hour-a-day attendance requirement eliminated a number of people on welfare who were already holding adequate jobs but collecting welfare anyway.

Second, this is not workfare or public jobs at the public's expense. Its emphasis is directed toward private sector jobs.

Third, this program is working. It should be tried I believe right here in our Nation's Capital; where the Sunday Washington Post normally has between 30 and 45 pages of "Help Wanted" ads, covering every kind of work from manual labor to nuclear scientists. Jobs are available.

Mr. President, when I first arrived in Washington a little over 6 years ago someone pointed out to me one Sunday the big "Help Wanted" section in the paper. And I have made it a habit ever since then to check the Washington Post "Help Wanted" ads every Sunday. They average between 30 and 45 pages and cover day labor work to nuclear scientists and everything in between. And unless people have problems of literacy and cannot read those want ads, I think the jobs are available in the private sector in Washington.

I cannot understand for the life of me why this approach has not been standard practice for the last 25 years. Because it is just plain commonsense.

Mr. President, the amendment which I have called up would amend Senate Concurrent Resolution 9, the budget reconciliation resolution. This amendment would restore $75 million in budget authority and $83 million in outlays for fiscal year 1982 to the Department of Labor's welfare reform demonstration program. This restoration is considerably lower than the original request contained in the January budget, which projected budget authority of $174 million and outlays of $159 million for fiscal year 1982 for this program. The reduction is made possible by the program's unanticipated rate of success.

I am also introducing an impoundment resolution aimed at disapproval of the proposed deferral of $45.8 million in budget authority for the program for fiscal year 1981.

My amendment and resolution would do no more than allow for a full 2-year test period for the welfare reform demonstration program, so that complete data would be available on this promising approach to welfare reform. Continuation of the program is especially important in light of its compatibility with the President's proposed workfare plan and the possibility that some such program may be instituted on a nationwide basis in the not too distant future.

The welfare reform demonstration program—also known as the employment opportunities pilot program (EOPP)—is designed to assist welfare recipients obtain unsubsidized employment by focusing on job and training opportunities as an alternative to welfare dependence. It is authorized by section 311(e) of the Comprehensive Employment and Training Act. The program is structured to provide a full 2-year test period for each of 12 EOPP projects. There are two additional projects which are funded through non-EOPP budget sources. The 14 geographically dispersed sites were selected in order to test variations in population characteristics, industrial structure, unemployment rates, wage levels, degree of urbanization, and transfer program characteristics. I ask that a list of the 14 cities be included in the RECORD as if read.

Each EOPP project has two components. The first component is an intensive job search program which provides for initial and recurring assistance in finding private sector employment. It also provides supportive services. The second component is a job training program which is provided for those who are initially unable to find private sector employment.

For a good many years now, our country has been troubled by escalating welfare costs and has been dismayed by the fraud and abuse which seemed to be a constant companion of certain welfare programs. In its early years, of course, CETA programs were not immune from these problems. So before extending the act in 1978, Congress insisted that a number of changes be implemented. For one thing, we insisted that job training and assistance be focused on those who need it most—the truly disadvantaged. Second, we asked CETA to initiate a partnership with the Nation's business community in order to encourage employment in the private sector. And third, we insisted on more effective and professional management within the programs themselves.

For my part, I have long believed that the Nation has an obligation to provide employment opportunities to every citizen who is able to work. But equally important, I believe these jobs should be located, whenever possible, within the private sector. Meaningless, make-work jobs in the public sector place an unacceptable burden on our already bloated public payrolls. Even worse, they tend to stifle initiative and create an umbilical cord of dependency for those they are designed to help.

It is for these reasons that the job search assistance programs are so important. Rather than providing cash grants to those out of work, the emphasis is on employment and training opportunities. Instead of forcing the unemployed into a pattern of degrading dependency, the program offers such people the much preferable option of supporting their families through a regular paycheck.

The taxpayers also benefit greatly from these projects. The EOPP concept insures that money we spend in the short run will save us many more dollars in the long run. Helping people help themselves will not only reduce food stamp, medicaid, and other welfare costs, but will also permit many more people to participate productively in the economies of their local communities.

Although the data are incomplete, the available statistics highlight the success of the program. In August 1980, there were 15,310 enrollees. By October 29, 1980, of the participants who actually completed the job search program, 44 percent of all AFDC eligibles and 48 percent of AFDC mandatories were working in unsubsidized jobs and 32 percent of AFDC eligibles and 31 percent of the AFDC mandatories were working in subsidized jobs or training. The Massachusetts and Missouri sites are placing 70 percent of their job search participants in unsubsidized jobs. The total placement for participants for all AFDC eligible enrollees was 76 percent.

Unlike the other projects, the Dayton, Ohio, EOPP project was designated to also assist general welfare recipients. As of October 29, 1980, the total placement for participants in the Dayton project was 35 percent. However, 46 percent of those who did not complete the Dayton job search program have had their welfare benefits reduced or eliminated. Thus, the project has shown a strong potential for eliminating fraud and

abuse in the welfare system. Administrators contend that many of the dropouts whose benefits were terminated did not participate because they did, in fact, have employment.

For these reasons, I believe that the program should be allowed to continue for its full 2-year test period, though I am willing to see its budget reduced by the significant sum of nearly $100 million in fiscal year 1982 budget authority.

Overall, my amendment would do the following:

Restore $75 million in budget authority and $83 million in outlays for fiscal year 1982; and restore $53 million in budget authority and $61 million in outlays for fiscal year 1983.

The impoundment resolution, if approved, would have the effect of directing obligation of fiscal year 1981 outlays proposed for deferral.

Before concluding, I would like to briefly address the administration's justification for discontinuing the welfare reform demonstration program. According to Albert Angrisani, the Department of Labor's Assistant Secretary for Employment and Training, the decision to eliminate the projects was based on the fact that they were intended to support the development of strategies to be used for legislation proposed by the previous administration. This shallow justification overlooks two glaring realities: The overwhelming success of the projects to date and their compatibility with the administration's workfare approach.

To summarize, Mr. President, if we are truly serious, if we are truly serious in the Senate of the United States of America that we truly want to do what the President said: that we want to cut fat, fraud, and waste; that we want to get the cheats and the freeloaders off welfare; that we want to save money and help balance the budget, I say that this program is an offer we cannot refuse. My only question is will enough Senators join me in this effort so that we can keep this very worthwhile program on the books. It returns more to the Federal Government than it costs and we should not let it go out of existence.

It is incredible to me that we would consider cutting a program that is doing so well out of the budget. Yet that is what is being done.

Let us cut that fat, fraud, and waste. Let us get the cheats and the freeloaders off welfare. Let us save money and let us help balance this Federal budget.

This is an offer none of us can refuse. I hope Senators will join me.

I reserve the remainder of my time.

Mr. DOMENICI. Mr. President, I would just say that I wish we could support the distinguished Senator, but that is impossible. Basically, this asks for about $75 million in budget authority in 1982 and $83 million in outlays to do the following: To demonstrate that a new welfare reform program proposed by President Carter should be carried out now. Even though Congress refused to do President Carter's program, the distinguished Senator would ask us now to put the money back.

I really do not think that that kind of welfare program has a chance in this Congress when the last Congress would not put it into effect.

In addition, the basic underlying concept of the demonstration program is similar to workfare but for demonstration only in certain parts of the country. The basic program that the new President proposes will be workfare across the country. I certainly do not think that we ought to give any indication here today that we want to put a total of $128 million in budget authority and $144 million in outlays over 2 years into a demonstration welfare program that basically was an idea of the Carter administration, which Congress refused to pass.

I yield back the remainder of my time on the amendment.

Mr. GLENN. Mr. President, the only objection I have heard so far is that this came up under President Carter. I cannot believe that we are so hidebound in our political alinements in the Senate of the United States that that can be the only objection to this amendment.

The distinguished Senator from New Mexico says that the present administration is going to propose workfare. That is the public trough. That is putting ourselves back at the public feeding trough again—public jobs. All we are doing is requiring people to go out and rake leaves, pick up cans along the road, and so forth. That is at public expense.

This program is working so far. It is putting people to work in the private sector. It is getting them off the welfare rolls. It is helping them to read such common things as the want ads in the newspapers each day. It trains them if they do not have any work experience. It trains them and puts them to work. Where it has been tried, it has been successful in taking at least 50 percent of the people off the welfare rolls.

Mr. President, it just does not make much sense, that we can rise in the Senate of the United States and just say we will take a partisan attitude on something that seems to me so fundamentally commonsense and object to it only because a former President proposed it.

I do not want to see us go to workfare and keep people at the public trough when they can be put out into private sector employment; that is, private sector jobs.

We should be trying to get people employed in the private sector. Get them off the welfare rolls. Get them off the system which keeps them on welfare at public expense.

I do not think workfare is going to prove nearly as effective as the program we already have in pilot status. All we are asking today is that this be continued in pilot status so that we can get the full 2-year experience that was planned. Then we will know better how to go with welfare in the future.

I reserve the remainder of my time.

● Mr. KENNEDY. Mr. President, we hear a lot these days about workfare as a way to end our welfare problems. The administration tells us there are 800,000 able-bodied adults now receiving AFDC who can work off their welfare grants in community service projects and return these savings to the Treasury.

Those familiar with workfare programs run in California and other States will tell you that the approach does not work:

In California, workfare made no difference in welfare costs;

In Massachusetts, work-relief participants actually stayed on welfare longer than they would have otherwise.

But, the employment opportunities program we're considering here today has produced dramatic results and offers real promise as a way to put welfare recipients to work in productive, private sector jobs.

The city of Lowell, Mass., has operated this demonstration program since October 1979. In that short time:

Over 700 welfare recipients have been employed;

For every dollar spent $2.27 in welfare payments, medicaid, food stamps is saved;

Welfare payments have been reduced by $190,000 a month;

$3.4 million in total welfare savings have been realized;

Welfare recipients that refused to participate had their benefits cut off.

The program has been so successful that the Department of Labor has agreed to support its expansion in 10 other Massachusetts communities.

The secret of this phenomenal success is the job club. Welfare recipients are taught a skill most of us take for granted—how to look for a job. They spend 8 hours a day, 5 days a week calling employers, going on interviews and learning how to sell themselves and their talents. As a result, 80 percent of those welfare recipients in the job club found work in the private sector.

To quote the director of the Lowell program, Neil Hurley:

> This is a program that works. It saves public funds. It gets people jobs. It helps to make individuals self-sufficient. It eliminates welfare fraud. It is practical. It . . . injects some commonsense into this Nation's troubled welfare system.

Mr. Hurley testified last week before the House Education and Labor Committee on the merits of the Lowell program. I ask that this testimony be inserted in the RECORD in its entirety.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY BEFORE HOUSE COMMITTEE ON EDUCATION AND LABOR, MARCH 26, 1981

INTRODUCTION

Mr. Chairman and members of the Committee I first want to thank the Committee for the opportunity to appear here today to testify on behalf of the Welfare Reform Demonstration Program.

My name is Neil Hurley and I am the Director of the CETA Program for the Lowell Massachusetts Consortium. Appearing with me today are Henry Przydzial, Director of the Welfare Reform Project, Dan O'Connor, the local Welfare Department Coordinator for the project, Bill Linnehan, an Employment Counselor from the State Division of Employment Security and two welfare recipients who successfully participated in the project, Ms. Janice Gawron and Mr. Gary Cook.

Our purpose in appearing here today is to report to the Committee on the success of Lowell's Welfare Reform Demonstration

Project and based upon that success to ask the Committee to support the continued funding of the program.

PROJECT DESCRIPTION

The purpose of the project is to offer Welfare recipients employment and training opportunities as an alternative to welfare cash assistance.

The project consists of two components:

1. A job search component which consists of an intensive five week private sector job search, and,

2. A work training component through which unsuccessful job search participants are placed in subsidized employment and training activities.

The project stresses 1, the importance of dealing with the participants' employment barriers so that they are job ready and 2, emphasizes a positive attitude that the participants are capable of finding employment.

RESULTS

The Lowell Program has been operational since October 1979. The successful results have included the following:

1. 70% of the Welfare recipients who have participated in and completed the program have found unsubsidized jobs. 719 individuals are now working full time who were previously unemployed and receiving welfare payments.

2. 70% entered employment rate does not include another 100 Welfare clients who removed themselves from AFDC and another 110 Welfare recipients who had their Welfare payments reduced or terminated because they refused to participate.

3. For every $1.00 spent, the program saves $2.27. To date, the program has saved $5,357,128 in Welfare payments, Medicaid costs and Food Stamps. An additional $768,216 in revenues are realized per year because of the state and federal taxes that these individuals are paying due to employment. Welfare savings and revenues equal $6,125,344 while the program has only spent $2,701,027.

4. The project has had the major impact on eliminating fraud and abuse in the Welfare system. The project has screened out ineligibles who were working full time and illegally collecting Welfare payments. We estimate that 10% to 15% of the Welfare clients contacted fall into this category.

5. The project has created a delivery system which combines the efforts of all the local agencies who are in the business of finding jobs for Welfare recipients. The Welfare Department, DES/WIN, and CETA are working together in this successful effort.

SUMMARY

This is a program that works. It saves public funds. It gets people jobs. It helps to make individuals self-sufficient. It eliminates Welfare fraud. It is practical. It is pragmatic. It is whatever other adjective you want to use to describe a program that injects some common sense into this nation's troubled Welfare system.

It would be unfortunate if the Lowell Welfare Reform Demonstration Project and similar projects operating in 14 other states were dismantled. In a time of limited resources, it would be a misuse of resources to throw away the progress that this program has achieved.

Lowell consortium: Employment opportunities pilot program

Mr. DOMENICI. I have yielded back the remainder of my time.

Mr. GLENN. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GLENN. Mr. President, if no one else wishes to speak, I yield back the remainder of my time and ask that we proceed to vote.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from Ohio. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 22, nays 77, as follows:

[Rollcall Vote No. 73 Leg.]

NOT VOTING—1

Williams

So Mr. GLENN's amendment (No. 27) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. TSONGAS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator is correct. The Senate will be in order.

Mr. TSONGAS. Mr. President, I was considering offering an amendment, which I probably will not do, but I wish to take a few minutes to speak on the UDAG program.

The PRESIDING OFFICER. Who yields time to the Senator?

Mr. HOLLINGS. I yield such time as necessary, on the resolution.

THE UDAG PROGRAM

Mr. TSONGAS. I thank the Senator from South Carolina.

Mr. President, there is no program in the Government which has had greater impact on the creation of jobs, the leveraging of private investment, and the

generation of taxes for our most distressed cities and towns.

As one who has spent a great deal of his time on economic development issues, I can say that of all the issues in the budget process, I consider the UDAG program to be the most important.

This program should be an integral part of the national effort to reindustrialize and revitalize our economic infrastructure. Funds invested in commercial and industrial revitalization projects through the UDAG program accomplish precisely what President Reagan has set out to do. In fact, the President's revised fiscal year 1981 budget gives recognition to this program, by keeping it fully funded for fiscal year 1981.

However, Mr. President, the Senate Budget Committee has voted to cut $300 million from community development programs for fiscal year 1981. Let me say that while I fully appreciate the spirit in which this rescission was approved, the magnitude of the rescission is not equitable, and it places in grave jeopardy the funding of even a small portion of the 459 projects totaling $984 million which are currently in the HUD pipeline.

It is my understanding that the Budget Committee could not say where they expected the $300 million in community development cuts for fiscal year 1981 to be absorbed. If the cut is absorbed by the UDAG program, it will mean the elimination of that program.

Let me suggest that the short-term gains of a total abolition of the UDAG are limited. The long-term loss to urban investment is enormous, and I believe that anybody who is familiar with the program appreciates that.

If we are really serious about reducing spending and inflation, we will make tough decisions to invest the Federal dollar where the return will be the greatest. We will not take action which will bring the cities to their knees, and make them even more dependent on even more costly Federal aid for survival. Instead we will give the cities the tools they need to join the rest of the Nation in making an economic recovery.

If there is any program which is distinctly Republican in its origin, the UDAG program would be it, since it is based on the notion of leveraging in private sector money.

Mr. President, I wonder whether I could now engage in a colloquy on this program with the chairman, the Senator from New Mexico.

Mr. DOMENICI. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. TSONGAS. Mr. President, I want to express my concern for the continuation of a meaningful urban development action grant program for the remainder of this fiscal year and for fiscal years 1982 and 1983. Our experience with the budget process over the last several years suggests that UDAG is in real jeopardy if it appears that Congress is hostile to the program during these early budget decisions. We should be careful not to foster misinterpretations of our intent today.

As my colleagues know, there is widespread support for the UDAG program. It effectively uses Federal seed moneys to leverage private investments in urban areas that the Nation is attempting to restore.

Today, slighly more than $300 million remains unobligated for the remainder of this fiscal year. In fact, $100 million in grant awards for large city projects are due to be announced at any moment. An additional $50 million in small city grants is scheduled to be announced in a few weeks. Private sector investments for these projects are all lined up and the projects are ready to go. It is important that our actions at this stage do not inadvertently kill promising projects that distressed localities have worked hard on and on which they are counting.

It is also important that we make it clear that at least $500 million could be accommodated for the UDAG program in each of fiscal years 1982 and 1983. I ask the Budget Committee chairman: Could such levels of funding for UDAG be accommodated within the current reconciliation instruction to the Banking Committee?

Mr. DOMENICI. I say to my good friend from Massachusetts that the answer is "Yes."

I acknowledge that UDAG has been a very useful program. The Senator from Massachusetts has cited examples where it has been helpful in his State. It also has been helpful in my State. We have had examples where it has helped produce in one community more than a thousand jobs.

It is my understanding that the administration intends to maintain UDAG type activities as a separate category under the community development block grant program and that it will have funding of its own in the range of $500 million for fiscal year 1982.

That is what I understand and reconciliation certainly allows that to occur within the jurisdictional committee.

Mr. TSONGAS. I thank the Senator. That is also my understanding. But in the current budget atmosphere there is always a chance that programs can fall through the cracks.

It is terribly important in my State and I expect in all States to the mayors but most importantly to those in the private sectors who are planning long-term investment in UDAG projects that they have firm assurance that the program will have a predictable life. I hope an amendment is not necessary to give that assurance.

It will be very helpful if the chairman of the Budget Committee will state that our decisions today will leave room for funding of the UDAG program for the remainder of this year at the level proposed by President Reagan and further funding for fiscal years 1982 and 1983 in the range of $500 million.

Mr. DOMENICI. I can assure the Senator from Massachusetts that, as the Budget Committee moves to prepare the first budget resolution, the committee will begin with funding assumptions that underlie the reconciliation instruction.

I am certain that this base does not preclude funding for UDAG for the remainder of this year and that it would be adequate to accommodate fiscal year 1982 and fiscal year 1983 funding for UDAG-type activities in the range recommended by the administration, which is somewhere near $500 million.

Mr. TSONGAS. I thank the Senator for his participation in the colloquy.

In light of that assurance I will not offer a further amendment on this today, and I hope that the message will be clear across the country that UDAG is alive and will continue. This administration is committed to it as well.

I think those of us who have had personal experience in how it worked will be supportive as time goes on.

Mr. DOMENICI. I thank the Senator for the questions. and it was my pleasure to participate with the Senator.

Mr. SARBANES. Mr. President, will the Senator from South Carolina yield 2 minutes off the resolution?

Mr. HOLLINGS. I yield whatever time is necessary.

Mr. SARBANES. I appreciate it.

Mr. HOLLINGS. Yes.

Mr. SARBANES. Mr. President, I wish to join my distinguished colleague from Massachusetts in underscoring the importance of the urban development action grants program. This program has been a tremendous stimulant to economic development and job creation, the very objectives which everyone is now asserting we wish to accomplish for the Nation.

As the Senator from Massachusetts pointed out, this program has been particularly successful in obtaining private investment for projects in areas of economic difficulty and has led to significant permanent employment in the private sector in many of our Nation's cities.

The UDAG program is a program that has worked extremely well in my own State. It has met its objectives and is a program which should be continued. It has been most successful in leveraging private investment. Nationwide, for every dollar of Federal money more than $6 in private funds have been invested, totaling almost $12 billion nationally in private investments.

It has helped to strengthen the economic base of numerous cities across the country.

In Maryland, participation in this program has been enormously successful. We have the highest investment ratio in the country. For every Federal dollar that the project has received in Maryland from the urban development action grants program, private industry has provided just under $9. In other words, we have almost a 9-to-1 leverage ratio with respect to the urban development action grants program.

It is, therefore, a program which has worked well to bring forth private investment, jobs, and a strengthened economic base.

I join the Senator from Massachusetts in underscoring the importance of this program and the importance of carrying it forward for the purpose of economic revitalization of our Nation.

Mr. TSONGAS. Mr. President, will the Senator yield?

Mr. SARBANES. I yield to the Senator.

(By request of Mr. TSONGAS, the following statement was ordered to be printed in the RECORD:)

● Mr. RIEGLE. Mr. President, the Budget Committee had to consider an enormous number of proposals in a very short period of time. The committee's report implies that the reconciliation instruction would face a substantial cut in the UDAG program immediately. In the last few days, I have checked into the implications of a sudden $300 million cut in community development programs, and I am convinced that it just does not make sense.

The Budget Committee majority staff apparently looked at the unobligated balances in the community development block grant and UDAG programs and suggested in the markup documents that $300 million of those balances could simply be rescinded. Well, let us look at the facts of how that cut would hit.

The block grant program today shows unobligated balances of $3.45 billion for the remainder of this year. But those amounts are not just sitting there. Virtually every dollar of that amount is already spoken for by local communities all across the country. Each block grant community has known for some time how much community development money it can expect. Each community had to develop plans for approval 1 or 2 or 3 years ago. Each one has made important local commitments under the program. Each community has based its budget decisions on the expectation of receiving its promised share.

The administration wants to launch a new policy of turning responsibility back to local governments. It makes no sense to suddenly throw the plans of those governments into turmoil.

Many communities in my own State are stretched financially to the breaking point. They desperately need their block grant share to meet basic community services. Most will be hard pressed to make a gradual adjustment to lower funding levels. But it is certain that many communities would suffer a severe fiscal blow from a sudden reduction this late in the year.

The block grant application review process for this year is already well under way. By the time Congress will have finally acted on the reconciliation bill, most communities will have received their grants. Fifty percent of all grants are made by June 30. It would be an administrative nightmare to try to recapture funds from communities, and it would be an unfair hardship to place the burden on those communities who happen to be last in line.

Even if the block grant program would suffer substantial cuts. Under the administration's proposal CD block grant funds would be diverted to carry out activities that are now financed by the weatherization program of DOE, and the neighborhood self help program, the 701 planning grant program and the section 312 rehabilitation loan program. CD block grants would have to be stretched to cover cuts in those programs of $160 million in fiscal 1981 and $380 million in fiscal 1982.

Therefore, rescinding the CD block grant amounts at this stage of the year simply is not practical, it is not responsible.

That means that deep cuts would fall squarely on the UDAG program. Today, the unobligated balances for UDAG stand at $318 million. But rescinding fiscal 1981 funds for UDAG would seriously damage local efforts to create new jobs in economically distressed areas across this country.

Over 450 UDAG applications involving about a billion dollars in requested funding is now pending. Private firms, private lenders and local communities have invested time and money in bringing these projects to an advanced stage of development. They have in good faith relied on the availability of funds that have already been appropriated. Announcements for the next round of grants, involving about $100 million in projects for large cities was scheduled for yesterday, April 1. Applicants are waiting on a moment-by-moment basis. The April round of awards for small cities will be announced only a few weeks from now.

A false signal of the Senate's intent could kill a large number of development projects that are ready to go and would produce private sector jobs in distressed areas.

UDAG has demonstrated solid results in over 1,000 projects. It has stimulated over $6 of private investment for every Federal dollar or a total of $12 billion of private investment in recent years. It has created or retained 470,000 permanent jobs at a one-time cost of $6,660 per job. It has produced over $320 million in annual local tax revenues or 17 cents in local tax revenue for each UDAG dollar.

UDAG helps locate new industry in areas where there is much poverty, high unemployment, and weak financial conditions. It creates jobs that reduces unemployment and welfare costs. It makes fuller use of existing roads, water and sewer systems, and other underused infrastructure.

The UDAG program has proven that the Federal Government can act in a timely and sensitive way to reinforce private sector initiatives that strengthen local economies. UDAG gives communities and private firms great leeway in inititaing projects that make sense at the local level. A small, highly professional staff helps refine ideas and acts promptly to facilitate private development.

UDAG has received widespread praise from informed analysts.

The House Appropriations investigations staff said UDAG is successful.

A special advisory panel of the Urban Land Institute, comprised of noted private businessmen concluded that: UDAG creates new private investment, jobs, and taxes, the private investment would not occur without public aid, and UDAG is working well.

Dr. James Howell (senior vice president of the First National Bank of Boston, a respected economist and a Republican) testified before Senate Budget Committee:

> Over the years, I have come to realize how vitally important grant programs can be to the stimulation of private sector capital formation in cities where the cost of doing business is out of line with other areas and where there is widespread social hardship and poverty.

The Council for Northeast Economic Action studied 11 old New England cities and found that Government funds were needed to leverage private investment in 53 percent of all private sector deals—and only three Federal programs accounted for 90 percent of those cases. Those three programs are industrial revenue bonds, SBA loans, and UDAG.

Local officials and private businessmen who have been involved with UDAG clearly judge it to be a valuable program.

I ask unanimous consent to have letters inserted in the RECORD at the conclusion of my remarks.

I thank the Budget Committee chairman for his statement on this matter. It is important for a very important program.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

CITY OF DETROIT EXECUTIVE OFFICE,
February 17, 1981.

Hon. DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: I would like to share with you my concern over the current discussions concerning cutting the federal budget through the elimination of the Urban Development Action Grant (UDAG) program and the elimination of or substantial underfunding of programs of the Economic Development Administration. The availability of these programs has been critical in our efforts to revitalize our City and in fact, were it not for these programs, many projects now underway throughout Detroit could not have been successfully undertaken.

The UDAG program, as you know, leverages and stimulates needed private development in distressed urban areas. In cities like Detroit, it has served as a means of reducing the cost penalty that exists to businesses that choose to develop in built-up cities vs. cleared suburban land. Costs such as those associated with the demolition of existing structures, the rehabilitation of buildings, or the relocation of utility lines are but a few examples.

Detroit has most recently used the UDAG program to fund the Central Industrial Park project. This project, better known as the General Motors Plant Project, is the most important undertaking within the City in recent history. The plant, to be completed before the 1984 model run, will directly employ over 6.000 workers and result in an additional 25,000 workers being employed in related industries thus relieving the human suffering caused by our 16 percent unemployment rate.

The plant will also serve as the nucleus of a revitalized industrial area both in the cities of Detroit and Hamtramck. The new private investment represented by this project will provide a significant increase in tax base to the City from property, income and business taxes.

The public costs associated with this effort are approximately $180 million. This will provide 465 acres of cleared land to GM within the cities of Detroit and Hamtramck at private costs comparable to those encountered

in a "greenfield" suburban site. Without the $30 million of UDAG funds, the public work would have been jeopardized, more likely causing GM to relocate its current Detroit assembly out of our City.

The second project important to the City that would not have been undertaken but for the UDAG funds, is the Washington Boulevard "Trolley Plaza". This residential project is the first effort by the City and the private sector to provide market-rate housing directly in the Central Business District. The 350-unit apartment, now under construction, is serving as the focus for the general revitalization and redevelopment of Washington Boulevard as a major residential and retail area. Shortly after the UDAG funding was provided for the project, an additional 600 residential units were committed to the area and the feasibility of converting the abandoned Heritage Hotel to residential use generated proposals from interested developers. In addition to serving as a catalyst for downtown housing, the project is important for providing the market to the proposed Cadillac Center Shopping Mall.

Finally, the UDAG program has enabled the City to revitalize the Oakman Mall, one of the City's oldest neighborhood shopping centers. Oakman Mall, serving a stable residential area, has been subject to the same market and demographic trends that have resulted in the abandonment by businesses of many commercial areas within the City. Oakman Mall suffered particularly when Sears Roebuck closed their store a number of years ago. The Mall is now being redeveloped with Sears and other tenants occupying renovated retail space. The neighborhood is now looking forward to being served by a fully redeveloped shopping area.

In the three projects where UDAG funds have been critical to funding and particularly to leveraging private funds, EDA funds have also, no less importantly, been involved. EDA's programs are expected to fund much of the demolition and site improvement work necessary to the construction of the Central Industrial Park project. The City has made a pre-application to fund those work items. In addition, the Washington Boulevard Plaza where the Trolley Plaza is being constructed, was constructed as an attractive public activity space providing a residential atmosphere with EDA funds. Finally, Oakman Mall public right-of-way improvements including new lighting and pedestrian ways were again funded by EDA. There are many other examples in the City where EDA funds and UDAG funds have been jointly used to fund public and private portions of projects.

In addition, the City of Detroit, like many other cities across the country, has benefited from the variety of EDA programs such as direct loans, loan guarantees, public works grants and technical assistance. Without this federal agency's assistance, many economic development activities critical to the business vitality of Detroit would not have occurred.

Critical to Detroit is the recent Auto Community Adjustment Program which the Economic Development Administration has initiated. The current planning phase is to be followed by the award of implementation grants to assist us in the revitalization of our auto-dependent economy.

My support for the continuation of these programs is without reservation. The programs have become a vital part of this and other cities' revitalization efforts. Both UDAG and EDA's staffs understand the challenges and problems which confront urban areas today. I hope that their experience and fine programs continue to be available to assist cities like Detroit in building their futures as economically and socially vital centers to live and work.

Sincerely,

COLEMAN A. YOUNG,
Mayor.

CITY OF HAMTRAMCK, MICH.
February 13, 1981

Hon. DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: The government of the City of Hamtramck and its citizens are thankful and appreciative as the recipient of a 30 million dollar Urban Development Action Grant from President Ronald Reagan's administration. We are hopeful that the additional grant of 5 million dollars will receive approval of the present administration.

This grant will aid our distressed city and alleviate the stress and depression of our citizens caused by the closing of the Dodge Main Plant of the Chrysler Corporation. It will culminate in the building of the new 500 million dollar facility by General Motors Corporation that will result in the preservation of at least 7,000 direct jobs and make their automobiles competitive with foreign imports. If our additional grant is approved, I can assure you of at least 25 million dollars of private investment and an additional 1,000 new jobs in our economy.

In my opinion this is the best federal program to assist industry as the recipient communities must prove and provide a 5 to 1 benefit ratio. If the program cannot be preserved in its present manner, some type of joint funding by local government and federal government should be adopted.

I am confident you will urge your colleagues to preserve this program, which provides a measure of encouragement to our young generation who are seeking employment in the private sector.

Respectfully yours,

ROBERT KOZAREN,
Mayor.

CITY OF SAGINAW, MICH.
February 16, 1981.

Hon. DONALD W. RIEGLE, Jr.,
Dirksen Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: The current debate concerning proposed domestic spending cuts, particularly as such cuts might affect the Urban Development Action Grant (UDAG) program, is of supreme concern to the City of Saginaw.

The City of Saginaw, hard-hit by the continuing downspiral in the automobile industry with its resultant negative effects upon the local, state and regional economy, stands as a viable example of the positive aspects of the UDAG program, both in what the program has allowed us to accomplish in the past and the potential it holds for our future.

A UDAG loan in the amount of $1.5 million was awarded the City of Saginaw in 1978, that being the amount needed to bridge the financial gap between an economically do-able project and one that had remained, with all attendant frustrations, in the planning stage for some eleven years.

Most importantly, HUD's approval of the loan said that the federal government was satisfied that the total $5 million project was sound and manageable and would, indeed, generate additional private investment in the central city, in the instance of the City of Saginaw, a total of approximately $41 million.

I am most pleased to point out that the long-awaited reality of the hotel further resulted in an infusion of positive thinking in regard to our central city which has today translated into an investment and development climate responsible for a projected total of $130 million worth of new construction and redevelopment.

Additionally, the reality of the hotel was the primary ingredient in the forging of an effective, working relationship, partnership if you will, between the private and public sectors in the City of Saginaw.

That partnership is credited as an influencing factor in our city being able to secure the interest of a Toronto, Canada, based development firm, Azlea, Inc., which today has plans for construction of a major, mixed-use project within our central city consisting of new retail, office towers, and public space and with an estimated cost of $61 million.

It is interesting to note that the development, which will have significant and positive economic and social impact upon not only the City of Saginaw but the entire Tri-City area, (Saginaw, Midland and Bay City, Michigan), includes plans for a 200-unit hotel as a part of Phase Two activity.

The project, called Saginaw Center and Commons, as perceived will result in some 1,600 new and permanent jobs within our community, as well as create approximately 600 construction related jobs over a two-year time period.

The earlier hotel project resulted in the creation of 200 new permanent positions and another 100 positions during the construction phase.

It is crucial that I point out that the financial packaging of the project to date centers on the availability of an Urban Development Action Grant in the amount of approximately $5 million, to be leveraged against a projected private investment of some $41 million, for Phase One construction.

The availability of such federal assistance has been a major factor in the City of Saginaw being able to secure the interest and initial planning investment (in the area of some $70,000 for market feasibility studies and architectural concepts) of a firm as strongly qualified as Azlea, Inc., which ranks as one of North America's largest and most successful development firms.

Aside from the potential positive impacts upon the community in the way of more jobs, economic diversification and increased tax base, the hotel project and now Saginaw Center and Commons has been a great boost for all downtown businesses and has created a renewed interest in city investment and development generally.

Put another way, the progress we have made to date could not have been possible without the UDAG program, or the use of public funds to stimulate private investment.

The private-public partnership we have forged to unite the community with a single purpose of economic growth and stability would not have evolved to the point it is today.

To quote from a recent editorial in the Saginaw News:

"Cities such as Saginaw, hoping to energize urban redevelopment, cannot do it by wishing it. The job requires imagination, innovative ideas, energy, support from those with ability to invest, and a lot of cooperation between government and the private sector.

"We've finally seen these elements come together for a new downtown hotel after years of disappointment. It's more than just a new building. It's a tangible sign of better things to come."

Sincerely,

———— ————,
Mayor.

CITY OF LANSING,
Lansing, Mich., February 9, 1981.

Hon. DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C .

DEAR SENATOR RIEGLE: Over the years, there have been some strange programs concocted in Washington, D.C. However, there have been some excellent ones, and these have far surpassed the oddities.

One of the excellent ones is the economic assistance provided by the Economic Development Administration of the U.S. Department of Commerce. Actual positions of employment can be created, or retained, not "make believe" jobs. Not only has the Economic Development Administration assisted us in retaining 1,600 real jobs in one industrial project alone, but the assistance is leading to one of the largest expansions by private industry in the history of the City of Lansing. Officially, the expansion will be announced within two weeks. Imagine, if you will, the tremendous and positive effect such will have on the lives of people, and on the economy of this Capital City of Michigan.

Another excellence program is the Urban Development Action Grant Program, first researched by the Ford Administration and implemented by the Carter Administration. U.D.A.G. provides a highly meaningful tool for cities to improve and to create real jobs, through the formula of merging private dollars with public funds.

The City of Lansing has received approval of two U.D.A.G.'s, one for the Number One Block of the Central Business District, which is generating $50 million in new investment, the second for a badly needed, and major housing project just south of the State Capitol Complex.

As a result, the City will greatly benefit in a number of ways:

A new tax base is being created;

Approximately 1,300 real jobs will result from the development of the Number One Block, providing self-sufficiency and dignity for a lot of people;

A whole new interest is developing in our Central Business District and private development is already underway.

Sir, if cities are to survive, the aforementioned are outstanding routes—I commend them to you.

Respectfully,

GERALD W. GRAVES,
Mayor.

KEMP, KLEIN, ENDELMAN & BEER,
Southfield, Mich., February 18, 1981.

Hon. DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

Attention: Don Campbell.

DEAR SENATOR RIEGLE: I am writing you in reference to the Reagan Administration proposal to substantially diminish or abolish the Urban Development Action Grant Program. This program is a categorical grant approach to the serious problems which confront cities today regarding the revitalization of deteriorating downtown central business districts. It is our firm belief that a return to the old "Block Grant" formula as was implemented by previous Administrations would seriously impair the efforts of cities in attempting to arrest this deterioration.

Essentially, the good things that can be said about UDAG far outweigh its faults. First of all, the UDAG concept has resulted in a minimum of red tape and a maximum "turnaround time" between the point at which initial discussions with the applicant take place and the point at which the monies are disbursed. Another asset of this program is the fact that a specific amount of that money has been targeted for distressed cities, unlike the effect of the Block Grant Programs of the mid-70's which was to provide significant assistance to wealthier communities and areas which were not distressed. Another benefit which has arisen under the UDAG program is the availability of consulting services for local governments in determining how best to apply the UDAG money in planning and implementing downtown revitalization projects. Finally, the UDAG concept has been highly successful in leveraging the private commitment of investment capital in our most distressed urban areas. This is evidenced by our ongoing "Pontiac Plan".

The most important accomplishment of the UDAG Program from our perspective has been its effect in insulating Mayors from pressures exerted by local community groups. Under the old Block Grant formula, monies disbursed to a locality, became the target of scores of local community groups which insisted upon directing the funds to "pet" activities, such as housing, weatherization, and others. Under the UDAG formula, the monies are earmarked for specific projects. The success of this kind of approach is, again, dramatically demonstrated in the "Pontiac Plan" which is now being constructed in downtown Pontiac with UDAG participation, and which has leveraged private development and created new entry-level jobs.

At this point, I wish to return to a discussion of the adverse effects of the previous Block Grant approach utilized by prior administrations. First of all, monies which were disbursed to localities were not distributed according to a specific pre-selected formula. As discussed above, this fact caused considerable turmoil at the local level as various special interest and community groups vied for control of the funds. Consequently, during the mid-70's Block Grant funding came to be recognized by community groups in Pontiac as a source of housing assistance. This greatly diminished the percentage of the Block Grant funding which could have been devoted to economic redevelopment. In addition, much of the Block Grant assistance was distributed to non-distressed localities—such as Orlando, Florida; Phoenix, Arizona; and Houston, Texas. The UDAG legislation alleviated this problem by earmarking a certain percentage of UDAG funds for distressed cities.

Another drawback of the old Block Grant formula was the fact that it denied funding for several developments in the City of Pontiac which are now eligible for funding under UDAG. Specifically, these projects which were not allowed funding under Block Grant formulas included auditoriums, convention centers, museums, and concert halls. As you may know, an important element in the success of the Pontiac Plan includes the eventual construction of a museum, auditorium, and a hotel-convention center on that site. Consequently, any return to the Block Grant approach to urban assistance would have to take into consideration this additional drawback of the old policy.

In the event that Mr. Reagan's Block Grant formula is accepted by the United States Congress, significant changes would have to take place in order to make it more successful than the program which was implemented in the mid-70's. One recommendation which we would make in this regard is to earmark a stated percentage of Block Grant money (for example, twenty-five percent) for distribution to the State—which could then turn around and distribute that money to localities according to UDAG-type formulas. Another recommendation would be to establish more specific formulas which Washington would apply in providing the funds directly to localities. In other words, a formula for Pontiac would emphasize the channeling of Block Grant money to downtown redevelopment based upon a study of the city's needs made in consultation with city leaders. This would, hopefully, reduce the amount of confusion at the local level which in the past has been brought on by special interests vying for Block Grant funding on behalf of favored projects.

Obviously, my position is clearly in favor of retaining the UDAG method of urban assistance. It employs concrete formulas which can be utilized to direct funding to specific and needed urban redevelopment projects. It provides an insulating layer of federal decision making which serves to reduce the amount of local level struggle between special interest groups for funding which may not directly or effectively address the more immediate problems of a community. In addition, UDAG has been extremely successful in reducing the delays and confusion in decision making both in Washington and at the regional level regarding the eligibility of applicants for UDAG assistance and the provision of that assistance.

In conclusion, as Mayor for the City of Pontiac—and as an individual who has had extensive experience in the implementation of federal urban assistance policies during the past decade—it is my strong recommendation that every effort be made at the national level to preserve the UDAG program. This program has proved to be effective, efficient, and totally relevant to attempts which have been made in the past twenty years to restore our deteriorating urban centers. The Block Grant approach as it was conceived and implemented had several drawbacks—all of which served to weaken the effectiveness and efficiency of such programs as they were applied to distressed urban centers. In the final analysis, it has been established to my complete satisfaction that the categorical approach—with strict formulas—is the most effective way to target federal assistance for the redevelopment of distressed cities without causing unnecessary and inefficient delay. The Block Grant program proved to be a cruel hoax in meeting the problems and satisfying the needs of disadvantaged and low income Americans. The UDAG approach, on the other hand, has resulted in dramatic progress toward putting people back to work, diversifying the industrial base of distressed localities, and, perhaps more importantly, giving people hope. We feel that the strongest endorsement of this program is now being constructed in downtown Pontiac: The number one distressed city in the nation.

Sincerely yours,

WALLACE E. HOLLAND,
Mayor.

PEOPLES NATIONAL BANK & TRUST CO.,
Center Bay City, Mich., February 16, 1981.

Hon. DONALD RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: I am writing to express support for the continuation of the Urban Development Action Grant program in Bay City, Michigan.

Our involvement with U.D.A.G.-supported activity is the Wenonah Park Plaza project here in Bay City.

This project is crucial to the revitalization of downtown Bay City. Without the parking provided by the Action Grant, this project's feasibility would be in grave doubt. With the grant, Bay City's downtown is looking forward to a tremendous boost.

Peoples National Bank is one of several local businesses which are limited partners in the Bay City Development Partnership, lead development entity for Wenonah Park Plaza. We have also committed to act as lead bank in $4.5 million of construction financing for the residential condominium component of the project.

Total private investment in Wenonah Park Plaza will be $40 million. The Action Grant is $8.2 million. Bay City voters have authorized up to $10 million in general obligation tax increment bonds to support the project and other downtown improvements.

This is an excellent example of the positive results that can be produced by a timely injection of federal funds in an economically distressed community. Millions of dollars of private capital are being sought for our downtown area. Public and private sectors are cooperating for the maximum mutual benefit.

I believe that this is an endeavor worthy of continuing.

Thank you for your efforts in this regard.

Very truly yours,

CLIFFORD C. VAN DYKE,
Chairman and President.

FLINT AREA CONFERENCE, INC.,
February 17, 1981.

Hon. DONALD W. RIEGLE,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR: As you may know I serve on the Board of Directors of the International Downtown Executives Association, an organization which represents more than 300 downtown organizations whose boards are comprised of the leading industrial, business and financial interests in their respective cities. On January 29 and 30 that Board met in Washington to discuss urban policy issues and the Reagan administration. An immediate consensus formed: The fundamental issue was continuance of an Urban Development Action Grant program. Whether Dallas, Philadelphia, Manhattan, Detroit, Syracuse, Atlanta, Denver or Springfield, Illinois the number one issue was maintenance of a categorical program providing an opportunity for private sector participation in the revitalization of our cities. By any name a program such as the Urban Development Action Grant is necessary to protect existing investment *and* promote reinvestment by the private sector in our central cities. That message was delivered in a luncheon meeting with Craig Fuller, Secretary to the Cabinet.

The Urban Development Action Grant program has acted as a catalyst for reinvestment in Flint creating jobs and diversification for a very distressed local economy. While news media from across the country concentrated on the plight of our city—the highest unemployment in our nation—we were about rebuilding. That would not have happened without the stimulation of a UDAG-type program. Two major grants totalling $15 million have leveraged over $80 million in new private investment in Flint. It is a simple truth that without this program, neither project would be underway.

The Urban Development Action Grant program in Flint has been efficient, effective and productive.

There is little argument with a desire to cut the federal budget across the board. It is reasonable to expect that federal aid to cities must be reduced as well as federal aid to agriculture; but eliminating or emasculating the most effective and efficient program of a department seems neither wise nor fulfilling of purpose.

You may expect our fullest support for any efforts you may initiate which are directed toward retention of the essence of an Urban Development Action Grant program.

Sincerely,

JAMES S. SHEAFFER,
President.

CITY OF FLINT, MICH.,
February 19, 1981.

Hon. DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: The purpose of this communication is to request your support of the Urban Development Action Grant Program which, as you know, is currently under the threat of elimination as part of the Federal budget cuts being proposed by the Reagan Administration.

The Urban Development Action Grant Program has had a tremendous impact on the City of Flint. This $16 million the City of Flint has received in Action Grant funds has generated six private dollars for every Action Grant dollar received. The four projects currently being funded by the Action Grant program will generate over 1,400 new jobs. The annual increase in the City's tax base is approximately $2 million a year.

The spin-off benefits to neighborhoods as a result of the Action Grant program are substantial. Approximately $1.5 million annually will be available through the recapture of Action Grant funds for neighborhood revitalization.

Without the Action Grant program, $142 million (total cost of all four Action Grant projects) would not have been committed for investment within the City of Flint. The Action Grant program has provided the necessary impetus to move critically needed projects from the planning stage into successful implementation.

The Action Grant program has lived up to its promise. The program has provided the incentive necessary to attract private investment to distressed cities such as Flint. The program is restoring the vitality of the City of Flint by creating jobs, by increasing the tax base, and by making this City more livable and economically viable. However, there is still much more work to be done. As a part of Flint's overall economic development strategy, a number of exciting, dynamic projects are planned. These projects need the investment incentives provided by the Action Grant program if they are to be realized.

I know you will join me in support of the Action Grant program by strongly voicing your support, on behalf of Flint and other Michigan cities in the U.S. Senate. Thank you.

Sincerely,

JAMES W. RUTHERFORD,
Mayor.

THE FRIENDLY CITY,
February 17, 1981.

Hon. DONALD W. RIEGLE,
Dirksen Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: As you may know, the City of Hazel Park received approval for a UDAG project in December, 1978. During this period the cost of borrowing began to skyrocket which created a situation whereby our project became economically infeasible. As a result, we were notified by HUD in September, 1980 that our project was being terminated. The termination letter provided that we could reapply at a later date. Since that time, we have been in touch with the proposed developer of the project who is most anxious to proceed as soon as the cost of borrowing declines.

This project based on our projections would have a significant impact on the City of Hazel Park. We are a city of some 20,000 people within an area of 2.8 sq. miles. The city is nearly 95% built up with no potential of expansion. The homeowners of the city carry 70% of the tax burden. This project is anticipated to increase our industrial tax base by some $7,500,000 resulting in approximately $525,000 in additional taxes, equally important 105 new jobs would be created. As you can see this project will have a significant impact on our city.

I trust this information is of some benefit to you in your effort to assure that this worthwhile program is continued.

Sincerely,

Mayor STEPHEN ZERVAS,
City of Hazel Park.●

Mr. CRANSTON. Mr. President, I, too, share the belief that the UDAG program is beneficial. In the past few weeks "economic recovery" have been the buzz words in these Halls, in this city, and, indeed, throughout this Nation. We all recognize the need to tighten our belts and to cut back on Federal spending. We are all sensitive to the need to make our economy more productive. In the Senate we are examining the Federal Government's role in the economy and the consensus seems to be to cut back on Federal spending and to encourage investment in the private sector. Our attitudes toward economic recovery directly affect the economic health and welfare of our Nation's cities.

I do not understand how, under the guise of economic recovery, we can agree to cut a program that is specifically designed to promote the economic recovery of our most distressed communities. I wholeheartedly support the urban development action grant—UDAG—program.

UDAG's are Federal grants that assist distressed cities and urban counties to strengthen their economic, employment, and tax bases through a combination of public and private investments in economic development projects. The basic Federal grant acts as seed money to leverage substantially larger commitments from private investors.

Mr. President, we must encourage private investment in our cities. And good economic development programs—programs proven effective—should be maintained and allowed to work. UDAG is a prime example.

The Senate Budget Committee would have us rescind $300 million from unobligated funds designed for community development for fiscal year 1981. Some suggest that this money must come out of the UDAG program which means that the UDAG program would have no funds for the remainder of this fiscal year. Fortunately, the colloquy between Senators TSONGAS and DOMENICI cleared up this matter so that UDAG can continue for this fiscal year.

UDAG's are an effective development too. In California alone, UDAG's have provided $137 million as inducement to start 52 separate projects leading to the construction of shopping centers, mixed residential areas, industrial sites, hotels, office and convention centers, and community facilities. The Federal money brought forth private investments of over $1 billion in California, creating and sustaining some 27,400 permanent new jobs. In the past 3 years UDAG's have made the difference between further decline in distressed communities and a chance to revitalize the local economy and vastly expand the job market.

The city of Commerce in East Los Angeles is a case in point. Commerce has been a major industrial center for many years. But in the 1970's several large manufacturing plants there either shut down or relocated. The city of Commerce which has a high number of unemployed and low income people, lost approxi-

mately 19,000 jobs over a period of 10 years.

Then Commerce received a $6.6 million UDAG to help finance construction of a manufacturing complex on the site of an abandoned steel plant. Private investment amounted to over $102 million for manufacturing and warehousing, plus office space and commercial buildings. More than 3,100 jobs will be created through the project and city tax revenues will increase substantially in the years to come with a revitalized tax base.

Similarly, the city of Glendale last year received a $6.7 million UDAG to assist construction of a 1,730-space parking garage as the touchstone to expansion of a regional shopping center. Private investment totaled $43.8 million. Some 1,215 permanent jobs were created plus 400 additional construction jobs. City taxes and other taxing authorities stand to gain more than $1 million additional revenue a year from the project.

Still other California cities—San Francisco, Oakland, Los Angeles, Watts, and many more—can point to UDAG success stories. The same is true for scores of cities throughout the United States. These reports add up to a program that works. UDAG builds upon the strengths of cities and city neighborhoods.

American cities were built by the private sector, and ultimately it will be the private sector which will rebuild them, employ their citizens and expand the local tax base. In the meantime, it should be Government's role to provide the leadership to encourage public-private partnerships to make our Nation more productive. Cities that have spent considerable time, money, and effort on the development of their applications for fiscal year 1981 should not be penalized by the proposed rescission. Indeed, for many communities, the UDAG's for fiscal year 1981 may be the only chance they will have to revitalize their sluggish economy.

Mr. President, I believe that this program is most worthy and I am pleased that the distinguished chairman of the Budget Committee (Mr. DOMENICI) agrees that it was not the intention of the Budget Committee to cut funds for the UDAG program beyond the President's levels.

● Mr. MOYNIHAN. Mr. President, I thank my colleagues, Senator TSONGAS, Senator SARBANES, and Senator RIEGLE, for the privilege of joining in this colloquy on urban development action grants. Let me say that I have been a long time in government. I have seen these efforts come and go. The one that has impressed me most—truly—is the UDAG program. In our State of New York, we got our share, not more or less, but just exactly what the population distribution would be: Out of some $1.9 billion since April of 1978, New York has gotten $169 million. This amount has produced $848 million in private investments, about a 6-to-1 ratio.

In Jamestown, N.Y., the first brass and zinc foundry in two generations in America has just been opened. In Broome County, N.Y., in the town of Union, a very large enterprise is about to get started in which a company that was manufacturing copiers in Japan is moving that operation to a new plant built with the assistance of UDAG funds. This grant of $3.5 million generated a private investment of $18 million. And, in Buffalo, just the kind of movement back to the center city that UDAG was designed to encourage is—in fact—occurring. A major bank is renovating its historic, original building and bringing all of its satellite offices in from the suburbs to be housed in an impressive new office building. A new hotel is also being built which will support the investment in the city's new convention center.

I have heard from communities throughout New York—both large and small—letting me know how the UDAG program has helped bring new investments, jobs, and activity back into the hearts of our cities and towns.

This program works, and the impressive, professional teams who conduct it are in place and experienced. To let it just disappear into a block grant, I think, would be costly. It makes no sense. Federal funds expended in the community development block program are a one-time expenditure. By contrast, more than 75 percent of UDAG's made to cities are loaned to private developers, and the loans are then paid back to the cities to be utilized again for further economic development. This impressive aspect of the UDAG program is seldom mentioned.

I thank the Chair. And I thank my distinguished colleagues from Massachusetts, Maryland, and Michigan.●

Mr. SARBANES. I thank the Senator from South Carolina for yielding.

Mr. HOLLINGS. Mr. President, I yield such time as he may need to the Senator from Delaware

UP AMENDMENT NO. 50

(Purpose: To restore funds for low-income energy assistance)

Mr. BIDEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Delaware (Mr. BIDEN), for himself, and Mr. TSONGAS, Mr. LEVIN, Mr. DODD, Mr. HART, Mr. PELL, Mr. METZENBAUM, Mr. EAGLETON, Mr. KENNEDY, Mr. RIEGLE proposes an unprinted amendment numbered 50.

Mr. BIDEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "authority" in line 16, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following: "Authority by $52,425,000,000, and outlays by $36,545,000,000, in fiscal year 1982: and to reduce budget authority by $58,828,000,000, and outlays by $47,294,000,000".

On page 10, beginning with "$10,303,000,000, in line 6, strike out through "$10,913,000,000" in line 9 and insert in lieu thereof the following: "$9,903,000,000" in budget authority and $7,528,000,000 in outlays for fiscal year 1982; and $11,963,000,000 in budget authority and $10,513,000,000".

Mr. BIDEN. Mr. President, I ask unanimous consent to add as cosponsors of this amendment Mr. TSONGAS, Mr. LEVIN, Mr. DODD, Mr. HART, Mr. PELL, Mr. METZENBAUM, Mr. EAGLETON, Mr. KENNEDY, Mr. RIEGLE, and Mr. BUMPERS.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIDEN. Mr. President, we have in a sense voted on this amendment already. This amendment adds $400 million for the low-income energy assistance program, a program which primarily assists the elderly and the needy. We have not voted on this amendment thus far because previously fuel assistance was part of a package of programs offered by the Senator from Rhode Island (Mr. CHAFEE). Although I voted for the Chafee package, I can understand how some of my friends on the Republican side of the aisle and Democratic side of the aisle may wish to vote for this amendment but did not want to vote for all the other aspects of the Chafee amendment.

This amendment gives them an opportunity to do just that.

Mr. President, I am particularly concerned that Senators who have been here for the last couple years have an opportunity to keep their commitment that we all made several years ago.

In June 1979, we passed a bill in this body at the request of the then-President Carter to decontrol over a period of time the price of natural gas. I voted against that bill, but I recall hearing this Chamber echo and reverberate with assertions on the part of my colleagues who were voting for the decontrol bill that we were going to vote for decontrol in order to help promote production, but not at the expense of the poor, the elderly, and those in need. Although we acknowledged that the price of energy and home heating oil was going to skyrocket, we were going to assure that the elderly and the poor of America were not going to bear all of the increased costs attributable to the energy decontrol bill.

Then in the spring of 1980 after some herculean efforts on the part of my colleagues on both sides of the aisle, we passed a windfall profit tax bill. The principle behind the windfall profit tax was not that we did not want corporations to make profits—we acknowledged the importance of increased profits and the importance of the oil companies making money—but what we wanted to make sure that they did not make profits at the expense of those people who would not be able to make it, those people who would not be able to heat their homes and drive the car, et cetera.

So we passed the windfall profit tax and we said we would set-aside a portion of that tax to insure that the social needs that would occur as a consequence of the dislocation caused by the skyrocketing price would be met. We were going to make assistance available to those folk not only in the Northeast, the North, and the Midwest, but also to those elderly who needed their air conditioners down in the South. We were going to see to it that we took care of some of those folk.

We passed the Home Energy Assistance Act under the leadership of Senators on both sides of the aisle, from Senator KENNEDY to Senator Javits, Senator METZENBAUM, and others, a bill which overwhelmingly passed.

Mr. President, that program worked pretty well. I come from a small State, but just in my State of Delaware, where we have less than 600,000 people, we found that a total of 27,530 persons in 9,731 households were served this winter. Over 3,500 of those households were elderly, and close to 1,000 were handicapped.

It worked. People were not forced to choose between food and heat. People were able, notwithstanding the tremendous increase in inflation, to eat, and they were also able to heat their homes.

Mr. President, it seems to me that with these budget cuts we are breaking faith with the people. We are saying that we are going to cut this program, we are going to cut it significantly beyond what it is and has been.

We do not even consider the fact that if this administration has its way immediate natural gas decontrol is just around the corner, at a time when over 53 percent of all households and the same proportion of elderly households heat their homes and apartments with natural gas, so we are going to give them a double whammy.

What we seem to be saying here is that in our fervor to cut the budget, not only are we going to cut programs that are worth while, not only are we going to go forward with new programs that do not make sense, but we are going to breach an implicit promise we made with the elderly in this country. We are now going to decontrol the price to heat your home. We have already decontrolled the price of home heating oil, which has doubled or tripled in price, now we are going to decontrol natural gas, which will make the price of gas go even higher. At the same time, we are going to let you worry about that. We are not going to step in and keep our promise to assist you in paying those higher prices.

I do not know, Mr. President, but I do not think this President really understands. Maybe it is just that he does not know how many folks depend on this program.

I wonder if he understands how many people really have to make basic choices, not whether or not they are going to go to the beach in the summer for a vacation or heat their home, but whether or not they are going to have an adequate diet or heat their home. These folks are not keeping the temperatures in their homes at 70 and 75 degrees, even with the fuel assistance. They are keeping their homes in the low 60's.

They have learned to wear sweaters, they have learned to turn the heat off at night and get under piles of blankets and covers.

I might point out in the weatherization program the folks who have taken the greatest advantage of that program and who have spent the most time and energy with their meager resources to weatherize their homes have been those elderly folks, the same people who are the ones who need this program.

There is not a whole lot more that they can do. There are not any more places they can cut. They cannot turn the thermostat down any more.

Here we are in a $3 trillion economy and a multibillion-dollar budget cutting $400 million for these folks.

I am sure that the Senator from New Hampshire and the Senators from Pennsylvania, Massachusetts, Maine, Ohio, and all those States where it gets cold will be prepared to keep the commitment this body made or be prepared to explain to those folks next winter why they cannot afford to heat their homes.

Mr. President, I do not think it is a good idea for this body to break its promises, especially so quickly. The American public, I guess, is getting used to our not keeping all our commitments, but to do it as rapidly as we are doing here seems to me to be a terrible mistake.

The PRESIDING OFFICER (Mr. HUMPHREY). The time of the Senator has expired.

Mr. KENNEDY. Mr. President, could I have 3 minutes?

Mr. ROBERT C. BYRD. Mr. President, will the Senator withhold for just a moment?

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, if the Senator will withhold for just a moment, I hope to now make a request that will facilitate the management of the remainder of the amendments on this resolution and also suit the convenience of a number of Members.

As I understand it, there are now time agreements on the amendment now pending by Mr. BIDEN of 20 minutes to be equally divided; Mr. KENNEDY 20 minutes on an amendment to be offered to be equally divided; and Mr. CHILES 30 minutes.

Mr. President, I ask unanimous consent that the vote ordered on the Biden and Kennedy amendments, if one is ordered on KENNEDY's amendment, be postponed until the disposition of the Chiles amendment and that when the Chiles amendment is completed that the votes occur back to back first on BIDEN for 15 minutes, the standard rollcall; 10-minute rollcall on KENNEDY and then CHILES a 10-minute rollcall vote.

Mr. KENNEDY. Mr. President, I have no objection to that. On a few of these amendments, if we could get 2 or 3 minutes I am glad to accommodate the leadership on both sides. The Senator from South Carolina has been extremely accommodating. I do not intend to delay the Senate, but these are important. In that spirit I am glad to agree on a time limit and I will try to move along.

Mr. BAKER. In the form of the request I made there is no restriction on any Senator on time from the resolution, and I did not want to limit the time on this stacked vote system but to do it when debate ended on the Chiles amendment, which is third in sequence.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. HOLLINGS. I yield time on the resolution, 3 minutes, to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I welcome the opportunity to join with my colleague from Delaware on this amendment. He has made the case with fairness and with a sense of compassion. I just want to mention a few additional facts.

The facts are, Mr. President, first, the needy people, the elderly people, pay four times as much of their income for energy as the average American household. With the increase in the decontrolled prices, the neediest people, primarily the elderly, pay out rising percentages of their fixed income in fuel.

Second, the group which conserves more in its use of energy in our total population happens to be the elderly and the poor. Thus, in the area of conservation they are doing more than any other group in our society while, at the same time, they are paying a higher percentage of their income, four times as much as the average American.

Because of rising energy costs, the poor have lost $6 billion in purchasing power just in 1980 alone.

We made a commitment to these people when the U.S. Senate accepted decontrol. We said the poor would not suffer.

And yet we see they have lost $6 billion in purchasing power in 1980. And we said that 25 percent of the windfall profits tax would go to meet those rising costs. That would be $5 billion this year.

However, today we are not arguing about providing $6 billion, or $5 billion—we are arguing about whether we should cut back on the funds they receive.

If the Budget Committee figure is adopted, it will mean $150 less to the average poor household at a time when energy costs are climbing every day.

This particular program, even if the Biden amendment is accepted, barely would move us back to $1.8 billion, so they remain well behind the rest of the population in their economic standing. Finally, I just make a special plea on behalf of the elderly. In my own State of Massachusetts, fuel bills have been up approximately 75 percent in the last year alone, from an average of $900 to an average of nearly $1,100. Surely, the elderly, who are least able to endure those fuel cost increases, deserve our help and assistance.

It is a matter of urgency to adopt this amendment, and I hope the Senate will accept it.

Mr. BIDEN. Mr. President, I ask unanimous consent that Senator RIEGLE be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. TOWER. I yield myself 3 minutes.

Mr. President, a lot of worthwhile programs are being reduced in funding because we have gotten to the point

where we can no longer permit the enormous growth in these programs.

They have continued to grow on an annual basis. I think we must defeat the amendment offered by the Senator from Delaware when we note the fact that these programs have increased in funding by over 720 percent—720 percent—since 1977.

The low-income energy program was expanded in fiscal year 1980 from about $200 million to $1.6 billion to help low-income people. The program has been handled in some respects as another welfare program with standardized cash payments to quite a large number of people.

The President's proposal will help assure that the States target the available money to people that have serious problems, instead of spreading it around to a great many people who are not in such great need.

The Federal Government now provides nearly all of the financial support for the program, even though assisting the needy, historically, has been and should be a shared Federal-State obligation.

Over the years, we have steadily reduced people to the status of dependency on the Federal Government to the extent that they now look to the Federal Government to do things historically they tended to look to their local communities to do.

It is my belief that reducing Federal funding will encourage the appropriate State involvement and responsibility.

The administration of this energy assistance program has, from the beginning, been mired in turmoil, controversy and inefficiency, which has prompted Congress to revise it every year of its existence. The program has been characterized by late payments, vast amounts of paperwork and benefit errors. It is expected that the President's proposal will streamline the program and remove any of these deficiencies. I urge my colleagues to reject the amendment by the Senator from Delaware.

Mr. BIDEN. Mr. President, will the manager of the bill on our side yield me 2 minutes?

Mr. HOLLINGS. I yield to the Senator from Delaware.

Mr. BIDEN. Mr. President, I am intrigued by the arguments of the Senator from Texas. I am also intrigued by the fact that it is made by a Senator from Texas.

I find it sort of interesting that in fiscal year 1980, this program, which the Senator said had just ballooned, was $1.6 billion and oil cost $12 a barrel. In fiscal year 1981, it was $1.85 billion and oil cost $24 a barrel. In fiscal year 1982, it is $1.45 billion and oil now cost $35 a barrel.

Now there is a lot of ballooning going on around here. But the balloon has gone up in Texas and Louisiana and all those board rooms, that is where the balloon has gone up.

All I ask is to allow this program to keep pace with oil prices. Let us just have those poor folks keep pace with those folks in the board rooms in Dallas and Shreveport and those other places. That is all.

I do not hear anybody talking about great waste, fraud, and abuse in this program. Let us just let it go up.

I would be willing to cut this program if oil companies would cut their oil profits and reduce their oil prices in direct proportion to the cuts in fuel assistance.

If it makes sense to spend $1.6 billion in 1980, then it sure makes as much sense to spend more on this program in 1981. The rationale which made sense in 1979 still makes sense today.

Mr. TOWER. I just want to note one or two things. I will not respond to everything the Senator from Delaware has said. He seems to have the impression that oil is produced in board rooms in Texas.

In fact, most of the oil in this country is produced by independents. For every independent oil operator that has gotten rich, there are probably a dozen who have gone broke. It is a very high risk industry.

As a matter of fact, it was some of our colleagues from the northern part of the United States that a few years ago were insisting that we raise the import quotas on Arab oil. They just could not get enough of that Arab oil at $1 a barrel and $1.50 a barrel.

Some of us stood here on the floor and said, "You better be careful about reducing yourself to a status of dependency on the Arab oil."

But, no, it was the very Senators who are pushing, or some of the very Senators who are pushing, this energy assistance program that insisted we raise the quotas, bring in cheap Arab oil, and reduce ourselves to the status of dependency on it.

So we stacked rigs in Texas because, at $3 a barrel, we could not compete. We stacked rigs, and in the process, we became steadily reduced to the status of dependency on external sources for oil. That is why OPEC can set the price.

So I think, historically, we better set the record straight on that.

LOW-INCOME ENERGY ASSISTANCE

Mr. EAGLETON. Mr. President, I rise in support of the amendment offered by Senator BIDEN to increase function 600 by $0.4 billion to add funds to the low-income energy assistance program.

The low-income energy assistance program was enacted by Congress as a necessary response to Government policy decontrolling the price of domestic crude oil, and thereby allowing the domestic price to rise up to the prevailing world price. Aware of the tremendous boon decontrol would and has meant to the domestic oil companies—estimated at $1 trillion over the decade—Congress imposed a tax on revenues directly attributable to that policy. To be phased out after 10 years, the windfall profit tax is expected to recoup $228 billion over this decade. That act specifically designated that 25 percent of the basic revenues be earmarked for assistance to the poor. Thus, the enactment of the Windfall Profit Tax Act last year constituted an explicit commitment on the part of Congress to assist in meeting the costs of essential home energy needs of low-income individuals and families.

Title III of the Windfall Profit Tax Act set forth the details of the Federal low-income energy assistance program (LIEAP), with an authorization level of $3.1 billion in fiscal year 1981.

Despite that authorization level, Congress appropriated only $1.85 billion for this year.

Now Senate Concurrent Resolution 9, as reported by the Senate Budget Committee, proposes to reduce that amount by 25 percent.

Indicative of the inadequacy of this year's program, a report recently published by the fuel oil marketing advisory committee of the Department of Energy indicated that over the 12-month period of 1980, low-income consumers have lost $6 billion in purchasing power, due solely to rising energy costs.

To be sure, all Americans are feeling the effects of decontrol and the OPEC price hikes; they are paying more for fuel, gasoline, and goods such as plastics and prescription drugs that are derived from petroleum. But the poor and the elderly on fixed incomes are particularly hard hit. Although their energy consumption is lower than average, their expenditures for fuel and utilities represent a considerably larger-than-average share of their income. Furthermore, low-income families and the elderly have little flexibility to adjust their budgets for higher fuel prices and remain able to pay for food, shelter, clothing, and other necessities. Keep in mind that while over the last 10 years there has been a 100-percent increase in the CPI, there has been a 1,600-percent increase in energy costs. That 15-plus multiple of energy costs over the cost of living index is ravaging those least able to meet higher costs.

The situation already is critical, and there are no indications it will abate. Indeed, there is every likelihood that its gravity will increase in light of the administration's announced intention of accelerated decontrol of natural gas, which is estimated to double the average family's gas bill immediately upon adoption.

If we do not adopt this amendment for the low-income energy assistance program, the elderly and the poor in this country will be forced to make cruel budgetary choices between heating and eating. That is a choice no American should have to make.●

● Mr. LEVIN. Mr. President, I join my colleague from Delaware in supporting funding for low-income fuel assistance.

We have been told that the budget will be equitable and will not hurt the truly needy. This program has the same goals and is therefore deserving of our support.

As oil prices increase because of oil decontrol, we must assure that our poorer citizens do not bear the brunt of these increases. There is evidence that our citizens have conserved energy as prices go up, but one can conserve only so much. We should fund this program that allows our citizens to pay their fuel bills.

This program is no frill, but a necessary expenditure. We may argue with various portions of the energy program, but I do not see how we can oppose a program that simply allows people to heat their homes. I think we can do more, but I do not see how we can do any less.●

● Mr. DURENBERGER. Mr. President, I rise today to support the amendment offered by Senator BIDEN, of Delaware. This amendment would restore $400 million to the budget authority of the Labor and Human Resources Committee for fiscal year 1982 and fiscal year 1983 on the understanding that these funds would be used for low-income energy assistance.

Mr. President, I have for the last several days generally supported the budget proposals made by the President and transmitted to the floor by the Budget Committee. In many cases I have had to cast difficult votes against funding a variety of programs which are now supported by Federal expenditures. In each case my vote was based on the strong belief that getting control of inflation by getting control of the Federal budget would be far more helpful to those benefiting from the program than a vote to restore the funds and send the deficit and inflation that much higher.

However, I have opposed the administration and the Budget Committee on a few votes. I have voted to restore funds. All of these votes have one factor in common. The issue which has caused me to part ways with my President and the colleagues of my party is energy policy. I voted to restore funds for the strategic petroleum reserve. I voted for the Chafee amendment that would have restored funds for weatherization. And now I will vote with Senator BIDEN to restore funds for the low income energy assistance program.

I do not agree with the energy policy announced by this President. I do not agree that it is appropriate to decontrol oil prices and at the same time recommend a reduction in energy assistance for those who do not have the income to afford the new high price. I cannot accept a policy that says all of our problems will be solved, if the Government simply steps out of the way and leaves energy issues to the marketplace. The energy marketplace is a cartel of 13 mostly unfriendly foreign nations. They have no concern for the impact of their prices on American jobs. They do not decrease prices when the shortfalls disappear and the glut returns. They do not concern themselves for the welfare of elderly Americans who have seen the cost of heating their homes skyrocket in the last few years.

Mr. President, the budget proposals which are included in this reconciliation resolution largely abdicate responsibility for energy policy. No funds to bring alcohol fuels and other renewables on line. No funds to weatherize the homes of the elderly and poor. No significant funding for the SPR to protect our security in a shortfall and substantially less funding for the low income energy assistance program, when the Government itself through the windfall profits tax will reap a $5.8 billion increase in revenues as a result of immediate rather than phased decontrol. Is it reasonable that we should take this $5 billion to balance the budget and claim victory over inflation while ignoring the impact of decontrol and further price increases on the American public?

Mr. President, as I say it is a policy that I cannot abide and have opposed in several votes in the last few days. I will continue to oppose this failure to answer the energy problems and challenges of the Nation so long as it is put forward by the President and reflected in the proposals that we consider in the Senate.●

Mr. HOLLINGS. Mr. President, I yield back our remaining time.

Has all the time been consumed on this particular debate?

Mr. TOWER. Mr. President, I yield back our time.

Mr. HOLLINGS. Mr. President, under the previous agreement, the distinguished Senator from Massachusetts will call up his amendment now.

Mr. President, we have ordered the yeas and nays on Senator BIDEN's amendment. Does the Senator from Massachusetts——

The PRESIDING OFFICER. The yeas and nays have not been ordered.

Mr. HOLLINGS. Mr. President, I ask for the yeas and nays on the amendment of the Senator from Massachusetts.

Mr. BIDEN. Mr. President, have the yeas and nays been ordered on the amendment on the fuel assistance?

The PRESIDING OFFICER. They have not.

Mr. HOLLINGS. Mr. President, I make such a request.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT NO. 51

(Purpose: To eliminate the reconciliation instruction to the Judiciary Committee to restore funds for Juvenile Justice Delinquency Prevention)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 51.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2 beginning with "$52,144,000,000" in line 17 strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following "$52,028,000,000 and outlays by $36,410,000,000, in fiscal year 1982; and to reduce budget authority by $58,890,000,000, and outlays by $47,613,000,000."

On page 9, strike lines 4 through 12.

Mr. KENNEDY. Mr. President, this amendment restores $116 million for the juvenile justice program. I am pleased to introduce this amendment with Senator SPECTER of Pennsylvania, the chairman of the Juvenile Justice Subcommittee. Senator SPECTER has shown great leadership in the juvenile justice area and I look forward to working with him this year.

The administration has proposed that we completely eliminate the juvenile justice program—the only program in the Federal Government to deal with violent crime. I believe that one of the great concerns of all Americans across this country is the growth of violent crime in the streets of our Nation. One of the most important problems that we face in eradicating violent crime is dealing with juvenile delinquents.

Almost half of the serious crime that is committed in this country is committed by young people—people of 18 years of age or less. In 1979, 20 percent of the violent crimes—rape, murder, robbery—were committed by youths.

I think there are a number of critical elements in any crime package. First, there must be action to change the bail system in our country to take into account the threat to local communities posed by individuals who are arrested for violent crime.

Second, I believe that it is important to establish programs for youthful offenders. We should not permit age alone to let violent juvenile offenders escape just punishment in our society. It seems to me that it is extremely important that we, as a society—if we are seriously interested in trying to come to grips with the problems of violence in our society—should support a program that is targeted toward the juvenile offender.

Third, I believe that we must reform our sentencing system and provide sufficient resources for law enforcement.

Furthermore, I think we are going to have to pay our police officials an adequate pay in order to provide for their families. These men and women risk their lives daily to combat violent crime and they should be paid a decent wage. I also believe that there has to be progress made in handgun control, particularly in the area of controlling small, concealable, Saturday night specials. We must address the problem of violent crime while recognizing the protections afforded by our Constitution. I have outlined these elements of my crime package earlier this week.

The juvenile justice program has been developed over the last decade. Our former colleague, the Senator from Indiana, Senator Bayh, watched that program develop and grow over a period of years. We have made important progress in the development of a juvenile justice system in this country—a system which recognizes the difference between the status offenders and those involved in crimes of violence. That is an important distinction. With respect to status offenders, like truants and runaways, the answer is often deinstitutionalization. We have made significant progress toward this goal. With respect to juvenile offenders, we must seek new answers—like restitution and job training programs which treat juveniles fairly and humanely.

It is important to also recognize the serious drug abuse problem which afflicts young people in our society. I am proud

to say that my home State of Massachusetts has always been a pioneer in improving the juvenile justice system, and dealing with the serious problems faced by juvenile offenders.

It seems to me, Mr. President, that over the period of this year Congress will vote billions and billions of dollars for national security and national defense, and I intend to vote for a number of those programs, particularly to strengthen our conventional forces. But the greatest, immediate threat to the people who live in the urban areas is the danger of violent crime.

Crime is also an increasing problem for those who live in suburban and rural areas.

It seems to me that if we spend tens of billions of dollars on national security, we ought to be able to spend $100 million in the principal area which most affects the security of our citizens who live both in the urban areas and the suburban areas. That is, in the area of violent crime. We must improve our juvenile justice system.

Mr. President, I reserve the remainder of my time.

Mr. DOMENICI. Mr. President. I was not here when Senator KENNEDY offered his amendment. I do not want to take a great deal of time other than to say that the reconciliation instructions to the Committee on the Judiciary would require the committee to reduce funding for programs under its jurisdiction by about 2 percent. Out of fiscal year 1982 budget authority of about $5.5 billion, only $116 million would have to be cut. This reduction is equitable given the size of the savings other committees are being asked to achieve.

The "working assumption" used by the Budget Committee in arriving at the reconciliation instructions to the Committee on the Judiciary is not binding. The Judiciary Committee does not have to achieve the savings by eliminating juvenile justice and delinquency prevention programs or by changing any other particular programs. The committee may achieve the savings in any manner it sees fit.

In arriving at its recommended direct spending instructions to the Committee on Finance, the Budget Committee assumed $100 million less in savings through the consolidation of Federal social services into a block grant than the President had assumed. This "add-on" was made specifically to give the Finance Committee the flexibility to increase funding for social services above the level proposed by the President. If the Finance Committee endorses the block grant approach and authorizes juvenile justice programs as eligible activities under the block grant, each State can choose to use a portion of its block grant funds for juvenile justice and delinquency prevention programs.

Federal juvenile justice grants comprise less than 1 percent of total State and local government criminal justice expenditures of $25 billion. The loss of direct Federal support for juvenile justice and delinquency prevention programs would have a minimal impact on overall criminal justice expenditures at the State and local level.

Mr. SPECTER. Mr. President, I support the reinstatement of $100,000,000 for the Office of Juvenile Justice and Delinquency Prevention because it is directed at an important problem and it has been a successful program.

Last week in testimony before the Senate Judiciary Committee, Attorney General William French Smith stated that the program was a good one but was eliminated because hard choices had to be made.

Yesterday, April 1, 1981, the Juvenile Justice Subcommittee held hearings on the Office of Juvenile Justice and Delinquency Prevention. The overwhelming weight of the testimony supported the value of the program.

The administration officials, who appeared on behalf of the Justice Department, reiterated Attorney General Smith's view that the program had been a success.

None would deny the problem of violent crime in this country.

None would deny that juvenile crime is a major contributor to the problem of violent crime, both as juveniles commit crimes of violence as juveniles, and later when juveniles graduate into adult status to commit repetitive crimes of violence.

This program is a modest start on a Federal offensive against violent crime.

At the hearing, Justice Department officials conceded that this program was superior to others which are to be retained.

All factors considered, I submit this program should be retained at the level of $100,000,000.

The PRESIDING OFFICER. Who yields time?

Mr. HOLLINGS. Mr. President, as I understand it, there is no rebuttal at this particular time. They are willing to yield back the remainder of their time.

The PRESIDING OFFICER. The Chair will advise the Senator from South Carolina that the yeas and nays have not been ordered on the amendment of the Senator from Massachusetts.

Mr. HOLLINGS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, can the Senator give me the assurance of having 5 minutes on the resolution? If so, I am willing to yield back the remainder of my time.

Mr. HOLLINGS. That will be fine.

Mr. KENNEDY. I yield back the remainder of my time.

Mr. HOLLINGS. I yield back the remainder of the time in opposition.

The PRESIDING OFFICER. All time has been yielded back.

Mr. HOLLINGS. The next amendment, Mr. President, will be offered by the distinguished Senator from Florida.

Would the distinguished Senator from Massachusetts want to proceed on another amendment?

Mr. KENNEDY. I will be glad to make a brief comment on vocational education, but I think it would be better if the Senator from Florida proceeded before me. I will then join him in making a comment on vocational education. It would be wiser, I think, to hold until he is here to proceed with his amendment.

UP AMENDMENT NO. 52

(Purpose: To restore funding for vocational education)

Mr. CHILES. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mr. CHILES), for himself, Mr. PELL, Mr. NUNN, Mr. KENNEDY, and Mr. CRANSTON proposes an unprinted amendment numbered 52.

Mr. CHILES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "by" in line 14, strike out through "1983" in line 20, and insert in lieu thereof the following: "by $14,567,000,000, and outlays by $2,343,000,000, in fiscal year 1981; to reduce budget authority by $52,725,000,000, and outlays by $36,865,000,000 in fiscal year 1982; and to reduce budget authority by $59,128,000,000, and outlays by $47,594,000,000 in fiscal year 1983."

On page 2, line 24, strike out "$13,300,000,000" through "$1,800,000,000" on line 1, page 3, and insert in lieu thereof the following: "$13,200,000,000 in budget authority and $1,490,000,000 in outlays for fiscal year 1981; by $3,130,000,000 in outlays for fiscal year 1982; and $1,780,000,000."

On page 10, beginning with "$2,388,000,000" in line 5, strike out through "$10,913,000,000" in line 9 and insert in thereof the following: "$2,288,000,000 in budget authority and $404,000,000 in outlays for fiscal year 1981; $10,203,000,000 in budget authority and $7,818,000,000 in outlays for fiscal year 1982; and $12,263,000,000 in budget authority and $10,813,000,000".

Mr. CHILES. Mr. President, I am pleased to offer this amendment on behalf of myself and Senators PELL and NUNN.

This amendment restores $100 million of budget authority, about half the proposed cut in vocational education, for fiscal years 1981, 1982, and 1983. The fiscal year 1981 money goes to the Appropriations Committee since there is a proposed rescission. The 1982 and 1983 funds go to Labor and Human Resources.

Mr. President, while this is a small sum of money, it is an important one. We all recognize that youth unemployment, particularly for the disadvantaged and minorities, is a major national problem. We clearly need better Federal, State, and local programs to deal with it. But I think we have to recognize that our existing vocational education system is a valuable resource to draw upon in that effort.

I recognize that in many places vocational education programs have been criticized for not serving the disadvantaged adequately. However, rather than scrapping a basically sound system, I think we must look for ways to improve it and eliminate its defects. Fortunately, even the current authorizing statute gives us a workable approach. In addition to the basic grants (subpart 2), there is a separate authorization for program improvement (subpart 3). That is not a Federal discretionary program. It is a formula program administered by

the State education agencies. Over the last few years, we on the Senate Appropriations Committee have tried to reorient more vocational education funding into program improvement.

One of my disappointments with the new administration's budget proposals for education was that they took 25 percent cuts across the board, with no distinction between successful programs and others. While I hope the Human Resources Committee will take a deeper look at these programs when it takes up the vocational education reauthorization next year, I do think there are two major areas where we can move ahead on program improvement.

The first is directing more services to the disadvantaged and handicapped, which I mentioned before.

The other area is keeping vocational education programs up with new technologies. If we are going to make a major effort to revitalize our economy, we must invest in higher technology equipment. That also means we have to train our workers to use that equipment and to perform in new kinds of production processes. To do so on a large scale will require upgrading and updating many of our vocational education programs.

To make the job skills taught in vocational education most useful, we need to draw on local businessmen the way we have used the private industry councils (PIC's) in CETA.

Mr. President, let me briefly describe one innovative vocational education program that was worked out with the electronics industry and the local "PIC" in Broward County, Fla.:

The PIC worked with the electronics industry to set up an upgrading program. They took experienced workers from dead-end assembly jobs and gave them 10 months of training to become technicians. CETA paid for the training and was also able to "backfill" placements into low-skill jobs. The training was provided by two proprietary schools and the county vocational education program. The electronics people tell me that vocational education did the best job at the lowest cost. Of the 60 people trained as technicians, 55 were women, and the majority black. An assembler makes $175/week; technicians start at $275 and go up to $400 per week. So the training allowed these people to double their salaries, by moving them up to high technology jobs.

Mr. President, this is just one example. We are talking about ways that we can get this country moving again, we are talking about ways that we can cut programs that have not been successful. I am talking about a training program that has been successful, that is a way to create the kind of training skills we need for jobs. This is not only for young people who have not been in the workforce, but is also an attempt to retrain people who need to be retrained for additional skills so they can go forward.

Mr. President, I certainly hope this amendment will be accepted by the Senate.

Mr. KENNEDY. Will the Senator yield 2 minutes?

Mr. CHILES. I yield.

Mr. KENNEDY. Mr. President, I ask unanimous consent to be added as a cosponsor to this amendment.

Mr. CHILES. Mr. President, I thank the Senator. I would like to ask that he be a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, the Senator from Florida has made the case well. I think vocational education is a program that has been with us for many years, really since just about the end of the First World War. My own State of Massachusetts has been committed to vocational education for years. Even during the times of the highest unemployment, vocational education schools in the heart of our industrial areas have insured that 90 to 95 percent of our young people have obtained jobs upon graduation.

Three million young Americans involved in vocational education will be cut out of this program under the administration's request. Many of these students will be returned to the program if the amendment of the Senator from Florida is accepted.

Finally, Mr. President, over the years there have been problems with this program. But we dealt with these problems at that time, and now the program is sound. I echo the sentiments of the Senator from Florida. If we are really talking about economic recovery, we are talking about giving young people the kinds of skills that will help them be full participants in that recovery. This type of endeavor provides those skills.

It has been a successful program in the past under any measurement. I join the Senator from Florida in urging that the Senate accept it.

Mr. ROBERT C. BYRD. Mr. President, I support the amendment which is being offered by the distinguished Senator from Florida, Mr. CHILES. This amendment would restore $100 million in budget authority for vocational education in each of the 3 fiscal years, 1981, 1982, and 1983.

While the bulk of support for vocational education programs is carried by the States, the Federal commitment serves as a stimulus for State participation and helps meet costs in the programs which the States otherwise would not be able to carry alone.

One need only look at the vocational education program in West Virginia and at the tremendous forward strides which it has made in the last 10 years to recognize the value of Federal support for vocational education. Enrollments in vocational education have risen from 56,513 in 1970, to 119,927 in 1979, an increase of 112 percent. In 1979, over 90 percent of students completing secondary vocational education programs found employment, and over 95 percent of adult students found jobs. In 1970, there were only 38 area vocational-technical centers. At the present time, there are 94 such facilities.

I have no doubt that Federal support for vocational education has provided the impetus for growth which vocational education has enjoyed in my State.

The cuts in Federal funding for vocational education which the Budget Committee is recommending would result in a reduction in the scope and quality of vocational education. States would not be able to continue serving special populations, that is, the handicapped and the disadvantaged; they would not be able to purchase costly equipment and supplies; they would not be able to modernize vocational education programs to keep pace with changing technologies. In other words, they would not be able to maintain the programs at a level consistent with demand and the requirements of the job market.

The major reason that people enroll in vocational education is to learn a skill that will earn them a living, and the main ingredient in every program is job training. In today's increasingly mechanized and technological society, good job skills are necessary to increased productivity and economic growth.

We are all aware of the fiscal pressures which our Nation is facing. Vocational education, like every other Federal program, must reexamine how it is using its resources and work to eliminate costly duplication. But now is not the time to reduce funding for this program to a level where it will be unable to provide a necessary and important service. The Budget Committee recommendation would reduce funding for vocational education to that level.

One of the most important kinds of assistance that we can give to people who are out of work and who are suffering economic hardship is the opportunity to learn a skill that will get them a job. Vocational education provides that assistance.

I urge my colleagues to support this amendment.

Mr. DOMENICI. Mr. President, I ask the minority leader, I was not here when we backed these votes up. Is it correct that we shall vote on the Kennedy amendment and the Chiles amendment?

Mr. HOLLINGS. Mr. President, we shall vote first on Biden, which is 15 minutes; then 10-minute votes on Kennedy and Chiles.

Mr. DOMENICI. Is that the extent of the amendments that we have?

Mr. HOLLINGS. It is right now. There might be a couple of colloquies. The distinguished minority leader has a statement and I shall yield on the resolution there.

The Senator from Michigan (Mr. LEVIN) might have a colloquy. We shall check with him. Then we shall be ready for passage.

Mr. DOMENICI. Mr. President, with reference to the Chiles amendment, the Federal expenditures on vocational education represent only 10 percent of the national funding for vocational education. Consequently, a reduction in Federal support certainly will not have a direct effect in proportion to the amount cut. Educational programs that the National Government supports represent about 2 percent of all the national expenditures on education.

I should also like the Senate to know that State and local support for vocational education is strong. While Federal expenditures for vocational education increased by 18 percent from 1972 through 1979, State and local expenditures increased by 170 percent over the same period. This suggests that States and localities may make up a portion of

the reduction in Federal expenditures for vocational education.

Also, it appears to me that we will have to find a better way to relate the CETA vocational training programs to vocational education that is being carried on in our schools. We have about $4.7 billion in CETA, even if the President's cuts are accomplished, and most of that is for youth job training.

I hope we will defeat the Chiles amendment and insist that the committees do a better job of relating CETA-type training moneys to our public schools and to institutions of vocational training. If that began to work, the cut that is proposed in vocational education would certainly go almost unnoticed.

I want the Senator from Florida to know that I share his genuine concern about vocational education. In fact, I believe that, over the years, we could have done a lot less in some of the other areas and have done much more in vocational education; but the truth of the matter is that we are here today because we have been trying to do everything. As a consequence, we must begin to retrench, and vocational education will take its share of the cuts.

So I hope the Senate will not agree to the Chiles amendment and that we will rely on the committees to use innovative ways to make sure that we do a better job with the educational funds which remain in the budget, which remain in CETA training-type programs. I believe that if we use our States more, that will occur. If we use our school districts more, with less rigidity, that will actually take place.

Mr. President, I yield back the remainder of my time on the Chiles amendment and any other amendments on which I have remaining time.

● Mr. PELL. Mr. President, in this period of economic uncertainty, we should not cut a program that provides education and training for jobs. This is what vocational education does.

Vocational education funds are directed to the States to provide both young people and adults with job-related education and training. These funds assist both secondary education and higher education. They provide a wide array of programs—from preparation of entry-level workers to retraining of workers—both those forced out of jobs and those seeking advancement—to training of adults who because of necessity must enter the workplace.

Vocational education is the fastest growing area of education. Some 18 million people are currently enrolled in vocational education programs.

The Reagan administration would—

Cut vocational education by 25 percent in fiscal year 1981, and 20 percent for fiscal year 1982;

Current funding is $779 million, but President Reagan would cut this to $584 million in fiscal year 1981 and to $623 million in fiscal year 1982;

Under the Reagan proposals, enrollment in vocational education would drop from 18 million to 15 million people, a cut of more than 16 percent, and

Programs in almost every area and every State would be eliminated—from entry-level training programs to retraining programs to cooperative with private industry.

The Budget Committee accepted the Reagan proposals without modification.

The Chiles amendment recognizes this is a period of budget stringency, but also recognizes the importance of this program.

The Chiles amendment would save education and training programs to serve 17.4 million people.

To cut this program so drastically does not make any sense. That is why I support the Chiles amendment, and I urge my colleagues to do the same.●

Mr. HOLLINGS. Does the Senator from Florida yield back the remainder of his time?

Mr. CHILES. Yes.

UP AMENDMENT NO. 51, AS MODIFIED

Mr. KENNEDY. Mr. President, I ask unanimous consent to modify my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The modified amendment follows:

On page 2 beginning with "$52,144,000" in line 17 strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following: "$52,609,000,000 and outlays by $36,-932,000,000, in fiscal year 1982; and to reduce budget authority by $59,095,000,000, and outlays by $47,613,000,000."

On page 9, strike lines 4 through 12.

The PRESIDING OFFICER. Do Senators yield back their time on the amendments?

Mr. HOLLINGS. Mr. President, the time is yielded back, as I understand, on the three amendments.

Mr. DOMENICI. Mr. President, I ask unanimous consent that it be in order that I send a technical amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 53

(Purpose: Technical amendment to strike "Select" from name of Small Business Committee)

Mr. DOMENICI. Mr. President, I send a technical amendment to the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes an unprinted amendment numbered 53.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, line 12, strike the word "'Select".

Mr. DOMENICI. Mr. President, when we drew this resolution the name of the Small Business Committee was the Select Committee on Small Business. Its name has been changed. This amendment will merely modify the resolution to include its present appropriate name.

I ask that the amendment be adopted.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. DOMENICI. Mr. President, I yield back the remainder of my time.

Mr. HOLLINGS. Mr. President, on the technical amendment I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (UP No. 53) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 54

(Purpose: Technical amendment to conform sense of Senate language to reconciliation instructions)

Mr. DOMENICI. Mr. President, I ask unanimous consent that it be in order to send a technical amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) proposes unprinted amendment numbered 54:

On page 21, line 25, between "9" and "of" insert "(c)".

Mr. DOMENICI. Mr. President, this amendment corrects an erroneous date in the sense of the Senate resolution. The Appropriations Committee was instructed in the concurrent resolution to return their rescissions by June 5. We erroneously included a May 31 date for them also when it should have been June 5.

This will merely clarify that.

I yield back the remainder of my time.

Mr. HOLLINGS. Mr. President, I yield back our time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (UP No. 54) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, on two previous occasions during the consideration of this measure I have made some brief remarks expressing my concern about this particular manner of achieving the President's program for economic recovery, so I will not take much time now. Before voting on final passage, however, I wanted to briefly reiterate my concerns.

I support the President's program for economic recovery. I join him in the belief that the growth of Federal spending must be slowed, and the deficit reduced, so that the pernicious inflation and paralyzing interest rates that have afflicted us can be eliminated. I do not, however, support this particular method of achieving those goals.

As I have said before, I believe this

resolution totally ignores the single biggest source of Federal spending—defense. Rather than casting a critical eye at the trillion-dollar-plus increase in defense spending planned for the next 5 years, this resolution is blind to the almost certain inflationary effects of that level of spending. Uncritical acceptance of these huge sums invites higher prices and poor workmanship.

Further, this resolution does not do enough to address entitlements and the other so-called uncontrollable aspects of the Federal budget. If the 5-year plan begun by this resolution is carried out to fruition, the net result will be less control over the Federal budget, not more, for the amount of the budget spent for national defense and the "safety net" will increase, while the amount for discretionary programs decreases. The Appropriations Committee overview hearings on the economy and the budget, which are on every Senator's desk, explain at length the perils of losing control over the budget in this way. This Congress will lose its flexibility in fiscal policy, and increasingly shirk its constitutional control over the purse strings.

And, Mr. President, as I think I have made quite clear over the past few days, I believe this resolution, in directing authorizing committees to make reductions in program authorization levels in order to achieve certain specified savings in fiscal year 1981, fiscal year 1982, and fiscal year 1983, has gone beyond the bounds of the Budget Act and has intruded upon the proper jurisdiction of the authorizing and appropriations committees. This I believe does violence to the Budget Act itself and to the comity of the Senate. But I have raised this point before and it does not seem to be a concern shared by a majority of my colleagues.

I think there is growing doubt, however, about what we are doing with this resolution. The numerous amendments on which we have been voting for the past few days indicate to me that Senators are struggling against the straitjacket we have put ourselves in by attempting to make all the budget cuts the President wants from the already very narrow base of discretionary funds. I do not believe the President called for the total excission of discretionary programs, or for holding defense spending safe from the scrutiny we have applied to other programs. I want to repeat and emphasize, Mr. President, that I support President Reagan in his efforts to control Federal spending, curb inflation, bring down interest rates, and revitalize our economy. I simply do not think this resolution is the best way to achieve those goals.

Mr. HOLLINGS. Mr. President, I yield to the distinguished Senator from Mississippi, from the time on the resolution.

Mr. STENNIS. I thank the Senator very much. I shall not detain the Senate long.

Mr. President, as I view the work that the Senate has done here since we convened and the work that has been done in preparation for this debate, the caucuses that have been held, it is amazing. Taken as a whole, it exceeds anything that has happened since I have been here.

I want to use these few minutes to refer to some of the facts and express appreciation and give credit particularly to our leaders in the passage of this resolution, which is a certainty. It is going to be a first step in leading to a sounder financial structure for our great Nation.

The committees that worked on this budget resolution and those participating in the caucuses and the debates have all worked at a high and constructive level. It is one of the best experiences that I have had here as a Member of the Senate, and it really gives me cause for continued faith in our system and in the high purposes that I believe prompt every Member to do what he or she can in meeting the economic problems we face.

These problems have gradually developed over the years. There have been some efforts before to change the course of the economy for the better, to keep interest rates lower and to reduce the excessively high rates of inflation. The efforts have helped some, but they have not been enough.

This problem was passed on throughout the 50 States in the recent elections in which the economy was certainly the principal issue. President Reagan and his helpers have been able to put together a package of changes, including reductions in expenditures directed toward reducing inflation and attendant problems, including high interest rates. I commend the President for his political courage and strong purposes. He has offered this plan as a major start in an effort to meet the problems. I am happy that I can say that I believe every Member of the Senate has given it his or her serious attention and has fully joined in the spirit of the effort. I think that, to a degree, all have made some contribution. I know that I have tried, but I was not willing to give every item an outright approval until I had actually examined the items. This is my constitutional duty, including making a judgment thereon. I have voted for some change but none that would change the fundamental course or structure of the plan. I withheld approval of some amendments that had merit, but my judgment has been that we could not do it all at once in one step, or even in 1 year. Some of those proposals should be adopted in subsequent bills.

Summed up in another way, I believe that many of us have concluded that even though we do not get the exact bill we want, if we do not take advantage of the present situation and correct our budget and excessive inflation, there may not be another similar chance to make effective and necessary changes in many years. In fact, it just could be that if we do not meet the situation and change our course now, there would not be another chance unless generated by a drastic upheaval of some kind. I do not mean by that the overthrow of our system or anything like that. I am thinking in terms of a really deep depression, with which I am familiar, which takes away almost everything.

I believe we have gone as far as we can for this step, and when the major parts of this program are enacted into law, there will be much more to be done on the same course for next year and even the next, because I think it will take at least two or more years to rectify our situation.

I commend every member of the Budget Committee for the many hours of dedicated work, ably led by the Senator from New Mexico (Mr. DOMENICI) and the Senator from South Carolina (Mr. HOLLINGS).

Also, I highly commend the four members of our Senate floor leadership for the splendid job they have done—the majority leader, the Senator from Tennessee (Mr. BAKER); the assistant majority leader, the Senator from Alaska (Mr. STEVENS); the minority leader, the Senator from West Virginia (Mr. ROBERT C. BYRD), the assistant minority leader, the Senator from California (Mr. CRANSTON). All of us, and the country, owe them a debt of gratitude.

It was my privilege to attend virtually every minute—except one afternoon when I missed about 30 minutes—of a number of caucuses we had in the minority party under the leadership of Senators ROBERT C. BYRD, CRANSTON, HOLLINGS, and others. Their leadership was superb. The atmosphere of the meetings and the effort of the Members was of a constructive nature and represented a very earnest desire on the part of the membership to help seek sound policies to strengthen and benefit our economy and the financial affairs of our country. The Senator from West Virginia (Mr. ROBERT C. BYRD) showed execellent leadership in the timely planning and personally presiding over these caucuses.

In the midst of our debate, President Reagan was attacked and suffered a pistol wound that carried the possibilities of the gravest consequences. There was grief, but no panic. After a short while, the news was better, and debate was resumed in an orderly way and on schedule.

I have witnessed many critical events here. This far-reaching legislation, coupled at the same time with the attempted assassination of a popular President, was all taken in stride.

The Government moved forward evenly, smoothly, and meaningfully. Indeed, it proved again the greatness of our system and affords a basis for continued hope and faith in our system and in our future.

Mr. President, I thank the Chair. I ran overtime.

Mr. HOLLINGS. That is all right.

I thank the distinguished Senator from Mississippi.

Mr. President, to the Senator from Virginia I yield such time as necessary on the resolution.

Mr. HARRY F. BYRD, JR. Mr. President, tonight the Senate will complete the first round in what is bound to be a long, hard fight for fiscal responsibility.

Passage of the reconciliation resolution will be a victory for the hard-pressed American taxpayer.

Much of the credit for this first victory must go to President Reagan, who showed great courage in submitting a budget calling for even-handed sacrifice to get control of Federal spending and combat double-digit inflation.

Credit, too, must go to the Senate Budget Committee, under the able leadership of the distinguished Senator from New Mexico (Mr. DOMENICI), and the

distinguished Senator from South Carolina (Mr. HOLLINGS). The committee sent to the floor a sound resolution and has defended it ably during 7 days of debate on the floor of the Senate.
